INCIDENT Weather Forecast

FORECAST NO: 11 NAME OF FIRE: GLASS

SHIFT DATE: Friday 10/09/2020 UNIT: Sonoma-Lake-Napa

TIME AND DATE

FORECAST ISSUED: 1900hrs 10/08/2020

SIGNED: Incident Meteorologist

Tom Bird

WEATHER DISCUSSION: A deep marine layer pushed inland overnight across the fire with excellent relative humidity recovery, and cool temperatures, over the entire elevation range of the fire. Today will continue with cooler temperatures, as seen yesterday, and elevated afternoon relative humidity. Low level marine stratus will be slow to burn off with clouds lingering into the afternoon hours. Saturday will bring a third consecutive day of continued cool, mostly cloudy, and moist conditions. A Pacific trough will pass to the north, with no rain over the fire, but a slight increase in westerly winds Saturday afternoon. On Sunday, high pressure builds back over the west coast to begin trending the weather warmer and drier. A breezy north to northwest flow returns to flush out the marine moisture. This will quickly warm and dry the region for next week. Next week should be fairly typical for October, with mildly warm and dry conditions reestablishing over the fire. Late week, stronger offshore winds are possible. Above normal temperatures, and critically low relative humidity will likely push fire weather conditions to elevated and critical levels.

WEATHER FORECAST:

WEATHER: Patchy fog and low stratus. Mix of sun, clouds, and haze in the afternoon. Cool and moist.

MAX TEMPERATURES (1500ft): 65-70 hills. Near 70-75 valley floors.

MIN HUMIDITY: 40-50% Mountains. 45-55% valleys.

20 FT WINDS:

RIDGETOPS / SLOPES - Southwest to west 3-7 mph w/ gusts 10-12 mph VALLEYS - Generally southwest 3 to 7 mph with gusts 10 mph. Dir. weakly influenced by terrain

HAINES INDEX: 4 (Low).

LAL: 1.

CHC of PCPN: 0% CHC of WETTING RAIN: 0%.

STABILITY/INVERSION: Strong inversion, possibly holding all day. Moderate smoke and clouds.

FORECAST FOR NIGHT SHIFT:

Low stratus and fog with deep marine layer over the fire. Continued cool and moist. Minimum temperatures: 50-55 slopes and ridges to 45-55 valleys. Maximum RH: 90-100% valley bottoms to 70-80% above 2000 ft elevation. Winds: West 3 to 7 mph.

OUTLOOK FOR SATURDAY:

Partly to mostly cloudy. Still cool and moist. Maximum temperatures: 60-70. Minimum RH: 45-55%. Winds: southwest to west 5-10 mph valleys. West to northwest 10-15 mph over upper slopes and ridges.

EXTENDED FORECAST (SUN-TUE):

Warming and drying through the period. Breezy northwest to north winds. Max Temps: Warming from 75 to 85. Min Temps: 50-60. Min RH: 18-25%. Max RH 35-45% ridges, 55-65% valleys. Winds: Northwest to northeast 10-15 mph. Possible breezy overnight conditions from northwest to north 15-25 mph.

FIRE BEHAVIOR FORECAST

INPUTS

WEATHER SUMMARY

Temperatures will be much cooler today with an increase in daytime humidity values for all areas. West and Southwest winds 3-6 mph with gusts to 10-12 mph possible on the ridges. Good overnight humidity recovery on the upper elevations with recovery above 90% in the valleys.

See IMET forecast for specific details

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels and Fire Behavior advisory in effect for the area for above normal fine fuel loading and critical fuel moistures. See attached advisory.

Fuel moistures remain at critical levels in all fuel models and all are available to contribute to fire spread or new ignitions. Interior islands and smoldering heavy fuels may continue to see activity, even with increased humidity due to time lag moisture recovery. Overnight activity will be greatly diminished due to increased recovery and marine layer intrusion up to 4000 feet in elevation.

These values are valid for any news starts in the area or ignitions outside the line.

ERC currently at 95% - Probability of Ignition 79%

SPECIFIC:

East Zone: Fire activity limited to isolated pockets of heat and smoldering fuels that are spread across most of the zone. Interior islands with residual heat may see some activity, but will not be a threat to the control lines.

West Zone: Smoldering heavy fuels with limited isolated heat continue to burn in this zone. Interior pockets on the upper slopes will see the highest potential for activity due to wind gusts and residual heat in the heavy fuels, but will not be a threat to control lines.

Air Operations: Limited smoke impacts, but marine and cloud layer may inhibit ability to fly.

Sunset 18:41 Sunrise 07:14

SAFETY

- Fuels outside the line remain very receptive. Be prepared to react to new starts
- Don't let down your guard down. Tragedies have occurred during mop up, especially in light flashy fuels.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 29, 2020

Subject: Dry offshore and northerly winds, followed by high temperatures will rapidly dry out fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures during August and September, coupled with limited precipitation has expanded extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through early October. Light precipitation that passed over the northern part of the region only lowered fire danger for a very brief period. Fires have recently shown or exhibited moderate to rapid rates of spread or generate extreme fire behavior when influence by winds. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to above normal fine fuel loading. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will climb back up to between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values in temperatures. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels - Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- · 40 years of consistent data
- 2019-20 growing season 4th highest total
- · 5 seasons of above normal in a row

Top 5 Growing Seasons	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links:

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will likely continue until enough precipitation occurs to significantly increase and maintain higher fuel moisture readings for an extended period.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at

or potential Red Flag conditions from the National

Weather Service and weather at

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

SAFETY MESSAGE

SAFETY: Result of doing things right.

- FATIGUE/DEHYDRATION -Get adequate rest, drink water and eat regularly.
- DRIVE slowly and cautiously. (Falling trees, rolling material, utility workers).
- Working near heavy equipment: Always approach from the front and make sure the operator has visual contact before approaching equipment.
- Multiple hazards in the WUI: steep narrow roads, heavy fuel loading, wells, wooden septic tanks, long escape routes, public presence, and power lines.
- COVID-19 Precautions: Practice 6' distancing on the fireline.
- Look Up, Look Down and Around: (Trees can fall with little sound or warning).
- Mop up: Stay engaged on the tasks assigned.

Ash Pit Awareness:

- Observe the remnants of the vegetation model.
- Look for depressions in the ground.
- Use your hand tool to sound your way into the burn.
- White ash may be an indicator of an ash pit.
- Ensure that PPE is worn and properly fitted.

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - FEMT / FEMP
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic; as needed for Minor/Major Emergency
- Communications will switch all emergency traffic to CALCORD as needed or requested.
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on CALCORD.
- Medical Unit will:
 - Dispatch air/ground ambulance to as appropriate. 1.
 - If necessary, after patient pickup, dispatch ambulance to 2. helibase for transportation.
 - Notify receiving hospital of injury status.

CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

INJURY REPORTING INFORMATION

CAL FIRE INCIDENT MANAGEMENT TEAM 3

TRAINING SPECIALIST MESSAGE

TRAINERS/EVALUATORS:

Beat the Rush!!

If as much work as possible has been completed in the position task book, you are strongly encouraged to take advantage of your time in camp and conduct the training close-out with the TNSP. It is not necessary to wait until you demob.

TRAINEES:

Sunday, October 11th at 1200 hours is the deadline to close out your active training assignment with the TNSP. In order to receive documented credit for your training assignment, you must close out with the Training Specialist.

Bring the following to the "exit interview"

-Your properly initiated Position Task Book

-Completed and signed ICS 225 Performance Evaluation

-Completed and signed Evaluation Record

Forms are available at the Training Desk Remember: No documentation-it didn't happen!

Justin Voyson TNSP 661-547-8629

Matt Seybert TNSP 714-875-4040

In readiness is all

INCIDENT MANAGEMENT TEAM 3

DEMOBILIZATION MESSAGE Glass Incident CA-LNU-015947

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

PUBLIC INFORMATION SECTION

Incident Information Line: (707)) 967-4207 Incident Media Line: (707) 967-4208 Incident Updates: tinyurl.com/glassfire2020

STATUS						
Incident Start Date: 9/27/2020	Incident Start Time: 3:50 AM					
Cause: Under Investigation	Acres:					
Containment:	Total Personnel:					

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found here.

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy here.

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE Sonoma Lake Napa Unit.

MAIL SERVICE – PIO will only be receiving mail/ packages until Sunday 10/11/2020. If you are having something delivered and it's expected to arrive after Sunday, you can contact the Fairground's keeper at the front office for assistance.

FINANCE SECTION

<u>FINANCE SECTION</u> is located in the "Saralee and Richard's Barn" Building. Enter from Redwood Plaza.

CAL FIRE TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL make sure you have started your eFC-33's and update after each shift. Please make sure Epay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS Check in with the Time Unit and drop off your agreements.
- SHIFT TICKET BOOKS for line supervisors are available in the Time Unit (agency personnel only).

DIVISION / GROUP - LINE SUPERVISORS

· Please make sure to turn in hired equipment shift tickets at the end of each shift.

COMP / CLAIMS

- Damage Claims (suppression, property, vehicle), 3 ways to report:
 - QR code at the bottom left
 - ICS-213. We will need location, description of damages, and your contact information.
 - LNU.Incidentclaims@fire.ca.gov
 - o Contact Number: (949) 680-8892
- WATER SOURCE WORKSHEET: Please complete the worksheet for water sources used.
 You can also use the QR code at the bottom right.
- Please report all injuries and suppression damage to the Comp / Claims, no matter how minor.

CAL OES REPRESENTATIVE

Located in OES Command Unit on trailer row near Finance.

Roger Raines, FSC1 .
Terry Eastwood, FSC1

Pat Aguada, FSC1

WATER USAGE

DAMAGE CLAIM REPORT

RE: Virtual Finance Support

If you are assigned to a CAL FIRE managed incident, you have noticed that there is no "federal" time unit on site. We have developed a virtual finance section to provide you with your invoices/time sheets. We will need for you to <u>scan and email</u> your documents to the <u>R5.CalFire.Support@firenet.gov</u> email address. (If you do not have a "scanning" app on your phone and/or computer you may visit the clerical trailer. If no clerical trailer is available check in with the Finance Section for assistance.) In the subject line enter:

TIME - Resource # - Company/Person Name - Attachment description - Fire Name/Number

Contract Crew/Equipment:

We need for you to send us the following information (even if you have submitted it to the CAL FIRE finance unit):

- Contact name, phone number, and email for on-site "leader"
- Resource Order
- Contract (Pages 1-2 and any additional pages referencing equipment/resource information)
- Crew Manifest
- Inspection (if one was done)
- Shift Tickets (signed by you and your incident supervisor) / CTRs (signed by your incident supervisor)

Administratively Determined (AD) Resources:

We need for you to send us the following information:

- Contact phone number and email
- Resource Order
- Casual Hire Form
- CTRs (signed by your incident supervisor)

Federal Employees:

As of right now, we are not planning to create OF-288s for Federal "regular" employees. Each of you can utilize your CTRs as your backup documentation for submitting your time sheets.

IF, however you require an OF-288, we will do our best to accommodate your needs. If you are claiming Hazard Pay, just like always, you must provide a justification for the claim ("H=Hazard") is NOT enough. Use "action verbs" to explain what/why you are claiming the hazard.

WHEN YOU ARE CLOSE TO DEMOB:

- Give Finance a "Courtesy Email" 1-2 days prior to make sure all your documents have been received.
- Submit all time documentation (including travel home) ahead of demob.
- Send an email the morning of your demob to the Support email so the demob process can be started from the virtual finance group.

EMAIL: R5.CalFire.Support@firenet.gov

Please <u>do not</u> wait until the end of your assignment to get us your information. Since we are virtual, the process will take additional time.

FIRE SUPPRESSION REPAIR GUIDELINES: GLASS INCIDENT CA LNU 015947

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be upgraded to their pre-fire condition to the extent feasible. Projects to large or complex to be completed by the Fire suppression repair group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by Operations and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities.

Examples of items that may be repaired include but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges and other watercourse crossings	Adverse impacts to water quality
Water Sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	Dozer Line Repair
Road barriers removed for fire access	Watercourse Crossings
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer lines:

- Berms and push-piles shall be spread out to the extent feasible.
- Waterbreaks shall be constructed at an approximately 45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall repaired to pre-fire conditions to the the extent
 feasible. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire
 suppression activities have damaged or rendered road drainage facilities non-functional,
 waterbreaks or drivable rolling dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Slope Gradient	Maximum waterbreak spacing
0-10%	200
11-25%	150
25-50%	100
>50%	75

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.

Peer Support Team Message:

INCIDENT PEER SUPPORT:

We have a trailer on the incident for any peer support related needs and we are here for you. We may not be in the trailer at all times so please, DO NOT HESITATE to call us directly!

> Amy Head 916 956-3277 Warren Parrish 916-823-6641 Chris Lomanto 916-247-6974

CAL FIRE Peer Support/Helpline 916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

Tony Howard 916-224-1543
 Mike Aiello 916-584-0548
Jeremy Sanders 916-281-6472
 Nikole Schutz 916-709-0434
Amber Henderson 805-794-1690
 Connie Quarisa 916-213-8697
Noelle Bahnmiller 916-661-0011
 Mike Deleo 916-661-0724
 Shawna Powell 530-717-0667
 Krissy Schaefer 619-592-6337

In addition to peer support, if there is a need, we can have a culturally competent Clinician available on the incident that could meet with you on an individual and/or group basis.

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together! Stay Healthy, Stay Alert and Stay Strong!

^{*}CAL FIRE Employees can also contact EAP directly at: 1-866-327-4762
