INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: EAST ZONE	
DIXIE FIRE		Date/Time From: 10/12/2021 0700 TUE	Date/Time To: 10/12/2021 1900 TUE
3. Objective(s):			
<p>Management Objectives</p> <ol style="list-style-type: none"> 1. Ensure firefighter and public safety by using strategies and tactics that mitigate known and anticipated hazards while providing for highest probability of success. 2. Elevate awareness of current COVID-19 precautions and best Infectious Disease Control measures to ensure the safety of the fire personnel and the public. 3. Provide timely and accurate information to the public, stakeholders, cooperators and the adjacent incident management teams (East and West zones) about fire status, fire management strategies and tactics, repair efforts, and any potential fire-related safety and health concerns. 4. Protect and or minimize the effects of the suppression repair operations to the cultural, heritage and natural resources in the fire area. 5. Effectively manage cost by implementing strategies and tactics that have a high probability of success. 6. Provide safe and efficient initial attack within the established fire perimeter for the East zone current fire footprint. <p>Control Objectives:</p> <p style="padding-left: 20px;">Keep the fire within the current containment lines.</p>			
4. Operational Period Command Emphasis:			
To ensure operational success, make sure you understand the suppression repair objectives written within the Suppression Repair Plan and follow the repair guidance. Collaborate and coordinate with READs and Tribal Representatives to complete suppression repair efforts.			
General Situational Awareness:			
Be prepared to change operational tempo and work areas when feasible. Increase awareness on driving, road/weather conditions. Ensure infectious disease control precautions are met.			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Dixie Fire East Zone Fire Weather Forecast

Forecast No: 82
Prediction For: Tuesday
Prediction Date: October 12, 2021
Forecast Issued: Monday 10/11/2021 at 1800 PDT

Incident: Dixie Fire East Zone
Unit: Plumas National Forest
Incident Meteorologist: 
Sean Luchs

*****Gusty Winds Today, Hard Freeze Tonight*****

WEATHER DISCUSSION: Gusty north to northeast winds are expected for a second day today. The strongest winds will be in well-aligned valleys (mostly northeast to southwest) with sustained winds around 15 mph with gusts to around 30 mph. Highs today look to reach a bit higher than yesterday, with most of the area rising into the 50s, and the warm spots trying to crack the 60 degree mark. Tonight looks cold again, though – overnight lows are forecast to drop into the upper teens and lower 20s once more.

TODAY: Windy again, with peak gusts for the day near or a little above 25 mph. These strongest winds are expected to be mid-day to early afternoon, and in exposed locations and valleys/drainages oriented northeast to southwest. After a cold start, afternoon temperatures will be modestly warmer than they were Monday.

High Temperatures: Valley/Drainages: 57-63° Mid-Slope (4500-5500 ft): 50-57° Ridges (> 5500 ft): 44-50°
Minimum Relative Humidity: Valley/Drainages: 12-20% Mid-Slope (4500-5500 ft): 15-25% Ridges (> 5500 ft): 15-30%
General Winds: Valleys and Lower Slopes: NE 10-15 mph, gusts above 20 in open areas and aligned valleys.
Upper Slopes and Ridges: NE to around 15 mph, with 25-30 mph in well-aligned terrain.

Stability: Weak inversion, lifting after 0700 with mixing heights rising to around 5000 ft AGL in the afternoon.

Chance of Precipitation: 0% LAL: 1 Transport Winds: NE 15-25 mph.

TONIGHT: Mostly clear, light winds, and cold. A hard freeze is expected across the fire area. Mid-level clouds increase near dawn.

Low Temperatures: Valley/Drainages: 19-25° Mid-Slope (4500-5500 ft): 21-27° Ridges (>5500 ft): 19-25°
Humidity Recovery: Valley/Drainages: 65-75% Mid-Slope (4500-5500 ft): 60-70% Ridges (> 5500 ft): 60-70%
Winds: Valleys/Drainages: NE 5-10 mph becoming light and variable after 2300.
Slopes and Ridges: NE 5-10 mph, becoming downslope 5 mph or less after 2300.

Stability: A more typical nighttime inversion returns after a two night absence, forming after 1900.

Chance of Precipitation: 5% LAL: 1 Transport Winds: Light and variable.

WEDNESDAY: Becoming partly cloudy and a little bit warmer, with some spots managing to see high temperatures above 60 degrees. Winds continue to gradually diminish, but some afternoon gustiness may linger. A slight chance for very light flurries or a shower of snow pellets returns, mainly in the morning. If there is precipitation, no accumulation or impacts are expected.

High Temperatures: Valley/Drainages: 60-66° Mid-Slope (4500-5500 ft): 54-60° Ridges (> 5500 ft): 49-55°
Minimum Relative Humidity: Valley/Drainages: 20-30% Mid-Slope (4500-5500 ft): 22-32% Ridges (> 5500 ft): 25-35%
General Winds: Valleys and Lower Slopes: Light and variable early, becoming W after 1100 and increasing to 7-12 mph after 1400.
Upper Slopes and Ridges: W below 10 mph until 1100, then increasing to 10-15 mph for the afternoon.

Stability: Inversion lifting after 0800 with afternoon mixing heights 6500-7000 ft AGL.

Chance of Precipitation: 15% LAL: 1 Transport Winds: W 10-20 mph.

Extended Outlook: For the second half of the week, expect a slow, gradual warming trend, but chilly nights will remain the norm. After a weak upper disturbance passes through Wednesday into very early Thursday brings a tiny chance of a shower, fair but dry weather and moderate winds are forecast to prevail through at least the weekend.

Please submit weather observations to Sean Luchs (IMET) at 240-499-6654, email to sean.luchs@noaa.gov or use the QR code to the left. Weather observations can be found using the QR code to the right.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 78 (West), 84 (East)

TYPE OF FIRE: Wildfire

FIRE NAME: Dixie

OPERATIONAL PERIOD: Day 0700-1900, 10/12/21

DATE ISSUED: October 11, 2021

TIME ISSUED: 2000

UNIT: CA-BTU-009205, Lassen/Plumas NF, Lassen NP

SIGNED: /s/ *Taro Pusina* Taro Pusina, FBAN

INPUTS

WEATHER SUMMARY

See *IMET Weather Forecast*

- Cool, dry and windy
- Max. Temps. 44-55°
- Min. RH: 15-25%. Maximum nighttime RH: 60-70%
- Winds: **Northeast** 10-15 mph with gusts 25-30 mph

FIRE BEHAVIOR

GENERAL:

Northeast California Energy Release Component is about 55

- **Expect very little fire activity** with a few isolated areas of smoldering and creeping in unburned interior islands, dozer berms, stumpholes and post-burn needlecast. Strong northeast could cause rapid fire spread outside of containment lines.
- **Fuels are grass, brush and timber** - Scott and Burgan fuel models GS2, SH3/4/9, TU1/5 and TL 6/9. 1000-hour fuel moistures are < 10% and live fuels are 60 – 70%.
- **Topography is varied** and includes mountains, hills, drainages, benches and meadows. The elevation ranges from 4000' to over 8000' in Lassen Park. All aspects are represented and slopes range from 0 to 80%.

SPECIFIC FIRE BEHAVIOR:

Very low fire behavior and potential. Very few smoldering hotspots remain within the fire perimeter.

West Zone: There are a few areas of unburned interior islands of vegetation in Lassen Park and Lassen Forest/Prospect Peak/Cluster Lakes areas that will continue to burn themselves out with low intensity. Light smoke may be visible. Any new starts or fire outside containment lines near DIV's S, P, O, N and L could rapidly spread southwesterly.

East Zone: Very little heat evident. There may be a few remaining hot stumpholes and buried heat in dozer berms. Very light smoke visible near Greenville but not a threat to containment lines.

Maximum Fire Behavior (new starts or outside of containment lines):

- Surface Flame Lengths 6-9'
- Rate of Spread 15-35 chains/hour grass and 10-20 chains/hour in timber
- Spotting Distance up to ¼-½ mile
- Probability of Ignition 60%

AIR OPERATIONS

- Gusty northerly winds could limit aviation operations

SAFETY

- Size-up work areas for **fire weakened trees near containment lines**. Watch for hot stumpholes and **rekindle potential** in areas of heavy post-burn needlecast.

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

For Day Operations: October 12, 2021

INCIDENT: **Dixie East Fire**

Day:10-12-21

Major Hazard and Risk:

- **Extended Medical Extractions Times:** Have a Primary, Alternate, Contingency and Emergency (P.A.C.E.) plan in place. Follow the 8 line in the 206/Medical plan (Last page in the IAP). Develop a plan before you need it.
- **Driving:** Observe posted speed limits and follow traffic laws. Don't be in a hurry. Fasten seatbelts and use backseats. Do not multitask while driving. Be prepared to encounter the public as they are allowed back into their areas. *Slow Down!*
- **Strong, Gusty, Winds:** Move to open areas and avoid snags and fire weakened trees.
- **Infectious Disease Control:** Wash hands frequently, practice social distancing, wear face coverings when and where required. Clean and disinfect frequently touched surfaces, don't share cell phones, radios etc.

Weather

With fall blowing in, it will be getting colder, and you may encounter snow in your work area. It is important to dress in layers and have a warm hat and gloves. Make sure to assess your work area for any slick spots due to freezing temperatures. There are extra sleeping bags available in supply if you need one.

Maintain your situational awareness.

Tragedy struck when Conroy, his mind preoccupied with work, stepped into the elevator-directly between a female grizzly and her cub.

We want to thank you for your compliance with the infectious disease control expectations of the incident management team.

You have been doing a great job!

Thanks, from your Safety Team!!

Greg Marfil, Cougan Carothers, Terri Knauth

8 line

Medical Incident Report (MIR)

This is on the last page of the IAP every day. Be familiar with it, train with it because you never know when you will need to use it.

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	Hazard Trees	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. Post road guards when appropriate.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> Maintain 8-10' spacing when working and walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access.
NN/PP, RR, UU & WW/XX	Chipping Operations	<ul style="list-style-type: none"> Ensure all emergency shut-off devices are tested each day prior to use. Ensure workers are trained in the use of all emergency shut-off devices. Ensure workers hands and feet remain outside of hopper deck Wear loose fitting clothing, skid resistant footwear, and keep clothing tucked in. Use signs, or cones to alert traffic of work area, and use flaggers to stop traffic when work area is congested.
All	Driving & Traffic	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, & Seat belts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions (eating, & cell phones etc.) and use the 3 second rule.
All	Air Operations	<ul style="list-style-type: none"> Establish and ensure communications are adequate between helibase and incident aircraft. Ensure work/rest policies are being met for flight crew. Involve AOBD with operational planning, strategy & tactics. Avoid risk/exposure transference. Follow policy on visibility, wind speed and update load calculations accordingly. Establish trigger points to stop operations. Utilize appropriate aircraft for the mission. Ensure performance planning is completed for environmental conditions. Conduct air operations in compliance with NSHO. Ensure only mission critical personnel are on flights.
All	Heavy Equipment Operations	<ul style="list-style-type: none"> Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 2 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> Identify helispots and communicate Lats/Longs to DIVS. Be familiar with the Medical Plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e. smoke inversions, high winds etc.), that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively.
All	Mine Shafts/Hazmat	<ul style="list-style-type: none"> Possible mine shafts in the fire area, stay alert. Do not approach mine shafts, get the Lat/Long and give to your Division Supervisor. Follow "HAZMAT Incident Operations" on page 36 in IRPG.
All	Infectious Disease Control	<ul style="list-style-type: none"> Utilize social distancing (6 feet). Wear a facemask if you can't social distance. Maintain the "module of one" concept. Disinfect vehicle interiors, and commonly touched surfaces frequently. Do not share devices (i.e. cellphones, laptops, radios etc.). Utilize technology to communicate while maintaining social distance. Wash your hands frequently.

FINANCE MESSAGE

Please continue to turn in completed hard copy CTR's and shift tickets at least every other day to Finance at the Quincy ICP. Electronic documents can be sent to the email address below. Please include the words "East Zone" in the subject line of any emails. Be sure to include your correct request number in the upper right-hand corner of your shift ticket.

REMINDER for contract crews and supervisors signing CTR's for contract crews: The contract agreement states that only the crew boss is allowed to start time when briefing starts. Any exceptions to this need prior approval and need to be documented on the CTR. All other crew members start their time no earlier than 30 minutes after briefing starts. Compensated time ends when the crew returns to ICP at the end of shift. Please ask Finance if you have questions on the terms of your contract.

Finance Phone: 213-598-3680

Finance Email 2021.dixie.ca.finance@firenet.gov

HUMAN RESOURCES MESSAGE

October 12, 2021

Manage conflict constructively:

High performing teams manage conflict constructively with mutual respect for one another. This has been the most challenging fire season in the past 100 years for our community. As the season pushes beyond the normal months that we are accustomed to fighting fire, it is vitally important that we be patient and respectful when disagreeing with directions, approaches, strategies, and assignments. Folks have been on assignment coming on 21-30 days and some have only had two days breaks between 14-day rolls, while others are brand new to our outfit and processes. Fatigue will begin to impact our judgement, ability to comprehend, and ultimately to manage disagreements. As you interact with the moving parts of our assignment refrain from raising your voice or yelling at one another, take time to ask questions and remember that folks may not remember your name or position, but they will remember how you treated them.

Take Home Message:

Manage conflict well, often, and with respect or it will manage you into chaos.

The Human Resources Specialist is here on assignment to help you and your teams manage the operational stress keeping your crews safe, positive, and productive increasing your situational awareness.

Human Resources Specialist – Martin Gutierrez
505.715.2171 (call/text) or email @ Martin.M.Gutierrez@usda.gov

“Ready for your first lesson in conflict resolution?”

shutterstock

Trivia Quiz:

What teams played the first NBA game? Who won? What was the score?

Answers to 10.11.21 Trivia: 1. What are we going to do if someone gets hurt? 2. How will we get them out of here? How long will it take to get them to a hospital?

Please text/call (leave voice message) or email me with the answers. Winners will be selected from the person / crew who sends the most accurate answer first, identifies themselves and their crew, and shares a positive story or message about how they improved their work environment from the previous workday. Photos of yourself or crew will automatically enroll you for the grand prize giveaway on our last day - *Answers and Winners will be included in the daily HRSP message*

RESOURCE ADVISOR MESSAGE

- Thanks for all your continued good work. Repair is making significant progress. Communication and cooperation have been good.
- Hazard tree clarification: The Incident Commander and Agency Administrator have directed that hazard trees be felled but not decked. This will apply to all work beyond the nearly completed China Grade road.
- Private land repair: Private land will only be repaired to minimum standards in accordance with the suppression repair plan. Beyond that landowners can make a claim for damages. Further details are being determined; please stand by.
- Remember that a line cleared for repair by archaeologists or other resource advisors may still have avoidance areas for archaeology, heritage, or rare species reasons.
- Avoidance areas will be clearly flagged with red/black flagging by the resource advisors.
- Resource advisors do not control or order equipment. We make requests or recommendations through the division supervisors and the chain of command.
- As always, work with the resource advisors if you have questions or concerns. Thanks for your cooperation and teamwork!

Tom DeMeo
Lead Resource Advisor
503 267 3943 cell

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:

- Patient Complaint, Condition and Location via Tactical or Command frequency. **Priority 1/Red Tag** or **Priority 2/Yellow Tag** trigger Incident within Incident (IWI).

-Division Supervisor/Operations contacts East Zone Communications:
If Red Priority Request Emergency Traffic/Clear Channel

- Division Supervisor or POC* will run "Medical -Emergency" on the Command frequency.
- Division Supervisor or POC* to use "Medical Incident Report" on back/next page of 206

POC* (Point of Contact) and/or Operations

EMERGENCY DURING OPS. BRIEF 0700-0730:

- If you have an emergency while briefing is going on over the command channel. Wait for a break and transmit your emergency traffic.

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:

- Patient Complaint, Condition and Location via Tactical or Command frequency. **Priority 3/Green Tag** Patients **only** trigger an Incident within Incident (IWI) if they are being transported to a medical facility.

- Division Supervisor contacts East Zone Communications:

- Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
- Division Supervisor or POC* will use "Medical Incident Report" on back/next page of 206

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE **"MEDICAL EMERGENCY"** TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
 Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.
 Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.
 Requesting air ambulance to Forest Road 1 at (Lat./Long.)
 "This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.
--	---

Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Crew Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES)	Federal	Contractor	Local Government
--	---------	------------	------------------

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively
