INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: August Complex West Zone	2. Operational Period:	Date From: Date 10/15/2020 To: 10/18/2020 Time From: Time 0700 To: 0700
--	-------------------------------	--

3. Objective(s):

- Management Objectives
- Provide for emergency personnel and public safety at all times.
 - Ensure COVID-19 precautions and best practices are met at all times.
 - Protect property, improvements, and infrastructure.
 - Ensure coordinated, timely and accurate release of public information.
 - Foster and maintain relationships with all cooperators and stakeholders.
 - Protect economic, natural, cultural and heritage resources.
 - Maintain fiscal accountability and keep costs commensurate with values at risk.

- Control Objectives
- Keep the fire within established control lines.

- General Situational Awareness:**
- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

INCIDENT Weather Forecast

TRANSITION FORECAST

NAME OF FIRE: August Complex West Zone

PREDICTION FOR: Day/Night Shifts

UNIT: Branch 7,9

SHIFT DATE: Thursday, October 15, 2020

SIGNED: 
Todd.Carter@noaa.gov - 509-319-0474

FORECAST ISSUED: Thursday, October 14, 2020

Incident Meteorologist (IMET)

Obtain a Spot Weather Forecast from NWS Eureka for Forecast Updates

WEATHER DISCUSSION:

***** Critically Dry, Hot and Breezy at times Wednesday, Thursday and Friday Morning *****

Red Flag warnings are in effect. Early Thursday morning and Thursday night winds funnel through the gaps such as Hell Hole Canyon at 10-15 mph with poor relative humidity recovery. Critically low relative humidity will likely be widespread into Friday. We'll see a northeast wind surge and potential humidity again down to around 10-18 percent during the day Thursday. Northeast winds will be a bit weaker during late morning and early afternoon but surge again Thursday night into early Friday. Critically hot and dry conditions will continue Friday with a weaker east surge Friday night. During the weekend it appears there may be some cooling and more seasonal northwest wind but there will be no precipitation in the extended forecast so it will remain dry.

WEATHER FORECAST TODAY (Thursday): Red Flag Warning in Effect

WEATHER: Clear of Clouds. Patchy smoke.

MAX TEMPERATURE: 86-92 F lower valleys; 76-82 F upper slopes and ridgetops.

MIN HUMIDITY: 10-18% valleys and 9-15% ridges.

20 FT WINDS:

RIDGETOP – North to northeast 12-18 mph gusts to 25 mph decreasing a bit during the afternoon.

SLOPE/VALLEY – Northeast to east winds of 8 to 14 mph with gusts to near 25 mph and the morning and again late afternoon. It's possible some sheltered valley will be light in the morning to early afternoon with northeast wind later.

*****Watch for possible variable directions of wind to 10 mph sheltered valleys between 1600 and 1800 *****

HAINES INDEX: 6 (High)

STABILITY/INVERSION: Inversions lifting around 1000 hours in deep valleys.

WEATHER FORECAST TONIGHT (Thursday Night): Red Flag Warning in Effect

WEATHER: Red Flag Warning in effect. Clear of cloud. Possible areas of smoke. Another surge of wind tonight.

MIN TEMPERATURE: 55-65 valleys and ridges.

MAX HUMIDITY: 15%-22% all Elevations; 35% where winds are light in sheltered valleys.

20 FT WINDS:

RIDGETOP – Northeast 14-20 mph. Gusts up to 30 mph overnight.

SLOPE/VALLEY –Northeast 10-15 mph with gusts to 25 mph in the evening. Some sheltered valleys not exposed to east wind may turn and variable or have sudden bursts of east wind overnight.

HAINES INDEX: 5 (Critical).

STABILITY/INVERSION: Inversions forming around 1900.

TUESDAY THROUGH THURSDAY: **** Hot, Dry and increased Wind later Wednesday into Thursday ****

Day	Friday	Saturday	Sunday
Sky/Shading/Smoke	Patchy Smoke Hot	Patchy Smoke	Patchy Smoke Hot
High Temperature	80-85 Ridges; 88-93 Valleys	75-80 Ridges; 85-90 Valleys	72-77 Ridges; 82-87 Valleys
Ridge RH Recovery (%)	15-25%	25-35%	25-35%
Min Rh (%)	9-15%	13-22%	16-27%
20 foot PM Winds (mph)	NE-NW 6-12 G 20	NW 5-10 G20	NW 3-6 G15

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 33	TYPE OF FIRE: Wildland Fire

DATE ISSUED: 10/12/20	TIME ISSUED: 2100
UNIT: MEU	SIGNED: FBAN – Troy Velin

INPUTS

WEATHER SUMMARY

See attached Weather Forecast in IAP

FIRE BEHAVIOR

GENERAL:

Fuels range from annual grasses, light to heavy brush and timber. This area of California is under a Fuels and Fire Behavior Advisory (dated 9/29/20) for extremely dry fuels and resulting increases in fire behavior.

We start the week of October 10th on the heels of a short-lived measurable rain. This rain did little for wide scale fuels modification and the 1 hour and 10-hour fuels will recover by Tuesday afternoon. BI on 10/10 was 38 and the low value is due to the rain event, ERC is 52, also because of rain. 100hr fuels recovered slightly to 10% but the average for this time period is 13%. 1000hr fuels are at 9% and is above the 95th percentile for dryness. Live fuels are still critically dry and there is little hope for recovery before finally bottoming out as dormant until next spring.

A high-pressure system moved into the West coast on Sunday and will over the coming days establish itself in the region. This will bring high temperatures and low humidities as well as a chance for a moderate to strong North / Northeast wind event later this week. This wind event will blow dry winds through dry fuels and will increase the potential for large fire growth. In this area we have seen even mild events (less than 10mph) exhibit extreme fire growth and behavior.

Branch – 7

Under a warming and drying trend pockets of heat within the control lines may become active. Lightly burned areas are always a concern for reburn, especially in Autumn when leaves begin to fall and cover established control lines. Needle cast in timber fires will also be a concern until all heat has been removed. During the wind event later this week, monitor for heat and growth in the Hellhole canyon. If unchecked, Southwest growth is likely and could be extreme. A NE wind as little as 8mph is all that would be necessary in the aligned drainage for the fire to reach proposed control lines in one burn period.

Weather and Fire Behavior tools for Firefighters:

Northern California Gacc; <https://gacc.nifc.gov/oncc/> has useful information on weather, fuels, analysis and Monthly & Seasonal outlooks.

Wildfire Analyst Pocket App (WFA Pocket); Available as a free Android or IOS application that was developed to provide firefighters with fire behavior calculations and outputs that are viewed in a 3d map interface allowing firefighters to change parameters and see real time results on the map.

Wind Ninja: This is a product of the USFS Rocky Mountain Research Station that computes varying wind fields for wildland fire application. Wind Ninja Mobile is a free phone application available on Android and IOS devices.

Safety

Being a Fire Behavior Analyst is simply observing and communicating the interactions between the Fuel, Weather and Topography. But we are all responsible for these observations and communications. Supervisors have a duty to evaluate the fire environment and pass them along to their resources. Take the time to become situationally aware of the fire environment around you and anticipate what fire on the landscape will do under current and expected weather, fuel type changes and changes in topography.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 29, 2020

Subject: Dry offshore and northerly winds, followed by high temperatures will rapidly dry out fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures during August and September, coupled with limited precipitation has expanded extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through early October. Light precipitation that passed over the northern part of the region only lowered fire danger for a very brief period. Fires have recently shown or exhibited moderate to rapid rates of spread or generate extreme fire behavior when influence by winds. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to above normal fine fuel loading. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will climb back up to between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values in temperatures. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels - Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4th highest total
- 5 seasons of above normal in a row

2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links:
https://gacc.nifc.gov/oncc/fuelsFireDanger_Bi.php
https://gacc.nifc.gov/oncc/fuelsFireDanger_Erc.php
https://gacc.nifc.gov/oncc/fuelsFireDanger_Hundred.php
<https://vegdril.unl.edu/Home/StateVegDRI.aspx?CA>
https://gacc.nifc.gov/oncc/fuelsFireDanger_Thousand.php
<https://www.esrl.noaa.gov/psd/eddi/>

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will likely continue until enough precipitation occurs to significantly increase and maintain higher fuel moisture readings for an extended period.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at <https://gacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service and weather at <https://www.wrh.noaa.gov/fire2/cfw/>.

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

**August Complex West Zone - MEU
HEALTH AND SAFETY MESSAGE**

INCIDENT: August Complex West Zone-MEU
CA-MEU-010843

DATE: October 15-18, 2020

TIME: 0700-0700

3 DAY EMPHASIS

HAZARD TREES AND SNAGS – COMPLACENCY – WEATHER

HAZARD TREES AND SNAGS

EVERY DIVISION POTENTIAL FOR ROLLOUT AND WIND STRESSED TREES

Watch Out – Line personnel continue to report tree fall, limb fall, some of which were near misses. Wind conditions will vary over the next 3 days which will have an impact on stressed trees. Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazard trees. Numerous incidents in the last few months of snags and falling trees have cause damage and or injury to firefighters.

Mitigation – Watch where you are walking, working, parked and driving. Eliminate the hazards with qualified sawyers or heavy equipment. Avoid hazards by designating “No Work Zones” (flag and map), limit nighttime operations. Modify suppression tactics or fireline location to avoid high risk trees. Post lookouts to help secure high-risk areas. Provide feedback regarding hazard trees. **Keep clear of bucket drops near trees/snags.**

COMPLACENCY

THE FIRE IS WINDING DOWN – DON'T GET COMPLACENT

Watch Out - Now is when some personnel may begin to forget the basics. With less fire activity we lose sight of being on the lookout for other hazards and risks. Patrol and aggressive mop-up can seem routine. Many accidents occur during overhaul – this is not the time to get hurt!

Mitigation- **Stay alert and maintain situation awareness.** Maintain high levels of line leadership and coach members of your team to take care of one another. Slow down and take breaks during exhaustive work. Stay hydrated, eat healthy and don't forget the basics.

WEATHER/FUELS

INCREASED WINDS and WIND SHIFTS IN FIRE AREA

Watch Out – This fire can wakeup due to winds over the next 3 shifts. Live and dead fuels are extremely dry across Northern California. Extreme fire behavior and rapid rates of spread are occurring in these areas, even when winds are light. Fire behavior changes due to current fire weather indices resulting in explosive fuels. Working in and around above normal fine fuel loading. Expect slope reversal anytime fire is backing into a drainage. Fire behavior will remain elevated across the mountains across the region, until significant rainfall occurs.

Mitigation - Remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions. **Fight fire aggressively but provide for safety first.**

- **Conduct a daily briefing with all personnel**
- **Briefing checklist can be found on the inside back cover of the IRPG**
- **Review the 215a and take tactical pauses to conduct hazard and risk assessments throughout the shift**

August Complex West Zone - MEU RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FATIGUE/DEHYDRATION	<p>Be alert for signs of fatigue and take breaks as necessary.</p> <p>Monitor incoming resources for level of fatigue.</p> <p>Drink water before, during and after shifts, up to 1.5 gal. per shift.</p> <p>Be alert for signs of heat stress in yourself and others; use the buddy system.</p> <p>Eat small meals often and when possible. Find shade when you can.</p> <p>Drink electrolyte drinks at a 2 water to 1 sport drink ratio.</p>
ALL	HAZARD TREES/TREE FELLING SAFETY	<p>Look up, look down, look around when entering timber.</p> <p>Identify and isolate the area to provide for the safety of others.</p> <p>Flag and make proper notifications. Do not leave incomplete falling operations.</p> <p>Monitor when mopping up. Watch where you park.</p> <p>Size up and mitigate concerns, work within your qualifications.</p>
ALL	COMPLACENCY	<p>Don't underestimate the task at hand. Wear full PPE while on the line.</p> <p>Everyone should be briefed on the conditions and circumstances regarding the fire and their assignments per the IRPG. Today is different than last shift, even if in the same area.</p>
ALL	INCREASING FIRE BEHAVIOR	<p>Know your LCES and maintain Situational Awareness.</p> <p>Use experienced Lookouts.</p> <p>Monitor weather for changes in the wind, temp, and RH during the shift.</p> <p>Have a contingency plan with established decision points and safety zones.</p>
ALL	AIRCRAFT OPERATIONS	<p>Monitor air-to-ground frequency, they are your eyes in the sky.</p> <p>Use air-to-ground frequency to communicate with aircraft.</p> <p>Use clear, concise statements when directing aircraft.</p> <p>Clear the area for incoming water and retardant drops.</p>
ALL	HEAVY EQUIPMENT	<p>Watch for rolling material avoid working below heavy equipment.</p> <p>Monitor safe working distances provide adequate working space.</p> <p>Utilize communication with the operators, stop if poor visibility (radio or hand signals).</p>
ALL	WEATHER CHANGES	<p>Monitor for possible wetting rain and increased temperatures on the fireline.</p> <p>Expect erratic winds. Communicate weather changes on fireline Monitor engine placement for access and egress. Roads will have oils rising to the top, account for increased stopping distances.</p>
ALL	DRIVING HAZARDS	<p>Complete appropriate DOT daily vehicle inspection.</p> <p>Slow Down! Long travel times to the line, stay alert. Stop if fatigued.</p> <p>Drive defensively! Expect the unexpected around every curve.</p> <p>Drive with headlights and seatbelts on. Narrow roads with limited passing room.</p> <p>Expect roads to deteriorate over the shift.</p>
ALL	COMMUNICATIONS	<p>Confirm correct tactical and command channel. No unassigned radio channels.</p> <p>Check your Air to Ground to make sure it is correct for your branch.</p> <p>Check your command frequency if you have moved branches or divisions.</p> <p>Ensure correct communication with neighboring federal zones.</p>
ALL	COVID 19	<p>Wear a mask when applicable; Utilize hand sanitizer and wash hands frequently.</p> <p>Maintain social distancing; Disinfect apparatus and coolers frequently; Adhere to local, state and federal Covid-19 guidelines.</p>
ALL	ENVIRONMENTAL HAZARDS	<p>Maintain situational awareness for illegal activity and hunters.</p> <p>Wash poison oak off hands and clothes.</p> <p>Be aware of wild animals. (Bears, Mountain Lions, Bees, etc.)</p>
	DATE PREPARED: October 14, 2020. 0900	OPERATIONAL PERIOD; Oct. 15-18/ 2020 0700-0700

CONTROL OPERATIONS:

TASK: Construct indirect fireline.

PURPOSE: Keep fire Northwest of indirect fireline location.

END STATE: Fireline in the correct location with the right dimensions to contain the fire.

Risk Assessment: Low: Patrol and indirect line construction.

SPECIAL INSTRUCTIONS:

- Utilize Risk Assessment Tool before tactical engagement.
- Do not deviate from planned travel route to and from worksite. Remain in spike camp after 2100. Disengage all resource in localized threat areas. Complete logistical duties, such as fuelling, in the morning outside of spike camp.
- Follow CDC guidance and established local, state and national guidance to ensure a healthy work environment. Adhere to the "module of one" concept to reduce physical exposure and transmission of COVID 19. Resources with symptoms notify COVID coordinator at 530-551-1729.
- Resource advisors will be operating in multiple divisions. They will check in & out with DIVS each time they enter and exit that division. Lead READ is Tom DeMeo (503) 267-3943
- Contact DIVS for initiating resource extension or crew swaps.
- Resources returning from R&R or swapping crew members MUST CALL CHECK-IN prior to shift.
- Communicate radio dead spots to DIVS.
- Ensure communication with divisions on adjacent Zones.

\$ FINANCE MESSAGE \$

CAL FIRE PERSONNEL

Make sure to update and finalize FC-33's throughout the incident.

ALL HIRED EQUIPMENT

Contact Hired Equipment Tech Spec from MEU so they can track your shift tickets and get them turned in to the time keeper in MEU. Make sure you get your shift ticket filled out by your **Fire Suppression Repair Supervisor.**

ALL SUPERVISORS OF HIRED EQUIPMENT

Shift Tickets for hired equipment need to be signed and turned in to MEU Time daily. Ensure the shift ticket is filled out completely (including evaluation), accurately and legibly. **Example included in IAP.**

PROPERTY DAMAGE or INJURIES

Please report any property damage caused by suppression activities and/or injuries to your **Division Group Supervisor.**

**Time will be located at Howard Forest HQ located at:
17501 N. Hwy. 101
Willits, CA 95450**

**Hired Equipment Number:
707-972-1875**

CALFIRE FINANCE MESSAGE

TIME UNIT

We are undergoing a new process to speed up Demob for *Cal Fire - Hired Equipment*. Financial payment documents for *Cal Fire - Hired Equipment* will be completed through E-Mail with DocuSign unless other arrangements have been made prior to Demob

When Demobing from the Incident, please bring the Time Unit the following information...

- EMAIL ADDRESS FOR REPRESENTATIVE WHO WILL SIGN DOCUMENTS
- NAME OF SIGNEE
- PHONE # FOR SIGNEE
- GOLDEN TICKETS

Hired Equipment Suppliers will meet with a Time Representative at Demob, who will assist with gathering all information to ensure proper payment of equipment

***Electronic processing will allow for Faster Processing and Payment to Supplier's**

****Documents can be signed and completed with any Smart Device (Smart Phone, Tablet, Computer) and does NOT require an account with DocuSign to complete**

Any Questions E-Mail imt5finance@gmail.com

CALFIRE 297

Important Information

Briefings

Friday and Saturday will be at Howard Forest 17501 US-101, Willits, CA 95490

Logistics

Meals

- Breakfast will be at Howard Forest Park starting at 6 am.
- Friday and Saturday, lunches, hydration, and fuel can be obtained from the CALFIRE Covelo Station located at 77251 Covelo Road, Covelo, CA 95428
- Meals during R&R in Willits:
 - Lumberjacks
 - Taqueria Bravo

Accommodations

Agency personnel contact Justin Smith @ 707-391-6710

All CDCR Crews, except those from Parlin Fork Camp, will R&R at Chamberlain Camp.

Demob

Starting Friday, Demob will be out of Howard Forest Headquarters.

Cause: Lightning	West Zone Containment:
	West Zone Total Personnel:

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

Training Message

As a reminder;

***The Training Specialist has left the
incident.***

If you are a Trainee and did not check out with Training, please keep copies of your ICS 225 and your Performance Evaluations and forward them to your Training Department.

Thank you,

Dottie Shaw

Training Specialist Team 5

DEMOBILIZATION PLAN
August Complex West Zone
CA-MEU-010843

DEMOB PROCEDURES

- Due to COVID-19, every effort will be made to ensure the demobilization procedures will limit face to face contact. Please follow the following plan:
- Check the demob list daily. You can find the demob list posted around camp or by utilizing the QR code on your IAP. Please report to demob only at your scheduled time.
- Wear a facial covering and maintain proper social distancing guidelines throughout the demob process.
- The Demob Unit will provide you with an ICS-221 check-out form.
- Every effort will be made to provide a remote demob.
- For the following units, demob personnel will make radio contact to ensure you are clear for demobilization:
 - Supply Unit
 - Communications Unit
 - Accomodations Unit (If applicable)
- For the following units, you will report in person to complete your check-out:
 - Time Unit
 - Documentation Unit
 - Training Specialist (If applicable)
 - Ground Support Unit
- Please ensure only essential personnel (Strike Team Leaders, Crew Boss's, One person per single resource, etc) are attending the in person demob.
- Finally, return your completed ICS 221 to the Demob Unit and you will be advised of your status (released home, reassigned, etc.)

Greg Barnhart
Demobilization Unit Leader
CAL FIRE Incident Management Team 5

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site
F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you or your department (not Finance) will mail to
OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

FIRE SUPPRESSION REPAIR PLAN: AUGUST WEST INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be upgraded to functional status to mitigate future damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rockied areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

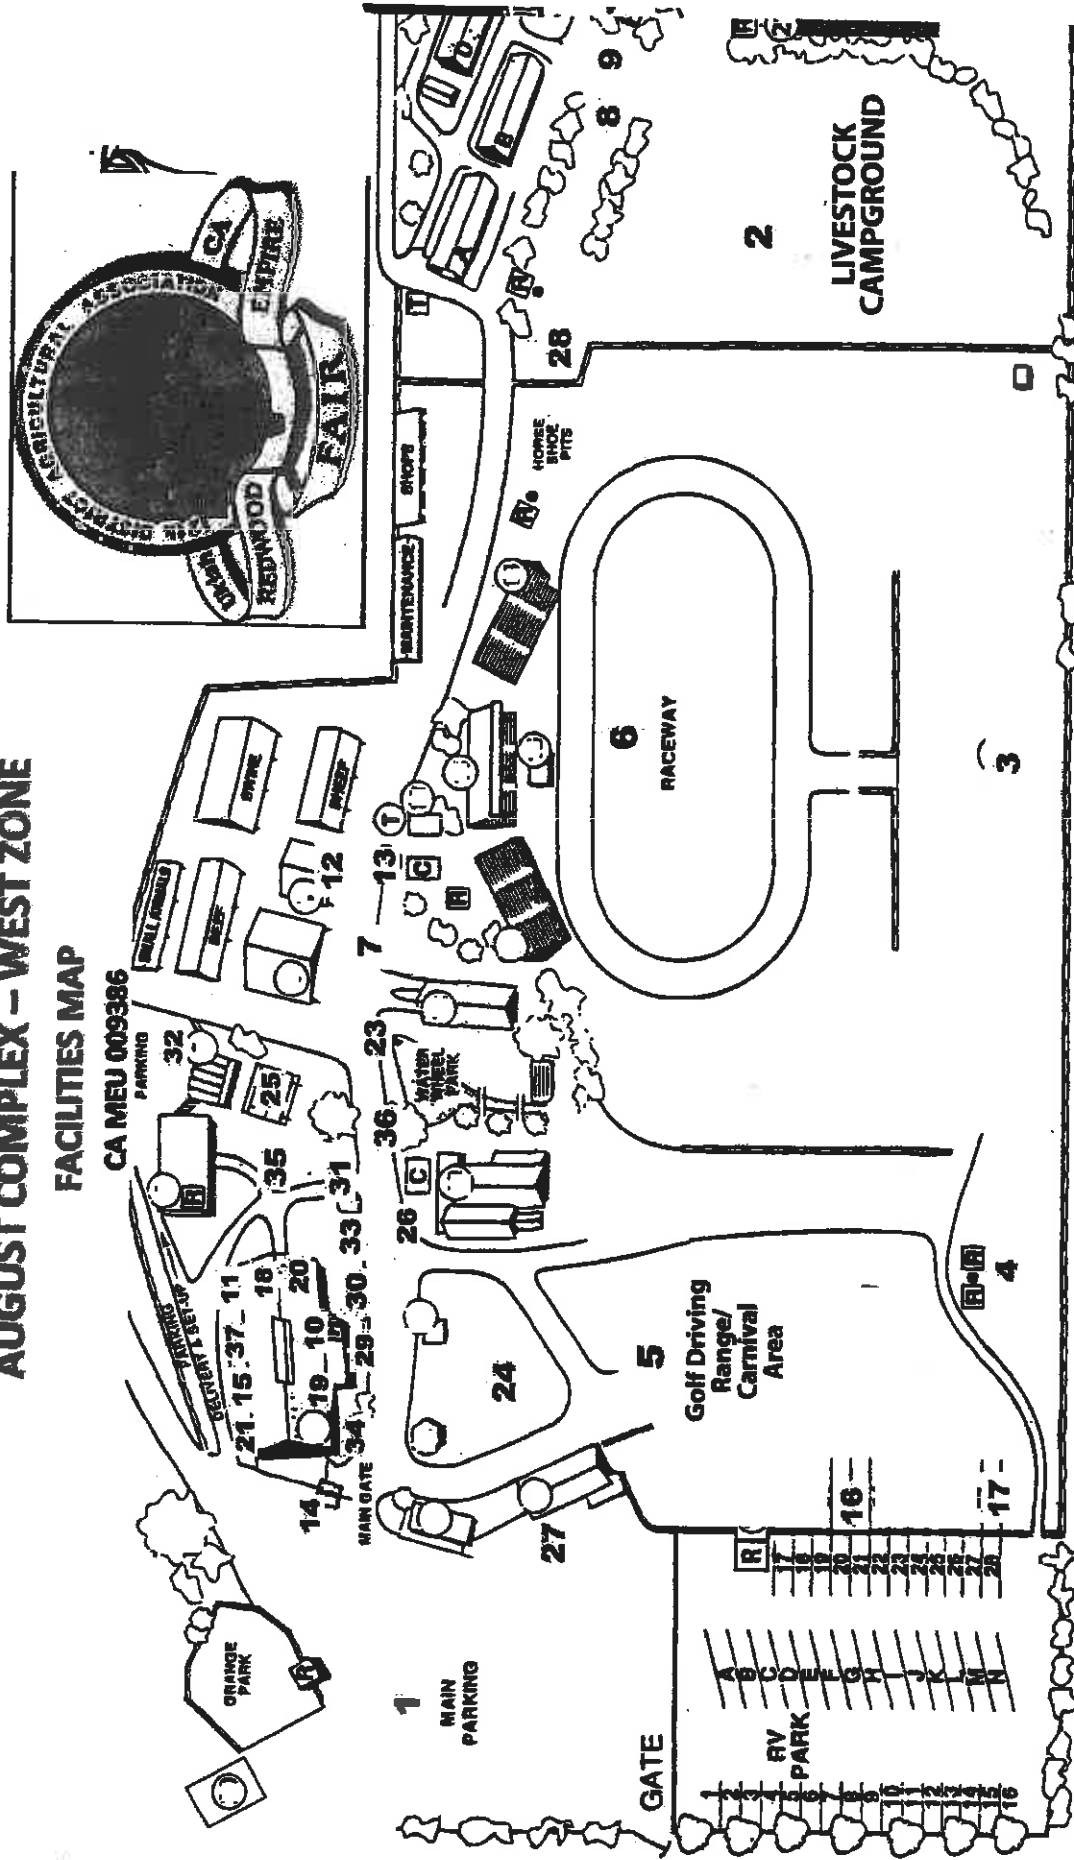

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.
