## Incident Status Summary (ICS-209)

Incident: **CREWS**

Narrative:

**Steep terrain making it difficult to make access. Deep seated stump holes and large dead down oak trees are holding significant heat on the fire line. Fire will make runs when in alignment with terrain and wind.**

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Tall Grass (2.5 feet)  
Brush (2 feet)**

Narrative:

**Oak Woodlands**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):  
**2 structures reported to have sustained damaged: 1 destroyed and 1 damaged. A damage assessment will be in process when safe to do so.**

33. Life, Safety, and Health Status/Threat Remarks:

**Fire has potential to move at a dangerous rate of spread when in alignment. It is wind-driven making short uphill runs at times. This poses significant containment challenges and the use of aircraft is critical to operational success.**

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

34. Life, Safety, and Health Threat Management:

	Active?
A. No Likely Threat	
B. Potential Future Threat	<b>X</b>
C. Mass Notifications in Progress	

## Incident Status Summary (ICS-209)

Incident: **CREWS**

<p><b>After gusty onshore winds this afternoon and evening, expect lighter overall winds tomorrow. However, breezy afternoon and evening winds will remain possible. Slightly cooler temperatures will persist into tomorrow along with decent overnight humidity recoveries as the marine layer deepens. Daytime relative humidity values will continue to slowly increase through tomorrow. Partly cloudy in the morning then becoming sunny. Max temperature.....78-83. Min humidity.....35-42 percent. Wind (20 ft).....Southwest winds 5 to 10 mph with gusts to around 15 mph in the afternoon and evening.</b></p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 90%;"></th> <th style="width: 10%; text-align: center;">Active?</th> </tr> </thead> <tbody> <tr><td>D. 36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Fire will continue to move east/southeast and will have dangerous rates of spread when in alignment with terrain and wind. The wind is assisting with uphill fire runs and causing short-range spotting in the grass. Fire will continue to grow and efforts will be directed at life safety and property conservation. Steep terrain has created a challenge in making access to the fire.**

24 hours: **Fire is expected to continue to grow into the next operational period potential for 500 acres.**

48 hours: **Potential for over 7,000 acres to be burned.**

72 hours: **Potential for 7,500 acres to be burned.**

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

**Provide for the life safety for the public and firefighters.**

**Protect property, environment, and valued livestock in the affected fire area.**

**Ensure timely and accurate information is being shared with all stakeholders and the public.**

**Foster and maintain relationships with stakeholders and allied agencies.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Currently, there are at least 30 homes and several ranches threatened. Access is difficult with steep terrain.**

24 hours: **Canada De los oso Ecological Preserve and the Henry Coe State Park.**

48 hours:

72 hours:

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **Fixed Wing and Rotary Wing Aircraft**  
**2-Golf Strike Teams**
