**Dryness:** Dead and down fuel moistures: 1 hour – 3% **10 hour 4%**, 100 hour 5%, and 1000 hour–5%.

### FIRE BEHAVIOR

Today will be more active than the previous shift. Forecasted clear skies will allow the fire to become ventilated and increase fire behavior. Expect an increase in rates of spread and flame lengths. Watch for alignment, especially if you're assigned to a Group or Division in the North or Northeast. Do not be lured into a false sense of security if working on a quiet piece of line, fire activity can increase suddenly with wind.

### SPECIFIC FIRE BEHAVIOR:

#### **Branch XX**

**Evans Group:** Active fire behavior heading toward the NE under SW wind influence, running surface fire, and spotting into the North Arm of Indian Valley (Diamond Mt. Rd.).

**Dyer Group:** Potential for active fire behavior, spotting from East Shore onto Dyer Mountain with alignment.

**Hunt Group:** Anticipate Moderate fire behavior, flanking fire in Hunt Cyn. and potential for spotting into the North Arm of the Indian Valley (Diamond Mt. Rd.)

#### **Branch XXV**

**Division QQ:** Potential for increased activity with SW wind alignment, surface fire, torching and spotting in the Mountain Meadow and Cairn Butte area.

**Division RR:** Minimal activity, interior smoldering.

**Division WW:** Minimal activity, interior smoldering.

**Division XX:** Minimal activity, interior smoldering.

#### **Night Branch**

Mild temperatures and low RH in the beginning of the shift. Moderate RH recovery on ridge tops (up to 40%) and valleys (up to 55%). Potential to secure containment lines with the improved conditions. Be mindful of wind shifts and speeds due to topographical features. The shift will start with a Pig of 40-50% diminishing after sunset.

### AIR OPERATIONS

**AVIATION WATCH OUT SITUATIONS:** Are you deviating from the assigned operation or flight?

# Dixie Fire East Zone – Safety Message

INCIDENT #CA-BTU-009205

DATE: 08/08-09-2021 TIME: 0700-0700 Day/Night Shift

## Hazard Control Around Trees

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment.
- Avoid hazards by designating “No Work Zones” (flag, sign, and map).
- Modify suppression tactics or fireline location to avoid high-risk areas.
- Post lookouts to help secure high-risk areas.
- Utilize road/traffic controls in high-risk areas.
- Fireproof potential hazard trees to prevent ignition.
- Keep clear of bucket drops near trees/snags.
- Reposition firefighters to secure areas in response to high wind forecast.
- Provide timely feedback to others regarding any hazard trees.

## LCES

- Lookouts- Use experienced people, know your trigger points, do not depend on air resources and check your surroundings!
- Communications- Know your radio frequencies, check batteries, and be cognizant of any problems with direct communications.
- Escape Routes- Know them, time them, discuss them, and reassess them!
- Safety Zones- Evaluate the “black” as your safety zone. Reassess for problems.

## Back to the Basics

- Size-Up; when does it start and when does it end?
- You can size up the weather, fuels, topography and the condition of crews enroute to a fire.
- Once on the incident, size-up should be occurring constantly to keep up situational awareness.
- Size-up doesn't end at demob. It ends when your back at home, after your gear is repacked and reset for the next assignment.

## Mitigate or Change Tactics When Faced With

- Indirect Fireline
- Compromised LCES
- Frontal Assault
- Change in wind speed and/or direction
- Re-burn Potential
- Predicted Lightning
- Lack of Communications
- Structural Protection
- Spotting Becomes Common
- Downhill Line Construction

# Haste Makes Waste

Haste makes waste is a phrase meaning rushing the task you're engaged in often results in mistakes that can be very costly. It means that making rash decisions can cause an individual or organization to fall behind compared to those who took their time to think through an issue before acting. This phrase was first recorded in this exact form in 1575, where the full text was:

"Haste makes waste, and waste makes want, and want makes strife between the good man and his wife."

Whether it's your teammate, spouse, friend, yourself, or whomever, strife is what we want to avoid. So (here's a tip), along with employing situational awareness, be cautious, patient, and deliberate in your actions to avoid any unnecessary setbacks that are not part of the plan.

**Reminder!!!** You can still pick up these postcards at the HR trailer. Just fill them out and drop them off. We'll stamp it and send it out for free!

# RESOURCE ADVISOR MESSAGE

## Reporting of Cultural Sites

- Do not use the radio. Looters listen to our frequencies and will note where you find things.
- Grab a GPS point, bump it up the chain of command or directly inform a Resource Advisor on the line or in camp.

## Stay Out!

- READs will be using flagging for areas to avoid suppression activities. Strip of red/black flagging.
- For more information, please consult with a READ.

## Food & Wildlife

- Throwing away and storing food in proper containers can keep wildlife off the line which prevents encounters with firefighters as well as future harm to the animals.

## Riparian Areas

- Meadows are natural barriers. Tie the line to them, not through them. If line is needed, go around and outside of the meadow to avoid damage.
- Stream and creeks will not be used as line. If needing to cross, minimize damage (i.e. on a dozer lift the blade and only track over) to prevent post-fire stability issues. Do not push or cut line through or along them.

## Water Drafting Sites

- Access the water source while trying your best to minimize damage to the soil and vegetation.
- If using a portable pump, make sure there is a spill kit and absorption pads to catch any accidental spills.
- Place portable pumps as far away as you can from the water source. Use screens on the intakes.
- Store fuel cans away from the water source and on a flat surface.

## Working in the Wilderness

- Follow MIST for suppression actions.
- Utilize system trails as much as possible for travel and/or handline.
- Consult with READs for spike camps, helispots, and sling sites locations.
- Practice "Leave No Trace" as much as possible.
- Work with READs to minimize visual impacts to wilderness areas when possible.

## Suppression Repair

- Utilize and coordinate with READs when implementing suppression repair plan.
- READs will determine when a line is completed by "approving" the line verbally and/or in ArcGIS Collector.
- Where the use of waterbars are applicable, see figure 1 for a visual bird's eye view. Questions? Ask a READ.

Figure 1 – Bird's eye view of water bars that are acceptable vs. unacceptable
