FIRE BEHAVIOR FORECAST FORECAST NUMBER: 1 TYPE OF FIRE: Wildfire FIRE NAME: GLASS CA-LNU-15947 DATE ISSUED: 9/28/2020 UNIT: SONOMA / LAKE / NAPA FIRE BEHAVIOR FORECAST TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: 9/29/20 – 9/30/20 TIME ISSUED: 1900 SIGNED: Typed/printed: Brian Newman FBAN

INPUTS

WEATHER SUMMARY

Slightly cooler today but above average temperatures will continue. Expect very dry conditions throughout the day with poor overnight recoveries. Winds will be shifting throughout the day, starting from the East early, shifting to the South in the afternoon and finally to the West overnight.

See spot weather forecast for specific details

OUTPUTS

FIRE BEHAVIOR

GENERAL: The fuels in the fire area are made up heavy brush and a dense gross crop along with a mix of Hardwoods and Conifer timber. Fuel moistures are at critical levels in all fuel models and will continue to trend drier under the current conditions. Fire has exhibited rapid growth when aligned with slope and winds. Reburn potential exists in the brush and timber understory where preheating of the canopy occurred. The smoke inversion may dampen burning conditions early but expect fire behavior to increase dramatically once the air clears.

ERC currently at 94% - Probability of Ignition 88%

SPECIFIC:

East Zone: Shifting winds can challenge control lines for this zone. Frequent torching in the Grey pines can produce multiple spot fires in the very receptive fuel beds. Ridgetop winds will be stronger in the afternoon and evening, increasing spotting potential and distances. Spotting of ½ mile possible

West Zone: This zone will see an increase in activity as the winds shift throughout the operational period. South and West facing drainages will see winds increase with resulting increase in fire activity. Spotting of 1/4 to 1/2 mile possible

Air Operations: Smoke inversion will obscure the fire area until mid-afternoon. Once the winds begin the shift, opportunities for air operations may present themselves on the eastern and southern portions of the fire.

SAFETY

- Be aware of winds shifting throughout the operational period
- Short intense fire runs are possible. Make sure you know where your safety zone is at and the time it takes to get there.

SAFETY MESSAGE

fa·tigue

- 1. Extreme tiredness, typically resulting from mental or physical exertion or illness.
 - Maintain hydration & nutrition intake. (Rest when possible, maintain LCES)
 - Look Up, Down, and Around: Watch for rolling material, limbs and trees.
 - Understand the plan for the day and your individual role within the plan.
 - Environmental Hazards in the WUI (Public, Power lines, Hazardous Materials)
 - Shifting winds, predicted to change all day. Brief on expected fire behavior.
 - Drive defensively and expect the unexpected (Civilians, Trees, Debris Fall).
 - COVID-19 precautions: (6 Feet Distance, Cover Nose and Mouth, Wash Hands)

Check and Go: Rapid evaluation to check for occupants requiring removal or rescue.

Prep and Go: Some preparation prior to resources leaving the area.

Prep and Defend: Safety Zone or TRA are present and adequate time exists for defense.

Fire Front Following: Use behind fire front.

Bump and Run: Ahead of the fire front in the spotting zone to extinguish spot fires.

Anchor and Hold: Extinguish structure fires, protect exposures.

10's and 18's

FIRING PLAN AND GO / NO GO CHECKLIST

Test Firing Plan

The size and location of the test burn will be large enough and representative of the fuels of the proposed burn area.

Communications:

A radio net announcement at the incident will be made prior to firing operations. This will be communicated on tactical and command nets and will identify general location of geographic area to be burned. Special frequencies may or may not be used.

Frequencies:

- 1. Firing Group Tactical
- 2. Air to Ground
- 3. Aerial ignition discreet frequencies:

Slop-overs and Escapes:

If an escape/slop-over occurs notify the Division/Group Supervisor, who will take appropriate suppression actions. The Firing Group Supervisor will evaluate whether or not to continue firing and communicate such to the Division Group Supervisor. At all times, appropriate information will be transmitted through the chain of command to the Operations Section Chief.

Perimeter Firing Sequence:

The perimeter firing will proceed as follows:

Conditions:

GO

Sequence of Firing:

Observed weather conditions: See IAP Weather Forecast Fire Behavior Burn Index: See IAP Fire Behavior Analysis

Ignition will begin at anchor point(s)

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found here.

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy here.

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE Shasta Unit.

MAIL SERVICE - Mail service is not available at this time.

CAL FIRE TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE personnel make sure you have started your eFC-33's and update after each shift. Please make sure Epay schedules are up to date.
- Hired Equipment Suppliers Check in with the Time Unit and drop off your agreements.
- Shift Ticket books for line supervisors are available in the Time Unit (agency personnel only).

DIVISION / GROUP - LINE SUPERVISORS

• Please make sure to turn in hired equipment shift tickets at the end of each shift.

COMP / CLAIMS

- For any damage claims, please use the QR code at the bottom left or an ICS-213 to make the initial report. We will need location, description of damages, and your contact information.
- Please make complete the water source worksheet for water sources used. You can also use the QR code at the bottom right.
- Please report all injuries and suppression damage to the Comp / Claims Unit, no matter how minor.

Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief. The Motel Tech Spec will have information on this.
