

INCIDENT ACTION PLAN

LNU LIGHTNING COMPLEX

CA-LNU-013407

Thursday

OPERATIONAL PERIOD

9/10/2020 0700

to

9/11/2020 0700

Briefing will be broadcasted on CDF TAC 27

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: LNU LIGHTNING COMPLEX	2. Operational Period: Date From: 9/10/2020 Date To: 9/11/2020 Time From: 0700 Time To: 0700
---	--

3. Objective(s):

Management Objectives

- Provide for emergency personnel and public safety at all times.
- Ensure COVID-19 precautions and best practices are met at all times.
- Protect property, improvements, and infrastructure.
- Ensure coordinated, timely and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Protect economic, natural, cultural and heritage resources.
- Maintain fiscal accountability and keep costs commensurate with values at risk.

Control Objectives:

<u>Branch 10 - Keep the fire:</u> Keep the fire within the existing perimeter.	<u>Branch 20, 25, 30/40</u> Keep the fire within the existing perimeter.
--	--

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Fire Weather Forecast

THURSDAY, SEPTEMBER 10, 2020

FORECAST NO: 23
PREDICTION FOR: Thursday
SHIFT DATE: September 10, 2020
ISSUED: 1800, September 9, 2020

NAME OF FIRE: LNU COMPLEX
UNIT: CALFIRE-LNU
INCIDENT METEOROLOGIST: *Scott Carpenter*

DISCUSSION: Extensive smoke will again be present across the area, but thinning of the smoke is expected to allow more warming than occurred Wednesday. Light onshore flow will assist with bringing the marine layer across much of the Walbridge which will slow the warming across those areas. Drier conditions will remain across the Hennessey Fire through the day, though some improvement is expected as compared to Wednesday.

THURSDAY:

Walbridge:

- **WEATHER:** Cloudy with fog and low cloud cover to around 1500 ft and extensive smoke during the morning. Extensive smoke will decrease slightly during the afternoon.
- **WIND (20 FT):** Terrain driven 3-8 mph through 1000, then Southeast 5-10 mph with gusts to 15 mph through 1400, then becoming Southwest 5-10 mph with gusts to 15 mph.
- **MAX TEMPERATURES:** 74-82°F
- **MIN RH:** 30-45% all areas.

Hennessey: Winds: Terrain driven 3-8 mph through 1400, then Southwest 6-10 mph with gusts to 15 mph. Min RH: 21-29%. Highs 78-87°F

THURSDAY NIGHT:

Walbridge:

- **WEATHER:** Areas of low clouds and fog developing below about 1500 ft elevation. Otherwise smoky skies will continue at higher elevations.
- **WIND (20 FT):** Becoming terrain driven 3-6 mph after 2100.
- **MIN TEMPERATURES:** 52-60°F
- **MAX HUMIDITY:** Bottom: 85-100% Top: 65-80%

Hennessey: Winds: Southwest 6-10 mph with gust to 15 mph through 0200, then terrain driven 3-6 mph. Max RH: 35-55%. Lows 65-72°F.

FRIDAY:

Walbridge:

- **WEATHER:** Cloudy with fog and low cloud cover to around 1500 feet and extensive smoke during the morning. Very dry conditions on the higher ridges. Extensive smoke will decrease slightly during the afternoon.
- **WIND (20 FT):** Terrain driven 3-6 mph through 1500, then Southwest 3-6 mph with gusts to 10 mph.
- **MAX TEMPERATURES:** 73-81°F
- **MIN RH:** 30-45% all areas.

Hennessey: Winds: Terrain driven 3-8 mph through 1400, then Southwest 6-10 mph. Min RH: 22-30%. Highs 78-87°F

LONG TERM TRENDS

Saturday-Sunday: Near normal to slightly above normal temperatures expected. No precipitation.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 23	TYPE OF FIRE: WILDLAND FIRE
FIRE NAME: LNU Lightning Complex (CALNU013407)	OPERATIONAL PERIOD: 09/10/20 – 09/11/20 24hr
DATE ISSUED: 09/09/2020	TIME ISSUED: 1700Hrs
UNIT: CA-LNU	SIGNED: Robert Clark Typed/printed: R. Clark

INPUTS

WEATHER SUMMARY: *See official forecast*****

Sky/ Weather.... Cloudy with fog and low cloud cover to around 1500ft and extensive smoke during the morning. Extensive smoke will decrease slightly in the afternoon.

Walbridge:

Max Temperatures...74-82F Min Humidity... 30-45%

Winds.... Terrain driven 3-8 mph through 1000, then Southeast 5-10 mph with gusts to 15 mph through 1400, then becoming Southwest 5-10 mph with gusts to 15.

Hennessey:

Max Temperatures...78-87F Min Humidity... 21-29%

Winds.... Terrain driven 3-8 mph through 1000, then Southwest 5-20 mph with gusts to 15.

OUTPUTS

FIRE BEHAVIOR

GENERAL: The extremely hot and dry weather the past week, has caused the ERCs to reach above the 97th percentile and will slowly drop. Fuels are still extremely dry will provide a receptive fuel bed for any ignition or spot fires. The primary driver of any fire activity will be wind and topography. Terrain and slope driven fire runs are still possible with any active fire or initial attack.

Expect any new start or spot fire to be highly resistant to control

Initial Attack Fire Behavior (Head fire, up wind, up slope)

Grass – **Rate of Spread** up to 1 mi/hr **Flame Lengths** 4-8 ft.

Brush – **Rate of Spread** up to 1.5 mi/hr **Flame Lengths** 10-20 ft.

Rates of spread and flame lengths could exceed forecasted values.

Probability of Ignition: up to 75% **Spotting Distance:** Spotting up to 3/4 mile. (Peak gusts)

SPECIFIC:

Fire behavior is minimal. Isolated heat is still holding in drainages and larger fuels and they will continue to smoke. Creeping and smoldering fire behavior in islands has been observed and conditions are still present to produce flare ups. Interior smokes will be present. Any active fire within the perimeter will have the potential to cause spot fires across containment lines with the winds.

Initial Attack – See predicted fire behavior above. Coordinate response for new fires near your division.

AIR OPERATIONS: Poor visibility likely at Healdsburg Helibase early with minimal improvement throughout the day.

SAFETY

Fuels outside the line continue to be very receptive. Be prepared to react to rollout or new starts.

Limited visibility may give you a false sense of security.

LNU LIGHTNING COMPLEX SAFETY MESSAGE

INCIDENT: Lightning Complex CA-LNU-013407 | **DATE:** September 10, 2020 | **TIME:** 0700-0700

Major Hazards / Risks: Fatigue//Dehydration, Driving, New Fires, Hazard Trees

Heat Stress and Fatigue: Be alert for the cumulative effects of fatigue and take breaks as necessary. Effects include slower reactions, lack of attention and forgetfulness. Dehydration contributes to fatigue. As fatigue increases, injuries tend to increase also.

Personnel: Monitor yourself and those around you. Consider a 2:1 water to electrolyte drink ratio and eat nutritious food regularly. Stay engaged and make smart decisions.

Driving: Reduce your speed! Drive defensively on narrow winding roads. Expect the unexpected around every curve. Drive with headlights and seatbelts on and utilize backcrossers. Coordinate your movements on one-lane roads.

Fire Behavior: Be prepared for new fires in the area. Fuels are receptive to fire spread. A small amount of wind on this dry fuel changes fire behavior dramatically!! Be alert to changes in wind direction and expect changes in fire behavior. Watch for spot fires outside of control lines and embers cast into structures.

Hazard trees: Survey all areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Brief personnel on Hazard Tree Safety on page 22 of your IRPG. Assess potential for trees to domino. Post lookouts when there is possible danger.

Line Construction: Conduct a thorough briefing for all personnel. Ensure LCES are in place prior to engagement. Use Downhill Checklist in the IRPG. Maintain proper crew spacing.

Ash pits: Risk of deep ash pits or root cavities with hot coals. White ash can be an indicator of ash pits. Stumps and roots may be fully consumed by fire. Difficult to identify hazard which likely extends beyond the immediate area along underground root lines. Risk of slips, trips, and falls.

Steep slopes/rolling material: Watch your footing while hiking in steep terrain. Be careful of rolling debris. Stagger personnel hiking uphill in loose soil. Maintain Situational Awareness.

Lookouts, Communication, Escape routes, Safety zones

Covid-19 Precautions:

- Keep your distance. Wear a mask when less than 6' from other people.
 - No group gatherings without masks.
 - Wash your hands.
 - Don't show up to work sick.
- Do daily health evaluations on your personnel.

Mop Up:

- Conduct thorough briefing for all personnel.
- Use all required PPE, including eye protection.
- Be alert for stump holes and root cavities.
- Evaluate unburned islands/Increase situational awareness.
- Back haul all trash and equipment off the line.
- Lift equipment with your legs and not your back.

Incident Safety Officer: Ryan Danielsen SOF1 (T)

Incident Commander: Sean Kavanaugh

SAFETY COMMUNICATION

HAZARD TREES

All personnel working on the LNU Lightning Complex need to maintain situational awareness while working in areas around “Hazard Trees”. Many Divisions and Branches have reported trees, both burned and unburned, falling during operational periods. Remember that there are hundreds of thousands of acres with standing dead or fire damaged trees posing an extreme life safety hazard to firefighters as well as to the civilian population. Educating our personnel on “hazard tree” awareness, identification, and mitigation when working and responding to these areas is **CRITICAL**.

- Identify the “Hazard Trees” in your divisions.
- Recognize when working in identified “Hazard Tree” areas and provide tailgate safety briefings to your crews.
- Refer to Hazard Tree Safety on page 22 of the IRPG.
- Recognize the potential for:
 - Green trees falling without warning
 - Ground fires rapidly reaching the crowns of large dead stands of trees
 - Trees and limbs falling during air operations or windy conditions
 - Domino effect of when falling limbs and trees come in contact with one another

MITIGATIONS

- Branches and Divisions should focus on life safety, safe ingress/egress, and alternate suppression options
- Lookout-Day and Night when working around fire weakened or drought stressed trees
- Communicate-Brief personnel when working near fire weakened or hazard tree areas
- Escape Routes-May be compromised by falling trees
- Safety Zones-Are identified and large enough for a “Hazard Tree” area.

During this pandemic, Public Health's focus is to reduce the spread of COVID-19 and to help keep our community healthy.

Find out about all the information, education, assistance, and support services we provide!

Public Health
Prevent. Promote. Protect.

Durante esta pandemia, el enfoque de Salud Pública es de reducir la propagación de COVID-19 y de ayudar a mantener saludable a nuestra comunidad.

LNU LIGHTNING COMPLEX INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FATIGUE / HEAT / DEHYDRATION	During periods of hot/dry weather with limited resources be alert for signs of fatigue and take breaks as necessary. Drink water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible.
ALL	DRIVING	Drive defensively! Narrow winding roads are hazardous. Slow Down. Drive with headlights on and seatbelts on. Be alert for heavy trucks and high-speed opposing traffic crossing into your lane. Use warning devices when operating near traffic. Watch for downed trees and rocks on roadways.
ALL	FIRE BEHAVIOR	Anticipate new starts. Review Wildland Urban Interface Firefighting in the IRPG. Monitor current weather conditions and forecasts. Make sure all personnel receive a briefing. Work within your capabilities when limited resources are available. Maintain escape routes and safety zones.
ALL	HAZARD TREES	Identify and isolate the area to provide for safety of others. Flag and make the proper notifications. Evaluate all trees prior to working under or near them. Don't fall any tree outside of your qualification. Post lookouts when there is possible danger.
ALL	STEEP TERRAIN / ROLLING DEBRIS	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris Maintain Situational Awareness and separation.
ALL	MOP UP AND PATROL	Use all required PPE, including eye protection and gauntlet gloves. Maintain proper spacing and overhead clearance. Be alert for ash pits and root cavities. Evaluate unburned islands, and consider re-burn potential.
ALL	ASH PITS	Risk of deep ash pits or root cavities with hot coals. White ash is sometimes an indicator of ash pits. Stumps and roots may be fully consumed by fire. Difficult to identify hazard which likely extends beyond the immediate area along underground root lines. Risk of slips, trips, and falls.
ALL	COVID 19	Maintain 6' distance whenever possible. Wear masks when less than 6' away from people, frequent hand washing/sanitizing, disinfect common surfaces, follow Napa County Public Health Guidelines. Conduct daily health evaluation of all personnel. Monitor for symptoms, follow reporting procedure.
ALL	FIRE SUPPRESSION REPAIR	Maintain accountability of personnel at all times. Monitor appropriate tactical channels. Use caution when operating equipment adjacent to unburned fuels. Consider the need for suppression apparatus.
ALL	HEAVY EQUIPMENT	Watch for rolling material and avoid working below heavy equipment. Monitor safe working distances. Avoid working below heavy equipment. Utilize communication with the operator (radio or hand signals). Stay out of the dust.
ALL	POWER LINES	Follow <i>Powerline Safety</i> guidelines in the IRPG. Communicate power line hazards to immediate supervisor. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
ALL	AIRCRAFT OPERATIONS	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft.
ALL	PERFORM TAIL GATE SAFETY MEETINGS	Everyone should be briefed on the conditions and circumstances regarding the fire and their assignments per the IRPG. Ensure all personnel have PPE, food, and water.
ALL	LINE CONSTRUCTION	Conduct thorough briefing for all personnel. Ensure LCES are in place prior to engagement. Use Downhill Line Checklist in the IRPG.

"LNU Lighting Complex" Incident Fire Suppression Repair Plan

I. Objectives

The purpose of this plan is to establish expectations for the orderly and cost effective mitigation of fire suppression damage. Given the magnitude of the LNU Lightning Complex, the Fire Suppression Repair (FSR) technical specialists will use this plan as a general guide but will also have to be as adaptive as possible in ensuring the most expedient and effective measures are implemented given the range of the FSR-related conditions they will likely encounter throughout the Sonoma Lake Napa Unit.

II. General Repair Guidelines

A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- 2) Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

B. Roads

- 1) Re-establish existing berms where applicable.
- 2) Breach berms to facilitate drainage, where applicable.
- 3) Clean culverts plugged with soil and rock resulting from fire suppression activities.
- 4) Blading or grading of roads may be necessary.

C. Firelines; Hand and Dozer

Install waterbars **as needed**. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using pre-fire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

Water Bar or cross drain spacing				
Fireline or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Spacing	200'	150'	100'	75'

D. Watercourses

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing may be sloped back to prevent future stream bank failure.

E. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)

DEMOB MESSAGE

LNU LIGHTNING COMPLEX

CA-LNU-013407

DEMOB PROCEDURES

- Demob procedures will vary based on which base camp you are assigned to.
- Due to COVID-19, every effort will be made to ensure the demobilization procedures will limit face to face contact. Please follow the following plan:
- Check the demob list daily. You can find the demob list posted around camp or by utilizing the QR code on your IAP.
- Please report to demob only at your scheduled time.
- Wear a facial covering and maintain proper social distancing guidelines throughout the demob process.
- Report to the Demob unit leader at your respective camp, they will provide you with an ICS-221 check-out form.
- Please scan the attached QR codes for further instructions.

CALISTOGA

SANTA ROSA

- ALL ground support inspections will be completed at the Santa Rosa base camp.
- ALL hired equipment and private resources will need to report to the Time Unit at the Calistoga ICP.
- ALL trainees must close out with the Training Specialist at the Calistoga ICP.
- ALL borrowed supply items must be returned to the Calistoga ICP.

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the
instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Questions?

OES Assistant Chief Mark Courson
916-281-4484

**Archaeological and Historic Properties:
General Fire-line Guidance.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that not much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated. It is our responsibility as federal and state employees to help in the protection of our heritage – preserving these places, and artifacts for scientific, cultural, educational, spiritual, and religious uses.

LNU LIGHTNING COMPLEX PUBLIC INFORMATION

Incident Information Line: 707-967-4207

Email pictures to: LNULightningComplex2020@gmail.com

MEDIA: California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection. The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property. If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO. Do not speculate or give opinions There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691): Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask.

Do not post:

- Inappropriate information, pictures or videos. Opinions regarding the incident, policy or endorsements of any kind.

PICTURES AND VIDEO OF INCIDENT: We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately, we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND: The Information staff will manage Lost and Found items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

MAIL SERVICE: The Information staff will assist you in mailing and receiving letters and packages. **Calistoga Fairgrounds, 1435 N Oak St, Calistoga, CA 94515**

Peer Support Team Message

Resource Box

LNU LIGHTNING COMPLEX INCIDENT PEER SUPPORT

Thank you for taking the time to have a look at this message.

Please pay attention to yourselves and others around you. Positive interactions go a long way. Many of us are here, away from our families and kindness towards each other is key.

Things to be aware of:

- Negative coping mechanisms
- Lack of sleep
- Irritability
- Fatigue
- Social withdrawal
- Depression
- Increased anxiety

You may not be experiencing these symptoms now. However, you may find yourself experiencing them when you return to your home or Unit.

If you find yourself in this situation and need to talk to someone, please contact Employee Support Services.

Warren Parrish: 916-823-6641

Chris Lamonto: 916-247-6974

Amy Head: 916-956-3277

ESS Helpline: 916-445-4337

We are here for all personnel at this incident.
