1. Incident Name: Dixie (West)	2. Operational Period:	Date From: 09.26.2021 Time From: 0700	Date To: 09.26.2021 Time To: 1900
3. Objective(s): <ul style="list-style-type: none"> • Identify and communicate hazards and conduct actions only when risks have been mitigated to acceptable levels. • Maintain an elevated awareness of current COVID-19 precautions and best infectious disease control measures to ensure the health of fire personnel and the public. • Provide safe and efficient initial attack within the established TFR perimeter. • Implement strategies and tactics, with the highest probability of success, that keeps the fire within the existing containment lines and minimize the impact to the cultural, heritage, and natural resources. • Provide timely and accurate information to the public, stakeholders, cooperators and the adjacent incident management teams (East & West zones) about fire status, fire management strategies and tactics, repair efforts, and any potential fire-related safety and health concerns. • Implement and/or account for the repair of fire suppression-related activities as specified in the Dixie Fire Suppression Repair Plan. • Maintain fiscal accountability and keep costs commensurate with values at risk. 			
4. Safety: <p style="text-align: center;">Fight Complacency!</p> <p>Complacency Definition: "Self-satisfaction accompanied by unawareness of actual dangers or deficiencies."</p> <ul style="list-style-type: none"> • Stay mentally engaged on the task at hand • Give clear briefings. Address complacency in your daily briefings and AAR's. • Clearly identify the shift's mission and purpose. • Use the "Buddy System" and watch out for each other. If you see something, say something. • Ask yourself: "Are you doing the job safely, the way you were trained?" • Look for a "new" or "fresh" approach to repetitive assignments. <p style="text-align: center;">BE SMART ON DIXIE WEST! DON'T LET MISSION CREEP HAPPEN TO YOU.</p> <p>Exhibit fireline leadership! if you notice your crew or coworkers are developing a complacent attitude, challenge them to re-focus and stay engaged. Be accountable for your own complacent attitude and change it if it occurs. Give people breaks from their routine if you notice complacency.</p>

INCIDENT Weather Forecast

Forecast No: 75
Prediction For: Sunday
Shift Date: September 26, 2021
Forecast Issued: September 25, 2021 at 1900

Name of Incident: Dixie-West Zone
Unit: Lassen NF
Incident Meteorologist: Mike Ottenweller

Discussion: Warm, very dry, and breezy conditions are once again in store for today. Conditions will be very similar to Saturday, except winds should be a bit stronger during the afternoon. Clear skies will allow for temperatures to quickly climb to around 80 degrees. Humidities will drop off sharply again during the afternoon with single digit RHs possible. Winds will ramp up sharply during the afternoon. Anticipate SW winds increasing to 15-20 mph with gusts to 30 mph for the lower elevations.

Forecast for Sunday: *Very Dry and Gusty-near critical conditions*****

Sky/Weather: Warm and very dry. Breezy SW winds, especially during the afternoon. Haze.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #62	TYPE OF FIRE: Wildland
FIRE NAME: Dixie (West Zone)	OPERATIONAL PERIOD: 9/26/21 Day Shift and Night Shift
DATE ISSUED: 9/25/21	TIME ISSUED: 2000
UNT: Plumas National Forest	WRITTEN: <i>Kelly Cagle</i> - FBAN

FUEL ASSUMPTIONS: The fuels involved on the Dixie fire consist primarily of conifer timber litter with a shrub or grass understory. Fuel model TU 5 (timber/shrub) best represents these conditions. There are also areas of fuel model GS 2 (shrub/grass) especially on the eastern side and lower elevation areas.

Consider all fuels available to contribute to fire spread. Grass fuels are completely cured, and live fuel moistures in shrubs and canopy are at levels that will easily carry fire. *1000 hour fuel moistures are in the single digits.*

WEATHER SUMMARY: Reference fire weather forecast for specifics. Breezy southwest winds and low humidities are expected today. Elevated burning conditions will be present over the fire area.

General Fire Behavior Forecast: Expect minimal fire behavior inside the fire footprint today. A few visible smokes are likely across the fire area – predominantly from stump holes, heavies or dozer berms. Reburn from needle cast has been occurring in recent days, with creeping active flame. Should fire escape the current footprint or a new start occur – expect very active fire behavior that will organize and begin to move rather quickly. Spread rates would be high and fire would likely prove difficult to suppress.

Night Shift: Minimal fire behavior expected. Some smoldering or isolated smokes will continue. Minor fire spread in reburn/needle cast is possible. Initial attack during nighttime hours could display active fire behavior until at least midnight and diminish thereafter.

Large Fire Growth Predictors on the Plumas NF:
RH below 15% + Wind speed > 10 mph + Burning Index > 90
All 3 of these parameters could be exceeded today
Month that large fire growth conditions occur most frequently on the Plumas – September!

Specific:

Interior islands in the Badger Mtn/Prospect Peak area will likely continue to burn and produce smoke. Fire spread will likely be moderate as heat appears to be on the lee side of the ridge and somewhat sheltered from wind. Any wind/slope/fuel alignment will produce aggressive fire behavior.

Heat showing in the Bogard area just west of Pole Spring road appears to have cooled considerably yesterday. Fuel exists in and around the heat, so growth toward the east is possible. If wind is able to directly affect heat, spread will likely be rapid.

Reburn from needle cast could occur in any of the divisions.

Initial Attack – If IA occurs, expect fire to develop quickly and to display fire behavior that could challenge control efforts.

Fine fuel moisture today is - 3 to 4%	Rates of Spread in Timber- 6 to 20 chains per hour
Probability of Ignition today - 85%	Rates of Spread in Grass- 20 to 60 chains per hour
Spotting Distance Today- 1/2 mile or greater	Flame Lengths- 3 to 11 feet (BI today is approaching 100)

AIR OPERATIONS : Skies remain clear today. Will be a bit breezy but should not impact aviation.

FIRE BEHAVIOR SAFETY: Most fire entrapments happen between 1430 and 1645. Average time from blow-up to entrapment is 24 minutes. It is wise to be within easy reach of your safety zone between 1430 and 1645.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

FINANCE MESSAGE

COST SHARE REPORTING – PHONE: 530-455-9586

This is a cost share fire. All line supervisors (DIVS, OPBD, STAM, etc.) need to check in with the Cost Share Team (CATS) each day at the end of your shift. The Cost Share Team (CATS) is in the Susanville Base Camp.

Please report *IN PERSON* to the Cost Share Team at the end of your shift.

Contract resources that have been assigned for more than two weeks are encouraged to request an interim payment.

Completed CTRs and Shift Tickets should be turned in daily. Hard copy documents can be turned in at Hat Creek or Susanville. Electronic documents can be sent to 2021.dixie.ca.west.finance@firenet.gov. Please include the words “West Zone” in the subject line of any email.

“Completed” CTRs and shift tickets include the following:

- Correct resource number. (for Shift Tickets, add to upper right corner)
- Correct date and incident supervisor signature
- Names of all operators or crew members
- The words “transport retained” in remarks with the names of the transport operator for heavy equipment with transport
- Any down time is documented in remarks

Finance Demob:

Please check-in with Finance a day or two ahead of anticipated demobilization to ensure that your documents compete and up to date. This will help to ensure a smooth process and will give you time to locate any that may have been missed. When you come to Finance to complete paperwork, please bring your supporting documentation such as CTR and/or Shift Ticket books, agreement, and/or manifest. Be sure to get the final shift ticket and/or CTR including anticipated travel start time signed by the incident supervisor prior to coming to Finance to close out.

If you have time reporting questions, contact Finance at 279-203-4435 or 279-203-4453. To contact Comp Claims please call 303-915-2000

DEMOB TIPS

Airline Flights

Contact DEMOB early to arrange your flight home.
It can take up to 72 hours to process.

Weedwash

All fireline personnel need to go to Susanville and go through the weedwash station located at 1620 Riverside Dr.

Crew Swaps & Extensions

All crew swaps and extension requests must be initiated through your fire supervisor at least 72 hours prior to your scheduled demobilization.

Demob Steps

1. Return all supplies, radios, etc. that were checked out.
2. Submit time for all personnel and equipment to finance.
3. All vehicles that have been on the fireline must go through the weedwash.
4. Weedwash is located at 1620 Riverside Dr, Susanville.
5. Receive a copy of your OF-288 and/or other financial documentation from Finance.
6. Complete the Demob Checkout Sheet using QR Code on the IAP cover.
7. Once you submit the Demob Checkout Sheet you are released and may travel home.

Contact Demob

If you have demob, airline, flight, extensions, or crew swap questions you can contact demob at 279-203-4451 or 2021.dixie.ca.west.demob@firenet.gov

Safe Travels!
