Incident Status Summary (ICS-209)

Incident: **CREWS**

Narrative:

Minimal fire activity, if the fire escapes current control lines it has the potential for a moderate rate of spread when in alignment with the wind and terrain.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Tall Grass (2.5 feet)
Brush (2 feet)**

Narrative:

Oak Woodlands

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):
2 structures reported to have sustained damaged: 1 destroyed and 1 damaged. A complete damage assessment will be in process when safe to do so.

33. Life, Safety, and Health Status/Threat Remarks:

If the fire escapes current control lines it has the potential for a moderate rate of spread when in alignment with the wind and terrain. Steep terrain is causing rolling materials to roll out creating small fire growth.

Incident Status Summary (ICS-209)

Incident: **CREWS**

<p>A 2000 foot deep marine layer will cover the lower portions of the fire but clouds may only be patchy to start the day. Full sunshine will prevail by 0900 hours Wednesday. High temperatures will warm into the mid 80s with afternoon humidity falling to around 25-30%. Afternoon winds will be from the southwest with gusts to around 15 mph. Winds will remain gusty through sunset, strongest higher elevations of Branch III. As the marine layer surges in overnight expect good humidity recovery over most of the fire below 1500 feet.</p> <p>WEATHER: A few morning clouds lower slopes otherwise sunny through the day.</p> <p>TEMPERATURES: Warming into the low 80s during the afternoon hours.</p> <p>HUMIDITY: Lowering 25-30%, driest above 1500 feet in Branch III</p> <p>20 FT WINDS:</p> <p>RIDGETOP - southwest 5 mph increasing 6-12 mph afternoon with gusts 15-20 mph</p> <p>SLOPE/VALLEY - Light through midday then west to southwest 4-8 mph gusts 12 mph.</p> <p>STABILITY/INVERSION: Marine inversion around 2000 feet in the morning, mixing out by late morning.</p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 80%;"></th> <th style="width: 20%; text-align: center;">Active?</th> </tr> </thead> <tbody> <tr><td>D. 36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

The fire will continue to move in a east/southeast direction. If the fire escapes current control lines it has the potential for a moderate rate of spread when in alignment with the wind and terrain. Suppression efforts will be directed at life safety and property conservation. Steep terrain has created a challenge in gaining access to the fire. Fire has the potential to grow an additional 100 acres this operational period.

12 hours: **Fire has the potential to grow upwards of 500 acres.**

24 hours: **Fire has the potential to grow upwards of 500 acres.**

48 hours:

72 hours:

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Provide for the life safety for the public and firefighters.

Protect property, environment, and valued livestock in the affected fire area.

Ensure timely and accurate information is being shared with all stakeholders and the public.

Foster and maintain relationships with stakeholders and allied agencies.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Currently, there are at least 30 homes and several ranches threatened. Access is difficult with steep terrain.**

24 hours: **Canada de Los Oso Ecological Preserve and the Henry Coe State Park.**

48 hours:

72 hours:

Anticipated after 72 hours:

Incident: **CREWS**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

No resources are expected to be needed, all necessary equipment is at scene.

12 hours:

24 hours: **No resources are expected to be needed, all necessary equipment is at scene.**

48 hours:

72 hours:

Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

The fire is burning in an area with no previous recorded fire history. Smoke could potentially impact Highway 152.

41. Planned Actions for Next Operational Period:

Direct and indirect Firefighting efforts using aircraft, bulldozers, Handcrews, and Engine companies to limit the spread of the fire. OPS OPS OPS

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):

43. Anticipated Incident Containment or Completion Date: **07/12/2020**

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$2,325,000.00**

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

Increased acreage was due to better mapping capabilities.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
