SCU Lightning Complex Fire Weather Forecast

FORECAST NO: 7

NAME OF FIRE: SCU Lightning Complex

PREDICTION FOR: 0700 Tue-0700 Weds

UNIT: CALFIRE Santa Clara

SHIFT DATE: Aug 25th-Aug 26th

SIGNED:

TIME AND DATE

Incident Meteorologist-Ryan Walbrun

FORECAST ISSUED: 2000 Aug 24th

WEATHER DISCUSSION: A seasonable weather pattern looks to be setting up today and lasting through much of the upcoming week. Fire Weather conditions will be moderated with seasonable daytime highs from the mid 80s lower slopes of the Calaveras Zone and mid 90s hottest interior portions of the Canyon Zone. General winds will be westerly and strongest over the higher terrain and northwest facing sections of the Calaveras Zone such as around Div Q. Winds over the Canyon Zone will be light and mainly terrain driven. Smoke will be most prevalent over the Canyon Zone as westerly transport winds push interior smoke eastward. Humidity values will be seasonably dry, lowering 22-32% afternoon hours. Continue to expect night time crashing of the humidity from around 2am-6am, especially above 1500-2000 feet interior portions of the Calaveras and Canyon Zones which can lead to rapid increases in fire behavior during the pre-dawn hours from fuels burning out or burning operations.

WEATHER FORECAST FOR TUESDAY:

WEATHER: Smoke and haze under mostly sunny skies

TEMPERATURES: Highs 85-90 lower slopes of Calaveras Zone exposed to the Bay breezes.
Highs 91-96 interior sections of the Canyon Zone.

HUMIDITY: 25-35% Calaveras Zone, wettest below 1500 feet. 15-25% Canyon Zone.

20 FT WINDS:

Ridgetop: Southwest 5-10 mph afternoon gusts 15-20 mph strongest Div Q and I.

Slopes : Upslope/Upcanyon 3-8 mph late afternoon gusts 12 mph Canyon Zone drainages.

Hwy 152: Expect strong and gusty west winds near Div M as the fire approaches Pacheco Pass and gets close to San Luis Reservoir. Afternoon and evening westerly gusts 30 mph.

STABILITY/INVERSION: Moderate morning inversion breaking by midday Calaveras Zone then Canyon.

WEATHER FORECAST FOR TUESDAY NIGHT:

WEATHER: Smoke and haze otherwise mostly clear skies over the fire with clouds on the lower slopes.

TEMPERATURES: Lows 57-65 lower slopes of Calaveras Zone and 66-75 above 1500 feet.

HUMIDITY RECOVERY: 55-65% but locally 25-35% hills of the Canyon Fire above 1500 feet.

20 FT WINDS: Ridgetop: Southwest winds 5-10 mph evening gusts 15 mph.
Slopes : Downcanyon 2-5 mph.

STABILITY/INVERSION: Stable inversion layer setting up overnight.

Extended Forecast: Wednesday through Saturday a seasonable weather pattern looks to set up. Look for daytime highs mid 80s to mid 90s. Humidity will lower 15-25% with good recovery on the lower slopes. Night time drying trends will likely continue across the Canyon Zone as the marine layer makes its way into the Santa Clara and East Bay Valleys. Prevailing wind direction will be Westerly 5-10 mph gusts 15-20 mph afternoon hours.

INPUTS

WEATHER SUMMARY:

Seasonable weather will enter the area, and will last through next week. Humidity values will be dry, lowering in the afternoon to the low 20's. Temperatures will vary between the Calaveras and Canyon Zones due to the ocean breezes. Expect high 80's on the lower slopes of the Calaveras Zone, and mid 90's on the interior portions of the Canyon Zone. Nighttime humidity will crash to low teens between 2am and 6am each night in the areas above 1,500' elevation. Winds over the Canyon zone will be light and terrain driven, while the Calaveras Zone will experience strong westerly winds.

OUTPUTS

FIRE BEHAVIOR

FUEL MODEL	RATE OF SPREAD FT/MIN	FLAME LENGTH FT	SPOTTING DISTANCE	PROBABILITY OF IGNITION
GRASS	45-87	7	.20 mi	90%
BRUSH	46-81	19	.40 mi	90%
OAK OVERSTORY	11-21	11	.30 mi	90%

GENERAL:

Fuels are currently at seasonal levels, and below the 90th percentile. Brush fields have a large amount of dead material in them from the previous years of drought and lack of fire history. Fuels above 1,500' elevation have been burning extremely well in the early morning hours due to the humidity dropping each night. When fuels, wind, and topography are all in alignment you can expect dangerous rates of spread. The winds along Hwy 152 can be very strong from the west and will eddy in the canyons and drainages found there.

*****Values above are valid for any new starts in the area*****

SPECIFIC:

- New ignitions will become established quickly in the dry fuels.
- Take the weather often throughout the shift to track the changing trends and conditions.
- The fire will slow greatly when it enters Oak and Pine stands.

AIR OPERATIONS: Visibility will clear up by midday when the inversion lifts. Expect gusty conditions over the ridgetops in the afternoon. Transport winds W 10mph. Air resources might not be available for your tactical plans due to visibility, weather, new fires, or being timed out. Have a plan in place for air resources before they arrive to maximize their efforts.

Sunset 19:44 Sunrise 06:30

SAFETY

- The best safety zone is in clean burn. Locate safety zones early in the shift, and update them as your working location changes.
- Fire weakened timber and branches will release due to winds. Roadways will become blocked easily.

ADDITIONAL INFO

ATTN: Federal Resources (specifically Federal Contracted Resources/ADs)

RE: Virtual Finance Support

If you are assigned to a CAL FIRE managed incident, you have noticed that there is no "federal" time unit on site. We have developed a virtual finance section to provide you with your invoices/time sheets. We will need for you to scan and email your documents to the R5.CalFire.Support@firenet.gov email address. (The CAL FIRE finance section may have a scanner available if you do not have a "scanning" app on your phone and/or computer.) In the subject line enter:

TIME - Resource # - Company/Person Name – Attachment description - Fire Name/Number

Contract Crew/Equipment:

We need for you to send us the following information (even if you have submitted it to the CAL FIRE finance unit):

- Contact name, phone number, and email for on-site "leader"
- Resource Order
- Contract (Pages 1-2 and any additional pages referencing equipment/resource information)
- Crew Manifest
- Inspection (if one was done)
- Shift Tickets (signed by you and your incident supervisor) / CTRs (signed by your incident supervisor)

Administratively Determined (AD) Resources:

We need for you to send us the following information:

- Contact phone number and email
- Resource Order
- Casual Hire Form
- CTRs (signed by your incident supervisor)

Federal Employees:

As of right now, we are not planning to create OF-288s for Federal "regular" employees. Each of you can utilize your CTRs as your backup documentation for submitting your time sheets.

IF, however you require an OF-288, we will do our best to accommodate your needs. If you are claiming Hazard Pay, just like always, you must provide a justification for the claim ("H=Hazard") is NOT enough. Use "action verbs" to explain what/why you are claiming the hazard.

WHEN YOU ARE CLOSE TO DEMOB:

- Give Finance a "Courtesy Email" 1-2 days prior to make sure all your documents have been received.
- Submit all time documentation (including travel home) ahead of demob.
- Send an email the morning of your demob to the Support email so the demob process can be started from the virtual finance group.

EMAIL: R5.CalFire.Support@firenet.gov

Please do not wait until the end of your assignment to get us your information. Since we are virtual, the process will take additional time.

Media Law

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- Media is **not permitted** on private property without the property owners permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.
