# Fire Weather Forecast

## MONDAY AUG 31, 2020

**FORECAST NO:** 13  
**PREDICTION FOR:** Monday  
**SHIFT DATE:** August 31, 2020  
**ISSUED:** 1900, Aug 30, 2020

**NAME OF FIRE:**  
**UNIT:**  
**Incident Meteorologist:**

**LNU COMPLEX**  
**LNU**  
**Eric Kurth(T)**

**...Hot and Dry This Week...**  
**...Gusty Northeast Winds for Higher Terrain Monday into Tuesday...**

**DISCUSSION:** Dry weather continues, with temperatures trending hotter this week. Northeast winds will bring drier air, especially over northern and eastern portions of the complex through Tuesday, with poor humidity recoveries for higher terrain. A weakened marine layer will still bring some cool air, low clouds and humidity to the valleys and Branch X. Skies will clear by late morning with increasing winds and lowering humidity. Northeasterly winds over divisions WW and UU could gust to 15 to 25 mph at times. Any shifts to southwest winds are expected to occur late in the afternoon or evening. The northerly winds will also bring smoke into the area from the August Complex, bringing poor visibility at times.

**MONDAY:**

- **WEATHER:** Partly cloudy morning becoming sunny by late morning.
- **WIND (20 FT):** Valleys: Light and variable through 1000 then becoming northeast 5-10 MPH with gusts to 15 MPH. Gusts to 20 MPH possible ridges and gaps: southwest 4-8 MPH after 5 pm.
- **MAX TEMPERATURES:** bottom: 94-99, top: 90-94.
- **MIN RH:** 14-25% all areas.

**Branch X:** Winds: Light and variable in the morning becoming west-southwest 5-10 MPH in the afternoon. Min RH: 25-35%. Highs 88-94

---

**MONDAY NIGHT:**

- **WEATHER:** Partly cloudy.
- **WIND (20 FT):** Valleys: becoming light and variable. Ridges: southwest 5-10 MPH, north 5 to 10 MPH gusting to 25 mph at times for divs TT and UU.
- **MIN TEMPERATURES:** 60-65 bottom, 65-75 top.
- **MAX RH:** Valleys: 50-70%, ridges: 35-45%.

**Branch X:** Winds: Southwest 5-10 MPH. Max RH: 75-95%. Lows 52-60.

---

**TUESDAY:**

- **WEATHER:** Partly cloudy morning becoming sunny by late morning.
- **WIND (20 FT):** Valleys: Light and variable through 1000 then becoming northeast 5-15 MPH with gusts to 15 MPH. Gusts to 25 MPH possible ridges and gaps: southwest 4-8 MPH after 5 pm.
- **MAX TEMPERATURES:** bottom: 95-100, top: 90-95.
- **MIN RH:** 10-20% all areas.

**Branch X:** Winds: Light and variable in the morning becoming west-southwest 5-10 MPH in the afternoon. Min RH: 20-30%. Highs 90-95

**LONG TERM TRENDS**

**Wednesday through Thursday:** Sunny, hot and dry with weaker onshore flow.

Weather Obs Sites

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 13	<b>TYPE OF FIRE:</b> WILDLAND FIRE
<b>FIRE NAME:</b> LNU Lightning Complex (CALNU013407)	<b>OPERATIONAL PERIOD:</b> 08/31/20 – 09/01/20 24hr
<b>DATE ISSUED:</b> 08/30/2020	<b>TIME ISSUED:</b> 2000Hrs
<b>UNIT:</b> CA-LNU	<b>SIGNED:</b> <i>Hugh Scanlon</i> <b>Typed/printed:</b> H. Scanlon

### INPUTS

**WEATHER SUMMARY: \*\*\*See official forecast\*\*\***

**Sky/ Weather....** Partly cloudy morning becoming sunny by late morning.

**Max Temperatures...**valleys 94-99F, ridges 90-94F **Min Humidity...** 14-25% all areas

**Winds....**northeast winds early, becoming west-southwest 5-10, gusts to 15 MPH in the late afternoon

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** Fuels remain near the 90th percentile for ERC. Unchecked fire growth will be to the north and east. Smoke from the August Complex is shading fuels. Interior islands continue to flare up presenting a threat when near fire perimeters. Critical thresholds for increased fire behavior: Smoke clearing out, RH below 35%, and SW afternoon winds. This has been happening around 1400 hours daily.

**Rates of Spread-** up to 1 mi/hr **Flame Lengths** 8-12 ft when wind or slope are in alignment.

**Probability of Ignition:** up to 90% **Spotting Distance:** Spotting up to ½ mile.

#### SPECIFIC:

##### **West Zone (Branch 10) -**

**Walbridge** – Smoke limits fire activity. Interior islands are burning in the understory. Fire activity increases after 1500. Expect continued roll out and short-range spotting, especially in Div L and near House Creek.

**Meyers** – No heat showing in IR images. Fire weakened trees are hazardous.

##### **East Zone-**

**Branch 20** – Fire will smolder and creep in the understory with the higher morning humidity. Northeast winds early will become SW in the late afternoon. Fire becomes active around 1400 and produces short range spotting. Roll out of hot material across lines remains a threat.

**Branch 25** – Heat can still be found near the control line above Hwy 16, and spotting into the green west of the highway is possible. On the west side of Hwy 16, the fire threatens to cross Cache Creek. Fire active in the brush when smoke clears, producing a heavy ember load and spot fire threat near the perimeter. Roll out into unburned fuels can cause uphill runs with the terrain or wind.

**Branch 30** – Unburned interior islands can flare up and burn out with the afternoon clearing.

**Branch 40** - Fire behavior is minimal. Some locations may still retain heat and flare up.

**AIR OPERATIONS:** Smoke from fires northeast of us can impact aviation resources. Clearing by 1400.

### SAFETY

Fuels are receptive to burning, and activity picks up when the smoke clears. Watch for the signs of increased fire behavior.

Recently burned areas near the perimeter may become active later in the day leading to potential spot fires, especially across drainages. Anticipate and prepare for predicted fire behavior.

## LNU LIGHTNING COMPLEX SAFETY MESSAGE

### Lookouts, Communication, Escape routes, Safety zones

**INCIDENT:** Lightning Complex CA-LNU-013407 | **DATE:** August 31, 2020 | **TIME:** 0700-0700

### **Major Hazards / Risks: Hazard Trees, Fatigue, Driving**

**Hazard trees:** Survey all areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Brief personnel on Hazard Tree Safety on page 22 of your IRPG. Assess potential for trees to domino. Post lookouts when there is possible danger.

**Fatigue:** Be alert for the cumulative effects of fatigue and take breaks as necessary. Effects include slower reactions, lack of attention and forgetfulness. Dehydration contributes to fatigue. As fatigue increases, injuries tend to increase also.

**Driving:** Reduce your speed! Drive defensively on narrow winding roads. Expect the unexpected around every curve. Drive with headlights and seatbelts on and utilize backers. Coordinate your movements on one-lane roads.

**Fire Behavior:** Fuels are receptive to fire spread. A small amount of wind on this dry fuel changes fire behavior dramatically!! Be alert to changes in wind direction and expect changes in fire behavior. Watch for spot fires outside of control lines and embers cast into structures.

**Line Construction:** Conduct a thorough briefing for all personnel. Ensure LCES are in place prior to engagement. Use Downhill Checklist in the IRPG. Maintain proper crew spacing.

**Personnel:** Monitor yourself and those around you. Consider a 2:1 water to electrolyte drink ratio and eat nutritious food regularly. Stay engaged and make smart decisions.

**Ash pits:** Risk of deep ash pits or root cavities with hot coals. White ash can be an indicator of ash pits. Stumps and roots may be fully consumed by fire. Difficult to identify hazard which likely extends beyond the immediate area along underground root lines. Risk of slips, trips, and falls.

**Steep slopes/rolling material:** Watch your footing while hiking in steep terrain. Be careful of rolling debris. Stagger personnel hiking uphill in loose soil. Maintain Situational Awareness.

#### Mop Up:

- Conduct thorough briefing for all personnel.
- Use all required PPE, including eye protection.
- Be alert for stump holes and root cavities.
- Evaluate unburned islands/Increase situational awareness.
- Back haul all trash and equipment off the line.
- Lift equipment with your legs and not your back.

#### Covid-19 Precautions:

- Keep your distance. Wear a mask when less than 6' from other people.
- No group gatherings without masks.
- Wash your hands.
- Don't show up to work sick.
- Do daily health evaluations on your personnel.

Incident Safety Officer: Chad Thompson SOF1

Incident Commander: Sean Kavanaugh

# SAFETY COMMUNICATION

## HAZARD TREES

All personnel working on the LNU Lightning Complex need to maintain situational awareness while working in areas around “Hazard Trees”. Many Divisions and Branches have reported trees, both burned and unburned, falling during operational periods. Remember that there are hundreds of thousands of acres with standing dead or fire damaged trees posing an extreme life safety hazard to firefighters as well as to the civilian population. Educating our personnel on “hazard tree” awareness, identification, and mitigation when working and responding to these areas is **CRITICAL**.

- Identify the “Hazard Trees” in your divisions.
- Recognize when working in identified “Hazard Tree” areas and provide tailgate safety briefings to your crews.
- Refer to Hazard Tree Safety on page 22 of the IRPG.
- Recognize the potential for:
  - Green trees falling without warning
  - Ground fires rapidly reaching the crowns of large dead stands of trees
  - Trees and limbs falling during air operations or windy conditions
  - Domino effect of when falling limbs and trees come in contact with one another

### MITIGATIONS

- Branches and Divisions should focus on life safety, safe ingress/egress, and alternate suppression options
- Lookout-Day and Night when working around fire weakened or drought stressed trees
- Communicate-Brief personnel when working near fire weakened or hazard tree areas
- Escape Routes-May be compromised by falling trees
- Safety Zones-Are identified and large enough for a “Hazard Tree” area.

**During this pandemic, Public Health's focus is to reduce the spread of COVID-19 and to help keep our community healthy.**

Find out about all the information, education, assistance, and support services we provide!

**Wear Your Mask**  
**Wash Your Hands**

## LNU LIGHTNING COMPLEX INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	<b>DRIVING</b>	Drive defensively! Narrow winding roads are hazardous. Slow Down. Drive with headlights on and seatbelts on. Be alert for heavy trucks and high-speed opposing traffic crossing into your lane. Use warning devices when operating near traffic. Watch for downed trees and rocks on roadways.
ALL	<b>HAZARD TREES</b>	Identify and isolate the area to provide for safety of others. Flag and make the proper notifications. Evaluate all trees prior to working under or near them. Don't fall any tree outside of your qualification. Post lookouts when there is possible danger.
ALL	<b>FATIGUE / HEAT / DEHYDRATION</b>	During periods of hot/dry weather with limited resources be alert for signs of fatigue and take breaks as necessary. Drink water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible.
ALL	<b>FIRE BEHAVIOR</b>	Review Wildland Urban Interface Firefighting in the IRPG. Monitor current weather conditions and forecasts. Make sure all personnel receive a briefing. Work within your capabilities when limited resources are available. Maintain escape routes and safety zones.
ALL	<b>STEEP TERRAIN / ROLLING DEBRIS</b>	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris Maintain Situational Awareness and separation.
ALL	<b>MOP UP AND PATROL</b>	Use all required PPE, including eye protection and gauntlet gloves. Maintain proper spacing and overhead clearance. Be alert for ash pits and root cavities. Evaluate unburned islands, and consider re-burn potential.
ALL	<b>ASH PITS</b>	Risk of deep ash pits or root cavities with hot coals. White ash is sometimes an indicator of ash pits. Stumps and roots may be fully consumed by fire. Difficult to identify hazard which likely extends beyond the immediate area along underground root lines. Risk of slips, trips, and falls.
ALL	<b>BACKFIRING and BURNOUT OPERATIONS</b>	Post lookouts, establish communications with both firing and holding teams, and identify escape routes and safety zones and make them known. Ensure approval and relay to all adjoining forces. Follow the Firing Operations Checklist. Wear full PPE.
ALL	<b>COVID 19</b>	Maintain 6' distance whenever possible. Wear masks when less than 6' away from people, frequent hand washing/sanitizing, disinfect common surfaces, follow Napa County Public Health Guidelines. Conduct daily health evaluation of all personnel. Monitor for symptoms, follow reporting procedure.
ALL	<b>AIRCRAFT OPERATIONS</b>	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft.
ALL	<b>HEAVY EQUIPMENT</b>	Watch for rolling material and avoid working below heavy equipment. Monitor safe working distances. Avoid working below heavy equipment. Utilize communication with the operator (radio or hand signals). Stay out of the dust.
ALL	<b>LINE CONSTRUCTION</b>	Conduct thorough briefing for all personnel. Ensure LCES are in place prior to engagement. Use Downhill Line Checklist in the IRPG.
ALL	<b>FIRE SUPPRESSION REPAIR</b>	Maintain accountability of personnel at all times. Monitor appropriate tactical channels. Use caution when operating equipment adjacent to unburned fuels. Consider the need for suppression apparatus. See HEAVY EQUIPMENT above.
ALL	<b>LIMITED RESOURCES</b>	Always work within the capabilities of yourself or your crew. Apply a risk management process to identify hazards, implement a plan, and evaluate progress frequently. Anticipate changes, stay flexible, and be ready for the unexpected.
ALL	<b>POWER LINES</b>	Follow <i>Powerline Safety</i> guidelines in the IRPG. Communicate power line hazards to immediate supervisor. Flag area around downed power lines and deny access. Treat all downed power lines as energized.

Kaiser Permanente	1 Quality Dr Vacaville, CA 95688 Lat/Long: 38.3887500, -121.9404167	707-624-4000	0:05	0:20		<input type="checkbox"/>	<input checked="" type="checkbox"/>

### 6. Special Medical Emergency Procedures

**Line Emergency**  
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division Group Supervisor Contacts:

1. Closest EMS resource
2. Communications Unit

- Communications Unit Contacts:

1. Ground or Air ambulance as requested.
2. Operations
3. Safety
4. Medical Unit

- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.

1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of the emergency.

- Communications Unit will clear the Command channel for emergency traffic as needed for duration of the need.

**Camp Emergency**  
Contact Medical Unit with patient complaint/condition and location. Medical staff will respond to stabilize the patient.

- Medical Unit contacts

1. Communications
2. Safety
3. Logistics
4. Operations
5. Crew Supervisor
6. Comp/Claims

**Injury Reporting Procedures**

**Nature of Injury:** \_\_\_\_\_

**Location of Patient:** \_\_\_\_\_

**Point of Contact:** \_\_\_\_\_

**Transportation Requested by:** Air \_\_\_\_\_ Ground \_\_\_\_\_

**Point of Pick-Up:** \_\_\_\_\_

**Lat:** \_\_\_\_\_ **Long:** \_\_\_\_\_

**Patient Unit ID:** \_\_\_\_\_

**Is an EMT with Patient:** Yes \_\_\_\_\_ No \_\_\_\_\_

**Age:** \_\_\_\_\_ **Sex:** Male \_\_\_\_\_ Female \_\_\_\_\_

**All Emergencies - Secure the area and identified witnesses for later investigation. Keep accurate log of events.**

Check box if aviation assets are utilized for rescue. If assets are used, coordinate with Air Operations.

# FIRING OPERATION CHECKLIST

Location: \_\_\_\_\_

Date: \_\_\_\_\_ Time: \_\_\_\_\_

Firing Supervisor \_\_\_\_\_

## 1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
  - Firing personnel
  - Holding forces
  - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

## 2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

## 3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

## 4. Other Notifications

- Other: \_\_\_\_\_
- Other: \_\_\_\_\_

Attach Firing Operations Checklist to ICS-214

# "LNU Lighting Complex" Incident Fire Suppression Repair Plan

## I. Objectives

The purpose of this plan is to establish expectations for the orderly and cost effective mitigation of fire suppression damage. Given the magnitude of the LNU Lightning Complex, the Fire Suppression Repair (FSR) technical specialists will use this plan as a general guide but will also have to be as adaptive as possible in ensuring the most expedient and effective measures are implemented given the range of the FSR-related conditions they will likely encounter throughout the Sonoma Lake Napa Unit.

## II. General Repair Guidelines

### A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- 2) Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

### B. Roads

- 1) Re-establish existing berms where applicable.
- 2) Breach berms to facilitate drainage, where applicable.
- 3) Clean culverts plugged with soil and rock resulting from fire suppression activities.
- 4) Blading or grading of roads may be necessary.

### C. Firelines; Hand and Dozer

Install waterbars **as needed**. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using pre-fire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

<b>Water Bar or cross drain spacing</b>				
Fireline or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Spacing	200'	150'	100'	75'

### D. Watercourses

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing may be sloped back to prevent future stream bank failure.

### E. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)

Prepared by:

**Jason Butcher, Fire Suppression Repair Lead**

**DEMOB MESSAGE**  
**LNU LIGHTNING COMPLEX**  
**CA-LNU-013407**

**DEMOB PROCEDURES**

- Demob procedures will vary based on which base camp you are assigned to.
- Due to COVID-19, every effort will be made to ensure the demobilization procedures will limit face to face contact. Please follow the following plan:
- Check the demob list daily. You can find the demob list posted around camp or by utilizing the QR code on your IAP.
- **Please report to demob only at your scheduled time.**
- **Wear a facial covering** and **maintain proper social distancing** guidelines throughout the demob process.
- Report to the Demob unit leader at your respective camp, they will provide you with an ICS-221 check-out form.
- Please scan the attached QR codes for further instructions.

**CALISTOGA**

**SANTA ROSA**

- ALL ground support inspections will be completed at the Santa Rosa base camp.
- ALL hired equipment and private resources will need to report to the Time Unit at the Calistoga ICP.
- ALL trainees must close out with the Training Specialist at the Calistoga ICP.
- ALL borrowed supply items must be returned to the Calistoga ICP.

LNU LIGHTNING COMPLEX

Incident Trainee/Trainer Data Form
CA-LNU-013407

Training Specialist: Claudia Soiza 949.632.7813

- All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this form and see the Training Specialist.
Prior to or as you process through DEMOB, remember to close your training package. To close your training package, bring: 1) A performance rating from your trainer. (ICS 225) 2) Your task book that has as many entries as possible by your Trainer.

Trainee Data

Trainee Name: ICS Trainee Position:

Request # (A,C,E, or O): Agency Designator ( Ex. CA-RRU):

Request # (A,C,E,O): Cell? Contact While on Incident:

Work Address:

City: State: Zip Code:

**Archaeological and Historic Properties:  
General Fire-line Guidance.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.  
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that not much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated. It is our responsibility as federal and state employees to help in the protection of our heritage – preserving these places, and artifacts for scientific, cultural, educational, spiritual, and religious uses.

# LNU LIGHTNING COMPLEX PUBLIC INFORMATION

**Incident Information Line: 707-967-4207**

**Email pictures to: [LNULightningComplex2020@gmail.com](mailto:LNULightningComplex2020@gmail.com)**

**MEDIA:** California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection. The media may only access private property with the property owner’s permission. Fire personnel cannot provide members of the media with authorization to enter private property. If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO. Do not speculate or give opinions There is no such thing as an “off the record” comment.

**CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691):** Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public’s desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask.

**Do not post:**

- Inappropriate information, pictures or videos. Opinions regarding the incident, policy or endorsements of any kind.

**PICTURES AND VIDEO OF INCIDENT:** We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately, we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can’t be looking up, down and all around.

**LOST AND FOUND:** The Information staff will manage Lost and Found items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

**MAIL SERVICE:** The Information staff will assist you in mailing and receiving letters and packages. **Calistoga Fairgrounds, 1435 N Oak St, Calistoga, CA 94515**

Resource Box

## LNU LIGHTNING COMPLEX INCIDENT PEER SUPPORT

Thank you for taking the time to have a look at this message.

Please pay attention to yourselves and others around you. Positive interactions go a long way. Many of us are here, away from our families and kindness towards each other is key.

Things to be aware of:

- Negative coping mechanisms
- Lack of sleep
- Irritability
- Fatigue
- Social withdrawal
- Depression
- Increased anxiety

You may not be experiencing these symptoms now. However, you may find yourself experiencing them when you return to your home or Unit.

If you find yourself in this situation and need to talk to someone, please contact Employee Support Services.

Warren Parrish: 916-823-6641

Chris Lamonto: 916-247-6974

Amy Head: 916-956-3277

ESS Helpline: 916-445-4337

We are here for all personnel at this incident.
