# Fire and COVID-19 Briefing Checklist

Se	elf-Awareness / Screening
	Immediately separate yourself from others.
	Notify supervisor if you or others experience:
	o Cough, more than expected
	<ul> <li>Shortness of breath or difficulty breathing</li> </ul>
	<ul> <li>New loss of taste or smell</li> </ul>
	<ul><li>Fever</li><li>Sore throat</li></ul>
	o Chills o Muscle pain
	Review and follow crew and division plans to
	isolate, triage, and transport symptomatic personnel.
H	giene on the Fireline
_	especially before and after eating or entering a
	public place, and after coughing or speezing
	Avoid handshakes and communal use items.
	Maintain a supply of hand sanitizer and hand wipes.
_	Inform supervisor of needed resupply.
	o Radios, phones, doors, pumps, fuel cans, etc.
o -	
	cial Distancing and Protective Equipment
	Initiate, practice, and remind others of social
_	distancing.
	Conduct briefings and conversations outdoors and at
_	least 6 feet apart.
	Clean or replace dirty face coverings, equipment, and PPE.
	and FFE.
$C_{0}$	mmunications
	Face coverings and social distancing complicate
	communications. Ensure effective sender/receiver
	messaging.

Protect yourself, your crew, and your camp!

#### INCIDENT Weather Forecast

FORECAST NO: 04 NAME OF FIRE: Glass Fire

SHIFT DATE: Friday 10/02/2020 UNIT: Sonoma-Lake-Napa

TIME AND DATE

FORECAST ISSUED: 1900hrs 10/01/2020

Incident Meteorologist

Tom Bird

**WEATHER DISCUSSION:** Elevated to Critical fire weather conditions expected today with a **Red Flag Warning** still in effect today through early Saturday morning. IF the overnight forecast was on-target, we come into today's operations with very poor RH and warm temperatures across the fire on the slopes above the valley floors. Today will bring conditions very similar to what we saw yesterday, but with stronger winds expected. Well above average temperatures again, despite a couple degrees cooler. Relative humidity will continue very low with another day of minimums near 10%. Winds will be breezy from the northwest, with some gusty conditions over higher slopes and ridges. Expect northwest winds of 10 to 15 mph with gusts 20-25 mph in the afternoon. Another night of poor recovery, and slope breezes, tonight will keep conditions elevated. Winds turn westerly, and look to be breezy Saturday afternoon. Slight increases in moisture and drops in temperatures. However still warm and dry. Conditions moderate Sunday through the week ahead.

WEATHER FORECAST: \*\*\*RED FLAG WARNING TODAY above 1000 ft EI\*\*\*
\*\*\*HEAT ADVISORY TODAY\*\*\*

WEATHER: Mostly sunny. Hot, dry, and breezy with higher gusts on ridges and upper slopes.

MAX TEMPERATURES (1500ft): 91-96 hills. Near 96-101 valley floors.

**MIN HUMIDITY: 9-14%.** 

20 FT WINDS:

RIDGETOPS / SLOPES - Northwest 10-15 mph w/ gusts 20-25 mph.

**VALLEYS** – Northwest 5 to 10 mph with gusts 15-20 mph.

HAINES INDEX: 6 (High).

LAL: 1.

CHC of PCPN: 0% CWR: 0%.

STABILITY/INVERSION: Weak inversion, breaking by 11am. Smoke should clear in the afternoon.

FORECAST FOR NIGHT SHIFT: \*\*\*RED FLAG WARNING TONIGHT above 1000 ft EI\*\*\*

Mostly Clear. Warm overnight temps. Poor RH recoveries. Breezy and gusty over ridges and slopes. Minimum temperatures: 78-83 slopes and ridges / 60-65 valleys. Maximum RH: valleys 60-65% / 22-27% midslopes and above. Winds: Northwest 10-15 mph w/ gusts 20-30 mph ridges/slopes. Valley bottoms: Northwest 10-15 mph through midnight, then down drainage 5-15 mph.

**OUTLOOK FOR SATURDAY:** 

Mostly sunny. Warm and dry, breezy in the afternoon. Maximum temperatures: 85-92. Minimum RH: 20-25%. Winds: NW 3-8 mph early, then west 10-15 mph with gusts over ridges and upper slopes 20-30 mph.

**EXTENDED FORECAST (SUN-TUE):** 

Mostly sunny, but with a few more clouds. Temperatures cooling slightly, with a corresponding increase in RH. Winds generally lighter. Marine layer should deepen and move better inland for better overnight recoveries. Max Temps: 75-85. Min Temps: 50s valleys / 60-65 ridges. Min RH: 28-38%. RH recoveries 85-95% valleys / 50-55 ridges. Winds: South to southwest 5-15 mph.

FIRE BI	EHAVIOR FORECAST
FORECAST NUMBER: 4	TYPE OF FIRE: Wildfire
FIRE NAME: GLASS CA-LNU-15947	OPERATIONAL PERIOD: 10/2/20 - 10/3/20
DATE ISSUED: 10/1/2020	TIME ISSUED: 1900
UNIT: SONOMA - LAKE - NAPA	SIGNED: Typed/printed: Brian Newman FBAN

#### **INPUTS**

#### **WEATHER SUMMARY**

#### RED FLAG WARNING TODAY FOR HIGH TEMPS, LOW HUMIDITY'S AND BREEZY NW WINDS

Very warm again today with low humidity values for areas above 1000' in elevation. Breezy NorthWest winds 10-15 mph with gusts of 25 mph possible on the ridges. Poor overnight recovery and continued warm temperatures for the mid to upper slopes.

See IMET forecast for specific details

#### **OUTPUTS**

#### FIRE BEHAVIOR

**GENERAL:** Fuels and Fire Behavior advisory in effect for the area for above normal fine fuel loading and critical fuel moistures. See attached advisory.

The fuels in the fire area are made up heavy brush and a dense grass crop along with a mix of Hardwoods and Conifer timber. Fuel moistures are at critical levels with all fuel models contributing to fire growth. Expect another day of active fire behavior across the incident with the mid and upper slopes remaining active overnight. Continued breezy wind speeds are expected throughout the daytime period into the late evening which will be terrain driven for lower elevations and stronger across ridges and upper slopes.

#### ERC currently at 91% - Probability of Ignition 90%

#### SPECIFIC:

East Zone: Slope and fuel driven runs can challenge control lines, especially in wind aligned topography. Frequent torching in the pines and firs can produce multiple spot fires in the very receptive fuel beds. Spotting of 3/4 to 1 mile possible

West Zone: Steep topography with light flashy fuels and brush is allowing for short intense fire runs. North and West aligned drainages will see the highest activity with the forecasted winds, active backing and flanking will continue. Spotting up to 3/4 mile possible.

Air Operations: Smoke inversion will clear by midday; forecasted winds should not limit air operations.

#### Sunset 18:51 Sunrise 07:08

#### SAFETY

- Fuels are receptive to burning and spotting potential is very high, watch for signs of increased fire behavior
- Short intense fire runs are possible. Make sure you know where your safety zone is at and the time it takes to get there.

# **Fuels and Fire Behavior Advisory**

#### Northern California Geographic Area

September 29, 2020

Subject: Dry offshore and northerly winds, followed by high temperatures will rapidly dry out fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures during August and September, coupled with limited precipitation has expanded extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through early October. Light precipitation that passed over the northern part of the region only lowered fire danger for a very brief period. Fires have recently shown or exhibited moderate to rapid rates of spread or generate extreme fire behavior when influence by winds. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to above normal fine fuel loading. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will climb back up to between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values in temperatures. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

#### Fuels - Low Elevation Grass Crop

#### Sierra Foothills Rangeland Forage Production Data

- · 40 years of consistent data
- 2019-20 growing season 4<sup>th</sup> highest total
- 5 seasons of above normal in a row

<b>Top 5 Growing Seasons</b>	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links:

https://gacc.nifc.gov/oncc/fuelsFireDanger Bi.php https://gacc.nifc.gov/oncc/fuelsFireDanger Erc.php https://gacc.nifc.gov/oncc/fuelsFireDanger Hundred.php https://www.esrl.noaa.gov/psd/eddi/

https://vegdri.unl.edu/Home/StateVegDRI.aspx?CA https://gacc.nifc.gov/oncc/fuelsFireDanger Thousand.php

#### Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will likely continue until enough precipitation occurs to significantly increase and maintain higher fuel moisture readings for an extended period.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

#### **Mitigation Measures:**

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at https://gacc.nifc.gov/oncc/predictive/weather/index.htm or potential Red Flag conditions from the National Weather Service and weather at https://www.wrh.noaa.gov/fire2/cafw/.

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A9 NC03B, NC04, NC05, NC06, NC07 and NC08.

# SAFETY MESSAGE

A **Red Flag Warning** also known as a Fire Weather **Warning** is a forecast issued by the United States National Weather Service to inform area firefighting and land management agencies that conditions are ideal for wildland fire combustion, and rapid spread.

- RED FLAG WARNING: WEATHER IS GETTING HOTTER AND DRYER.
- Increase your hydration, electrolytes and nutrition with fruits and vegetables.
- Look Up, Down, and Around: (Trees can fall with little sound or warning).
- STOP COVID-19! (Distance 6 Feet, Cover Nose and Mouth, Wash Hands).
- Make sure everyone gets a briefing! (Details matter).
- Drive defensively and expect the unexpected (SLOW DOWN).
- Be cautious of cooperators working on power and utility lines down around the fire areas. <u>Treat all lines as if they are energized.</u>

#### **HYDRATE**

<u>H</u>ave enough cold water available for the entire shift.

You are responsible for your daily hydration habits

<u>Drink a minimum of one quart of water each</u> hour.

Remember that nutrition will keep your body healthy.

Avoid carbonated and caffeinated beverages.

Talk to your crew about Heat Illness prevention measures.

Evaluate the work pace based on the day's assignments.

#### 10's and 18's

10.ATTEMPTING FRONTAL ASSAULT ON FIRE

**CALFIRE INCIDENT MANAGEMENT TEAM 3 SOF1 David Sargenti**

#### FIRING PLAN AND GO / NO GO CHECKLIST

#### Test Firing Plan

The size and location of the test burn will be large enough and representative of the fuels of the proposed burn area.

#### Communications:

A radio net announcement at the incident will be made prior to firing operations. This will be communicated on tactical and command nets and will identify general location of geographic area to be burned. Special frequencies may or may not be used.

#### Frequencies:

- 1. Firing Group Tactical
- 2. Air to Ground
- 3. Aerial ignition discreet frequencies:

#### Slop-overs and Escapes:

If an escape/slop-over occurs notify the Division/Group Supervisor, who will take appropriate suppression actions. The Firing Group Supervisor will evaluate whether or not to continue firing and communicate such to the Division Group Supervisor. At all times, appropriate information will be transmitted through the chain of command to the Operations Section Chief.

#### Perimeter Firing Sequence:

The perimeter firing will proceed as follows:

Co		141.		
L.O	na	IT I	пп	

GO

Observed weather conditions: See IAP Weather Forecast Fire Behavior Burn Index: See IAP Fire Behavior Analysis

Ignition will begin at anchor point(s)  2.  3.		uence of riring:
4. 5.  Aerial Ignition Plan (Section 8344.5 of the CAL FIRE 8300 manual): 1. Ignition will begin at anchor point(s) 2. 3. 4.	1. lg	gnition will begin at anchor point(s)

### 8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
  - FEMT / FEMP
  - Communications Unit
- Communication Unit will clear command channel for emergency traffic; as needed for Minor/Major Emergency
- Communications will switch all emergency traffic to CALCORD as needed or requested.
- Communications Unit contacts:
  - Medical Unit
  - Safety
  - Operations
- Division Supervisor will run medical emergency on CALCORD.
- Medical Unit will:
  - Dispatch air/ground ambulance to as appropriate.
  - If necessary, after patient pickup, dispatch ambulance to helibase for transportation.
  - Notify receiving hospital of injury status.

**CAMP EMERGENCY:** Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

# CAL FIRE INCIDENT MANAGEMENT TEAM 3

# TRAINING SPECIALIST MESSAGE

# TRAINEES:

Please register with the TNSP as soon as possible in order to receive documented credit for your training assignment. Training is located directly next to check-in.

# TRAINERS/EVALUATORS:

The narrative in the ICS 225 (Performance Evaluation) should reflect the tasks performed by the trainee on the incident. Be as descriptive as possible.

Bring the following with you to register:

- -Incident Qualification Card
- -Initiated Position Task Book

**REMOTE CHECK-IN** 

-Trainee Registration Form

Matthew Seybert TNSP 714-875-4040

## **INCIDENT MANAGEMENT TEAM 3**

# DEMOBILIZATION MESSAGE Glass Incident CA-LNU-015947

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

## SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

## BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

## BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

# **PUBLIC INFORMATION SECTION**

Incident Information Line: (707)) 967-4207

Incident Media Line: (707) 967-4208

Incident Updates: www.fire.ca.gov/current incidents

STATUS						
Incident Start Date: 9/27/2020	Incident Start Time: 3:50 AM					
Cause: Under Investigation	Acres:					
Containment:	Total Personnel:					

MEDIA - The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found here.

CAL FIRE SOCIAL MEDIA POLICY - When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy here.

PHOTOGRAPHS AND VIDEOS OF INCIDENT - We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND - The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE Shasta Unit.

MAIL SERVICE - Mail/ packages can now be delivered to the Public Information trailer. All mail/ packages will be available for pickup at the Public Information trailer located in the entrance to base camp. Please use the following template to label the address: Daver Unado

Glass Fire PIO/ your name

1350 Bennett Valley Road

Santa Rosa, CA. 95404

# Peer Support Team Message: INCIDENT PEER SUPPORT:

We have a trailer on the incident for any peer support related needs and we are here for you. We may not be in the trailer at all times so please, DO NOT HESITATE to call us directly!

Amy Head 916 956-3277
Warren Parrish 916-823-6641
Chris Lomanto 916-247-6974
or
CAL FIRE Peer Support/Helpline

Below are other Team Members not on the incident who can also be contacted directly:

916-445-4337

Tony Howard 916-224-1543
Mike Aiello 916-584-0548
Jeremy Sanders 916-281-6472
Nikole Schutz 916-709-0434
Amber Henderson 805-794-1690
Connie Quarisa 916-213-8697
Noelle Bahnmiller 916-661-0011
Mike Deleo 916-661-0724
Shawna Powell 530-717-0667
Krissy Schaefer 619-592-6337

In addition to peer support, if there is a need, we can have a culturally competent Clinician available on the incident that could meet with you on an individual and/or group basis.

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together! Stay Healthy, Stay Alert and Stay Strong!

<sup>\*</sup>CAL FIRE Employees can also contact EAP directly at: 1-866-327-4762

# FINANCE SECTION

<u>FINANCE SECTION</u> is located in the "Saralee and Richard's Barn" Building. Enter from Redwood Plaza.

## CAL FIRE TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL make sure you have started your eFC-33's and update after each shift. Please make sure Epay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS Check in with the Time Unit and drop off your agreements.
- SHIFT TICKET BOOKS for line supervisors are available in the Time Unit (agency personnel only).

### **DIVISION / GROUP - LINE SUPERVISORS**

· Please make sure to turn in hired equipment shift tickets at the end of each shift.

## COMP / CLAIMS

- Damage Claims (suppression, property, vehicle), 3 ways to report:
  - o QR code at the bottom left
  - ICS-213. We will need location, description of damages, and your contact information.
  - LNU.Incidentclaims@fire.ca.gov
  - o Contact Number: (949) 680-8892
- WATER SOURCE WORKSHEET: Please complete the worksheet for water sources used.
   You can also use the QR code at the bottom right.
- Please report all injuries and suppression damage to the Comp / Claims, no matter how minor.

## **CAL OES REPRESENTATIVE**

Located in OES Command Unit on trailer row near Finance.

Roger Raines, FSC1 / Terry Eastwood, FSC1

Pat Aguada, FSC1

### ATTN: Federal Resources (specifically Federal Contracted Resources/ADs)

### **RE: Virtual Finance Support**

If you are assigned to a CAL FIRE managed incident, you have noticed that there is no "federal" time unit on site. We have developed a virtual finance section to provide you with your invoices/time sheets. We will need for you to <u>scan and email</u> your documents to the <u>R5.CalFire.Support@firenet.gov</u> email address. (If you do not have a "scanning" app on your phone and/or computer you may visit the clerical trailer. If no clerical trailer is available check in with the Finance Section for assistance.) In the subject line enter:

TIME - Resource # - Company/Person Name - Attachment description - Fire Name/Number

### **Contract Crew/Equipment:**

We need for you to send us the following information (even if you have submitted it to the CAL FIRE finance unit):

- Contact name, phone number, and email for on-site "leader"
- Resource Order
- Contract (Pages 1-2 and any additional pages referencing equipment/resource information)
- Crew Manifest
- Inspection (if one was done)
- Shift Tickets (signed by you and your incident supervisor) / CTRs (signed by your incident supervisor)

### Administratively Determined (AD) Resources:

We need for you to send us the following information:

- Contact phone number and email
- Resource Order
- Casual Hire Form
- CTRs (signed by your incident supervisor)

### **Federal Employees:**

As of right now, we are not planning to create OF-288s for Federal "regular" employees. Each of you can utilize your CTRs as your backup documentation for submitting your time sheets.

IF, however you require an OF-288, we will do our best to accommodate your needs. If you are claiming Hazard Pay, just like always, you must provide a justification for the claim ("H=Hazard") is NOT enough. Use "action verbs" to explain what/why you are claiming the hazard.

#### WHEN YOU ARE CLOSE TO DEMOB:

- Give Finance a "Courtesy Email" 1-2 days prior to make sure all your documents have been received.
- Submit all time documentation (including travel home) ahead of demob.
- Send an email the morning of your demob to the Support email so the demob process can be started from the virtual finance group.

## EMAIL: R5.CalFire.Support@firenet.gov

Please <u>do not</u> wait until the end of your assignment to get us your information. Since we are virtual, the process will take additional time.

The intent of this document is to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

### FIRE SUPPRESSION REPAIR GUIDELINES: GLASS INCIDENT CA LNU 015947

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be upgraded to their pre-fire condition to the extent feasible. Projects to large or complex to be completed by the Fire suppression repair group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by Operations and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities.

Examples of items that may be repaired include but are not limited to:

Infrastructure Damage	Natural Resource Damage				
Fences and gates	Soil erosion				
Culverts, bridges and other watercourse crossings	Adverse impacts to water quality				
Water Sources	Adverse impacts to protected species of plants and animals				
Utility distribution lines (above or below ground)	Dozer Line Repair				
Road barriers removed for fire access	Watercourse Crossings				
Trash, debris, and supplies left by fire suppression resources					
Miscellaneous damage to residential property					

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer lines:

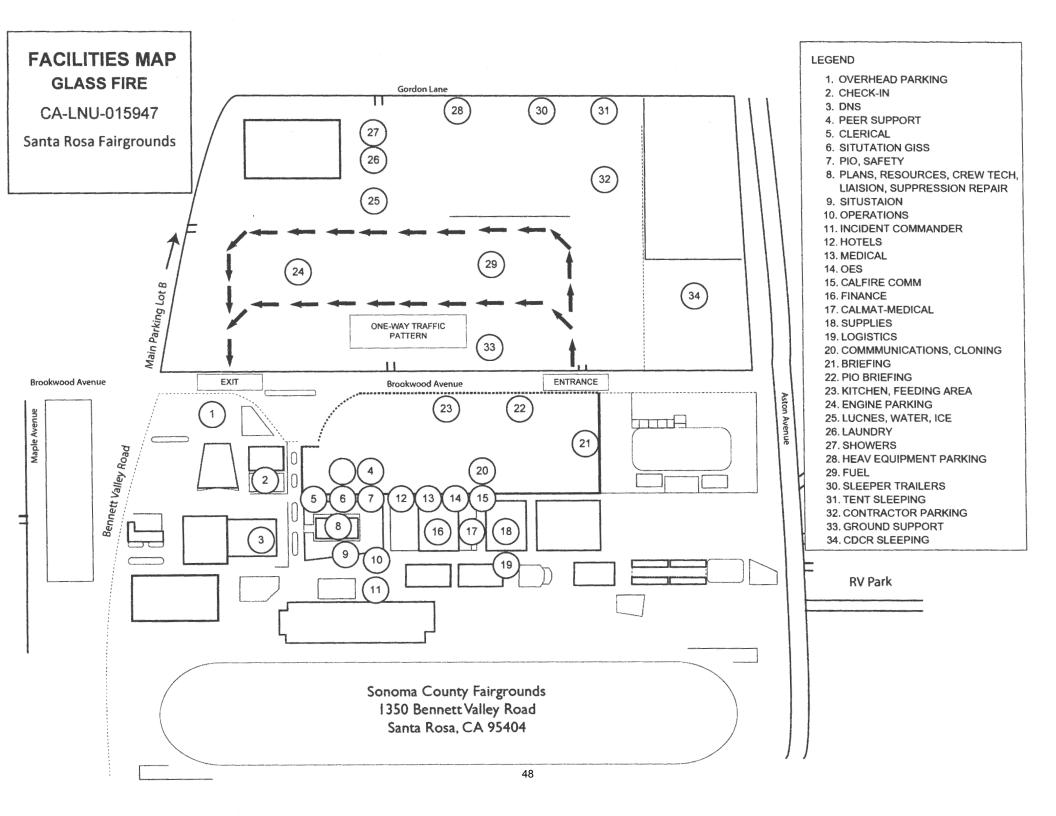

- Berms and push-piles shall be spread out to the extent feasible.
- Waterbreaks shall be constructed at an approximately 45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall repaired to pre-fire conditions to the the extent
  feasible. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire
  suppression activities have damaged or rendered road drainage facilities non-functional,
  waterbreaks or drivable rolling dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

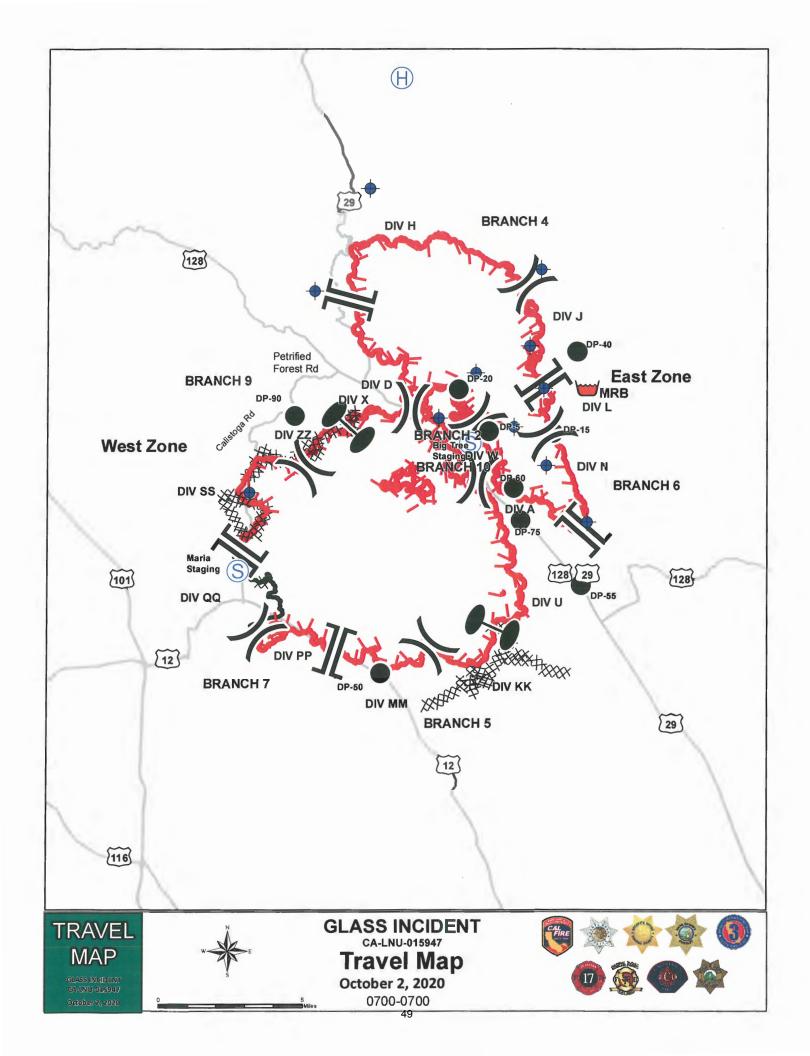

Slope Gradient	Maximum waterbreak spacing		
0-10%	200		
11-25%	150		
25-50%	100		
>50%	75		

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.
