PREDICTION FOR: 24 Hour Shift

FORECAST ISSUED: 08/24/21 1700

SHIFT DATE: 08/25/21

INCIDENT Weather Forecast

NAME OF FIRE: Caldor

UNIT: USFS Eldorado NF

SIGNED: James Dudley

Incident Meteorologist

<u>WEATHER DISCUSSION</u>: A weather disturbance will move across the fire area this morning bringing gusty south winds. As this feature moves away to the east winds will shift to the southwest and diminish some during the afternoon however gusty conditions will prevail over especially the ridges. High pressure will then begin to build over the region Thursday through the weekend with much lighter winds...warmer temperatures...and lower humidity with increasingly poor overnight recovery. Inversions will strengthen with longer periods of smoky conditions over the fire.

.WEDNESDAY . . . Sky/weather.....Areas of smoke with inversion breaking by 0900 otherwise sunny. Max temperature.....73-83. Min humidity......22-28 percent. Wind (20 ft)..... Slope/valley.....Southeast to south 8-13 mph with gusts to 22 mph through 1100...then becoming southwest 4-9 mph with gusts to 15 mph through the afternoon. Ridgetop.....South 17-22 mph with gusts to 30 mph through 1100 then southwest 13-18 mph with gusts to 25 mph through the afternoon. Mixing height......Near surface increasing to around 7000 ft AGL. Transport winds.....Southwest around 18 mph. .WEDNESDAY NIGHT... Sky/weather......Mostly clear. Areas of smoke. Min temperature.....52-62. Max humidity......35-45 percent. Wind (20 ft)..... Slope/valley.....Downslope/downcanyon 3-7 mph. Ridgetop.....South-southwest 9-13 mph. Mixing height.....Lowering to near surface. Transport winds.....Southeast around 5 mph. . THURSDAY . . . Sky/weather.....Areas of smoke with inversion breaking by 1300 otherwise sunny. Max temperature.....77-87. Min humidity......16-21 percent. Wind (20 ft)..... Slope/valley......Downcanyon 2-6 mph through 0900 then becoming upslope/upcanyon 3-7 mph with gusts to 12 mph through the afternoon. Ridgetop.....Southwest to west 4-7 mph. Mixing height......Near surface increasing to around 5600 ft AGL.

Incident Weather Station Data - SCAN Code with Smart Phone

Branch 1: Pine Tree Rd (TR113), Hawkeye Rd (PG433)

Transport winds.....South around 6 mph.

Branch 10: Sugarloaf (SKBC1)
Branch 15: Owens Camp (OWNC1)

Branch 20: Leak Peak (TT017), Eldorado Portable NE DP14(TS445)

Branch 30: Barney Ridge (TT022), So So Road (PG415)

FIRE BEHAVIOR FORECAST FORECAST NUMBER: 7 TYPE OF FIRE: WILDFIRE FIRE NAME: CALDOR CAENF-024030 DATE ISSUED: 8/24/2021 UNIT: ELDORADO NATIONAL FOREST Typed/printed: Stephen Volmer FBAN

INPUTS

WEATHER SUMMARY:

Temperatures will be in the low 80's with humidity levels between 22-28%. Morning winds will be out of the south 8-13mph gusting to 22mph, becoming southwest 4-9mph after 11am. Afternoon ridgetop winds will be gusty from the southwest 13-18mph with gusts to 25mph. Winds will slow overnight returning to the diurnal flow down canyon 3-7mph and shifting up canyon in the early morning. Nighttime temperature will be in the high 50's with humidity averaging between 35-45% across the entire fire area.

Review the weather forecast for more details

OUTPUTS

FIRE BEHAVIOR

FUEL MODEL	RATE OF SPREAD FT/MIN	FLAME LENGTH FT	SPOTTING DISTANCE	PROBABILITY OF IGNITION	
TIMBER	14	7	.8 miles	87%	
UNDERSTORY	29	13	.8 miles	87%	
BRUSH	95	15	.5 miles	87%	

GENERAL:

Group tree torching is expected with rates of spread up to 120 ft/min

Single and group tree torching will occur due to the abundant low ladder fuels and tight canopies. Active crown fire runs will be possible in areas where the drainages are in alignment with the winds. Expect long distance spotting at the top-ends of those areas. Fuels in the area is extremely dry and receptive to ignition. Current ERC's and BI's are above the 90th percentile, 1000 hr fuels are below the 3rd percentile. Local live fuel moistures are above critical levels, but brush fields still maintain an abundant amount of dead material within them due to the prolonged drought and will produce moderate rates of spread.

SPECIFIC:

- The abundant amount of dead down material across the incident will continue to be the major source of ember cast and heat which will have the potential to threaten the control lines in all areas.
- Fire activity will moderate overnight allowing for good windows of opportunity to conduct firing operations and direct line control tactics.
- Rates of spread will increase in the dense brush fields found in Div A, Div D, and Div W where they are in alignment with the drainages and up-canyon winds.

AIR OPERATIONS:

Smoke clearing in the early morning, with increased visibility and increased fire activity by 11:00. Transport winds out of the south southwest 15mph with a mixing height of 7,000' AGL. Expect erratic winds across the ridgetops. Air resources may be limited or ineffective due to the increased winds and reduced visibility.

Sunset 19:42

Sunrise 06:27

SAFETY:

- Extremely hot deep ash pits will be found in all areas. Watch where you are walking and working.
- Be alert. Keep calm. Think clearly. Act decisively.
- Long range spotting can block your escape routes, always have an alternate plan.

Fuels and Fire Behavior Advisory

Northern California

August 17, 2021 to August 31, 2021

Subject: Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

Discussion: Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify thorough out the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are below average in dryness, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year and are running at or above the 97th percentile in most cases. Expect increased fire intensity and spread rates in these areas. Early season extreme fire behavior has been observed in both light and heavy fuels. **Anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. Anticipate higher resistance to control in all fuel types.
- Already this year, Northern California has experienced large fire activity and multiple team
 deployments. California will likely experience an extended fire season. It is important to be mindful of
 and manage fatigue for all resources. Everyone, every day, returns home safely.

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding
 normal expectations for this time of the year. Local briefings need to be thorough and highlight
 specific fire environment conditions. These include but are not limited to local weather
 forecasts, Pocket Cards, ERC's, live and dead fuel moistures.
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates.

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

SAFETY MESSAGE CALDOR INCIDENT

1. Incident Name: CALDOR 2. Operational Period: Date From: 8/25/21

Time From: 07:00

Date To: 8/26/21 Time To: 07:00

HAZARD TREES:

Pay Close Attention to Where You Are Parking, Working or Taking a Break.

Review the Safety Communication with your crews.

HIGHER TEMPERATURES FORECASTED.

MONITOR yourself and your assigned personnel for <u>FATIGUE</u> and <u>DEHYDRATION</u>.

Use cooling stations throughout the day.

Avoid Complacency.

Maintain Good Work Rest Cycles.

When Moving Apparatus Utilize backers and spotters When in Doubt Scout It Out.

<u>RECEPTIVE FUEL BEDS</u> – Critical Rates of Spread: Long Range Spotting The Wind Goes Where the Water Flows, Watch for Alignment.

ENSURE ALL PERSONNEL ARE IN PROPER PPE PRIOR TO STARTING ANY OPERATIONS, There Won't Be Time to Adjust If Conditions Change.

Adhere to COVID-19 Best Practices – Masks must be worn indoors and when social distancing can't be maintained (i.e. Morning Operational Briefing)

Don't Let Pressure Alter Your Decision-Making Process

PLAN = Primary Alternate Contingency Emergency

4. Site Safety Plan Required? Yes 🗌 No 🗴								
5. Prepared by: Name: J.B	Buchmeier SOF1 / J.Novak SOF1

SAFETY COMMUNICATION HAZARD TREE / TREE MORTALITY AWARENESS

Standing dead trees (snags) and green trees remain a constant threat to responder safety. Due to extended drought conditions, there are millions of dead and dying trees in California, and many more that are stressed due to unhealthy forests or fire damage. The combination of epidemic levels of bark beetle infestations and years of drought conditions has created an extreme hazard throughout California. Conifer and Oak trees that have recently died are identified as "Red Trees". Once the

needles or leaves have fallen, the dead tree enters the "Gray Phase" where continued decay and decomposition may be occurring internally with few visual indicators of its extent.

Aside from over 9 million acres of standing dead trees that pose an extreme life safety hazard for firefighters and civilians, the hazard trees are everywhere we operate carrying out our mission. Educating and training our personnel on "Hazard Tree" awareness as well as the appropriate actions for identification and mitigation of safety concerns while working, training, and responding to **ALL AREAS IS CRITICAL.** Operating in a known tree mortality area brings awareness to responders, we need to ensure we are taking precautions in ALL areas.

- □ Personnel should identify the "Hazard Tree" or "Tree Mortality" locations in their local response areas, fire line assignments and the locations of active fuel reduction projects that they could possibly encounter.
- ☐ Recognize when responding to identified "Tree Mortality" areas and provide safety briefings to all responding resources.
- ☐ Incidents should be focused on responder safety and hazard tree considerations.
- $\ \square$ Be prepared for extreme fire behavior and dangerous rates of spread:
 - Delay or withdraw until the fire can be engaged.
 - o Provide appropriate clearance for staged or parked vehicles.

□ Recognize the potential for:

- o Green trees falling without warning.
- o Ground fire rapidly reaching the crowns of large dead stands of trees
- o Trees and limbs falling during air operations or windy conditions
- o With advancing decay of trees watch for bark slide, falling limbs or multiple

trees falling together if they are in

contact with each other

Personnel performing work on fuel reduction projects in ALL areas, need to ensure applicable IIPP documents reflect the work being performed and are updated throughout the project's life span.

Lookout – When working around fire weakened, stressed or decaying trees

Communicate – Brief personnel when working near fire weakened or hazard tree areas

Escape Routes – May be compromised by falling trees

Safety Zones – Are identified and large enough for a "Hazard Tree" or "Tree Mortality" area

For Tree Mortality Area Responder Briefing Packets, click here

CAL FIRE / Incident Management Team 6

COVID-19 Response Algorithm

Employee Response Action Plan

COVID-19 Positive Test or COVID-19 Positive Clinical Symptoms Presentation

- COVID 19 Symptoms: Cough, SOB, Fever or afebrile, Chills, Muscle Pain, Sore throat, Loss of taste/smell
- Employee informs Company Officer and Strike Team Leader of presumed/confirmed COVID-19 symptoms.
- Employee advised to seek evaluation by Medical Unit and CAL MAT or base camp medical unit.
- Crew initiates cleaning measures. Mask, safety glasses, gloves worn. (If needed, LOGS will assist)
- Medical Unit to notified IC, Liaison, Safety and Logistics ASAP. Medical Unit will notify COVID-19 Public Health Officer and determine need for testing and locations.

Incident Action Plan

- Company Officer / Strike Team Leader notified of personnel with COVID-19 positive test or symptom.
- Medical Unit evaluates individual(s) and need for care and evaluation.
- IC, Liaison, Safety and Logistics notification made to determine course of incident evaluation and response.
- Line Chief, Agency Administrator, and Region Office updated upon notification

Facilities Response

- Medical and Safety notified
- Incident Notification
- Disinfection plan initiated.
- Resource Status Evaluated

Medical Evaluation & Contact Tracing

- Personnel interviewed by Medical Unit. List of Positive contacts made in the last 5 days acquired. All Exposed are required to wear surgical mask, self monitor for Fever/Resp symptoms for up to 14 days (exposed personnel are subject to COVID-19 testing)
- Home Unit / Department utilized and retrospective tracking of Positive COVID-19 personnel inter-actions are identified within the last 5 days.
- Home Unit / Department updated by Company Officer / Strike Team Leader.
- Public Health Department is contacted and updated by IC or Designated Representative.
- Positive COVID-19 Employees w/symptoms will need to be evaluated by Health Department conducting testing, prior to returning to assignment.
- Positive COVID-19 Employees w/o symptoms may be required to be evaluated and resource status will be reviewed prior to returning to assignment.

Construct control lines as direct as possible.

Prepare indirect control line for possible firing operation.

Improve and hold established control lines.

Prepare structures for defensive actions.

7. Special Instructions:

Buckbar Rd. off limits to Water Tenders, alternate route use Pleasant Valley Rd.

DEMOBILIZATION PLAN - SUMMARY CALDOR FIRE INCIDENT CA-ENF-024030

GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. By definition, surplus personnel are available for release if they have rested for a minimum of 8 hours, are cleaned up, outfitted and have a vehicle ready to depart to their next destination.

GENERAL GUIDELINES

- NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOB UNIT.
- o Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours.
- All Resources will arrive at the Demobilizations Unit at their scheduled time Only.
- All government and hired vehicles leaving the incident will have a safety inspection. If a vehicle is within 1,000
 miles of a "B" service, it is the responsibility of the resource to contact Ground Support and have an oil change prior
 to their scheduled demobilization time.
- o All Rental Vehicles will receive a safety inspection prior to leaving the incident.
- All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- All strike team leaders are responsible to call North Ops at 1-530-224-2466 immediately upon being released from the incident

RESPONSIBILITIES

Unit Leaders will declare resources excess to their Section Chief. Section Chiefs will declare excess resources to the Planning Section Chief through the Resource Unit Leader. This should be done 36 hours in advance of anticipated release. Use the Declaration of Excess Resources sheet or General Message Form (ICS-213) to list all excess resources. Include the resource name, request number, name of person, date and time of declared excess, and time in which the resource will be eligible to leave. Send to the RESOURCE UNIT where the resource will be determined to be surplus to the incident. Surplus resources will then be able to report to the DEMOB UNIT, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures, and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment. Resources are not to contact South Ops or the expanded dispatch center unless instructed to do so by the Demobilization Unit.

RELEASE PRIORITIES

- 1. Organized fire departments
- 2. OES engines
- 3. Hired personnel and equipment
- 4. Other agencies (USFS, BLM, etc.)
- 5. Out of region CAL FIRE forces
- 6. Within Region CAL FIRE Forces
- 7. Unit CAL FIRE Forces

TRAVEL INFORMATION

All resources will meet agency specific requirements on hours of travel per day. For CAL FIRE hand crews, a full 24 hour reset period shall be adhered to before departing from the incident. After a crew's last operational period they shall begin the demobilization release procedure during their 24 hour off shift. In addition, they must use the following complete 24 hour period as reset time before they depart from the incident.

FINANCE MESSAGE

FEDERAL RESOURCES

Refer to Caldor Federal Finance Procedures

CAL FIRE TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL Ensure you have started your eFC-33's and update after each shift. Please make sure Epay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS Check-in with the TIME Unit and drop off your agreements.

DIVISION / GROUP - LINE SUPERVISORS

- Please turn in hired equipment shift tickets at the end of each shift.
- SHIFT TICKET BOOKS Available in the TIME Unit for agency line supervisors only.

COMP / CLAIMS

- Damage Claims (suppression, property, vehicle)
 - ICS-213. We will need location, description of damages, and your contact information.

Federal Contract Resources

Private: Contractor Attachments:

@Check-In: Resource Order, Full Contract/Agreement,

Certifications

(if required), Pre-Inspection

Daily: SHIFT Tickets, receipts (fuel issues, claims, etc.) **@Demob:** Contractor Evaluations, Final Shift Tickets and receipt forAddition/Deductions, Post-Inspection, Final

Signed Invoices

FEDERAL FINANCE DEMOB PROCEDURES

All Resources will be sent their **DRAFT OF-288/OF-286's** via the Finance email. 12 hours will be provided to allow the resource to review their document and reply back to Finance with the statement "No Corrections Necessary" or a description of any issues. After Finance receives the email, any discrepancies will be resolved. Next, the resource is sent the **FINAL DOCUMENT** for signature. They will then email the signed document back to Finance, if able. Finance will then sign the **FINAL DOCUMENT** and email it back to the resource. This completes the process.

INCIDENT PEER SUPPORT:

Team members are available on the incident for any peer support related needs. The best way to get a hold of them is to call them directly or stop by the ESS Trailer

In addition, there is an onsite clinician available to meet on an individual and/or group basis

Jeremy Sanders 916-281-6472
John Kiszka 530-448-2402
or
CAL FIRE 24 Hr. Peer Support/Helpline
916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

Tony Howard 916-224-1543
Mike Aiello 916-584-0548
Warren Parrish 916-823-6641
Nikole Schutz 916-709-0434
Amber Henderson 805-794-1690
Amy Head 916-956-3277

Chris Lomanto 916-247-6974 Connie Quarisa 916-213-8697 Noelle Bahnmiller 916-661-0011 Krissy Shaefer 619-592-6337 Shawna Powell 530-717-0667 Mike Deleo 916-661-0724

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

A message to our firefighters from ASHLEY IVERSON.

Stay Healthy, Stay Alert and Stay Strong!

Media Law

The <u>California State Penal Code Section 409.5(d)</u> allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- Media **is not permitted** on private property without the property owners permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.

CAL FIRE Social Media Policy (Social Media 0691)

Social Media is increasingly being used by public agencies, the media as well as the public. This form of communication continues to grow rapidly in order to supply the instant gratification needs of society. Therefore when on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, 0691. You can get further information about the CAL FIRE Social Media Policy from the incident Public Information Officer. While assigned to the incident, there will be **no** posting of:

• Inappropriate information or materials, no opinions, no endorsements, inappropriate pictures or videos

Lost and Found

The Information Section will manage Lost and Found items for the incident. If you have lost an item leave your contact information and what you have lost at the Information Section. If you have found an item on the incident bring the item to the Information Section with your contact information as well.
