## LEADER'S INTENT:

Incident responders have a **DUTY** to safeguard each other and the public we serve from hazards. It is through **RESPECT** for everyone's health and safety that we follow these mitigations identified below. We rely on everyone's **Mutual INTEGRITY** to ensure compliance for the sake of our health and success in our mission.

COVID-19 prevention and mitigation guidance for individuals, regardless of vaccination status, includes:

- Face coverings: Masks are to be worn in any enclosed incident facility (tent, yurt, building, vehicle) or common use area regardless of proximity to others. Masks need to cover the nose and mouth securely. Exceptions are a person alone in an enclosed space; outdoors and able to maintain a minimum distance of six feet; or actively engaged in firefighting.
- The **Module as One concept** should be used by crews and modules to the extent practical. This reduces potential exposure to Covid-19 from outside resources and the public.
- All incident personnel are expected to conduct self-screening of their health on a daily basis. Anyone experiencing sickness / illness should contact their supervisor and see MEDL, Frontline or Covid coordinator personnel for assessment.
- Great Basin Team 1 has a zero tolerance policy for bullying, sexual harassment, illegal drug and alcohol use.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 43	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Dixie East	<b>OPERATIONAL PERIOD:</b> September 1, 2021 Day/Night
<b>DATE ISSUED:</b> August 31, 2021	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> Plumas NF	<b>SIGNED:</b> /s/ Tobin Kelley FBAN / <i>Lisa Loncar</i> <i>FBAN(t)</i>

### INPUTS

#### WEATHER SUMMARY

Hot, dry and windy conditions persist, ridgetop winds gusting to 28 mph from the WSW by 1300.

#### Fuels

Grass/Shrub and Timber Understory. Fuels are cured and receptive to ignition.

### OUTPUTS

#### FIRE BEHAVIOR

**General:** Active to extreme fire behavior expected yet again today, flanking, group torching, crown runs and potential for 0.5-1-mile spotting. In areas where wind and fuels align with terrain expect uphill runs. Haines of 5 increases the potential for transition to a plume dominated fire in areas of heavy timber. In several areas of the fire needle drop is starting to occur creating some potential for reburn.

**DIV NN:** Overall, minimal activity expected. As needles drop on hot spots expect potential for reburn.

**DIV PP:** Slight wind shift to the WSW today. The fire will continue to burn towards FSR 176 and FSR 177. The Walker Fire scar continues to limit fire spread to the north. Expect rapid rates of spread in lighter fuels. In the western half of the Division minimal fire activity continues to provide good opportunity for mop-up.

**DIV UU/Genesee Group:** Backing, flanking, single tree torching and reburn of any needle drop is expected. The fire north of the Devils Punch Bowl continues to have potential to grow. Interior pockets of unburned fuels will continue to burn together.

**DIV RR:** The fire continues to burn actively along Grizzly Ridge; however, winds remain favorable. Flanking, uphill runs, and torching.

**QQ/Davis Group:** Winds are expected to be out of the WSW today. The fire will continue to burn along Turner Ridge and towards FSR 177. As the fire moves into lighter fuels expect rapid rates of spread. In areas of heavier timber, the potential for long range spotting increases.

**DIV WW/XX:** Minimal fire activity.

**Night Ops:** High winds and poor RH recovery continue, resulting in the fire remaining active overnight. Flanking, uphill runs, torching and the potential for short range spotting remains.

**AIR OPERATIONS:** High winds should clear smoke out of most of the fire area however, heavy smoke is still expected downwind of the main fire front.

### SAFETY:

**New acres, new fuel influences, new spot fires, new folks, new supervisors, new travel routes...lots of new stuff – same old fire, same old hazards. Ensure LCES is in place and the Standard Firefighting Orders are communicated and understood.**

Incident Location: QUINCY      County: Plumas      State: CA      Latitude: " N      Longitude: " W

Forest / Unit / Jurisdiction: Plumas NF

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

# RESOURCE ADVISOR MESSAGE

## Reporting of Cultural Sites

- Grab a GPS point, bump it up the chain of command or directly inform a Resource Advisor on the line or in camp.

## Stay Out!

- **READs will be using flagging for areas to avoid suppression activities. Strip of red/black flagging.**
- **Pay attention to the avoidance areas marked on the map.**
- For more information, please consult with a READ.

Do not disturb cultural resources.

**Leave what you find for others to enjoy.**

## TRASH/FOOD & WILDLIFE

- Be professional, pick up your trash and that of others, you can get trash bags from supply.
- Throwing away and storing food in proper containers can keep wildlife off the line which prevents encounters with firefighters as well as future harm to the animals.

## Riparian Areas

- Meadows are natural barriers. Tie the line to them, not through them. If line is needed, go around and outside of the meadow to avoid damage.
- Stream and creeks will not be used as line. If needing to cross, minimize damage (i.e. on a dozer lift the blade and only track over) to prevent post-fire stability issues. Do not push or cut line through or along them.

## Water Drafting Sites

- Access the water source while trying your best to minimize damage to the soil and vegetation.
- If using a portable pump, make sure there is a spill kit and absorption pads to catch any accidental spills.
- Place portable pumps as far away as you can from the water source. Use screens on the intakes.
- Store fuel cans away from the water source and on a flat surface.

## Working in the Wilderness

- Follow MIST for suppression actions.
- Consult with READs for spike camps, helispots, and sling sites locations.
- Practice “Leave No Trace” as much as possible.
- Work with READs to minimize visual impacts to wilderness areas when possible.
