*** FLASH FLOOD WATCH in effect through 11 AM Friday ***

DISCUSSION: The first of two storm systems will impact the area Friday. A period of moderate to briefly heavy rain is likely across the burn scar early to mid-morning, transitioning to on/off showers later in the day. High potential for ash flows and rock falls, as well as possible debris flows, with greatest threat for western portions of the burn scar near Feather River Canyon. Expect breezy winds, especially in the morning. A lull is expected late Friday into Saturday, although isolated showers may continue. A much stronger storm will bring very heavy rain Sunday into Monday, with a high risk of debris flows, and strong/gusty winds.

RAWS**

Debris Flow Safety

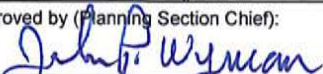

- Debris flows are fast-moving, often deadly slides consisting of mud, rocks, water and other debris, and are common after fires.
- Rainfall **intensity** is the most important factor leading to debris flows, not total rainfall or duration.
- Avoid low-lying areas, drainages and creeks during heavy rain, particularly near steep slopes.
- Seek higher ground if a debris flow may be imminent or occurring.

COVID -19

THE LOCAL SITUATION

What's New

Beginning Monday 10/18, all newly issued resource orders contain language requiring COVID testing upon arrival and at demobilization.

For incoming resources testing must be conducted prior to check in. Once tested Frontline medics will give those with negative test results stamped and signed COVID Test receipt to bring to Check In.

In Camp

Past 5 days: Two individuals tested positive for COVID-19. Both were asymptomatic; one discovered during demobilization and one at check in.

Don't become complacent. COVID is a risk in camp. Mitigations like

In Town: Quincy and the southern region of Plumas County

Positive cases are trending up sharply in southern Plumas County. In a three day period last week, from 10/12 to 10/14, 46 new cases were identified. **As of 10/18 there were a total of 104 active cases in the county.**

Plumas County provides updated numbers on Mondays and Thursdays.

State-wide and Nationally

Generally, with a few exceptions, California and National COVID infection rates are trending downward.

Guidance On Safe Transition To Home Unit

After Demobilization

The Incident Commander and the EAIMT leadership offer this informational guidance to refer to concerning safe travel after demobilization from the Dixie East Zone during the COVID-19 pandemic.

Once you leave the Incident, you will lose the protective “bubble” you have built up and will be traveling among the public. It is readily evident that social distancing, handwashing, and vaccinations are inconsistent in many communities that you will travel through.

For you to remain free from exposure to COVID-19, you will need to be especially disciplined in continuing these common practices. The safe practices that have been developed for health and safety remain:

- **Social Distance:** Maintain minimum of 6 feet spacing whenever possible. Expose as few team members as possible to public areas like shops and convenience stores whenever possible. Avoid unnecessary face-to-face or close contact with persons outside your module while in transit. Avoid sharing food, utensils, or personal items.
- **Mask:** Wear your mask, especially if you are not vaccinated.
- **Hand Hygiene:** Continue regular hand hygiene. Wash hands for 20-30 seconds with soap and water. You may substitute hand sanitizer as needed. Rub generously into all hand surfaces for 20-30 seconds.
- **Disinfect and Clean Common Spaces:** Clean and disinfect all areas such as door handles (interior and exterior), dashboards, steering wheel, buttons/knobs, and other interior surfaces. Be especially careful of contact with public items, including gas pumps, door handles, restroom surfaces and keypads.
- **Regular Monitoring and Self-Assessment:** Daily self-check using the standard symptom list. Maintain awareness of any change in your health. Immediately discuss with your supervisor should you exhibit symptoms.

Should you develop symptoms and exhibit distress, seek care immediately. Do not delay care to continue travel to your home unit.

Symptoms to monitor (This list does not include all possible symptoms):

- Headache
- New Loss of Taste or Smell
- Sore Throat
- Congestion or Runny Nose
- Nausea or Vomiting
- Diarrhea
- Fever or Chills
- Measured Temperature of 100.4 or Greater
- Cough
- Shortness of Breath or Difficulty Breathing
- Fatigue
- Muscle or Body Aches

Resource Advisor Message

- Thanks for all your continued good work. Repair is making significant progress. Communication and cooperation have been good.
- Amendment to the suppression repair plan: The amendment to the plan to clarify direction on potential operational delineation (POD) lines, hazard trees, seeding, and GIS was signed Oct 20 and is ready for distribution.
- When hazard trees are felled, woody material may be removed to reduce fuel hazard. Options include chipping, piling for later burning, and decking.
- Remember that a line cleared for repair by archaeologists or other resource advisors may still have avoidance areas for archaeology, heritage, or rare species reasons.
- Avoidance areas will be clearly flagged with red/black flagging by the resource advisors.
- Resource advisors do not control or order equipment. We make requests or recommendations through the division supervisors and the chain of command.
- As always, work with the resource advisors if you have questions or concerns. Thanks for your cooperation and team work!
