

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">DIXIE FIRE EAST ZONE</p>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="padding-right: 20px;">Date From:</td> <td style="padding-right: 20px;">9/17/2021</td> <td style="padding-right: 20px;">Date To:</td> <td>9/18/2021</td> </tr> <tr> <td>Time From:</td> <td>0700</td> <td>Time To:</td> <td>0700</td> </tr> </table>	Date From:	9/17/2021	Date To:	9/18/2021	Time From:	0700	Time To:	0700
Date From:	9/17/2021	Date To:	9/18/2021						
Time From:	0700	Time To:	0700						

3. Objective(s):

Strategic Objectives

Implement a full suppression strategy on the Dixie Fire. Strategy and tactics implemented on the incident are to be prioritized utilizing life safety, community infrastructure defense, and natural / cultural values as a guiding principle. Minimize acres burned on all lands by effective and efficient firefighting efforts that offer the highest probability of success while maintaining safety first.

Leaders Intent:

Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct timely / effective communications.
- Personal safety and the safety of others, including driving safely and defensively while implementing tactics that offer a high probability of success.
- Manage fatigue by taking breaks and maintaining work rest guidelines.
- Ensure all personnel have been briefed in operational strategies and tactics.

Management Objectives

- Utilize the risk management process to identify and mitigate hazards to protect first responders and the public. Emphasize strategies and tactics that have the highest probability of success and the least exposure to first responders and the public.
- Develop proactive strategies to protect life, residential properties, communities, businesses and infrastructure. Employ tactics that fulfill these strategies while being mindful of the necessity for contingency and emergency plans. Ensure strategies account for incidents priorities, applying resources to those protecting life and residential properties first.
- Follow COVID-19, CDC and established local, state and federal guidance to limit virus spread within the incident and surrounding communities near fire area.
- Provide timely and continuous incident information to affected agency partners, cooperators, CIIMT 14 and NIMO 1, as well as the public.
- Utilize social media and all other communication tools to keep the public well informed of the fire conditions and other pertinent information.
- Coordinate with Resource Advisors to implement suppression repair according to the plan and agency policy.
- Maintain fiscal accountability and keep costs commensurate with values at risk.

Control Objectives

- Keep the fire within the current footprint.

General Situational Awareness:

Utilize IRPG checklist to support management decision making. Provide clear and concise directions, ask clarifying questions when needed.

Fire Weather Forecast

FORECAST NO: 57
PREDICTION FOR: DAY AND NIGHT SHIFT

NAME OF FIRE: Dixie East CA-BTU-9205
UNIT: Plumas NF

SHIFT DATE: 17 Sep 2021
TIME AND DATE

SIGNED: *Eric C. Kurth*

FORECAST ISSUED: 1900 / 16 Sep

Incident Meteorologist eric.kurth@noaa.gov

...Increasing Southwest Winds with Low Humidity into Saturday...

...Rain with Gusty Southwest Winds Sunday...

WEATHER DISCUSSION: Sunny, dry and a little cooler. Wind will begin light terrain driven then become southwest, with afternoon gusts to 28 mph over ridges. Gusty southwest winds increase for the weekend. Cooler, higher humidity for the weekend. Wetting rain likely Sunday.

WEATHER FORECAST:

WEATHER: Mostly sunny and hazy.

TEMPERATURE: Ridge high 72 to 77. Valley high 77 to 85.

HUMIDITY: Ridge minimum 15 to 20 percent. Valley minimum 13 to 19 percent.

20 FT WIND:

RIDGETOP – Variable up to 5 mph, by 1300 becoming SW 5 to 10 mph gusts to 15 mph. By 1400, ridge wind WSW increasing to 8 to 12 mph, gusts 22 to 28 mph.

SLOPE/VALLEY – Down valley/downslope 2 to 4 mph, becoming upslope/up valley 5 to 10 mph gusts to 18 mph by 1300.

HAINES INDEX: 4 low

LIGHTNING ACTIVITY LEVEL: 1.

MIXING HEIGHT/TRANSPORT WIND: Rising to 5000 to 7000ft AGL, SW 19 mph.

STABILITY/INVERSION: Inversion breaking 1100.

OUTLOOK FOR TONIGHT: Clear. **Low temperature:** Ridges 48 to 54. Valleys 40 to 51. **Maximum humidity:** Ridges 40 to 50 percent. Valleys 50 to 80 percent. **Ridge wind** SW 8 to 12 mph gusts to 25 mph through 2200, becoming SW 4 to 9 mph with gusts to 14 mph. **Valley wind** up valley/upslope valley 7 to 12 mph gusts to 18 mph evening becoming southwest 4 to 7 mph. **Haines Index** 4. **LAL** 1. **Mxg Hgt/Trans Wind:** Mixing height 9000ft dropping to 300ft, SW 12 mph.

OUTLOOK FOR SATURDAY: Partly cloudy. **High temperature:** Ridges 69 to 77. Valleys 74 to 78. **Minimum humidity:** Ridges 17 to 24 percent. Valleys 15 to 22 percent. **Ridge wind** SW 5 to 10 mph with gusts to 15 mph, by 1400 becoming SW 12 to 18 mph with gusts to 28 to 35 mph. **Valley wind** Southwest 4 to 8 mph gusts to 14 mph increase to 6 to 12 mph with gusts to 22 mph. **Haines Index** 4 Low. **LAL** 1. **Mxg Hgt/Trans Wind:** Rising to 7000ft AGL, SW 26 mph.

EXTENDED FORECAST: **Sat Night/Sun:** Slight chance of rain Saturday night. Rain likely Sunday. Slight chance of afternoon thunderstorms. Low 40 to 50. High 60 to 68. Afternoon ridge wind SW 10 to 17 mph gusts 30 to 38 mph. **Sun night/Mon:** Slight chance of rain before 2300. Mostly cloudy becoming mostly sunny during the day. Colder. Low 35 to 43. High 67 to 74. Afternoon humidity 20 to 30 percent. Ridge wind NE 5 to 10 mph, gusts to 21 mph. **Mon night/Tue:** Mostly clear. Low 36 to 46. High 62 to 72. Ridge wind NE 4 to 8 mph, gusts to 15 mph.

For area weather observations:

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 59	TYPE OF FIRE: Wildfire
FIRE NAME: Dixie	OPERATIONAL PERIOD: 09/17-09/18 Day/Night
DATE ISSUED: Thursday, September 16, 2021	TIME ISSUED: 2000
UNIT: Plumas National Forest	SIGNED: /s/ Patrick Doyle, FBAN

WEATHER SUMMARY (See Fire Wx Forecast)
WEATHER Mostly sunny and hazy. **HUMIDITY** (minimum) ridge/valley: 15-20% (up 1)/13-19% (up 1)
MAX TEMP Ridges/Upper Slopes: 72-87° (down 5), Valleys/Lower Slopes: 77-85 (down 3)
20 FOOT WINDS (Afternoon)
 Slope/Valley: upslope/upvalley 5-10 mph (no change), G18 mph (up 2)
 Ridge Top: WSW 8-12 mph (no change) with gusts up to G22-28 mph (range, up 2)

TOPOGRAPHY: Elevation: 1,500-7,600. Slopes: 0%-100% (0-45°degrees).

FIRE BEHAVIOR

GENERAL:

- **Minimal activity most areas.** Be careful to watch for any new activity near control lines, near edges of unburned islands, and edges of riparian areas that have the potential to flare up and spot. **Majority of fire activity will be in stumps, stump holes and root systems.** To a lesser extent in hollows and catfaces of standing trees. Winds and afternoon heat will increase fire activity. In addition, watch for activity in broken top snags (candles or candlesticks), creeping and smoldering edge-areas between unburned and burned areas.
- **Current fire environment conditions meet some of the critical thresholds that support rapid fire growth with a high resistance to control.** These include extreme to exceptional drought conditions, fuel moistures that are at or near extreme lows or exceeding minimums, and energy release component (ERC) indices exceeding or near critical level for fire danger index.
- **Be Prepared: New starts outside of recent fire footprint(s) will establish readily and spread rapidly with moderate to extreme fire behavior** (torching, individual/group tree torching and passive/active crown fire with spotting 0.1-0.5 miles, with potential for spotting distances 1-4 miles if plume dominated).

SPECIFIC:

DIV NN / OO / PP / WW / XX / Honey Group: Minimal fire activity expected. **Watch for any new activity or starts!**

DIV UU: Minimal fire activity, except for persistent activity in area on steep slopes west of Devils Punchbowl. Steep slopes and difficult access make finding heat holding in stump holes, roots and catfaces. Forecasted SW winds this afternoon though strong will push fire back into itself. Potential holdovers not found or interior islands have potential to flare up, torch trees and spot.

DIV RR/QQ: Forecasted SW winds this afternoon though strong will push fire back into itself. Main activity is from Dixie Mt. down to Dixie Valley, but stump holes can hold on to heat for a longtime without showing smoke when underground. Grizzly, Turner and Horton ridges have minimal activity, but wind test this afternoon may wake up any sleeping heat there. Think about Monday-Tuesday next week, forecasted N-NE-E winds.

Night Ops: Fire activity depends on area be worked. Most areas have minimal activity, but winds tonight should affect areas that still have active heat. **Most activity will be stumps, stump holes and roots in berms and roads.** Lower temperatures, poor-to-moderate humidity recovery ridgetop and midslope, and increased wind speeds will increase fire activity overnight where pre-existing heat exists.

AIR OPERATIONS: Clear air today. Expect minimum fire activity impacts due to smoke to air operations.

SAFETY: Strong winds and potential for extreme fire behavior under current fire environment, require maintaining your situational awareness, having a fire response plan, putting LCES in place before engaging new fire starts or spots.

Fuels and Fire Behavior Advisory

Northern California

September 16, 2021, to September 30, 2021

Subject: Potential for extreme fire behavior due to continued critically low live and dead fuel moistures. Very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, periods of excessive heat have caused elevated to record fire danger rating values across much of northern California. Anticipated moisture could temporarily reduce some threat across the far north PSAs.

Discussion: Fires burning in northern California continue to exhibit extreme fire growth due to critical fuel conditions. Rapid fire spread can be fuels driven. Wind events have led to extreme rates of spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Extreme to Exceptional levels of drought conditions continue to exist across much of Northern California. The drought is expected to persist or intensify through the rest of fire season. Deficient rainfall and snowpack with early melt off, coupled with periods of extreme heat has resulted in fuels that are critically dry, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year. Recent scattered rain has reduced some ERC values, but fuels are rebounding quickly. Extreme fire behavior has been observed in all fuel types and both live and dead fuels. **Continue to anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of extreme levels of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. 1000-hour fuel moistures continue to trend at record low levels in many areas. Live fuel moistures in grasses, shrubs, and trees, remain at critical levels in many areas of Northern California due to limited green-up this spring. **Expect fires to ignite easier, spread faster and burn hotter. Reports of blistered paint on vehicles have been surprisingly frequent so far this year. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. Aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. **Anticipate higher resistance to control in all fuel types.**
- Northern California continues to experience large fire activity and multiple team deployments and will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. **Everyone, every day, returns home safely.**
- The frequency of North to Northeast offshore wind events increases from mid-September into the fall. These strong winds are often accompanied by very low RHs and will pose an increased hazard when combined with this year's critically dry fuels conditions. **Watch for change.**

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. **Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, PocketCards, ERC's, live and dead fuel moistures.**
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the northeastern portion of Far Eastside.

Prepared By (Communications Unit Leader) <i>Kody Kerwin</i>				Incident Location: QUINCY		Forest / Unit / Jurisdiction: Plumas NF		Latitude: " N		Longitude: W	
Kody Kerwin, COML (925) 953-3044 Communications: 480-640-0402				County: Plumas		State: CA					

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

Incident: Dixie CA-BTU-009205	Date: 9-17-21 thru 9-18-21	Operational Period: 0700-0700
---	--------------------------------------	---

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

Major Hazards and Risks:

- ❖ **Situational Awareness:** Re-evaluate your situation throughout the day. Work through the 10 standard orders when evaluating new assignments and as the situation changes. Apply weather and fire behavior information to YOUR situation, and base actions on the worst possible scenario. Stay ahead of the fire behavior power curve. Engage based on predicted fire behavior and weather.
- ❖ **PPE–** Please recognize that in low stress situations like mop up, it is easy to over-look the importance of wearing the appropriate PPE include eye protection.

How to properly refuse risk

When an individual feels an assignment is unsafe they have the obligation to identify, to the degree possible, safe alternatives for completing the assignment. Individuals may refuse an assignment as unsafe when:

- There is a violation of unsafe work practices
- Environmental conditions make the work unsafe
- They lack the necessary experience or qualifications
- Defective equipment is being used

**Mop up and fireline repair
is hazardous Work**

Fireline repair and mop up can be repetitive work, although hazards are still present

- Injuries and accidents are common during the mopup and repair phase
- Gather situational awareness in your work area and communicate it
- Stay focused on tasks, don't let the routine nature of the assignment allow your mind to wander, resulting in loss of situational awareness
- Take frequent breaks, stay hydrated and manage fatigue

Resource Advisor Message

- Resource advisors will continue to work with operations staff to coordinate the big picture of where equipment is best allocated over time.
- Remember to follow Regional guidelines on hazard tree removal; REAFs will have copies of those. Guidelines state no tree removal from more than one tree length from the road and 1.5 tree lengths on the uphill side of the road. Trees removed should be dead or showing sufficient mortality to be removed.
- Fuel breaks should retain large trees for shade. Valuable logs should be decked; smaller logs and branches should be chipped. Fuel breaks should not be wider than one tree width. Shrubs and smaller trees can be masticated. Avoid leaving bare soil.
- In general we are not repairing lines on private land. REAFs can document suppression damage and prepare a report if requested. Consult a REAF if you have questions. In cases where a line goes in and out of NF we will repair the line. Consult with the Agency Administrator if needed.
- REAFs will help facilitate involvement and guidance from Forest personnel on the repair effort; i.e. continue to coordinate on fire lines to be left open.

Installation of Waterbars

Construct waterbars when natural contour cannot be reconstructed, and slope exceeds 10% for dozer lines and hand lines.

Where possible, restore lines to natural contour and vegetation/duff cover; if this can be achieved and is approved by READ, waterbars are not needed.

- Spacing-

- These spacing distances should be used as a guide. Judgement should be used in locating waterbars to minimize erosion potential. Install waterbars at the following recommended intervals:

Fire line Gradient (% of slope)	Distance between Waterbars (in feet)
0 to 10	No waterbars needed
11 to 20	100
21 to 40	75
41 to 60	50

- Location-

- Locate waterbars at natural slope breaks or take advantage of natural features when possible. Direct water to unburned areas and/or resistant surfaces with high vegetation cover when possible. Waterbars should discharge into undisturbed areas and preferably rocky ground or filtered areas well protected with slash and vegetative cover.

- Width-

- The waterbar channel will be wide enough to handle the expected waterflows and to avoid plugging when a normal amount of sloughing or sediment movement occurs.

- Angle-

- Place waterbars at an angle relative to the fire line. The angle will be between 30-45 degrees.

- Depth-

- Dozer Lines

- ✓ Cut waterbars at least 6" into compact soil. The total height from the bottom of the waterbar to the top should average 18" and not to exceed 24".

- Hand Lines

- ✓ As a general rule, cut waterbars at least 4" into the compact soil. Total height from the bottom of the ditch to the top of the waterbar should average at least 8" and not exceed 12".

HUMAN RESOURCE MESSAGE

Active Listening: High performing teams demonstrate active listening when accomplishing the mission. Active listening is a way of listening and responding to another person that improves mutual understanding. Often when people talk to each other, one party may not be listening attentively. They may be distracted, half listening, half thinking about something else. Here are some questions to ask yourself to determine if you are actively listening:

- *Do you really hear what the other person says or are you busy preparing a response?*
- *Can you repeat what the other person just said to you?*
- *Do you understand what the other person intended to say?*
- *Did you repeat what the person just said to verify that is what they meant to say?*
- *Did you ask clarifying questions to better understand the other person?*
- *Are you on the same page and agree on what was just said and meant?*

Remember: **93%** of all communication is through body language (facial expressions, body posture, and tone). Only **7%** of a conversation is the actual verbal part. Active listening is crucial when there is a heightening situational awareness on and off the line.

Take Home Message:

Take the time to really hear the other person by repeating what they just said, then ask clarifying questions, then agree on what you both have said before rolling with the plan.

"You weren't listening.
I said, 'DON'T fall.'"

Larry Sandoval
Human Resource Specialist
505-944-6489

COVID-19 Message

- **Wear a mask properly** (over nose and mouth) in all indoor facilities, vehicles (more than one person), briefing area, dining area, and when you can't stay 6' from others. Stay 6' from others when possible.
- Ensure COVID-19 precautions and best practices are always met.
- If you're feeling ill or need COVID testing, get evaluated by Frontline medical trailer.
- **Contact a COVID Advisor** below with any COVID, testing, or vaccine related questions.

Quincy Camp Testing

Whether you are experiencing symptoms or just want COVID testing for peace of mind, please go to Frontline medical trailer

(Located north end of camp to right of exit gate by restroom building)

**ONLY YOU CAN
PREVENT
COVID-19**

Quincy Camp Free Vaccines

Training Specialist Message

Checking out is just as important as checking in. Be sure to Close out with the Training Specialist before you leave.

The Training Specialist is located at ICP in Serpilio Hall Directly behind Supply.

If you have already registered as a trainee with the previous Training Specialist, there is no need to register again. Your information has been handed off.

Training Specialist contact information:

Steve Tolen TNSP(t) - (530) 394-8114 william.tolen@usda.gov

Call, text or email at anytime with questions or concerns

Robert Rivelle TNSP – (707) 498-1761.

How to Register as a Trainee:

1. Use the QR code below to register. If you are having problems, contact or come by and meet with the Training Specialist at any time.
2. Once registered you will receive text and/or email updates.

To Close Out your assignment:

1. **Trainer:** Complete the evaluation record in the back of the position task book and make as many task entries as possible.
2. **Trainer:** Complete the ICS 225 Individual performance rating and go over it with your trainee
3. **Trainee:** Text or email a photo of the ICS 225 Individual performance rating to the training specialist
4. **Trainee:** Complete the exit questions utilizing the QR code below
5. **Trainee:** Once completed the Trainee and Training Specialist will have a brief conversation about your task book and the assignment.

MEDICAL PLAN (ICS 206 WF) CIIMT 1

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o – 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o – 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. <i>(WGS84)</i>
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? *Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, et c.*

REMEMBER:

Confirm ETA's of resources ordered. Act according to your level of training.

Be Alert – Keep Calm – Think Clearly – Act Decisively

*** Follow up with MEDL upon return to ICP ***
