INCIDENT Weather Forecast

FORECAST NO: 02

NAME OF FIRE: Glass Fire

SHIFT DATE: Wednesday 9/30/2020

UNIT: Sonoma-Lake-Napa

TIME AND DATE

FORECAST ISSUED: 1900hrs 9/29/2020

SIGNED: Tom Bird
Incident Meteorologist

WEATHER DISCUSSION: In the BIG picture, an unseasonably strong ridge of high pressure will remain anchored over the Western U.S. through the remainder of the week. This will keep temperatures abnormally warm and the conditions quite dry. The dry conditions will keep skies clear (except for smoke) and RH low. With loose pressure gradients, winds will be generally light again today. Directions will favor northerly in the morning, and southwesterly in the afternoon, but overall terrain influences will dominate. Northwest winds will increase Thursday afternoon through Friday to elevate fire weather conditions. A Red Flag Warning may be issued for this period. Both days will be warm and dry. High pressure begins to relax for the weekend to trend temperatures down, RH up, and winds lighter. This should moderate fire weather conditions.

WEATHER FORECAST: ****Persistent weather – a lot like yesterday – warm and dry****

WEATHER: Mostly sunny but with smoke hanging over the fire. Warm and dry with generally light winds.

MAX TEMPERATURES (1500ft): 86-91.

MIN HUMIDITY: 17-22%.

20 FT WINDS:

RIDGETOPS / SLOPES – Northwest 3-8 mph early, bcmg southwest 5-10 mph w/ gusts to 15 mph.
VALLEYS – Variable, generally less than 10 mph. A few afternoon gusts 12-15 mph.

HAINES INDEX: 6 (High).

LAL: 1.

CHC of PCPN: 0% **CWR:** 0%.

STABILITY/INVERSION: Inversion holding through mid-afternoon, keeping smoke over fire all day.

OUTLOOK FOR NIGHT SHIFT:

Mostly Clear. Minimum temperatures: 70-75 slopes and ridges / 60s valleys. Maximum RH: valleys 60-70% / 25-35% midslopes and above. Winds: Northwest 5-11 mph ridges and upper slopes. Valley bottoms: Down drainage 3-7 mph.

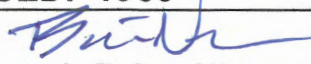

OUTLOOK FOR THURSDAY: ****Elevated Fire Weather – Breezy NW winds – Hot and Dry****

Mostly sunny and becoming breezy. Smoke blown to the southeast for better visibility. Maximum temperatures: 88-93. Minimum RH: 14-19%. Winds: Northwest 10-15 mph with afternoon gusts over ridges and upper slopes 20-25 mph.

EXTENDED FORECAST (FRI-SUN):

Continued breezy Thursday night through Friday with poor RH recoveries. Mostly sunny, but with a few more clouds. Temperatures cooling slightly, with a corresponding increase in RH. Winds will slacken for the weekend. Max Temps: 82-88. Min Temps: 60s valleys / 70s ridges. Min RH: 25-35%. RH recoveries 65-75% valleys / 50-55 ridges. Winds: Northwest 15-25 mph Friday. Variable, favoring south to southwest, 5-10 mph SAT and SUN.

INPUTS

WEATHER SUMMARY

Persistent weather pattern will continue for much of the week, with minor changes in afternoon humidity values. Overall light winds with localized topographic channeling, with a few afternoon gusts of 15 mph are possible.
See IMET forecast for specific details

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels and Fire Behavior advisory in effect for the area for above normal fine fuel loading and critical fuel moistures. See attached advisory.

The fuels in the fire area are made up heavy brush and a dense gross crop along with a mix of Hardwoods and Conifer timber. Fuel moistures are at critical levels with all fuel models contributing to fire growth. Expect another day of active fire behavior across the incident with the mid and upper slopes remaining active overnight. The smoke inversion may dampen burning conditions early but expect fire behavior to increase dramatically once the air clears.

ERC currently at 94% - Probability of Ignition 87%

SPECIFIC:

East Zone: Slope and fuel driven runs can challenge control lines for this zone, expect activity to increase with afternoon heating and thinning smoke layer. Frequent torching in the pines and firs can produce multiple spot fires with the very receptive fuel beds. Winds will be localized and terrain driven. Spotting up to ¼ mile possible

West Zone: Steep topography filled with light flashy fuels and brush is allowing for short intense fire runs. South and West facing drainages will see the highest activity especially in the afternoon due to surface heating and clearing smoke. Spotting up to ¼ mile possible.

Air Operations: Smoke inversion will obscure the fire area until mid-afternoon. Once the winds begin the shift, opportunities for air operations may present themselves on the eastern and southern portions of the fire.

Sunset 18:54 Sunrise 07:06

SAFETY

- Watch for diurnal wind shifts mid evening
- Rolling material can ignite fires below crews
- Be aware of sudden increases in fire behavior due to smoke clearing over the fire

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 29, 2020

Subject: Dry offshore and northerly winds, followed by high temperatures will rapidly dry out fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures during August and September, coupled with limited precipitation has expanded extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through early October. Light precipitation that passed over the northern part of the region only lowered fire danger for a very brief period. Fires have recently shown or exhibited moderate to rapid rates of spread or generate extreme fire behavior when influence by winds. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to **above normal fine fuel loading**. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will climb back up to between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values in temperatures. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will likely continue until enough precipitation occurs to significantly increase and maintain higher fuel moisture readings for an extended period.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at <https://gacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service and weather at <https://www.wrh.noaa.gov/fire2/cafw/> ..

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

DEMOBILIZATION MESSAGE Glass Incident CA-LNU-015947

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE Shasta Unit.

MAIL SERVICE – Mail service is not available at this time.
