33. Life, Safety, and Health Status/Threat Remarks:
Crew and public safety will continue to be a top priority on the incident. COVID-19 precautions continue to be a high priority for all personnel.

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):
Increased northeast winds and low humidity poses threats to control lines. Minimal suppression repair efforts due to extreme fire weather conditions still in effect. Red Flag Warning remains in effect. Skunking and smoldering in interior islands, still present.

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

Temperatures moderating to conditions that should allow for suppression repair to engage in 12 hours: work projects. High fire behavior probability still present across entire complex for interior islands burning. Red Flag warning ends at 0800. Skunking and smoldering in interior islands,

Incident Status Summary (ICS-209)

Incident: **SCU LIGHTNING COMPLEX**

	still present.
24 hours:	Temperatures moderating to conditions that should allow for suppression repair to engage in work projects. Minor increases to humidity recovery.
48 hours:	Favorable weather conditions will return to continue fire suppression repair efforts. Temperatures cooling with increases to humidity recovery below 2000 feet.
72 hours:	Cooling trend will continue through the weekend with RH gradually rising in the lower slopes. Above 200- feet will still remain dry.
Anticipated after 72 hours:	
37. Strategic Objectives (define planned end-state for incident): Keep the fire within current fire perimeter.	
38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts: 12 hours: 24 hours: 48 hours: 72 hours: Anticipated after 72 hours:	
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order: 12 hours: 24 hours: 48 hours: 72 hours: Anticipated after 72 hours:	
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. Crews will continue to strengthen control lines and mop up off the line. Due to the size and complexity of the incident, fire suppression repair has become the main priority and a plan has been implemented.	
41. Planned Actions for Next Operational Period: Crews will continue to strengthen control lines and mop up off the line. Fire suppression repair has become the main priority and a plan has been implemented. Demobilization of excess equipment.	
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):	
43. Anticipated Incident Containment or Completion Date: 09/12/2020	
44. Projected Significant Resource Demobilization Start Date: 09/04/2020	
45. Estimated Incident Costs to Date: \$66,595,184.00	
46. Projected Final Incident Cost Estimate:	
47. Remarks (or continuation of any blocks above – list block number in notation): An FMAG for this incident has been approved on 8-21 for Santa Clara & Stanislaus counties.
