Temperatures will remain a little above normal though not quite as hot as they were this weekend. RHs will lower gradually through mid-week and then fall more rapidly during the second half of the week with nighttime recoveries worsening as well. The typical up and down canyon wind pattern will continue through the week with the afternoon southwesterlies becoming breezier as the week progresses.

---

These areas and the portion of the Feather River Valley near Belden will see swirly and battling winds at times.

## SAFETY MESSAGE/PLAN (ICS 208)

Dixie CA-BTU-009205	Operational Period: Date From: 7/20/21 Time From: 0700	Date to: 7/21/21 Time to: 0700
---------------------	---	-----------------------------------

**//// MAJOR HAZARDS AND RISKS: ////**

**Thunderstorm/Lightning:**

Keep alert on the current local forecasts. Reference page 21 in the IRPG. Follow the 30/30 rule. If you see lightning and hear thunder within 30 seconds, seek shelter. Do not resume work until 30 minutes has passed.

**Extreme Fire Behavior:**

Expect intense fire runs with plume dominated fire behavior. Take weather regularly. Maintain situational awareness specific to wind direction changes and increased fire spread.

**Entrapment Avoidance:**

Adhere to the 10 Standard Firefighting orders. Consider the 18 Situations that Shout Watch Out. Consider the Common Denominators of Fire Behavior on Tragedy Fires. Maintain LCES. Establish your decision point(s). Conduct risk management.

**Safety Zones/TRA:**

Locations where the threatened firefighter may find refuge from the danger. Safety zones should be large enough, conceptualized, and planned as a location where no shelter is needed. Utilize temporary refuge areas when appropriate.

**Fatigue – Physical and Mental:**

Continually monitor your crew. Hydrate and increase your caloric intake when performing arduous work during long shifts. Monitor work / rest cycle.

**Driving:**

Steep, narrow or dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. Flag unstable roads and other hazards that may be encountered while driving. Follow posted speed limits while driving in base camp. Drive with your vehicle headlights on. Pay extra attention while driving on Highway 70, there are several areas where rocks have fallen onto the roadway and closures maybe in effect. Limit your exposure time while in the Highway 70 fire area.

**Power lines:**

Follow Power Line Safety guidelines (IRPG pg.24.)  
Follow FIRESCOPE identification and management of Life Safety Zones procedures, 3 horizontal strands of fire line tape, write "Do not enter" or "Do not cross".

**Rail Roads:**

Major train tracks are in the fire area. Assume ALL tracks are active. Do not walk on or near the train tracks. Keep a safe distance from any active trains.
