CA-BTU-009205

Tuesday

OPERATIONAL PERIOD

8/24/2021 0700
to
8/25/2021 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: DIXIE WEST ZONE	2. Operational Period: Date From: 8/24/2021 Date To: 8/25/2021 Time From: 0700 Time To: 0700		
3. Objective(s):			
<u>Strategic Objective</u> Implement a full suppression strategy on the Dixie Fire. Strategy and Tactics implemented on the incident are to be prioritize utilizing life safety, community infrastructure defense, and natural/cultural values as a guiding principal. Minimize acres burned on all lands by effective and efficient firefighting efforts that offer the highest probability of success while maintaining safety first.			
<u>Leaders Intent</u> Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take the appropriate actions regarding: - Professional behavior, conduct timely / effective communications - Personal safety and safety of others, including driving slowly, safely and defensively Implementation of tactics that offer a high probability of success - Manage fatigue by taking breaks and maintaining work rest guidelines - All line supervision personnel including crew and striketeam leaders must attend the morning Operational Briefing			
<u>Management Objectives</u> - Utilize the risk management process to identify and mitigate hazards to protect first responders and the public. Emphasize strategies and tactics that have the highest probability of success and the least exposure to first responders and the public. - Develop proactive strategies to protect life, residential properties, communities, businesses and infrastructure. Employ tactics that fulfill these strategies while being mindful of the necessity for contingency and emergency plans. Ensure strategies account for incident priorities, applying resources to those protecting life and residential properties first. - Follow COVID-19, CDC and established local, state and federal guidance to limit virus spread within the incident and surrounding communities near the fire area. - Provide timely and continuous incident information to affected agency partners, cooperators, California Team 1 as well as the public. - Utilize social media and all other communications tools to keep the public well informed of the fire conditions and other pertinent information. - Maintain fiscal accountability and keep costs commensurate with values at risk.			
<u>Control Objectives</u> - Keep the fire north of fire perimeter and Highway 162 and the junction on Highway 70 - Keep the fire south of Harvey Valley Road - Keep the fire east of Mill Creek drainage - Keep the fire west of the eastern Lassen County line			
<u>General Situational Awareness</u> Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees. Stop, Think, Organize, Proceed

Dixie West Fire Weather Forecast

FORECAST NO: 38
DATE: August 24th, 2021
FORECAST ISSUED: 1800 August 23rd, 2021

SECTORS: Lassen/Westwood
Incident Meteorologist: Derek Williams
Signed: *Derek Williams*

WEATHER DISCUSSION: Broad southwesterly flow will continue across the fire area with gusts along ridgetops of less than 25 mph in the afternoon, otherwise, expect mainly terrain driven winds in sheltered valleys. Smoke will continue to hamper maximum temperatures during the day but some valleys could manage to reach the mid to upper 70s, approaching 80 in valleys. Ventilation will improve during the afternoon hours as southwest winds increase aloft but smoke will fill back in tonight as a light drainage flow redevelops after sunset. Locally unstable conditions and stronger wind gusts could develop if smoke clears.

TODAY:

SKY/WEATHER: Smoke and haze.

MAX TEMP:	Valleys: 75-80°	MIN HUMIDITY:	Valleys: 16-21%
	Ridgetops: 72-77°		Ridgetops: 17-23%

CHANCE OF THUNDERSTORMS: 0% **LAL:** 1.

WINDS: **Valleys:** Light drainage winds in the morning. Upslope and upvalley wind 3-6 mph in the afternoon in sheltered valleys, southwest 5-7 mph in exposed and aligned valleys.
(20 FEET) **Ridgetops:** Southwest 4-8 mph in the morning, increasing to 10-15 mph in the afternoon with gusts around 23 mph.

HAINES: 5 (moderate)

MIXING HEIGHT: Rising to 7,000 feet by 1700. **TRANSPORT WIND:** Southwest 17-22 mph.

VISIBILITY: 5-8 miles. Better visibility in Plumas county.

INVERSION: Inversion gradually mixing out between 1200 and 1330.

TONIGHT:

SKY/WEATHER: Smoke and haze.

MIN TEMP:	Valleys: 36-41°	MAX HUMIDITY:	Valleys: 65-70%
	Ridgetops: 41-46°		Mid Slopes: 55-60%
			Ridgetops: 60-65%

CHANCE OF THUNDERSTORMS: 0% **LAL:** 1

WINDS: **Valleys:** West to southwest 6-10 mph in the evening with localized higher gusts in the terrain favored areas, becoming downslope/down valley 2-4 mph after midnight.
(20 FEET) **Ridgetops:** Southwest 10-14 mph with gusts to 20 mph in the evening, decreasing to 5-10 mph by morning.

TRANSPORT WIND: Southwest 10-15 mph.

STABILITY/INVERSION: Moderate inversion and poor ventilation developing after midnight.

EXTENDED OUTLOOK: Wednesday through Sunday. An upper-level disturbance will bring gusty ridgetops winds to the fire area Wednesday but will remain below critical thresholds. Dry conditions will persist with lower wind speeds mainly from the west through the weekend. However, temperatures will be on the rise to above normal levels along with poorer RH recoveries and critically low afternoon humidity through the weekend.

INPUTS

WEATHER SUMMARY:

Temperatures will warm to the mid 70's to the lower 80's with minimum humidity dropping to 16 to 23% during the day. Light drainage winds in the morning, becoming 3-6 mph mid-day, 10-15 mph on the ridges with gusts to 23 mph possible. Overnight the temperatures will be in the mid 30's to mid 40's with humidity recovery at 65-70%, except 55-60% in the mid slope thermal belt areas. Winds overnight will continue from the Southwest at 6-10 mph becoming downslope in the early morning hours.

OUTPUTS

FIRE BEHAVIOR

GENERAL: *****FUELS AND FIRE BEHAVIOR ADVISORY IN EFFECT FOR THE FIRE AREA*****

Smoke will be over the fire, especially in the valleys and low areas before beginning to thin somewhat. Overall fire activity will be moderated by this smoke cover to begin the shift. Ridgetop winds will increase in the afternoon and thin the smoke, allowing for increases in fire activity. As the smoke thins and fire becomes aligned with topography, expect a quick increase in activity with torching and spotting. All the fuel in the area is extremely dry and receptive to ignition. Smoke conditions will affect burning conditions, if thick smoke remains over the fire, expect activity to be moderated.

SPECIFIC:

Butte Sector: Smoldering material will continue to burnout, especially in the stump holes and large dead and down. Needle cast fallen over hot material can ignite and potentially spread. Minimal heat exists in the sector, expect this to continue as mopup and patrol continues.

Lassen Sector: Fire activity should be low to moderate to start the shift, but will increase when wind speeds increase and cause thinning of the smoke. Topography in this sector is very mountainous which will channel winds and increase the probability of ember cast and spotting, especially in upper elevations or thinner tree stands. Spread rates will generally be slow to moderate, but will increase with any change of conditions, such as wind speed or slope alignment. Heavy fuels will hold heat through the night and continue to burn out, and potentially challenge control lines within Branch 9 & 16. Conditions should remain favorable for the planned firing operations.

Clear/Lake Branch: Fire activity in this branch will be primarily smoldering and isolated ground fire. Needle cast has fallen over much of these areas, be aware of potential ground fire if the needle cast is over hot spots and stump holes.

Janesville Branch: Fire progression is primarily fuel and slope driven, with short range spotting possible in wind aligned areas. If the smoke clears in the afternoon, expect intensity to increase with an increase in spotting production and distances. Limiting these spots by increasing mop up distances will be vital to holding existing control lines. Wind over the escarpment may cause swirling on the eastern face, be aware of erratic winds..

AIR OPERATIONS

Air operations may be limited early today, but smoke may clear enough by mid-afternoon for air operations.

SAFETY

- Snags and stump holes are likely in timber areas.
- Make sure to identify escape routes and safety zones early in the shift before dark.

Fuels and Fire Behavior Advisory

Northern California

August 17, 2021 to August 31, 2021

Subject: Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

Discussion: Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify throughout the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are below average in dryness, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year and are running at or above the 97th percentile in most cases. Expect increased fire intensity and spread rates in these areas. Early season extreme fire behavior has been observed in both light and heavy fuels. **Anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. **Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. **Anticipate higher resistance to control in all fuel types.**
- Already this year, Northern California has experienced large fire activity and multiple team deployments. California will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. **Everyone, every day, returns home safely.**

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. **Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures.**
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

SAFETY MESSAGE

Stress - a state of mental or emotional strain or tension resulting from adverse or very demanding circumstances.

- **STOP COVID-19! Wash your hands frequently.**
- **Scout, size-up, and mitigate hazards for your assigned tasks.**
- **Ensure that you have the correct radio clone for the day.**
- **Look up, Look down, Look all around for Hazardous trees in you work area.**
- **Weather is getting hotter and dryer. Drink water/maintain proper nutrition.**
- **Set a reasonable work pace to meet the day's objectives.**
- **Wildlife is present around the roadways and in the fire areas. Slow down.**
- **Be watchful around heavy equipment, they may not see you.**

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Shortness of breath or difficulty breathing
 - New loss of taste or smell
 - Fever ○ Sore throat
 - Chills ○ Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
 - Radios, phones, doors, pumps, fuel cans, etc.

Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

Communications

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your crew, and your camp!

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

DEMOBILIZATION MESSAGE Dixie Incident CA-BTU-009205

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

MEDIA

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY

When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency, and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

PHOTOGRAPHS AND VIDEOS OF INCIDENT

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional, or embarrassing circumstances, which are a serious breach of ethics. The Public Information Office is looking for photos and videos from the Dixie Fire, email to: calfireimt3pio@gmail.com

LOST AND FOUND

The Information Section will manage lost and found items for the incident, located at the PIO Trailer.

Today's Feature: Clovis Mammoth Hunters

- Clovis culture is named after artifacts originally identified in 1932 near the town of Clovis, New Mexico.
- Archaeologists originally thought that these artifacts marked the earliest evidence of Paleoamericans migrating into North and Central America around 12,000 years ago!
- Archaeologists have learned that Clovis people hunted extinct megafauna species such as mammoths, bison, mastodon, sloths, camels and much more.
- Clovis projectile points have been identified within the Dixie Fire area that were used to hunt mammoths!

Fun Facts:
Genetic data indicates that Clovis people are the direct ancestors of roughly 80% of contemporary Native American populations.

Fun Facts:
Archaeologists have recently discovered archaeological sites which predate Clovis artifacts going back as far as 20,000 years ago!!

Fun Facts:
Fluting is a technique that creates a distinctive shallow channel extending from the base of the point. Fluting acts as a 'shock absorber.'

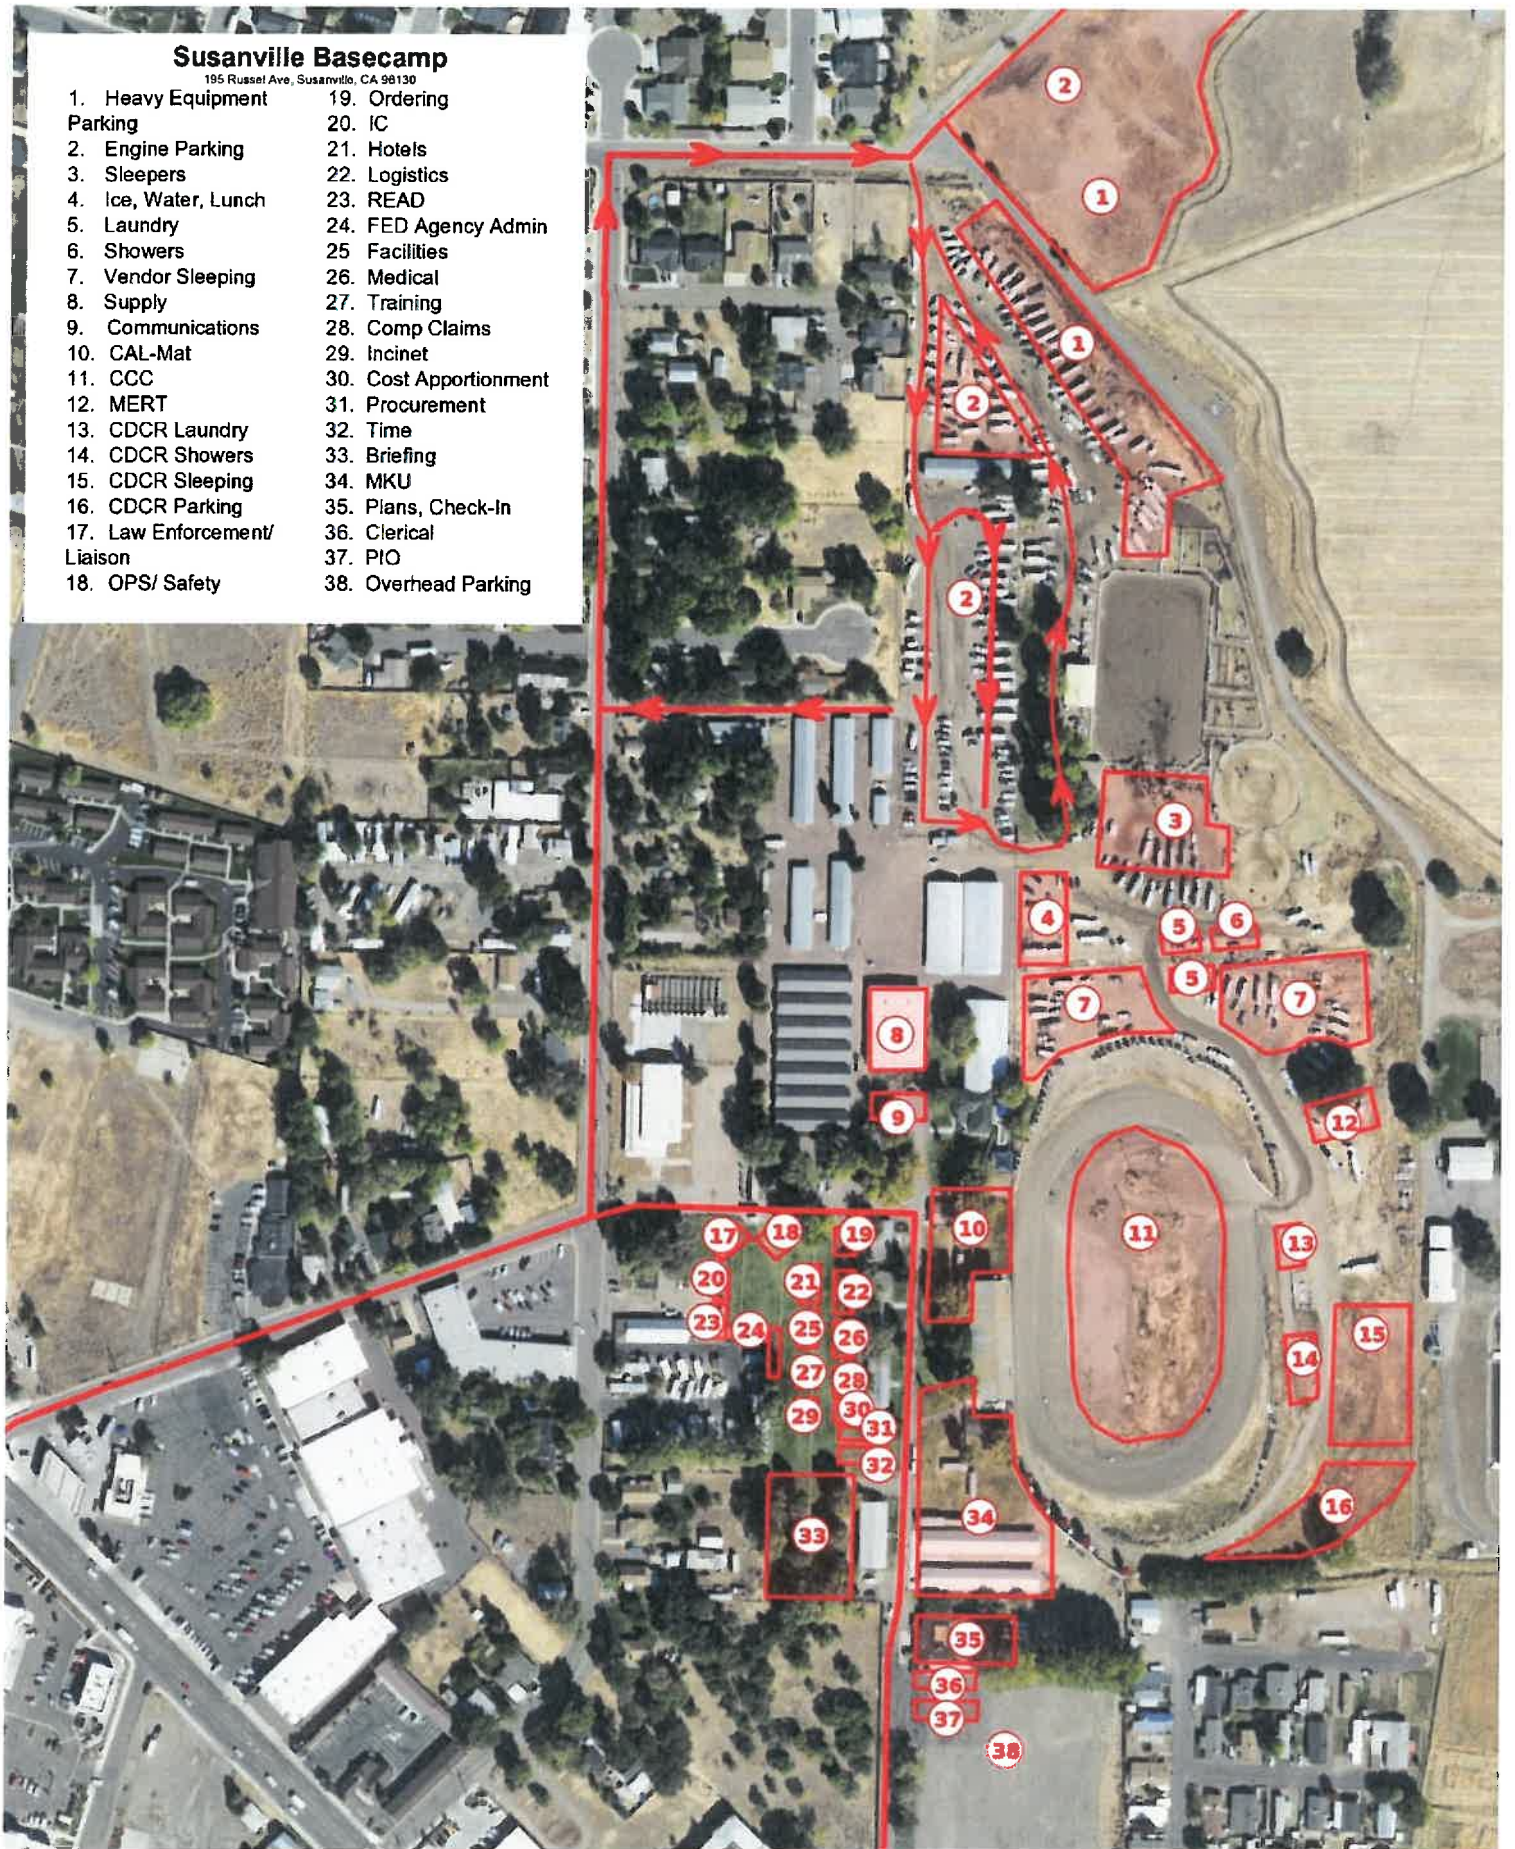

**** If you think you have identified a natural or cultural resource concern, check in with the REAF in your Division or contact Lead READ Jake Martin at 530-260-6288 – jacob.martin1@usda.gov. Remember artifact collecting is illegal.**

Thank you!
