Deer Zone Fire Weather Forecast

FORECAST NO: 3

NAME OF FIRE: SCU Lightning Complex

PREDICTION FOR: 0700 Fri-0700 Sat

UNIT: CAL FIRE Santa Clara

SHIFT DATE: Aug 21st-Aug 22nd

SIGNED: *Ryan Walbrun*

TIME AND DATE

Incident Meteorologist-Ryan Walbrun

FORECAST ISSUED: 2000 Aug 20th

WEATHER DISCUSSION: Cooler with higher humidity values this morning. Westerly winds will increase through the day and continue to test the fire lines in the Deer Zone. Afternoon highs will swarm into the lower 90s with breezy west winds that will last through sunset. Humidity values will be as high as they have been since the fire started providing tranquil fire weather conditions for mop-up and patrol. Good humidity recovery overnight with West winds easing after midnight. Smoke from the Napa fires will continue to spread above the Deer Zone.

WEATHER FORECAST FOR FRIDAY:

WEATHER: Smoke and haze through much of the day. Breezy West winds during the afternoon.

TEMPERATURES: Highs 87-92 (1-4 degrees cooler)

HUMIDITY: 20-29% (2-5% wetter)

20 FT WINDS: Westerly 5-10 mph thru midday then increasing 10-15 mph with frequent gusts 25 mph during the afternoon along Morgan Territory Rd and Los Vaqueros Reservoir

STABILITY/INVERSION: Smoke from the Napa fires will influence the Deer Zone keeping the inversion moderate to strong. Cooler marine air will keep the surface more stable as well.

WEATHER FORECAST FOR FRIDAY NIGHT:

WEATHER: Breezy West winds through midnight. Otherwise, smoky with better RH recovery

TEMPERATURES: Lows 64-70

HUMIDITY RECOVERY: 50-60%

20 FT WINDS: Westerly winds 15-25 mph gusts to 30 mph thru midnight then slowly easing overnight.

STABILITY/INVERSION: Stable inversion layer setting up overnight.

SAFETY INFORMATION: The Deer Zone fires are in a wind prone region. Expect westerly winds to test containment lines in the afternoon and through most of the night. Smoke from the Napa Fires will impact the air. Don't count on Air Ops to be your eyes.

EXTENDED FORECAST: No big changes Saturday with similar temps and westerly winds. Humidity recovery should be better with onshore winds. Will be watching for some incoming tropical moisture by Sunday.

Canyon Zone Fire Weather Forecast

FORECAST NO: 3

NAME OF FIRE: SCU Lightning Complex

PREDICTION FOR: 0700 Fri-0700 Saturday

UNIT: CAL FIRE Santa Clara

SHIFT DATE: Aug 21st-Aug 22nd

SIGNED:

TIME AND DATE

Incident Meteorologist-Ryan Walbrun

FORECAST ISSUED: 2000 Aug 20th

WEATHER DISCUSSION: Given the smoke production on all the upstream fires, heavy smoke is expected to stay over the Canyon Fire today. The smoke will keep the fire shaded and the inversion will likely not break. Temperatures will continue to be hot with dry conditions, though there will be enough smoke to take a few degrees off the forecast high temps. Winds will be westerly on the ridges above 2000 feet and diurnal/slope driven on the lower drainages. For tonight be aware of lowering humidity above 1000 feet. This is a **common phenomenon for these hills, where humidity values actually lower after midnight and through sunrise to as low as the single digits.** Take five at 2 am and check your RH.

WEATHER FORECAST FOR FRIDAY:

WEATHER: Smoke and haze for most of the day over the fire with sunny skies outside the fires edge.

TEMPERATURES: Highs 84-89 (little change)

HUMIDITY: 12-22% (little change)

20 FT WINDS:

Ridgetop: West to northwest 5-10 mph afternoon gusts 15 mph

Slopes : Upslope/Upcanyon 3-8 mph

STABILITY/INVERSION: Inversion will be moderate to strong with extensive smoke from other fires. Inversion is unlikely to break given the amount of smoke but watch for blue skies as a signal for the inversion about to break.

WEATHER FORECAST FOR FRIDAY NIGHT:

WEATHER: Smoke and haze. Otherwise mostly clear.

TEMPERATURES: Lows 66-75, warmest above 1000 feet.

HUMIDITY RECOVERY: Steady humidity values 15-30% most the night but may drop to single digits.

20 FT WINDS: Ridgetop: West to Northwest winds 5-10 mph evening gusts 15 mph easing after dark.
Slopes : Downcanyon 2-5 mph.

STABILITY/INVERSION: Stable inversion layer setting up overnight.

SAFETY INFORMATION: Smoke and haze will impact aircraft. If the inversion breaks fire behavior will increase rapidly with westerly ridge winds allowing for spotting. **For tonight, be aware of fire history that shows that humidity values will often drop at night where the Canyon Fire is currently burning.**

EXTENDED FORECAST: Little change for Saturday. Take advantage of the quiet weather to build lines as the latest forecast shows increasing tropical moisture by Sunday. Hydrate!

Calaveras Zone Fire Weather Forecast

FORECAST NO: 3

NAME OF FIRE: SCU Lightning Complex

PREDICTION FOR: 0700 Fri-0700 Saturday

UNIT: CAL FIRE Santa Clara

SHIFT DATE: Aug 21st-Aug 22nd

SIGNED:

Incident Meteorologist-Ryan Walbrun

TIME AND DATE

FORECAST ISSUED: 2000 Aug 20th

WEATHER DISCUSSION: Onshore winds will bring slight cooling and moistening to lower slopes below 1000 feet. Above 1000 feet warm and dry weather will continue with breezy West to Northwest winds that will align the Calaveras Fires towards the Canyon Zone. Temperatures and humidity values will be moderated somewhat compared to previous days. One of the biggest impacts for the fire today will be smoke from the other fires across the region. This smoke is expected to be over the Calaveras Zone and shade things out. However, should the smoke clear watch for winds to align as the inversion breaks. For tonight expect cooler temperatures and good humidity recovery lower slopes. **If working above the marine layer at 1500 feet or higher expect to see humidity values lower between midnight and end of shift Saturday as low as the single digits. Warm and dry weather above the inversion at night means Watch Out!**

WEATHER FORECAST FOR FRIDAY:

WEATHER: Smoke and haze expected most of the day, mainly due to smoke from other fires.

TEMPERATURES: Highs 82-88 (1-4 degrees cooler)

HUMIDITY: 12-22% (little change)

20 FT WINDS: West to Northwest 4-8 mph thru midday then increasing 6-12 mph with gusts 18-22 mph.

STABILITY/INVERSION: Smoke from other fires is expected to heavily influence the Calaveras Fire and keep the inversion strong. If you see skies turning blue in the afternoon, use that as a Watch Out.

WEATHER FORECAST FOR FRIDAY NIGHT:

WEATHER: Breezy winds through sunset. Otherwise mostly clear with smoke.

TEMPERATURES: Lows 65-75, warmest above 1500 feet.

HUMIDITY RECOVERY: 50-60% lower slopes below 1000 feet. 30-40% above 1500 feet but interior **areas may see humidity values crash as low as 10% after midnight** thru sunrise. Watch for this!

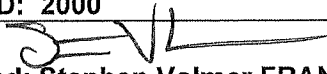

20 FT WINDS: West to Northwest winds 5-10 mph evening gusts 15 mph easing after dark.

STABILITY/INVERSION: Stable inversion layer setting up overnight.

SAFETY INFORMATION: We are approaching the 17 year anniversary of the largest deployment in California history. This occurred in these hills during the 2003 Santa Clara Lightning Complex. Humidity values plummeted to less than 15% overnight leading to the deployment. Take five at 2 am and check wx.

EXTENDED FORECAST: Little change for Saturday with similar temp, winds and humidity. We will be watching for a possible intrusion of tropical moisture by Sunday so take advantage of this quiet weather period.

FIRE BEHAVIOR FORECAST

| | |
|--|--|
| FORECAST NUMBER: 4 | TYPE OF FIRE: WILDFIRE |
| FIRE NAME: SCU LIGHTNING COMPLEX CASCU-005740 | OPERATIONAL PERIOD: 8/21-8/22/20 0700-0700 |
| DATE ISSUED: 8/20/20 | TIME ISSUED: 2000 |
| UNIT: SANTA CLARA | SIGNED:  Typed/printed: Stephen Volmer FBAN |

INPUTS

WEATHER SUMMARY:

Continued high temperatures across the unit with warm and dry overnight conditions. Northwest winds will surface rapidly when the inversion breaks on the DEER and CALAVERAS across the ridgetops. Daytime humidity will be in the teens across the complex. Night time humidity will vary greatly between the zones, and elevations. Expect lower humidity in the upper elevations of the complex throughout the night, with no decrease in fire activity.

See the Weather Forecasts for the specific details of each zone

OUTPUTS

FIRE BEHAVIOR

| FUEL MODEL | RATE OF SPREAD FT/MIN | FLAME LENGTH FT | SPOTTING DISTANCE | PROBABILITY OF IGNITION |
|---------------|-----------------------|-----------------|-------------------|-------------------------|
| GRASS | 100-145 | 9 | .40 mi | 94% |
| BRUSH | 88-124 | 23 | .80 mi | 94% |
| OAK OVERSTORY | 20-30 | 13 | .60 mi | 94% |

GENERAL:

All fuels in the area are completely cured, and have a large amount of dead fuels intermixed within them from the previous years of drought. The region is currently in a severe drought. Expect critical rates of spread when fuels, wind, and topography are all in alignment. Heavy dead down fuels will be consumed 100% leaving deep seated heat in the ash pits. Expect an increase in fire activity after 1200. Lightning hold-overs and new starts will come to life quickly. Poor overnight humidity recovery will lead to active fire behavior thought the evening.

Values above are valid for any new starts in the area

SPECIFIC:

- Fuels in the area are extremely receptive to ember cast and will produce spot fires easily, as will rollout in the steep drainages of the Canyon and Calaveras zones.
- Humidity values will decrease to single digits values between midnight and sunrise.
- Fire activity will decrease when it encounters the Oak and Pine overstory areas.

AIR OPERATIONS: Smoke and haze will fill the area producing limited visibility to the Southeast. Expect gusty conditions over the ridgetops in the afternoon. Transport winds W 10mph. Air resources might not be available for your tactical plans due to visibility or being timed out.

Sunset 19:50 Sunrise 06:27

SAFETY

- Winds increase and/or changes direction.....Weather getting hotter and dryer.
- Take weather often to track trends in critical weather patterns.
- Fire weakened timber and branches will continue to release. Be alert while working in timbered areas.

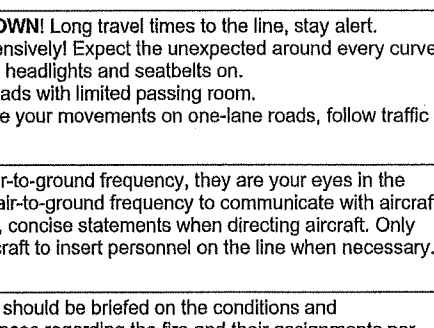

SAFETY MESSAGE/PLAN (ICS 208)

| | | | |
|--------------------------|-------------------------------|--------------------|------------------|
| 1. Incident Name: | 2. Operational Period: | Date From: 8/21/20 | Date To: 8/22/20 |
| SCU LIGHTNING COMPLEX | | Time From: 0700 | Time To: 0700 |

| | | |
|----------------------------|---|----------------------------|
| S A F E T Y | <p>Wash hands often with warm water and soap for a minimum of twenty seconds. Keep hand sanitizer nearby. Disinfect vehicle and any PPE used appropriately. Minimize hand to face exposure. Wash your hands before eating.</p> <p>Be prepared for new fires to start. Fuels are dry and receptive to fire. Consider P.A.C.E and know your L.C.E.S. Don't have a false sense of security.</p> <p>Use Downhill Line Checklist (IRPG). Conduct thorough briefing for all personnel. Ensure LCES in place prior to engagement. Establish Safety Zones. Utilize Risk Management Process.</p> <p>Avoid complacency!!!! Experiencing extreme fire behavior due to low live and dead fuel moistures, persistent drought, and elevated fire danger rating values.</p> <p>Remain mindful of what is going on around you! LCES!</p> <p>HEADS UP!!! Lookout for SNAGS when working around areas with burned trees. Evaluate all wind damaged trees with large limbs before working under around them.</p> <p>Steep winding roads are throughout the incident. Slow down when driving on loose gravel and blind curves. Drive defensively with headlights on and use hands free devices.</p> <p>Stay hydrated!!! Time to think = Time to drink. Document rest and hydration on 214.</p> <p>Ensure radios are properly programmed for today's IAP and that crews are trained in communications procedures for the incident.</p> <p>Maintain proper social distancing and monitor yourself for any possible symptoms and report immediately.</p> | S A F E T Y |

INCIDENT ACTION PLAN SAFETY ANALYSIS (ICS 215A)

| 1. Incident Name: SCU LIGHTNING COMPLEX | 2. Operational Period: | Date From: 8/21/20 Time From: 0700 | Date To: 8/22/20 Time To: 0700 |
|---|------------------------------------|--|-----------------------------------|
| Incident Area | Hazard/Risks | Mitigations | |
| ALL | COMPLACENCY | Don't underestimate the task at hand. Wear full PPE while on the line. Don't get caught off guard. Do you have the right radio clone. | |
| ALL | COVID 19 | Adhere to local, state, federal, and CDC health guidelines. Maintain social distancing when applicable. Wear a mask for yourself and others. Report any symptoms immediately to a supervisor. | |
| ALL | FIRE BEHAVIOR | Know your LCES and maintain Situational Awareness. Use experienced Look Outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH during the shift. Have a contingency plan with established decision points and Safety Zones. | |
| ALL | FATIGUE/HEAT/DEHYDRATION | Be alert for signs of fatigue and take breaks as necessary on hot dry days. Monitor incoming resources for level of fatigue. Drink water before, during, and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible. Find shade when you can. Drink electrolyte drinks at a 2:1 water/sport drink ratio. | |
| ALL | STEEP TERRAIN/ROLLING DEBRIS | Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness. | |
| ALL | LINE CONSTRUCTION | Conduct thorough briefing for all personnel (inside rear IRPG). Ensure LCES in place prior to engagement. Establish adequate Safety Zones. Use Downhill Line Checklist. Follow "Look Up, Look Down, Look All Around" procedures. Utilize Risk Management Process...reference the IRPG. | |
| ALL | HAZARD TREES | Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do not fall trees out of your certification level. | |
| ALL | DRIVING HAZARDS | SLOW DOWN! Long travel times to the line, stay alert. Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads, follow traffic plans. | |
| ALL | AIRCRAFT OPERATIONS | Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Only utilize aircraft to insert personnel on the line when necessary. | |
| ALL | PERFORM TAIL GATE SAFETY | Everyone should be briefed on the conditions and circumstances regarding the fire and their assignments per the IRPG. | |
| ALL | DOZER SAFETY | Watch for rolling material. Monitor safe working distances. Avoid working below dozer. Utilize communication with the operator (radio or hand signals). | |
| 5. Prepared By: Joe Buchmeier | | Position/Title: SOF1 | |
| ICS 215A | Date/Time: 8/20/2020 / 2030 | Signature:  | |

CAL FIRE / INCIDENT MANAGEMENT TEAM 6

COVID-19 DAILY HEALTH CHECK SCREENING ALGORITHM

EACH WORKDAY WILL BEGIN WITH THE FOLLOWING:

Temperature recorded
Employee Screening Questionnaire

TEMPERATURE RECORDED

- Fever YES/NO? *Fever is considered $> 100.4^*$
- #### EMPLOYEE SCREENING QUESTIONNAIRE
- Are you feeling ill/feverish?
 - Are you having chills?
 - Do you have new or worsening SOB?
 - Do you have a new or worsening cough?
 - Do you have a new or prolonged sore throat?

No Fever and No answered to all
Employee Screening Questionnaire

Continue with Daily Operations

Yes Fever OR Yes answered to any of the Employee
Screening Questionnaire

- Wash Hands, Don Mask and Isolate from other employees. Maintain a distance of > 6 feet.
- Notify the Company Officer and/or Strike Team Leader.
- Notify Medical Unit Leader
- Refer employee to appropriate healthcare provider for evaluation and treatment.
- Disinfect "High-touch" surface areas.

REMINDERS TO ALL EMPLOYEES

- ◇ Self-Monitor yourself while you are on and off the line. If you experience any flu-like symptoms, COVID-19 symptoms, or any Respiratory illness symptoms contact your Company Officer and or Strike Team Leader.
- ◇ Maintain proper hand hygiene. Wash hands with soap and water for 20 seconds. Utilize hand sanitizer often. Do not shake hands, touch, or hug others.
- ◇ Cover coughs or sneezes (if not masked). Cloth Masks should be exchanged and or washed daily.
- ◇ Masks are required when out in the public on non-emergency business.
- ◇ Disinfect high-touch surfaces daily.
- ◇ Practice social distancing (> 6 feet) at meal times, dormitories, in-person meeting, or while in public.

CAL FIRE / Incident Management Team 6

COVID-19 Response Algorithm

Employee Response Action Plan

COVID-19 Positive Test or COVID-19 Positive Clinical Symptoms Presentation

- COVID 19 Symptoms: Cough, SOB, Fever or afebrile, Chills, Muscle Pain, Sore throat, Loss of taste/smell
- Employee informs Company Officer and Strike Team Leader of presumed/confirmed COVID-19 symptoms.
- Employee advised to seek evaluation by Medical Unit and CAL MAT or base camp medical unit.
- Crew initiates cleaning measures. Mask, safety glasses, gloves worn. (If needed, LOGS will assist)
- Medical Unit to notified IC, Liaison, Safety and Logistics ASAP. Medical Unit will notify COVID-19 Public Health Officer and determine need for testing and locations.

Incident Action Plan

- Company Officer / Strike Team Leader notified of personnel with COVID-19 positive test or symptom.
- Medical Unit evaluates individual(s) and need for care and evaluation.
- IC, Liaison, Safety and Logistics notification made to determine course of incident evaluation and response.
- Line Chief, Agency Administrator, and Region Office updated upon notification

Facilities Response

- Medical and Safety notified
- Incident Notification
- Disinfection plan initiated.
- Resource Status Evaluated

Medical Evaluation & Contact Tracing

- Personnel interviewed by Medical Unit . List of Positive contacts made in the last 5 days acquired. All Exposed are required to wear surgical mask, self monitor for Fever/Resp symptoms for up to 14 days (exposed personnel are subject to COVID-19 testing)
- Home Unit / Department utilized and retrospective tracking of Positive COVID-19 personnel inter-actions are identified within the last 5 days.
- Home Unit / Department updated by Company Officer / Strike Team Leader.
- Public Health Department is contacted and updated by IC or Designated Representative.
- Positive COVID-19 Employees w/symptoms will need to be evaluated by Health Department conducting testing, prior to returning to assignment.
- Positive COVID-19 Employees w/o symptoms may be required to be evaluated and resource status will be reviewed prior to returning to assignment.

Media Law

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- Media **is not permitted** on private property without the property owners permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.

CAL FIRE Social Media Policy (Social Media 0691)

Social Media is increasingly being used by public agencies, the media as well as the public. This form of communication continues to grow rapidly in order to supply the instant gratification needs of society. Therefore when on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, 0691. You can get further information about the CAL FIRE Social Media Policy from the incident Public Information Officer. While assigned to the incident, there will be no posting of:

- Inappropriate information or materials
- No opinions
- No endorsements
- Inappropriate pictures or videos

Lost and Found

The Information Section will manage Lost and Found items for the incident. If you have lost an item leave your contact information and what you have lost at the Information Section. If you have found an item on the incident bring the item to the Information Section with your contact information as well.

Peer Support Team Message:

INCIDENT PEER SUPPORT:

We have a few people on the incident for any peer support related needs. The best way to get a hold of them is to call them directly.

Jeremy Sanders-916 281-6472

Shawna Powell-530 717-0667

John Kiszka-530 598-2615

or

CAL FIRE Peer Support/Helpline

916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

Tony Howard 916-224-1543

Mike Aiello 916-584-0548

Warren Parrish 916-823-6641

Nikole Schutz 916-709-0434

Amber Henderson 805-794-1690

Amy Head 916-956-3277

Chris Lomanto 916-247-6974

Connie Quarisa 916-213-8697

In addition to peer support, if there is a need, we can have a culturally competent Clinician available on the incident that could meet with you on an individual and/or group basis.

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

Stay Healthy, Stay Alert and Stay Strong!

CAL FIRE Employees can also contact EAP directly at: 1-866-327-4762
