**Minimal** 

Incident: SCU LIGHTNING COMPLEX

### **Smoldering**

#### Narrative:

Hot and Dry conditions allowed for increased smoldering of hot material in the interior portions of the complex. Minimal suppression repair activity was performed due to high probability of ignition values, high temperatures and low humidity.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Tall Grass (2.5 feet)
Chaparral (6 feet)
Timber (Grass and Understory)

Narrative:

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

Damage Inspection is complete, 100%
