

Incident Action Plan

OPERATIONAL PERIOD

09/27/2021 07:00 – 09/28/2021 07:00

Monday - Tuesday

Dixie Fire East Zone

**CA-BTU-009205
PN N5ZB21 (1522)**

2021.dixie.ca.finance@firenet.gov

Incident Information

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: DIXIE FIRE EAST ZONE	2. Operational Period:	Date From: 9/27/2021 Time From: 0700	Date To: 9/28/2021 Time To: 0700
--	-------------------------------	---	-------------------------------------

- 3. Objective(s):**
1. Identify and communicate hazards and conduct actions only when risks have been mitigated to acceptable levels.
 2. Maintain an elevated awareness of current COVID-19 precautions and best infectious disease control measures to ensure the health of fire personnel and the public.
 3. Implement strategies and tactics, with the highest probability of success, that keeps the fire within the existing containment lines and minimize the impact to the cultural, heritage, and natural resources.
 4. Provide timely and accurate information to the public, stakeholders, cooperators and the adjacent incident management teams (East & West zones) about fire status, fire management strategies and tactics, repair efforts, and any potential fire-related safety and health concerns.
 5. Implement and/or account for the repair of fire suppression-related activities as specified in the Dixie Fire Suppression Repair Plan.
 6. Maintain fiscal accountability and keep costs commensurate with values at risk.
 7. Provide safe and efficient initial attack within the established TFR perimeter.

General Situational Awareness:

Utilize IRPG checklist to support management decision making. Provide clear and concise directions, ask clarifying questions when needed.

Fire Weather Forecast

FORECAST NO: 67
PREDICTION FOR: Day/Night Shift
SHIFT DATE: Monday 9/27/2021
TIME AND DATE ISSUED: 9/26/2021 1800 PDT

INCIDENT: Dixie (East)
UNIT: Plumas NF
SIGNED: *Steve Hannah*
Incident Meteorologist: steve.hannah@noaa.gov

***** MONDAY, RED FLAG WARNING FOR GUSTY WINDS AND LOW RH*****

Weather Discussion:

A trough is bringing strong gusty southwest winds across the fire area today through early Tuesday morning. This coupled with low RH today is creating critical fire weather conditions with a Red Flag Warning in effect to 2300. The winds will remain strong overnight and into Tuesday morning before weakening and shifting to the north Tuesday afternoon. Moisture will arrive in the area late today increasing the RH and also causing light showers that can persist to late Tuesday morning. Alas the showers are going to be on the light side with only a few hundredths of an inch of rainfall expected. The system will also bring cooler conditions to the region for Tuesday with freezing temperatures possible.

WEATHER FORECAST:

TODAY: *RED FLAG WARNING 1100-2300*

SKY/WEATHER: Partially cloudy. Light showers forming late in the evening

High Temperature: 70-77. **Min RH:** 15-22%

20 ft Level-WINDS: Valleys: Southwesterly winds 7-12 mph gusts to 20 mph, increasing by midday to 15-20 mph with gusts to 30 mph. **Ridges:** Southwesterly winds 10-15 mph gusts to 25 mph, increasing, by midday to 25-30 mph gusts to 40 mph.

Transport Winds: Southwesterly 30 to 40 mph. **Mixing Height** 5,500 ft.

Precipitation Chance....35% LAL.....1. Haines Index...3

TONIGHT:

SKY/WEATHER: Cloudy with light showers.

Low Temperature: 34-40. **Max RH:** 80-90%

20 ft Level-WINDS: Valleys: Southwesterly winds 12-17 mph gusts to 22 mph, becoming, after midnight, Northwesterly 4-7 mph with gusts to 12 mph. **Ridges:** Southwesterly winds 15-20 mph gusts to 25 mph, becoming, after midnight, Northwesterly 8-12 mph gusts to 18 mph.

Transport Winds: Southwesterly 20 to 30 mph, after midnight NW 10 to 20 mph. **Mixing Height** Decreasing to 1400 ft.

Precipitation Chance....45% LAL.....1. Haines Index...3

TUESDAY:

SKY/WEATHER: Partially cloudy with few showers lasting into late morning.

High Temperature: 63-70. **Min RH:** 19-26%

20 ft Level-WINDS: Valleys: Northerly winds 3-6 mph, becoming, by midday, Northeasterly 4-7 mph with gusts to 16 mph. **Ridges:** Northerly winds 5-10 mph gusts to 15 mph, becoming, by midday, Northeasterly to 5-9 mph gusts to 18 mph.

Transport Winds: Northerly to Northeasterly 10 to 20 mph. **Mixing Height** 7,000 ft.

Precipitation Chance....10% LAL.....1. Haines Index...3

Outlook for Wednesday:

Warmer, drier, with partially cloudy skies. Highs in the upper-60s to low-70s, lows in the 30s

Outlook for Thursday:

Warm, dry, with partially sunny skies. Highs in the mid to upper-70s, lows in the 40s.

For area weather observations:

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #69	TYPE OF FIRE: Wildland
FIRE NAME: Dixie	OPERATIONAL PERIOD: 9/27/21 Day Shift and Night Shift
DATE ISSUED: 9/26/21	TIME ISSUED: 2000
UNIT: Plumas National Forest	WRITTEN: David Quisenberry - FBAN

FUEL ASSUMPTIONS: The fuels involved on the Dixie fire consist primarily of conifer timber litter with a shrub or grass understory. Fuel model TU 5 (timber/shrub) best represents these conditions. There are also areas of fuel model GS 2 (shrub/grass) especially on the eastern side and lower elevation areas.

Consider all fuels available to contribute to fire spread. Grass fuels are completely cured, and live fuel moistures in shrubs and canopy are at levels that will easily carry fire. 1000-hour fuel moistures are in the single digits.

WEATHER SUMMARY: Reference fire weather forecast for specifics. **Red flag conditions today due to high wind speeds and low relative humidity 1100 – 2300.**

General Fire Behavior Forecast: Expect increasing though still minimal fire behavior inside the fire footprint today. Visible smokes are likely across the fire area – predominantly from stump holes, heavy fuels, or dozer berms. Reburn from needle cast has been occurring in recent days, expect this to continue. Expect significant resistance to control from any new starts or escapes from the current perimeter. Rates of spread and flame lengths will be very high. Terrain and wind alignment will increase fire intensity. ERC has risen to the 90th percentile with fuel moistures at very low levels. The burning index for tomorrow will be near the 97th percentile indicating high fire growth potential.

Night Shift. Minimal fire behavior expected inside the fire perimeter. Some smoldering or isolated smokes will be visible inside the burn area. Increased reburn in needle cast is possible. Initial attack during nighttime hours could display active fire behavior until relative humidity rises. High winds speeds may extend the burning period somewhat.

**Large Fire Growth Predictors on the Plumas NF:
RH below 15% + Wind speed > 10 mph + Burning Index > 90
All 3 of these parameters could be exceeded today
Month that large fire growth conditions occur most frequently on the Plumas – September!**

Specific:

DIV UU – Minimal fire behavior expected. Isolated smokes likely.

DIV RR – Minimal fire behavior expected. Scattered heat/smoke exists along Grizzly Ridge containment line. Smoke and heat here should be pushed back into the fire perimeter by SW winds.

DIV WW/XX- Minimal fire behavior expected. Isolated heat remains around Mt Hough but appears well interior.

DIV NN/QQ/PP/OO – Minimal fire behavior expected. Reburn in these areas could pressure containment lines. Expect higher rates of spread in the needle cast reburn today. With increased potential to move across sparse fuel in high winds.

Reburn from needle cast could occur in any of the divisions.

Initial Attack – If IA occurs, expect fire to develop quickly and to display fire behavior that could challenge control efforts.

Fine fuel moisture today is - 3 to 4% Rates of Spread in Timber - 8 to 30 chains per hour

Probability of Ignition today - 85% Rates of Spread in Grass - 20 to 80 chains per hour

Spotting Distance Today- 3/4 mile or greater Flame Lengths - 5 to 14 feet

AIR OPERATIONS: Good visibility. Potential for gusty winds to limit aviation operations

FIRE BEHAVIOR SAFETY: Post lookouts and communicate changes in weather and fire activity. Have a good plan for engagement and establish solid trigger points and follow your plan if your trigger points are reached.

Health and Safety Message

QR code for Hazards and Risks

Incident: Dixie – East Zone

Date: Monday September 27, 2021

Hazards and Risks: *Wind Gusts & Trigger Points*

Wind Gusts: there are high wind gusts predicted for today, strong winds up 40 mph could be possible on the high ridge tops and only reducing 10 -20 mph in the valleys. If you're in an area where the winds line with the valley bottoms you may see Fresh Gale winds where the canopy offers virtually no protection. Refer to the Beaufort Scale page 72 in you IRPG for more information.

Trigger Points: Today when you're in the field, be sure to establish trigger points for reposition to secure areas in response to high winds. Consider that trees may have been weakened from the fire. Look up at the surrounding area when you park your vehicle to be sure you're not in danger of being hit by falling trees or debris.

15. WIND INCREASES AND/OR CHANGES DIRECTION

Heavy Equipment: All Divisions

- Maintain proper separation between crew members and equipment
- Do not approach running/moving equipment without permission from the operator.
- Watch for rolling material and domino effect of moving trees, rocks, and logs.
- Slow down when approaching blind curves when grading is taking place.
- Be aware of the swing radius on certain equipment.

COVID-19 Message

- **Wear a mask properly** (over nose and mouth) in all indoor facilities, vehicles (more than one person), briefing area, dining area, and when you can't stay 6' from others. Stay 6' from others when possible.
- Ensure COVID-19 precautions and best practices are always met.
- If you're feeling ill or need COVID testing, get evaluated by Frontline medical trailer.
- **Contact a COVID Advisor** below with any COVID, testing, or vaccine related questions.
- **REMINDER: all USDA employees must be fully vaccinated no later than NOVEMBER 22, 2021.**
 - **OCTOBER 11: First dose deadline (Moderna COVID-19 vaccine)**
 - **OCTOBER 18: First dose deadline (Pfizer COVID-19 vaccine)**
 - **NOVEMBER 8: Second dose deadline (Moderna and Pfizer vaccine)**
 - **NOVEMBER 8: First (only) dose deadline (Johnson and Johnson COVID-19 vaccine)**

Quincy CampTesting

Whether you are experiencing symptoms or just want COVID testing for peace of mind, please go to Frontline medical trailer

(Located north end of camp to right of exit gate by restroom building)

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

Resource Advisor Message

- Resource advisors will continue to work with operations staff to coordinate the big picture of where equipment is best allocated over time.
- Remember to follow Regional guidelines on hazard tree removal; REAFs will have copies of those. Guidelines state no tree removal from more than one tree length from the road and 1.5 tree lengths on the uphill side of the road. Trees removed should be dead or showing sufficient mortality to be removed.
- Fuel breaks should retain large trees for shade. Valuable logs should be decked; smaller logs and branches should be chipped. Fuel breaks should not be wider than one tree width. Shrubs and smaller trees can be masticated. Avoid leaving bare soil.
- Repair on suppression lines on private land will be evaluated on a case by case basis, based on highest Fire and Forest priorities. REAFs can document suppression damage and prepare a report if requested by the private landowner. If a landowner requests a repair, document on a General Message (213) with the name, contact info. and any other relevant information and pass this on to your Division.
- REAFs will help facilitate involvement and guidance from Forest personnel on the repair effort; i.e. continue to coordinate on fire lines to be left open.

HUMAN RESOURCES MESSAGE

September 27, 2021

MUTUAL RESPECT

High performing teams demonstrate several qualities and traits that make them stand out above average performing teams. Everyone can agree that the physical work that is done cannot be accomplished without teams managing the stress of the work in positive ways. During this assignment we will share with you the qualities that high performing teams strive for when managing *operational stress*. High performing teams demonstrate mutual respect when accomplishing the mission.

Mutual Respect is the foundation for honesty, trust, and meaningful communication. In order for relationships to remain healthy, both the boss and the worker must be equally respected and appreciated. *Mutual respect is defined as a proper regard for the dignity of a person or position.* It is also the sharing of ideas but not always agreeing with the other party. But in the end both parties respect each other and their ideas even if they disagree.

Social Mutual Respect is being conscious of what a person is either watching or listening to in common public areas. This also includes conversations that may be overheard by others in the general area.

Take Home Message:

Mutual Respect covers every way we interact with our environment:

- the music you listen to out loud
- the webpages you look at on our network
- the conversations you have on your phone
- the words displayed on your clothing

The Human Resources Specialist is here on assignment to help you and your teams manage the *operational stress* keeping your crews safe, positive, and productive increasing your situational awareness.

Human Resources Specialist – Martin Gutierrez –
505.715.2171 (call/text) or email @ Martin.M.Gutierrez@usda.gov

Trivia Quiz:

What are the (7) seven fatigue-work and rest practices related to firefighter health?

Please text/call (leave voice message) or email me with the answers. Winners will be selected from the person / crew who sends the most accurate answer first, identifies themselves and their crew, and shares a positive story or message about how they improved their work environment from the previous workday. Photos of yourself or crew will automatically enroll you for the grand prize giveaway on our last day - *Answers and Winners will be included in the daily HRSP message*

Dixie East Zone

Training Specialist Message

Remember to close out your training package before you demob. If you switch trainers be sure to get a performance eval (ICS 225) from each trainer and each trainer sign your taskbook.

The Training Specialist is located at ICP in Serpilio Hall Directly behind Supply.

If you have already registered as a trainee with the previous Training Specialist, there is no need to register again. Your information has been handed off.

Training Specialist contact information:

Steve Tolen TNSP(t) - (530) 394-8114 william.tolen@usda.gov

Call, text or email at anytime with questions or concerns

How to Register as a Trainee:

1. Use the QR code below to register. If you are having problems, contact or come by and meet with the Training Specialist at any time.
2. Once registered you will receive text and/or email updates.

To Close Out your assignment:

1. **Trainer:** Complete the evaluation record in the back of the position task book and make as many task entries as possible.
2. **Trainer:** Complete the ICS 225 Individual performance rating and go over it with your trainee
3. **Trainee:** Text or email a photo of the ICS 225 Individual performance rating to the training specialist
4. **Trainee:** Complete the exit questions utilizing the QR code below
5. **Trainee:** Once completed the Trainee and Training Specialist will have a brief conversation about your task book and the assignment.

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (*if different*): (*Descriptive Location (drop point, intersection, etc.) or Lat. / Long.*) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
