Fire Weather Forecast

SUNDAY AUG 30, 2020

FORECAST NO: PREDICTION FOR: SHIFT DATE:

12 Sunday August 30, 2020 1900, Aug 29, 2020 NAME OF FIRE: UNIT: Incident Meteorologist: LNU COMPLEX LNU Eric Kurth(T)

DISCUSSION: Dry weather continues, with temperatures trending hotter this week. Marine air will bring a cool start to the valleys this morning, along with good humidity recoveries and low clouds. Skies will clear by late morning with increasing winds and lowering humidity.. While general southwest winds are expected today over the area, northerly winds over Division WW and light northeasterly winds could prevail until early afternoon, then shift to southwesterly. The northerly winds in the morning hours will bring increasing smoke, with some clearing later in the afternoon. A weaker marine layer returns tonight bringing some low clouds and increasing humidity.

SUNDAY:

ISSUED:

WEATHER: Partly cloudy morning becoming sunny by late morning.

- WIND (20 FT): Valleys: Light and variable through 1100 then becoming south 5-10 MPH with gusts to 15 MPH.
 Gusts to 25 MPH possible in the valleys of divs KK, GG, CC. Ridges and gaps: southwest 4-8 MPH through 1100 then becoming west-southwest 8-12 MPH with gusts to 15 MPH.
- MAX TEMPERATURES: bottom: 92-97, top: 89-93.
- MIN RH: 20-28% all areas.

. Branch X: Winds: West-southwest 5-10 MPH with gusts to 15 MPH. Min RH: 25-35%. Highs 85-90

SUNDAY NIGHT:

WEATHER: Partly cloudy.

- WIND (20 FT): Valleys: becoming light and variable. Ridges: southwest 5-10 MPH, northeast 3 to 6 MPH at times for div TT.
- MIN TEMPERATURES: 60-65 bottom, 65-75 top.
- MAX RH: Valleys: 80-90%, ridges: 40-50%.

Branch X: Winds: Southwest 5-10 MPH, Max RH: 75-95%, Lows 52-60.

MONDAY:

WEATHER: Partly cloudy morning becoming sunny by late morning.

- WIND (20 FT): Valleys: Light and variable through 1100 then becoming south 5-10 MPH with gusts to 15 MPH.
 Gusts to 25 MPH possible in the valleys of divs KK, GG, CC. Ridges and gaps: southwest 4-8 MPH through 1100 then becoming west-southwest 7-11 MPH with gusts to 15 MPH.
- MAX TEMPERATURES: bottom: 94-99, top: 90-94.
- MIN RH: 20-30% all areas.

Branch X: Winds: West-southwest 5-10 MPH with gusts to 15 MPH. Min RH: 20-30%. Highs 89-94.

LONG TERM TRENDS

Tuesday through Wednesday: Sunny, and trending hotter with lowering humidity. Winds continue to prevail from the southwest winds but could trend a little lighter.

FIRE BEHAVIOR FORECAST

| 1 | |
|--|--|
| FORECAST NUMBER: 12 | TYPE OF FIRE: WILDLAND FIRE |
| FIRE NAME: LNU Lightning Complex (CALNU013407) | OPERATIONAL PERIOD: 08/30/20 - 08/31/20 24hr |
| DATE ISSUED: 08/29/20 | TIME ISSUED: 2000Hrs |
| UNIT: CA-LNU | SIGNED: Hugh Scanlon |
| 1 | Typed/printed: H. Scanlon |

INPUTS

WEATHER SUMMARY: ***See official forecast***

Sky/ Weather.... Partly cloudy morning becoming sunny by late morning.

Max Temperatures...bottom 92-97F, top 89-93F Min Humidity... 22-30% all areas

Winds....slope/terrain, becoming west-southwest 8-12, gusts to 15 MPH in the afternoon

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels remain near the 90th percentile for ERC. Fire growth will be to the north and east if unchecked. Smoke from the August Complex is shading fuels. Interior islands continue to flare up presenting a threat when near fire perimeters. Critical thresholds for increased fire behavior: Smoke clearing out, RH below 35%, and SW afternoon winds. This has been happening around 1400 hours daily.

Rates of Spread- up to 1 mi/hr Flame Lengths 8-12 ft when wind or slope are in alignment.

Probability of Ignition: up to 80% Spotting Distance: Spotting up to ½ mile.

SPECIFIC:

West Zone (Branch 10) -

Walbridge –. Smoke limits fire activity. Occasional torching around 1500 as smoke clears. Interior islands are burning in the understory. Fire weakened trees can fall without warning. Expect continued roll out and short-range spotting, especially in Div L and near House Creek.

Meyers – No heat showing in IR images. Large diameter logs and stump holes can retain heat.

East Zone-

Branch 20 – Fire will smolder and creep in the understory and brush fuels with the higher morning humidity. Northeast winds early will become SW in the afternoon. Fire becomes active around 1400 and produces short range spotting. Short duration crown runs are possible in the timber fuels. Watch for roll-out.

Branch 25 – Fire growth checked east of Hwy 16, however heat can still be found near the control line. Fuels along Cortina ridge aren't showing heat, but flare ups are possible. On the west side of Hwy 16, the fire approaches Cache Creek. Fire active in the brush when smoke clears, producing a heavy ember load and spot fire threat near the perimeter. Roll out into unburned fuels can cause uphill runs with the terrain or wind.

Branch 30 - Unburned interior islands continue to burn out with the afternoon winds.

Branch 40 - Fire behavior is minimal. Some locations may still retain heat and flare up.

AIR OPERATIONS: Heavy smoke early in the day from the northeastern fires. Expect clearing by 1400.

SAFETY

Probability of Ignition of 80% means expect embers to ignite in receptive fuels.

Recently burned areas near the perimeter may become active later in the day leading to potential spot fires, especially across drainages. Anticipate and prepare for predicted fire behavior.

LNU LIGHTNING COMPLEX SAFETY MESSAGE

Maintain Situational Awareness

INCIDENT: Lightning Complex CA-LNU-013407 DATE: August 27, 2020 TIME: 0700-0700

Major Hazards / Risks: Fatigue, Fire Behavior, Limited Resources

Fire Behavior: Fuels are receptive to fire spread. A small amount of wind on this dry fuel changes fire behavior dramatically!! Be alert to changes in wind direction and expect changes in fire behavior. Watch for spot fires outside the control lines and embers cast into structures.

Line Construction: Conduct thorough briefing for all personnel. Ensure LCES are in place prior to engagement. Use Downhill Line Checklist in the IRPG.

Driving: Slow Down! Drive defensively on narrow winding roads. Expect the unexpected around every curve. Drive with headlights and seatbelts on. Coordinate your movements on one-lane roads.

Personnel: Manage yourself and those around you for fatigue. Drink fluids frequently and eat nutritious food regularly. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and partner. Stay engaged and make smart decisions.

Line Construction: Conduct thorough briefing for all personnel. Ensure LCES are in place prior to engagement. Use Downhill Line Checklist in the IRPG.

Fatigue: Limited resources and hot, dry, windy weather for the next several days. Be alert for signs of fatigue and take breaks as necessary. Be alert for signs of fatigue in yourself and others.

Hazard trees: Survey the areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Dead trees from bug kill. Review and follow Hazard Tree Safety in your IRPG.

Steep slopes/rolling material: Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.

Lookouts, Communication, Escape routes, Safety zones

Mop Up:

- Conduct thorough briefing for all personnel.
- Use all required PPE, including eye protection.
- Maintain proper spacing and overhead clearance.
- Be alert for stump holes and root cavities.
- Minimize exposure to smoke.
- Evaluate unburned islands/Increase situational awareness.
- Back haul all trash and equipment off the line.
- Lift equipment with your legs and not your back.

Covid-19 Precautions:

- Keep your distance. Wear a mask when less than 6' from other people.
- No group gatherings without masks
- Wash your hands
- Don't show up to work sick
- Do daily health evaluations on your personnel.

Incident Safety Officer: Matthew Macdonald SOF Trainee

Incident Commander: Sean Kavanaugh

SAFETY COMMUNICATION

HAZARD TREES

All personnel working on the LNU Lightning Complex need to maintain situational awareness while working in areas around "Hazard Trees". Many Divisions and Branches have reported trees, both burned and unburned, falling during operational periods. Remember that there are hundreds of thousands of acres with standing dead or fire damaged trees posing an extreme life safety hazard to firefighters as well as to the civilian population. Educating our personnel on "hazard tree" awareness, identification, and mitigation when working and responding to these areas is CRITICAL.

- Identify the "Hazard Trees" in your divisions.
- Recognize when working in identified "Hazard Tree" areas and provide tailgate safety briefings to your crews.
- Refer to Hazard Tree Safety on page 22 of the IRPG.
- Recognize the potential for:
 - o Green trees falling without warning
 - Ground fires rapidly reaching the crowns of large dead stands of trees
 - Trees and limbs falling during air operations or windy conditions
 - Domino effect of when falling limbs and trees come in contact with one another

MITIGATIONS

- Branches and Divisions should focus on life safety, safe ingress/egress, and alternate suppression options
- Lookout-Day and Night when working around fire weakened or drought stressed trees
- Communicate-Brief personnel when working near fire weakened or hazard tree areas
- Escape Routes-May be compromised by falling trees
- Safety Zones-Are identified and large enough for a "Hazard Tree" area.

During this pandemic,
Public Health's focus is to reduce the spread of COVID-19 and to help keep our community healthy.

Rev 2.8.2011

"LNU Lighting Complex" Incident Fire Suppression Repair Plan

I. Objectives

The purpose of this plan is to establish expectations for the orderly and cost effective mitigation of fire suppression damage. Given the magnitude of the LNU Lightning Complex, the Fire Suppression Repair (FSR) technical specialists will use this plan as a general guide but will also have to be as adaptive as possible in ensuring the most expedient and effective measures are implemented given the range of the FSR-related conditions they will likely encounter throughout the Sonoma Lake Napa Unit.

II. General Repair Guidelines

A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

B. Roads

- 1) Re-establish existing berms where applicable.
- 2) Breach berms to facilitate drainage, where applicable.
- 3) Clean culverts plugged with soil and rock resulting from fire suppression actives.
- 4) Blading or grading of roads may be necessary.

C. Firelines; Hand and Dozer

Install waterbars as needed. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using prefire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

| | Water Bar or cross drain spacing Fireline or Road Gradient (%) Spacing | 0-10% 200' | 11-25% 150' | 26-50% 100' | >50% 75' |
|--|--|---------------|----------------|----------------|-------------|
|--|--|---------------|----------------|----------------|-------------|

D. Watercourses

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing may be sloped back to prevent future stream bank failure.

E. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)

Archaeological and Historic Properties: General Fire-line Guidance.

Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:

- 1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
- 2. Note, that not much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
- 3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
- 4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
- 5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
- 6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
- 7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated. It is our responsibility as federal and state employees to help in the protection of our heritage – preserving these places, and artifacts for scientific, cultural, educational, spiritual, and religious uses.

LNU LIGHTNING COMPLEX PUBLIC INFORMATION

Incident Information Line: 707-967-4207

Email pictures to: <u>LNULightningComplex2020@gmail.com</u>

MEDIA: California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection. The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property. If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO. Do not speculate or give opinions There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691): Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask.

Do not post:

 Inappropriate information, pictures or videos. Opinions regarding the incident, policy or endorsements of any kind.

PICTURES AND VIDEO OF INCIDENT: We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately, we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND: The Information staff will manage Lost and Found items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

MAIL SERVICE: The Information staff will assist you in mailing and receiving letters and packages. Calistoga Fairgrounds, 1435 N Oak St, Calistoga, CA 94515

Peer Support Team Message

LNU LIGHTNING COMPLEX INCIDENT PEER SUPPORT

Resource Box

Thank you for taking the time to have a look at this message.

Please pay attention to yourselves and others around you. Positive interactions go a long way. Many of us are here, away from our families and kindness towards each other is key.

Things to be aware of:

- Negative coping mechanisms
- Lack of sleep
- Irritability
- Fatigue
- Social withdrawal
- Depression
- Increased anxiety

You may not be experiencing these symptoms now. However, you may find yourself experiencing them when you return to your home or Unit.

If you find yourself in this situation and need to talk to someone, please contact Employee Support Services.

Warren Parrish: 916-823-6641 Chris Lamonto: 916-247-6974

Amy Head: 916-956-3277 ESS Helpline: 916-445-4337

We are here for all personnel at this incident.
