INCIDENT Weather Forecast

FORECAST NO: 02

NAME OF FIRE: Glass Fire

SHIFT DATE: Wednesday 9/30/2020

UNIT: Sonoma-Lake-Napa

TIME AND DATE

SIGNED:

Tom Bird

FORECAST ISSUED: 1900hrs 9/29/2020

Incident Meteorologist

<u>WEATHER DISCUSSION:</u> In the BIG picture, an unseasonably strong ridge of high pressure will remain anchored over the Western U.S. through the remainder of the week. This will keep temperatures abnormally warm and the conditions quite dry. The dry conditions will keep skies clear (except for smoke) and RH low. With loose pressure gradients, winds will be generally light again today. Directions will favor northerly in the morning, and southwesterly in the afternoon, but overall terrain influences will dominate. Northwest winds will increase Thursday afternoon through Friday to elevate fire weather conditions. A Red Flag Warning may be issued for this period. Both days will be warm and dry. High pressure begins to relax for the weekend to trend temperatures down, RH up, and winds lighter. This should moderate fire weather conditions.

WEATHER FORECAST:

Persistent weather - a lot like yesterday - warm and dry

WEATHER: Mostly sunny but with smoke hanging over the fire. Warm and dry with generally light winds.

MAX TEMPERATURES (1500ft): 86-91.

MIN HUMIDITY: 17-22%.

20 FT WINDS:

RIDGETOPS / SLOPES - Northwest 3-8 mph early, bcmg southwest 5-10 mph w/ gusts to 15 mph.

VALLEYS - Variable, generally less than 10 mph. A few afternoon gusts 12-15 mph.

HAINES INDEX: 6 (High).

LAL: 1.

CHC of PCPN: 0% CWR: 0%.

STABILITY/INVERSION: Inversion holding through mid-afternoon, keeping smoke over fire all day.

OUTLOOK FOR NIGHT SHIFT:

Mostly Clear. Minimum temperatures: 70-75 slopes and ridges / 60s valleys. Maximum RH: valleys 60-70% / 25-35% midslopes and above. Winds: Northwest 5-11 mph ridges and upper slopes. Valley bottoms: Down drainage 3-7 mph.

OUTLOOK FOR THURDAY: ***Elevated Fire Weather – Breezy NW winds – Hot and Dry***
Mostly sunny and becoming breezy. Smoke blown to the southeast for better visibility. Maximum temperatures: 88-93. Minimum RH: 14-19%. Winds: Northwest 10-15 mph with afternoon gusts over ridges and upper slopes 20-25 mph.

EXTENDED FORECAST (FRI-SUN):

Continued breezy Thursday night though Friday with poor RH recoveries. Mostly sunny, but with a few more clouds. Temperatures cooling slightly, with a corresponding increase in RH. Winds will slacken for the weekend. Max Temps: 82-88. Min Temps: 60s valleys / 70s ridges. Min RH: 25-35%. RH recoveries 65-75% valleys / 50-55 ridges. Winds: Northwest 15-25 mph Friday. Variable, favoring south to southwest, 5-10 mph SAT and SUN.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2 TYPE OF FIRE: Wildfire

FIRE NAME: GLASS
CA-LNU-15947

OPERATIONAL PERIOD: 9/30/20 – 10/1/20

JNIT: SONOMA - LAKE - NAPA SIGNED: Find

Typed/printed: Brian Newman FBAN

INPUTS

WEATHER SUMMARY

Persistent weather pattern will continue for much of the week, with minor changes in afternoon humidity values. Overall light winds with localized topographic channeling, with a few afternoon gusts of 15 mph are possible.

See IMET forecast for specific details

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels and Fire Behavior advisory in effect for the area for above normal fine fuel loading and critical fuel moistures. See attached advisory.

The fuels in the fire area are made up heavy brush and a dense gross crop along with a mix of Hardwoods and Conifer timber. Fuel moistures are at critical levels with all fuel models contributing to fire growth. Expect another day of active fire behavior across the incident with the mid and upper slopes remaining active overnight. The smoke inversion may dampen burning conditions early but expect fire behavior to increase dramatically once the air clears.

ERC currently at 94% - Probability of Ignition 87%

SPECIFIC:

East Zone: Slope and fuel driven runs can challenge control lines for this zone, expect activity to increase with afternoon heating and thinning smoke layer. Frequent torching in the pines and firs can produce multiple spot fires with the very receptive fuel beds. Winds will be localized and terrain driven. Spotting up to ¼ mile possible

West Zone: Steep topography filled with light flashy fuels and brush is allowing for short intense fire runs. South and West facing drainages will see the highest activity especially in the afternoon due to surface heating and clearing smoke. Spotting up to ½ mile possible.

Air Operations: Smoke inversion will obscure the fire area until mid-afternoon. Once the winds begin the shift, opportunities for air operations may present themselves on the eastern and southern portions of the fire.

Sunset 18:54 Sunrise 07:06

SAFETY

- Watch for diurnal wind shifts mid evening
- Rolling material can ignite fires below crews
- Be aware of sudden increases in fire behavior due to smoke clearing over the fire

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 29, 2020

Subject: Dry offshore and northerly winds, followed by high temperatures will rapidly dry out fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures during August and September, coupled with limited precipitation has expanded extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through early October. Light precipitation that passed over the northern part of the region only lowered fire danger for a very brief period. Fires have recently shown or exhibited moderate to rapid rates of spread or generate extreme fire behavior when influence by winds. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to above normal fine fuel loading. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will climb back up to between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values in temperatures. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels - Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4th highest total
- 5 seasons of above normal in a row

Top 5 Growing Seasons	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links: https://gacc.nifc.gov/oncc/fuelsFireDanger Bi.php https://gacc.nifc.gov/oncc/fuelsFireDanger Erc.php https://gacc.nifc.gov/oncc/fuelsFireDanger Hundred.php

https://vegdri.unl.edu/Home/StateVegDRI.aspx?CA https://gacc.nifc.gov/oncc/fuelsFireDanger Thousand.php https://www.esrl.noaa.gov/psd/eddi/

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will likely continue until enough precipitation occurs to significantly increase and maintain higher fuel moisture readings for an extended period.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at https://gacc.nifc.gov/oncc/predictive/weather/index.htm or potential Red Flag conditions from the National Weather Service and weather at https://www.wrh.noaa.gov/fire2/cafw/ .

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

SAFETY MESSAGE

Com·mu·ni·ca·tion (n): A process by which information is exchanged between individuals through a common system of symbols, signs, or behavior.

- This is a marathon not a sprint. Pace yourself and get small wins!
- Manage fatigue, work smart, use good body mechanics.
- HEAT WAVE is forecasted. Maintain proper hydration & nutritional intake.
- Make sure everyone gets a briefing! (Validate the plan).
- Multiple hazards in the WUI: steep narrow roads, heavy fuel loading, wells, wooden septic tanks, long escape routes, public presence, and power lines.
- Drive defensively and expect the unexpected (Civilians, Trees, Smoke).
- SNAGS are everywhere. Size up your work area prior to engaging.
- COVID-19 Leadership: (6 Feet, Cover Nose and Mouth, Wash Hands).

Tailgate Safety Briefing Checklist

- Accountability: Everyone checks in and everyone checks out. Supervisors know where their crews are at all times.
- Communication: Everyone knows the communication plan and how to use their radio.
- ✓ Briefing: Everyone knows the plan for the day and their role in the plan.
- ✓ Safety Gear: Everyone has the appropriate safety gear.

LCES: Have these been addressed?

10's and 18's

8. CONSTRUCTING FIRELINE WITHOUT SAFE ANCHOR POINT

CALFIRE INCIDENT MANAGEMENT TEAM 3 SOF1 David Sargenti

INCIDENT RISK ANALYSIS ICS 215A

BRANCH	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
Dit ii voi:		Recognize signs of fatigue.
ALL	FATIGUE	Be aware of rest cycle while driving from incident.
		All personnel are responsible for their personal safety.
N=78		Prepare for slope reversal and wind shifts.
ALL	FIRE BEHAVIOR / RE-BURN	Be aware of preheated canopy and potential for re-burn.
		Watch your speeds.
		Drive defensively! Expect the unexpected.
ALL	DRIVING HAZARDS	Watch for road degradation and dusty conditions.
TILL		Be aware of debris in the roadways from rollout and suppression
		operations.
79537/8		Be aware of changing wind conditions.
ALL	WEATHER	Watch for changing weather conditions.
		Ensure adequate personnel and resources are available for the
100		operation.
ALL	FIRING OPERATIONS	Follow the Fire Operations checklist.
		Utilize Risk Management Process IRPG (p. 1).
		Be aware of weakened structures, roadways, and driveways.
ALL	WUI HAZARDS	 Scout for propane tanks, septic tanks, and wells.
		 Watch out for public, power lines, narrow roads and poor egress.
	DOWNER LANGE	Be cautious of down lines.
ALL	POWER LINES	Make appropriate notifications if found.
1111	THE COST A CONTACT OF THE COST OF THE COST	Drink water before, during and after each shift.
ALL	HYDRATION/NUTRITION	 Be alert for signs of heat stress in yourself and others.
	FIRE AND DROUGHT	 Follow Hazard Tree Safety Guidelines (IRPG p. 22).
ALL	WEAKENED TREES/SNAG	 Many of the trees within the fire area and along roadways are
0.0000000	HAZARDS	stressed due to drought conditions and burn times.
		 Watch for civilian traffic.
ALL	CIVILIAN PRESENCE	 Be aware that civilians continue to occupy the fire area
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,		 Watch for residents in and around the area.
		 Check the communication plan for frequency assignments.
ALL	COMMUNICATIONS	 Be clear and concise when talking on the radio.
		 Use human repeaters as needed.
ALL	BRIEFINGS	 Make sure everyone gets a briefing on the plan for the day.
ALL	DMERINGS	 Document this on your ICS 214.
ALL	LCES	 Ensure that LCES is being utilized.
		 Be aware of rotor wash when working near helicopters.
ALL	AIRCRAFT AWARENESS	 Understand that hazardous trees may react to helicopters
ALL	AINCIAI I AVANEIVESS	overhead.
		 Monitor assigned aircraft frequencies.
ALL	HEAVY EQUIPMENT	 Be aware of heavy equipment working in the area.
ALL	HEAT I EXCHINENT	 Be watchful around heavy equipment, they may not see you.
	20 (000-000) (000-	 Wear mask when in camp and around the public.
ALL	COVID 19	 Wash/sanitize hands often, Social distancing when applicable.
		 Complete daily COVID screening process.

FIRING PLAN AND GO / NO GO CHECKLIST

Test Firing Plan

The size and location of the test burn will be large enough and representative of the fuels of the proposed burn area.

Communications:

A radio net announcement at the incident will be made prior to firing operations. This will be communicated on tactical and command nets and will identify general location of geographic area to be burned. Special frequencies may or may not be used.

Frequencies:

- 1. Firing Group Tactical
- 2. Air to Ground
- 3. Aerial ignition discreet frequencies:

1. Ignition will begin at anchor point(s)

Test Fire is favorable

П

Slop-overs and Escapes:

If an escape/slop-over occurs notify the Division/Group Supervisor, who will take appropriate suppression actions. The Firing Group Supervisor will evaluate whether or not to continue firing and communicate such to the Division Group Supervisor. At all times, appropriate information will be transmitted through the chain of command to the Operations Section Chief.

Perimeter Firing Sequence:

Sequence of Firing:

The perimeter firing will proceed as follows:

Conditions:

Observed weather conditions: See IAP Weather Forecast Fire Behavior Burn Index: See IAP Fire Behavior Analysis

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - FEMT / FEMP
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic; as needed for Minor/Major Emergency
- Communications will switch all emergency traffic to CALCORD as needed or requested.
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on CALCORD.
- Medical Unit will:
 - Dispatch air/ground ambulance to as appropriate.
 - If necessary, after patient pickup, dispatch ambulance to helibase for transportation.
 - Notify receiving hospital of injury status.

CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

CAL FIRE INCIDENT MANAGEMENT TEAM 3

TRAINING SPECIALIST MESSAGE

TRAINEES:

Please register with the TNSP as soon as possible in order to receive documented credit for your training assignment. Training is located directly next to check-in.

TRAINERS/EVALUATORS:

The narrative in the ICS 225 (Performance Evaluation) should reflect the tasks performed by the trainee on the incident. Be as descriptive as possible.

Bring the following with you to register:

- -Incident Qualification Card
- -Initiated Position Task Book
 - -Trainee Registration Form

REMOTE CHECK-IN

Matthew Seybert TNSP 714-875-4040

Mut

INCIDENT MANAGEMENT TEAM 3

DEMOBILIZATION MESSAGE Glass Incident CA-LNU-015947

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

PUBLIC INFORMATION SECTION

Incident Information Line: (707)) 967-4207

Incident Media Line: (707) 967-4208

Incident Updates:

Incident Start Date: 9/27/2020	Incident Start Time: 3:50 AM
Cause: Under Investigation	Acres:
Containment:	Total Personnel:

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found <a href="https://example.com/here.com/he

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy here.

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE Shasta Unit.

MAIL SERVICE - Mail service is not available at this time.

GLASS INCIDENT FINANCE MESSAGE

Finance is located in the "Saralee and Richard's Barn" Building

CAL FIRE TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE personnel make sure you have started your eFC-33's and update after each shift. Please make sure Epay schedules are up to date.
- Hired Equipment Suppliers Check in with the Time Unit and drop off your agreements.
- Shift Ticket books for line supervisors are available in the Time Unit (agency personnel only).

DIVISION / GROUP - LINE SUPERVISORS

 Please make sure to turn in hired equipment shift tickets at the end of each shift.

COMP / CLAIMS

- For any damage claims, please use the QR code at the bottom left or an ICS-213 to make the initial report. We will need location, description of damages, and your contact information.
- Please make complete the water source worksheet for water sources used.
 You can also use the QR code at the bottom right.
- Please report all injuries and suppression damage to the Comp / Claims Unit, no matter how minor.

Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief. The Motel Tech Spec will have information on this.

ROGER RAINES, FSC1, IMT3
