<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): WEATHER DISCUSSION: The air mass over the region will begin to stabilize today, thus minimal to no shower and thunderstorm activity is expected. Weather returns to a more seasonal and mundane pattern with gusty west winds during the afternoon periods along with low daytime RH values. Afternoon temperatures will rise slightly through the weekend to just above average for this time of year. Although some afternoon cumulus is expected during the afternoon periods, abundant sunshine can be expected.</p> <p>WEATHER FORECAST TODAY (THURSDAY DAYTIME): WEATHER: Sunny with areas of smoke. Some afternoon cumulus. MAX TEMPERATURES: 83 - 89 MIN HUMIDITY 4500 ft: 18 - 24% WIND: West 8 to 12 mph. Gusts 20 to 25 mph between 1400 and 1900 PDT. LAL: 3 CWR: 0% HAINES: 3 STABILITY / INVERSION: Moderately Unstable. SMOKE TRANSPORT WIND: South West 15 mph.</p> <p>WEATHER FORECAST THURSDAY NIGHT: WEATHER: Clear. Smoke laying in lower elevations. MIN TEMPERATURES: 50-55. MAX HUMIDITY: 65-70%. WINDS (EYE LEVEL): Downslope 3 to 5 mph with gusts up to 10 mph.</p>																													

<p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p> <p style="padding-left: 20px;">The fire will continue to burn to the N and NE for an additional operational period. Crews will</p> <p>12 hours: continue to construct and reinforce containment lines. Suppression repair planning and evaluation in ongoing.</p> <p style="padding-left: 20px;">The fire will continue to burn to the N and NE for the remainder of the operational period.</p> <p>24 hours: Crews will continue to construct and reinforce containment lines. Suppression repair planning and evaluation in ongoing. Evacuation repopulation is expected to begin.</p> <p>48 hours: The fire is not expected to increase in size and crews will continue to construct and reinforce</p>

Incident Status Summary (ICS-209)

Incident: **GOLD**

containment lines, mop up and patrol. Suppression repair evaluation and planning will continue. Evacuation repopulation is expected to continue.

72 hours: **The fire is not expected to increase in size and crews will continue to construct and reinforce containment lines, mop up of heavy fuels and patrol. Suppression repair is expected to begin. Evacuation repopulation is expected to be complete.**

Anticipated after 72 hours: **The fire is not expected to increase in size and crews will continue to construct and reinforce containment lines, mop up of heavy fuels and patrol. Suppression repair is expected to begin. Evacuation repopulation is expected to be complete.**

37. Strategic Objectives (define planned end-state for incident):

**Keep the fire South of Ash Valley
Keep the fire North of Fort Mountain
Keep the fire West of Madeline Plains
Keep the fire East of Snag Hill**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **LMU is currently managing two large wildland fire incidents. There will still be a threat of fires from lightning within the last 48 hours. The incident is burning in areas with private residences, ranches and commercial operations including agriculture, livestock and timber. There are cultural resources that are threatened. The Willow Creek Campground is threatened.**

24 hours: **LMU will still be managing two large wildland fire incidents. There will still be a threat of fires from lightning within the last 48 hours. The incident is burning in areas with private residences, ranches and commercial operations including agriculture, livestock and timber. There are cultural resources that are threatened. The Willow Creek Campground is threatened.**

48 hours: **LMU will still be managing two large wildland fire incidents. There will still be a threat of fires from lightning within the last 48 hours.**

72 hours: **LMU will still be managing two large wildland fire incidents. There will still be a threat of fires from lightning within the last 72 hours.**

Anticipated after 72 hours: **LMU will still be managing two large wildland fire incidents.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **3 - Type 3 Strike Teams**

24 hours:

48 hours:

72 hours:

Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

LMU is currently managing two large wildland fire incidents. The threat of fires from lightning within the last 48 hours will continue. The current incident continues to impacted private residences, ranches and commercial operations including agriculture, livestock and timber.

41. Planned Actions for Next Operational Period:

Personnel will continue to construct direct and indirect fire line. The planning process for suppression
