

INCIDENT ACTION PLAN DIXIE WEST ZONE INCIDENT

CA-BTU-009205

Thursday

OPERATIONAL PERIOD

7/29/2021 0700

to

7/30/2021 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: DIXIE WEST ZONE	2. Operational Period:	Date From: 7/29/2021	Date To: 7/30/2021	
		Time From: 0700	Time To: 0700	

3. Objective(s):

- Management Objectives**
- Utilize the risk management process to identify and mitigate hazards to protect firefighters and the public. Emphasize strategies and tactics that have the highest probability of success and the least exposure to firefighters and the public
 - Develop strategies to protect life, property, communities, businesses and infrastructure. Employ tactics that fulfill these strategies while being mindful of the necessity for contingency and emergency plans. Ensure strategies account for incident priorities, applying resources to those with the highest consequences first.
 - Follow COVID-19, CDC and established local, state and federal guidance to limit virus spread within the incident and surrounding communities near the fire area.
 - Provide timely and continuous incident information to affected agency partners, cooperators, California Team 2 as well as the public
 - Maintain fiscal accountability and keep costs commensurate with values at risk.

- Control Objectives**
- Keep the fire north of fire perimeter and Highway 162 and the junction of Highway 70
 - Keep the fire south of Highway 36 and Highway 89
 - Keep the fire east of Highway 32
 - Keep the fire west Genesee Road and Grizzly Ridge to Highway 70

- General Situational Awareness:**
- Utilize IRPG checklists to manage risk.
 - Ensure Lookouts are established, Escape Routes and Safety Zones are clearly identified.
 - Ensure effective communications are occurring by giving clear instructions and asking clarifying questions.

5. Site Safety Plan Required? Yes No

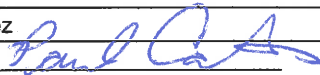

Approved Site Safety Plan(s) Located at:

FIRE WEATHER FORECAST

FORECAST NO. 13

NAME OF FIRE: Dixie Fire – West Zone

PREDICTION FOR: Thursday July 29, 2021

UNIT: Butte Unit

TIME AND DATE

SIGNED: Julia E. Ruthford

FORECAST ISSUED: 2000 Wednesday 7/28/21

Julia Ruthford
Incident Meteorologist

WEATHER DISCUSSION: Strong upper level ridging will continue to bring hot, dry and unstable weather to the fire area through Fri. RH recoveries along upper slopes and ridges will be minimal as thermal belt effects strengthen. Afternoon W-SW general winds will on the lighter side, although locally breezy up canyon winds will still develop and be strengthened by strong solar heating. Smoke in western areas will lift first around mid-morning with deeper valleys taking until early to mid-afternoon to completely ventilate. NE down canyon overnight through mid-morning winds will be enhanced by hot valley temperatures and a resulting thermal low.

THURSDAY

WEATHER: Hot, dry and unstable. Small cumulus builds ups forming over the mountains in the afternoon with **moderate pyro-cumulus development possible over areas of more intense heat.**

MAXIMUM TEMPERATURE: Highs upper 90s to low 100s 2000-3000 ft valleys and mid 80s 6000-7000 ft ridges.

MINIMUM RELATIVE HUMIDITY: Low to mid teens.

20 FOOT WINDS:

Branch I & V - NE down-canyon winds around 15-20 mph with gusts to 30 mph diminishing between 0900 & 1000. Up-slope winds 3-5 mph developing late morning then becoming predominately SW and increasing to 10-15 mph. Expect swirling and battling winds near drainage intersections.

Branch VII – NE winds 8-11 mph will channel through valleys draining to the SW away from the High Lakes Plateau until around 1000 with lighter E-NE wind near the plateau edge. Light up-slope winds will develop late morning and become W to SW 5-8 mph with gusts to 15 mph in the afternoon.

Branch IX & X - Light winds through midday becoming up-slope 3-5 mph early afternoon and W to NW 4-7 mph with gusts 10 to 12 mph mid to late afternoon.

Peaks & Higher Ridges - E-NE winds 5-10 mph through 1000. W-SW winds 10-15 mph in the afternoon with gusts up to 20 mph.

STABILITY: Inversions lifting around 1100 western areas & 1300-1500 elsewhere. Unstable in the afternoon.

CHANCE OF RAIN: <5% **LAL:** 1 **SMOKE TRANSPORT WIND:** W-NW 10-15 mph in the afternoon.

THURSDAY NIGHT

WEATHER: Mostly clear.

MINIMUM TEMPERATURE: Lows in the upper 60s to low 70s ridges and upper 50s to mid-60s valleys.

MAXIMUM RELATIVE HUMIDITY: 20-25% ridges and 40-45% valleys.

20 FOOT WINDS: W-SW 10-15 mph in the evening, diminishing around 2200. In Branch I, V & VII winds will become NE around 2200 and increase to 15 to 20 mph through channeled areas around 0100 with local gusts 25-30 mph after 0400. In Branch IX & X W-NW winds will diminish around sunset with SE (Branch IX) and SW (Branch X) down-valley winds 5 to 8 mph developing during the early morning hours.

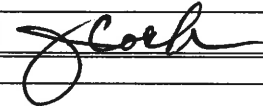

STABILITY: Smoke settling in valley inversions overnight with strengthening thermal belts developing along upper slopes and ridges. NE down canyon winds will carry smoke pooling in Feather River Valley downstream to the SW.

CHANCE OF RAIN: <5% **LAL:** 1 **SMOKE TRANSPORT WIND:** W-SW 10 mph in the evening becoming NE down valley after midnight.

FRIDAY: Hot, dry and unstable weather will continue for Friday with the general pattern of afternoon SW up-valley winds and enhanced overnight NE down canyon winds continuing. Isolated to widely scattered thunderstorms are possible late afternoon through the evening hours.

OUTLOOK FOR SATURDAY THROUGH TUESDAY: A band of mid-level moisture will move through Fri Night and Sat bringing more cloud cover and slightly cooler temperatures back into the area as well as the potential for few light showers or isolated thunderstorms. A drier airmass will move back in for Sun with very dry SW flow increasing Mon & Tue.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 4	TYPE OF FIRE: Wildfire
FIRE NAME: Dixie Fire West Zone	OPERATIONAL PERIOD: 7/29/2021
DATE ISSUED: 7/28/2021	TIME ISSUED: 2100
UNIT: CA-BTU	Signed: John Cook FBAN 

WEATHER SUMMARY: Warmer, dry and sunny and breezy

Temp: Day low 90s RH: Day 14%, Night 22% on ridge,
Winds: NW@11 gust to 18. Night NE@17 gust to 30

FIRE BEHAVIOR

General:

Potential for increased fire activity today. Successive drying days increase chance for rekindle. Main fire activity will continue in the North and West sides of the fire as unburned interior islands consume. The fire will remain active at night as dry fuels continue to consume. Very poor overnight humidity recovery will allow activity early. Spotting remains the greatest threat for escape and spread. Probability of Ignition (PIG) is high today due to higher temperature. Spotting distances should remain less than 1/2 mile, unless an extreme crown run occurs. Increased activity is again likely when the smoke cover breaks with inversion lift. Large fuel mop up still critical due to dryness.

Extreme Fire Behavior:

Extreme behavior is mostly influenced by heavy fuel loadings, stand density and steep slopes. When this occurs, it will burn with high intensity with group torching and spotting. The potential for crown runs is likely when intensive surface fire occurs where slopes and wind align in thick stands with low branches. These runs can develop large Pyro cumulus clouds.

Fuels: There is a large variety of fuels throughout the area. Mixed pine and conifer forest with grass or shrub understory, open grass and isolated shrub areas. Live fuel moistures are very low. Drought conditions are extreme in the region and large dead fuels are very dry. The predominant fuel type in the fire area is TL6, TU5 and GS2.

Energy Release Component is **above the 97th** percentile at 89. (*Fuel Model G 97th percentile is 85*)
ERC is projected to continue increasing slowly with no significant decrease in the forecast.

1HR fuel moisture: 4% (-- from yesterday)	10HR moisture: 5% (--)	100HR fuel moisture: 5% (--)
Energy Release Component: 89 (+3)	Burning Index: 77 (+4)	Probability of Ignition: 80%

Local Watchout Thresholds: (bold if present) ALL 4 present today.

20' winds over 6 mph, RH below 20%, Temp > 85 deg, 10 HR < 5%

Expected Surface Fire Behavior:

Timber Understory (TU5) Timber with shrubs:	4-8' flame length and Rate of Spread 10-15 ch/hr head
Timber Litter (TL6) Timber with needles and branches:	1-5' flame length and Rate of Spread 3-12 ch/hr

SPECIFIC: West Zone

BRANCH I: SW winds will keep pressure off of the line but increased torching and smoldering may occur as fuels are impacted by sun and wind.

BRANCH V: SW winds will again support burnout and holding of firing operations along DIV E during day. Downslope winds after 2200 will push containment and make spot detection difficult at night. Watch for flares ups and torching through the night.

BRANCH VII: NW winds should again be favorable to burnout and holding during day. Be ready for down slope NE winds after 2200 to push containment and make spot detection difficult at night. Watch for spotting through the night.

BRANCH IX: Fire continues to burn interior areas. Large column development conditions are possible.

BRANCH X: Fire behavior may pick up in the afternoon as clear air will be likely with NW winds pushing smoke interior.

AIR OPERATIONS and SMOKE FORECAST: Visibility will improve for air operations after 1100

SAFETY

Fire Order #5: Post lookouts when there is possible danger.

The situation can change quickly with firing and active fire at the same time. Lookouts need to be experienced and in good locations to see all around the area.

ASSIGNMENT LIST (ICS 204 WF)

CONTROLLED UNCLASSIFIED INFORMATION//BASIC

1. Incident Name: DIXIE WEST ZONE	2. Operational Period: Date From: 07/29/21 Date To: 07/30/21 Time From: 0700 Time To: 0700	3. Branch I	Division A

AIR OPERATIONS SUMMARY ICS-220

Incident Name and Incident Number
EAST & WEST ZONE/DIXIE 21-CABTU-009205

Sunrise 604 **Startup** 634 **Cutoff** 1953 **Sunset** 2023

General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc.
TRACK ALL DIPSITE LOCATIONS / NUMBER OF DIPS / GALLONS TAKEN.
TRACK ALL DROP LOCATIONS / NUMBER OF DROPS / GALLONS DROPPED
ALL GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES, FORMAT.
*AVOID Aerial Application of Retardant / Foam / Agent within 300' of Waterways, Bodies of Water, etc.
If Retardant / Foam / Agent is Dropped Within These Areas Immediately Notify the AOB and Provide the Following Information: Lat / Long, Estimated Number of Gallons and a Map Detailing The Area.*

Aircraft Ordering: Command (CDF Command 1) use (T3) 131.8

6. Special Medical Emergency Procedures:

LINE EMERGENCY:

Crew Supervisor to contact Division Supervisor with patient complaint/condition, location, and resource needs.

- Division Supervisor contacts and gives report on conditions, complaint/condition, and resource needs to:
 1. Nearest Line FEMT/FEMP
 2. Communications Unit
- Emergency or Priority traffic received: Communication Unit will clear the command channel for emergency traffic only, for the duration of the MAJOR IWI
- Communications Unit will make proper notifications
- OPERATIONS can declare a MAJOR IWI based on the report on conditions from the division supervisor
- Division Supervisor or designee will serve as point of contact (IWI SUPERVISOR) and run the emergency utilizing the COMMAND CHANNEL and CALCORD for the tac net during the IWI

****ALL EMERGENCIES: Secure the area and identify witnesses for later investigation. Keep an accurate log of events****

*****START 20 MINUTE TIMER IF IWI*****

BASE CAMP EMERGENCY:

CONTACT COMMUNICATIONS UNIT AT: (916) 956-0315
report patient complaint/condition and location. Medical Staff will respond to stabilize incident

- COMMUNICATIONS Unit contacts:
 1. Operations
 2. Medical
 3. Safety
 4. Logistics

SAFETY MESSAGE/PLAN (ICS 208)

Dixie CA-BTU-009205
WEST ZONE

Operational Period: Date From: 7/229/21 Date to: 7/30/21
Time From: 0700 Time to: 0700

//// MAJOR HAZARDS AND RISKS: ////

Physical and Mental Wellness:

Continually monitor yourself and your crew. Hydrate and increase your caloric intake when performing arduous work during long shifts. Monitor work / rest cycle.

Driving:

Steep, narrow, or dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. SLOW DOWN! Flag unstable roads and other hazards that may be encountered while driving. Follow posted speed limits while driving in base camp. Drive with your vehicle headlights on. Pay extra attention while driving on Highway 70, there are several areas where rocks have fallen onto the roadway and closures maybe in effect. Limit your exposure time while in the Highway 70 fire area. Reduce speed on Hwy 32 and always maintain control of your vehicle.

Extreme Fire Behavior:

Expect intense fire runs with plume dominated fire behavior. Take weather regularly. Maintain situational awareness specific to wind direction changes and increased fire spread. Long range spotting of one mile plus has been observed. Beware of pyro-cumulus development and the potential for rapid changes in conditions and weather/lightning associated. Prepare for possible deterioration of pyro-cumulus which will cause severe out flow winds in all directions.

Entrapment Avoidance:

Adhere to the 10 Standard Firefighting orders. Consider the 18 Situations that Shout Watch Out. Consider the Common Denominators of Fire Behavior on Tragedy Fires. Maintain LCES. Establish your decision point(s). Conduct risk management.

Safety Zones/TRA:

Locations where the threatened firefighter may find refuge from danger. Safety zones should be large enough and planned as a location where no shelter is needed. Utilize temporary refuge areas when appropriate.

Communications:

There are areas on the fire that Command Channels have limited reception. Use human repeaters to relay messages. Make sure your radios are cloned with the correct frequencies. Review the ICS 205 for both zones. Monitor neighboring Tac channels.

SAFETY MESSAGE/PLAN (ICS 208)

Dixie CA-BTU-009205 WEST ZONE	Operational Period: Date From: 7/29/21 Time From: 0700	Date to: 7/30/21 Time to: 0700
----------------------------------	---	-----------------------------------

//// MAJOR HAZARDS AND RISKS: ///

Firing Operations:

Follow the Firing Operation Checklist. Assure that: Lookouts are posted, communications are established with both firing and holding teams, escape routes and safety zones are established and not compromised by the firing operations, and that the firing plan has been approved and relayed to all adjoining forces.

COVID-19:

Follow California Department of Public Health masking guidance. Ensure you are performing good personal hygiene practices by washing your hands frequently. Ensure you are reporting any illnesses or if you are not feeling well to your supervisor. If you are coughing or sneezing, ensure you cover your mouth properly.

Power lines:

Follow Power Line Safety guidelines (IRPG pg.24)
Follow FIRESCOPE identification and management of Life Safety Zones procedures, 3 horizontal strands of fire line tape, write "Do not enter" or "Do not cross"

Wildlife:

Rattlesnakes, bears, and other potentially dangerous animals have been spotted in the fire area. Be aware of where you are stepping and placing your hands especially around rock piles. If you come across a potentially dangerous animal, let it be known and leave the area.

Multiple Base Camps:

The fire has three base camps. It is imperative that personnel and resources are briefed on which base camp they are assigned to. Personnel shall receive a briefing at each base camp. The Westwood and Quincy base camps are in areas that personnel have not been to before. Please make sure you are driving safely, increase following distances, and maintain situational awareness.

Zoning the fire:

With the fire being zoned, maintain accountability of all personnel and resources in assigned work locations. Ensure personnel have access to both IAP's and specifically review the communication plan for both zones. Personnel should be aware of the strategy and tactics occurring in different zones.

MEDIA

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY

When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency, and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

PHOTOGRAPHS AND VIDEOS OF INCIDENT

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional, or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND

The Information Section will manage lost and found items for the incident, located at the PIO Trailer.
