INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: WEST	
DIXIE FIRE WEST ZONE		Date/Time From: 10/24/2021 0700 SUN	Date/Time To: 10/24/2021 2100 SUN
3. Objective(s):			
Management Objectives: 1. Ensure firefighter and public safety by using strategies and tactics, with the highest probability of success, that keeps the fire within the existing containment lines and minimize the impact to the cultural, heritage, and natural resources. 2. Implement and/or account for the repair of fire suppression-related activities as specified in the Dixie Fire Suppression Repair plan 3. Identify and communicate hazards and conduct actions only when risks have been mitigated to acceptable level. 4. Maintain an elevated awareness of current COVID-19 precautions and best infectious disease control measures to ensure the health of fire personnel and the public. 5. Provide safe and efficient initial attack within the current fire area or when requested by the local units. 6. Provide timely and accurate information to the public, stakeholders, cooperators and the adjacent incident management teams (East & West zones) about fire status, fire management strategies and tactics, repair efforts, and any potential fire-related safety and health concerns. 7. Maintain fiscal accountability and keep costs commensurate with values at risk.			
Control Objectives: Keep the fire within the current containment lines and maintain availability for initial attack if requested.			
4. Operational Period Command Emphasis:			
As with military field actions, there are only five things we can do in firefighting. We'll call them levels of engagement...defend (holding actions, priority protection areas), reinforce (bringing more or different resources to bear on the issue), advance (anchor and flank, direct or indirect attack), withdraw (move to a safety zone or otherwise cease current activities until conditions allow a different level of engagement) or delay (waiting until the situation has modified sufficiently to allow a different level of engagement). Today we withdraw and delay.

SAFETY MESSAGE

SAFETY IS OUR FIRST PRIORITY

Fire fighter safety comes first on every fire, every time

Incident: Dixie West	Date: October 24, 2021	Shift: Day
-----------------------------	-------------------------------	-------------------

SAFETY THOUGHT

Situational Awareness is being aware of what is happening around you in terms of where you are, where you are supposed to be, and whether anyone or anything around you is a threat to your health and safety.

The Situation is Always Changing

Being able to adapt to changing conditions is a trait all resources are to follow.

- **Be patient**
- **Assess risk prior to engaging in actual work**
- **Discuss specific hazards you may face during your shift**
 - **Know proven mitigation measures**
 - **Share mitigation measures with others**

Safety Message:

SAFETY IS OUR FIRST PRIORITY
Firefighter safety comes first on every fire, every time.

Safety Thought:

“MODULE AS ONE”

Module as One should be used by crews and modules to reduce exposures to COVID-19 and other sickness from outside resources or the public. Face coverings must still be worn within the module when operating in close quarters EXCEPT when alone, when outside and able to maintain at least 6-feet of distance, or actively engaged in firefighting on the fireline.

Key Points:

- *Exposing yourself could mean also exposing your module and your family.* Crews and modules should limit close contact with other resources and the public on incidents to insulate their module. When coming into close contact or riding in vehicles, all resources should wear cloth face coverings or masks. While the practice of handshaking, hugging, or any physical contact is a deeply rooted etiquette within the United States, this practice should be avoided to reduce further potential for disease transmission.
- *Further reduce exposure by identifying select individuals on your crew or module that will pick up meals and supplies, interact with the public and enter ICP.* Ensure these select individuals protect themselves by using face coverings, physical distance, and good hand hygiene during every interaction. This is especially important when working in or traveling through an area with high community transmission.

Kaili McCray MEDL/ COVID & Cliff McClure, SOF1(t)

COVID TESTING PROCEDURES: *ALL* Federal employees and federal contractors agree to be tested for COVID-19 prior to incident check-in, demob and when relieving personnel for crew swaps; regardless of vaccination status. Personnel experiencing COVID-19 symptoms or personnel with confirmed exposure will also be tested.

COVID TESTING:

Step 1: Scan QR Code and fill out form

Step 2: Go to the Eagle Lake Ranger Station, 477-050 Eagle Lake Rd
[0600-2200]

Human Resource Message

Mutual Respect within an Emergency Incident

An emergency incident is not a normal workplace. Working and living with a lot of different folks, especially in adverse weather can result in elevated stress and fatigue. These conditions can create an environment where you may be faced with conduct and ethical issues. We all know the rules and the path to follow, knowing these rules helps us make the right choice.

Everyone who participates in an incident is individually responsible to treat one another with respect and to maintain a work environment free of harassment and hostility.

“Coming together is a beginning; keeping together is progress; working together is success.” -Henry Ford
