### INPUTS

**WEATHER SUMMARY: \*\*\*CRITICAL WEATHER DAY- RED FLAG WARNING TILL 11PM TONIGHT\*\*\***

The weather will remain hot and dry again today with a slight chance of thunderstorms early in the morning. - Temperatures will be 70-80 degrees during the day and 35-52 degrees overnight. Humidity will be 15-23 percent during the day and 50-75 percent overnight. The wind will be southwest 25-30 mph with gust to 40 mph in the morning decreasing slightly in the afternoon. Overnight winds will be southwest 15 mph with gust to 30 mph decreasing 10-20 mph.

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL: \*\*\*FUELS AND FIRE BEHAVIOR ADVISORY IN EFFECT FOR THE FIRE AREA\*\*\***

The wind will continue this morning from the southwest and surfacing even into the lower valleys. The fire will be extremely active in the morning, with wind driven runs and spotting potential ½ to 1 mile. Spot fires in open timber stands and brush fields will grow rapidly in the morning. The increased winds will keep the column bent over and limit vertical growth in the morning. In the afternoon the wind will begin to subside which will allow for more vertical growth. The fire intensity will reduce as the fuels begin to thin to the north along the Hat Creek Rim.

#### SPECIFIC:

**Lassen Sector:** The fire spread will be driven by the high winds in the morning. The fuels to the north become lighter with more spacing in the timber. The open stand allows for the wind to have a higher effect on the fire, increasing the rate of spread. The fire intensity will reduce with the lighter fuels.

**Shasta Sector:** The fire will continue to flank towards Highway 44. The fire will progress at a slow to moderate rate of spread, with some head runs with the wind in the morning. Fire intensity will be high with the heavy fuels and will abate in the grass meadows. The spotting will be short range, but still has the potential to cross Highway 44.

**Butte/Westwood Sector:** The wind will be strongest over the ridge in the morning and subside slightly through the afternoon. A spot fire across the control line would spread rapidly. The overstory will continue to build a new ground fuel especially with stronger winds. Fires in this new layer will have low intensity but could lead to fire outside of the control lines.

### AIR OPERATIONS

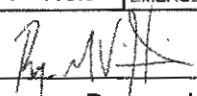

Visibility will be clear in the fire area throughout the day with high winds in the morning.

### SAFETY

There is a slight chance for thunderstorms in the morning. Observe the weather in the morning and plan for the changes in the afternoon.
