33. Life, Safety, and Health Status/Threat Remarks:

Fire has potential to move at a dangerous rate of spread when in alignment. This poses significant containment challenges and the use of aircraft is critical to operational success.

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

After gusty onshore winds this afternoon and evening, expect lighter overall winds tomorrow. However, breezy afternoon and

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

The fire will continue to move in a east/southeast direction and has potential for dangerous rates of spread when in alignment with terrain and wind. The wind is assisting with uphill fire runs and causing short-range spotting in the grass. Fire will continue to grow and efforts will be directed at life safety and property conservation. Steep terrain has created a challenge in making access to the fire.

12 hours: **Fire is expected to continue to grow into the next operational period potential for up to 500 acres.**

24 hours: **Potential for over 7,000 acres to be burned.**

48 hours: **Potential for 7,500 acres to be burned.**

72 hours: **Anticipated after 72 hours:**

37. Strategic Objectives (define planned end-state for incident):

Provide for the life safety for the public and firefighters.
Protect property, environment, and valued livestock in the affected fire area.
Ensure timely and accurate information is being shared with all stakeholders and the public.
Foster and maintain relationships with stakeholders and allied agencies.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Currently, there are at least 30 homes and several ranches threatened. Access is difficult with steep terrain.**

24 hours: **Canada de Los Oso Ecological Preserve and the Henry Coe State Park.**

48 hours:

72 hours:

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **Fixed Wing and Rotary Wing Aircraft**

<p>40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. The fire has outpaced the ability to control and contain the fire. The fire has significant potential for growth and spread with the ability to consume 10000 acres.</p>													
<p>41. Planned Actions for Next Operational Period: Direct and indirect Firefighting efforts using aircraft, bulldozers, Handcrews, and Engine companies to limit the spread of the fire.</p>
