

# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> DIXIE FIRE EAST ZONE	<b>2. Operational Period:</b>	Date From: 9/16/2021 Time From: 0700	Date To: 9/17/2021 Time To: 0700
--	-------------------------------	---	-------------------------------------

**3. Objective(s):**

**Strategic Objectives**

Implement a full suppression strategy on the Dixie Fire. Strategy and tactics implemented on the incident are to be prioritized utilizing life safety, community infrastructure defense, and natural / cultural values as a guiding principle. Minimize acres burned on all lands by effective and efficient firefighting efforts that offer the highest probability of success while maintaining safety first.

**Leaders Intent:**

Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct timely / effective communications.
- Personal safety and the safety of others, including driving safely and defensively while implementing tactics that offer a high probability of success.
- Manage fatigue by taking breaks and maintaining work rest guidelines.
- Ensure all personnel have been briefed in operational strategies and tactics.

**Management Objectives**

- Utilize the risk management process to identify and mitigate hazards to protect first responders and the public. Emphasize strategies and tactics that have the highest probability of success and the least exposure to first responders and the public.
- Develop proactive strategies to protect life, residential properties, communities, businesses and infrastructure. Employ tactics that fulfill these strategies while being mindful of the necessity for contingency and emergency plans. Ensure strategies account for incidents priorities, applying resources to those protecting life and residential properties first.
- Follow COVID-19, CDC and established local, state and federal guidance to limit virus spread within the incident and surrounding communities near fire area.
- Provide timely and continuous incident information to affected agency partners, cooperators, CIIMT 14 and NIMO 1, as well as the public.
- Utilize social media and all other communication tools to keep the public well informed of the fire conditions and other pertinent information.
- Coordinate with Resource Advisors to implement suppression repair according to the plan and agency policy.
- Maintain fiscal accountability and keep costs commensurate with values at risk.

**Control Objectives**

- Keep the fire within the current footprint.

**General Situational Awareness:**

Utilize IRPG checklist to support management decision making. Provide clear and concise directions, ask clarifying questions when needed.

**Approved Site Safety Plan(s) Located at:**

# Fire Weather Forecast

**FORECAST NO:** 56  
**PREDICTION FOR:** DAY AND NIGHT SHIFT

**NAME OF FIRE:** Dixie East CA-BTU-9205  
**UNIT:** Plumas NF

**SHIFT DATE:** 16 Sep 2021  
**TIME AND DATE**  
**FORECAST ISSUED:** 1900 / 15 Sep

**SIGNED:** *Eric C. Kurth*  
**Incident Meteorologist** [eric.kurth@noaa.gov](mailto:eric.kurth@noaa.gov)

**...Increasing Southwest Winds this Week with Low Humidity Through Friday...  
...Gusty Southwest Winds and Chance of Rain for the Weekend...**

**WEATHER DISCUSSION:** Sunny, dry and a little cooler. Wind will begin light terrain driven then become southwest, with afternoon gusts to 26 mph over ridges. Gusty southwest winds increase through the week. Cooler, higher humidity for the weekend with chances of rain.

**WEATHER FORECAST:**

**WEATHER:** Mostly sunny and hazy.

**TEMPERATURE:** Ridge high 72 to 77. Valley high 77 to 85.

**HUMIDITY:** Ridge minimum 14 to 20 percent. Valley minimum 12 to 19 percent.

**20 FT WIND:**

**RIDGETOP** – Variable up to 5 mph, by 1300 becoming SW 5 to 10 mph gusts to 15 mph. By 1400, ridge wind WSW increasing to 8 to 12 mph, gusts 20 to 26 mph.

**SLOPE/VALLEY** – Down valley/downslope 2 to 4 mph, becoming upslope/up valley 5 to 10 mph gusts to 18 mph by 1300.

**HAINES INDEX:** 4 low

**LIGHTNING ACTIVITY LEVEL:** 1.

**MIXING HEIGHT/TRANSPORT WIND:** Rising to 7000 to 8000ft AGL, SW 18 mph.

**STABILITY/INVERSION:** Inversion breaking 1200.

**OUTLOOK FOR TONIGHT:** Clear. **Low temperature:** Ridges 50 to 59. Valleys 40 to 51. **Maximum humidity:** Ridges 36 to 40 percent. Valleys 45 to 70 percent. **Ridge wind** SW 8 to 12 mph gusts to 25 mph through 2200, becoming south southwest 4 to 8 mph with gusts to 14 mph. **Valley wind** up valley/upslope down slope/down valley 5 to 10 mph gusts to 18 mph becoming downslope/down valley 2 to 5 mph. **Haines Index** 4. **LAL** 1. **Mxg Hgt/Trans Wind:** Mixing height 4000ft dropping to 400ft, SW 10 mph.

**OUTLOOK FOR FRIDAY:** Partly cloudy. **High temperature:** Ridges 72 to 79. Valleys 74 to 83. **Minimum humidity:** Ridges 14 to 18 percent. Valleys 12 to 18 percent. **Ridge wind** SW 2 to 6 mph, by 1400 becoming SW 9 to 15 mph gusts to 28 mph. **Valley wind** down valley/downslope 1 to 4 mph, becoming upslope/up valley 4 to 8 mph gusts to 20 mph. **Haines Index** 4 Low. **LAL** 1. **Mxg Hgt/Trans Wind:** Rising to 7000ft AGL, SW 14 mph.

**EXTENDED FORECAST:** **Fri Night/Sat:** Partly cloudy early becoming mostly cloudy afternoon. A slight chance of light afternoon rain showers.. Low 40 to 50. High 70 to 77. Afternoon ridge wind SW 9 to 15 mph gusts 25 to 35 mph. **Sat night/Sun:** Mostly cloudy. Chance of rain. Low 40 to 53. High 67 to 74. Afternoon ridge wind SW 10 to 17 mph gusts 30 to 35 mph. Increasing humidity. **Sun night/Mon:** Mostly cloudy. A slight chance of rain showers Low 39 to 50. High 62 to 72. Higher humidity. Afternoon ridge wind NE 5 to 10 mph, gusts to 20 mph.

**For area weather observations:** 

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 58	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Dixie	<b>OPERATIONAL PERIOD:</b> 09/16-09/17 Day/Night
<b>DATE ISSUED:</b> Wednesday, September 15, 2021	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> Plumas National Forest	<b>SIGNED:</b> /s/ Patrick Doyle, FBAN <i>Patrick Doyle</i>

**WEATHER SUMMARY** (See Fire Wx Forecast)  
**WEATHER** Mostly sunny and hazy. **HUMIDITY** (minimum) ridge/valley: 14-20% (up 1)/12-19% (up 1)  
**MAX TEMP** Ridges/Upper Slopes: 75-80° (no change), Valleys/Lower Slopes: 80-88° (no change)  
**20 FOOT WINDS (Afternoon)**  
 Slope/Valley: upslope/upvalley 5-10 mph (no change), G16 mph (no change)  
 Ridge Top: WSW 8-12 mph (no change) with gusts up to G20-26 mph (range, down 5, to up 1)

**TOPOGRAPHY:** Elevation: 1,500-7,600. Slopes: 0%-100% (0-45°degrees).

**FIRE BEHAVIOR**

**GENERAL:**

- **Minimal activity most areas.** Heat can hide in stump holes and roots. Be careful to check these near control lines, near edges of unburned islands, and edges of riparian areas that have the potential to flare up and spot. **Majority of fire activity will be in stumps, stump holes and root systems.** To a lesser extent in hollows and catfaces of standing trees. Increase in fire activity in broken top snags (candles or candlesticks), creeping and smoldering edge-areas between unburned and burned areas.
- **Current fire environment conditions meet some of the critical thresholds that support rapid fire growth with a high resistance to control.** These include extreme to exceptional drought conditions, fuel moistures that are at or near extreme lows or exceeding minimums, and energy release component (ERC) indices exceeding or near critical level for fire danger index.
- **New starts outside of recent fire footprint(s) will establish readily and spread rapidly with moderate to extreme fire behavior** (torching, individual/group tree torching and passive/active crown fire with spotting 0.1-0.5 miles, with potential for spotting distances 1-4 miles if plume dominated.

**SPECIFIC:**

**DIV NN / OO / WW / XX / Honey Group:** Minimal fire activity expected.

**DIV UU:** Minimal fire activity, except for some in area on steep slopes west of Devils Punchbowl. Steep slopes and difficult access make finding heat holding in stump holes, roots and catfaces. Forecasted winds this afternoon will test this area. Potential holdovers not found or interior islands have potential to flare up, torch trees and spot.

**DIV RR/QQ:** Wind test this afternoon for activity from Dixie Mt. down to Dixie Valley, but stump holes can hold on to heat for a longtime without showing smoke when underground. Grizzly, Turner and Horton ridges have minimal activity, but wind test this afternoon may wake up any sleeping heat there.

**DIV PP:** Minimal fire activity expected. Escarpment winds will not favor any fire along the rim and downslope.

**Night Ops:** Fire activity depends on area be worked. Most areas have minimal activity, but winds tonight should affect areas that still have active heat. **Most activity will be stumps, stump holes and roots in berms and roads.** Lower temperatures, poor-to-moderate humidity recovery ridgetop and midslope, and increased wind speeds will increase fire activity overnight where pre-existing heat exists.

**AIR OPERATIONS:** Clear air today. Expect minimum fire activity impacts due to smoke to air operations.

**SAFETY:** Rolling material loosened by fire activity burning out the supporting structure is still a threat when working on fire perimeter, or along roadway. Stay vigilant and remain focused on the task at hand.

## ***SAFETY MESSAGE***

*Fire fighter safety comes first on every fire, every time*

### **Major Hazards and Risks:**

#### **❖ Fireline:**

- Snags and fire weakened trees remain a serious concern especially as the wind is predicted to increase in the coming days. Stay alert and reassess your work areas.
- Park your vehicle in the direction of egress. Even though this fire appears out, it is still a good practice to park in the direction of your safe exit. Make sure you are pulled off the road so others can still get by. Practice now will ensure you do it on the next fire.

#### **❖ Travel:**

- PG&E and logging trucks have been reported driving fast in the fire area (especially around Bucks Lake).
- Drive defensively and don't assume other drivers are going to behave properly.
- Adhere to posted speed limits and expect on coming traffic around blind corners.

#### **❖ Communications:**

- This is a large fire and there are dead spots in the radio coverage. Confirm coms in your area and use human repeaters where contact with East Communications is spotty.
- Check out a satellite phone from communications if your work area proves to be problematic for the Command Channel.
- Don't mumble on the radio. Speak loud and speak clear. The command channel is connected through several repeaters which creates some background noise. Don't make communications ask you to repeat due to low volume.

**Team Safety Officers: Doug McKelvey, John Nickey, Linda Ferguson (t), Terry Nickerson(t)**

**INCIDENT RADIO COMMUNICATIONS PLAN (ICS 205)** Incident Name: **DIXIE EAST ZONE** Date/Time Prepared: **9/15/2021 1800** Operational Period Date/Time: **9/16/2021 0700 - 9/17/2021 0700**

**Utilization of any frequency other than those listed on this form are prohibited, subject to fines by the FCC and demobilization from the incident.**

Prepared By (Communications Unit Leader) *Kody Kerwin* Incident Location: QUINCY Forest / Unit / Jurisdiction: Plumas NF  
 County: Plumas State: CA Latitude: " N Longitude: W  
**Kody Kerwin, COML (925) 953-3044 Communications: 480-640-0402**

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

## General Message from Resource Advisors

- **Suppression repair is essential work to leave a better landscape behind and support our Plumas National Forest partners**
- **Resource advisors are working very closely with the Suppression Repair Group, Operations, and Fire leadership to strive for seamless communication and a common effort**
- **Please work with your supervisor as well as the Resource Advisors to implement work correctly and identify additional equipment/resource needs**
- **Follow direction in the Suppression Repair Plan. Operations and Planning staff have copies, or talk to any resource advisor and he/she can get you the document**
- **Resource advisors will be present in all divisions where repair is taking place.**
- **Archaeologists and other specialists are clearing work on lines to allow work to proceed**
- **Resource advisors are inspecting work done and marking as Complete, provided work meets standards**
- **We are working for the most efficient allocation of equipment and want to avoid moving it around unnecessarily**
- **Remember repair includes removing hazard trees, chipping along roadsides, repairing trails, extracting logs, repairing fences, repairing archaeological damage, repairing staging areas and safety zones, seeding to avoid invasives, and other treatments in addition to repairing dozer lines**
- **We are very fortunate to have Tribal resources such as the Chumash and other engines/crews for repair. Their special cultural skills are invaluable for assessing archaeological and heritage resources and their repair. We are working very closely with the Tribal Liaison and the Maidu Tribe to insure the best possible outcomes.**
- **Please contact the resource advisors if you have questions. Lead Resource Advisor Tom DeMeo 503 267 3943 cell**

## Installation of Waterbars

Construct waterbars when natural contour cannot be reconstructed, and slope exceeds 10% for dozer lines and hand lines.

Where possible, restore lines to natural contour and vegetation/duff cover; if this can be achieved and is approved by READ, waterbars are not needed.

- Spacing-
  - These spacing distances should be used as a guide. Judgement should be used in locating waterbars to minimize erosion potential. Install waterbars at the following recommended intervals:

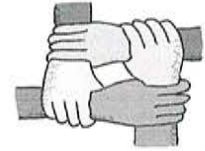

Fire line Gradient (% of slope)	Distance between Waterbars (in feet)
0 to 10	No waterbars needed
11 to 20	100
21 to 40	75
41 to 60	50

- Location-
  - Locate waterbars at natural slope breaks or take advantage of natural features when possible. Direct water to unburned areas and/or resistant surfaces with high vegetation cover when possible. Waterbars should discharge into undisturbed areas and preferably rocky ground or filtered areas well protected with slash and vegetative cover.
- Width-
  - The waterbar channel will be wide enough to handle the expected waterflows and to avoid plugging when a normal amount of sloughing or sediment movement occurs.
- Angle-
  - Place waterbars at an angle relative to the fire line. The angle will be between 30-45 degrees.
- Depth-
  - Dozer Lines
    - ✓ Cut waterbars at least 6" into compact soil. The total height from the bottom of the waterbar to the top should average 18" and not to exceed 24".
  - Hand Lines
    - ✓ As a general rule, cut waterbars at least 4" into the compact soil. Total height from the bottom of the ditch to the top of the waterbar should average at least 8" and not exceed 12".

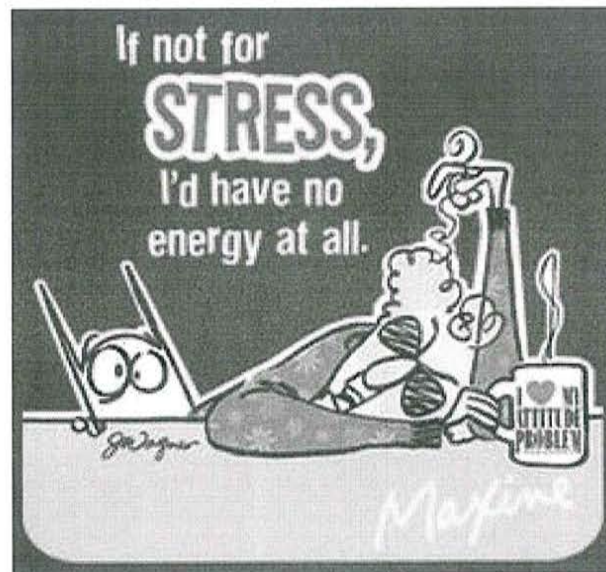

## Human Resource Message

Stress and fatigue impact your emotional and physical well-being. This can negatively affect your interactions with others. Take action, don't ignore your stress.

### STRESS RELIEVERS

- Relaxation – break the stress cycle with frequent stress breaks throughout the day – stretch, take a walk, deep breathing
- Eat three nutritious meals a day and healthy snacks
- Stay in touch with team members and communicate
- Replenish, rest, get some down time

Larry Sandoval, HRSP  
505-944-6489

# COVID-19 Message

- **Wear a mask properly** (over nose and mouth) in all indoor facilities, vehicles (more than one person), briefing area, dining area, and when you can't stay 6' from others. Stay 6' from others when possible.
- Ensure COVID-19 precautions and best practices are always met.
- If you're feeling ill or need COVID testing, get evaluated by Frontline medical trailer.
- **Contact a COVID Team Member** below with any COVID, testing, or vaccine related questions.

## Testing at Quincy ICP and A23 Spike

Whether you are experiencing symptoms or just want COVID testing for peace of mind, visit either of the Frontline medical trailers at Quincy ICP or A23 Spike.

**ONLY YOU  
CAN PREVENT  
COVID-19**

## Quincy Camp Free Vaccines

**Thursday  
6 - 8 pm**

Vaccine yurt

(Just east of briefing area  
beside Fire Info yurt)

Provided by

Plumas County Dept. Health

## Training Specialist Message

Checking out is just as important as checking in. Be sure to Close out with the Training Specialist before you leave.

**The Training Specialist is located at ICP in Serpilio Hall Directly behind Supply.**

If you have already registered as a trainee with the previous Training Specialist, there is no need to register again. Your information has been handed off.

### Training Specialist contact information:

Steve Tolen TNSP(t) - (530) 394-8114 [william.tolen@usda.gov](mailto:william.tolen@usda.gov)

Call, text or email at anytime with questions or concerns

Robert Rivelle TNSP – (707) 498-1761

### How to Register as a Trainee:

1. Use the QR code below to register. If you are having problems, contact or come by and meet with the Training Specialist at any time.
2. Once registered you will receive text and/or email updates.

### To Close Out your assignment:

1. **Trainer:** Complete the evaluation record in the back of the position task book and make as many task entries as possible.
2. **Trainer:** Complete the ICS 225 Individual performance rating and go over it with your trainee
3. **Trainee:** Text or email a photo of the ICS 225 Individual performance rating to the training specialist
4. **Trainee:** Complete the exit questions utilizing the QR code below
5. **Trainee:** Once completed the Trainee and Training Specialist will have a brief conversation about your task book and the assignment.

# MEDICAL PLAN (ICS 206 WF) CIIMT 1

Medical Incident Report					
<b>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</b>					
<b>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</b>					
<b>Use the following items to communicate situation to communications/dispatch.</b>					
<b>1. CONTACT COMMUNICATIONS / DISPATCH</b> (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
<b>2. INCIDENT STATUS:</b> Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor injury or illness. <b>Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. <i>(WGS84)</i>		
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>		
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>		
<b>3. INITIAL PATIENT ASSESSMENT:</b> Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG PAGE 106					
Treatment:					
<b>4. TRANSPORT PLAN:</b>					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
<b>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</b>					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extraction</i>					
<b>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</b>					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
<b>7. CONTINGENCY: Considerations:</b> If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
<b>8. ADDITIONAL INFORMATION:</b> Updates/Changes, et c.					
<b>REMEMBER:</b> Confirm ETA's of resources ordered. Act according to your level of training.					
<b>Be Alert – Keep Calm – Think Clearly – Act Decisively</b>					
<b>*** Follow up with MEDL upon return to ICP ***</b>
