## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: Wildfire
FIRE NAME: SCU LIGHTNING COMPLEX CASCU-005772	OPERATIONAL PERIOD: 8/18-8/19/20
DATE ISSUED: 8/7/20	TIME ISSUED: 1800
UNIT: SANTA CLARA	SIGNED:  Typed/printed: Stephen Volmer FBAN

### INPUTS

#### WEATHER SUMMARY:

Continued triple digit temperatures across the unit with warm and dry overnight conditions will last through Wednesday morning. Partially sunny skies with smoke and haze due to the high pressure creating an inversion over the area. Expected increased winds once inversion breaks in the afternoon. Northwesterly winds will surface with an increase in gusty conditions across the ridgetops.

**\*\*See the Spot Weather Forecasts for the specific details of each zone\*\***

### OUTPUTS

#### FIRE BEHAVIOR

FUEL MODEL	RATE OF SPREAD FT/MIN	FLAME LENGTH FT	SPOTTING DISTANCE	PROBABILITY OF IGNITION
GRASS	71-114	8	.30 mi	92%
BRUSH	66-101	21	.60 mi	92%
OAK OVERSTORY	15-25	12	.40 mi	92%

#### GENERAL:

All fuels in the area are completely cured. The 10 and 100 hour fuels are currently at their seasonal averages, and will carry fire easily. The fuel levels will continue to drop steadily over the next 3 days with the absence of cloud cover, poor overnight humidity recovery, excessive heat, and higher wind speeds.

Expect an increase in fire activity after 1200 when the inversion lifts. Lightning hold-overs and new starts will come to life quickly. Watch for smokes developing in the bottom of drainages.

**\*\*\*Values above are valid for any new starts in the area\*\*\***

#### SPECIFIC:

- Fuels in the area are extremely receptive to ember cast and will produce spot fires easily, as will rollout in the steep drainages of the Canyon zone.
- Fire activity will decrease when it encounters the Oak Overstory areas.
- Be alert for new starts. Know your routes of travel, in and out, before sundown.

**AIR OPERATIONS:** Smoke and haze will fill the area producing limit visibility until the inversion lifts. Expect gusty conditions over the ridgetops in the afternoon when the air clears. Transport winds WNW 10mph.

Sunset 19:53    Sunrise 06:26

### SAFETY

- Light flashy fuels will react quickly to changes in temperature and humidity. Track the weather trends.
- Fire activity will increase once the inversion lifts in the afternoon.
- Expect thermal belts to form in the canyons, causing increased fire activity in the upper elevations.

### SAFETY MESSAGE/PLAN (ICS 208)

<b>1. Incident Name:</b>	<b>2. Operational Period:</b>	Date From: 8/18/20	Date To: 8/19/20
SCU LIGHTNING COMPLEX		Time From: 0700	Time To: 0700

**Situational Awareness:** Access your current situation constantly, maintain radio communication with your division, adjacent divisions, and monitor air-to-ground frequencies to understand what is always happening around you. Pay attention to any changes in weather and fire behavior.

**Steep Slopes/Rolling Material:** Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.

**Line Construction:** Use Downhill Line Checklist (IRPG). Conduct thorough briefing for all personnel. Ensure LCES in place prior to engagement. Establish Safety Zones. Utilize Risk Management Process.

**Stay Hydrated!!!** Time to think = time to drink. Document rest and hydration on 214.

**COVID:** Wear a mask and practice social distance. Report any symptoms to immediate supervisor.

**Driving:** Keep your speeds down on all roads. Be alert for civilian traffic in the fire areas. There are many narrow roads. Park apparatus off the roadway and follow traffic plans. Wear your seatbelts!

**Avoid complacency!!!!** Experiencing extreme fire behavior due to low live and dead fuel moistures, persistent drought, and elevated fire danger rating values.

**Fatigue:** Take frequent nutrition and hydration breaks throughout the day. Hydrate with a 3 water to 1 electrolyte drink ratio on hot dry days. Monitor Personnel for fatigue.

**Potential Fire Behavior:** Be prepared for new fires to start. Fuels are dry and receptive to fire. Consider P.A.C.E and know your L.C.E.S. Don't have a false sense of security.

### Media Law

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- Media is **not permitted** on private property without the property owners permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.
