FAWN INCIDENT

CA-SHU-010480

OPERATIONAL PERIOD

9/26/2021 0700

to

9/27/2021 0700

THIS PAGE LEFT INTENTIONALLY BLANK

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">FAWN</p>	2. Operational Period:	Date From: 9/26/2021 Time From: 0700	Date To: 9/27/2021 Time To: 0700
---	-------------------------------	---	-------------------------------------

3. Objective(s):

- Management Objectives**
- Provide for and maintain Public and First Responder safety utilizing the incident safety analysis process.
 - Ensure COVID-19 precautions and best practices are met at all times.
 - Protect values at risk; including infrastructure, improvements, private, and public lands, natural, and cultural resources.
 - Foster and maintain relationships with all cooperators and stakeholders.
 - Ensure coordinated, timely and accurate release of public information.
 - Maintain fiscal accountability and keep costs commensurate with values at risk.

- Control Objectives**
- Keep the fire North of Hwy 299
 - Keep the fire South of Shasta Lake
 - Keep the fire East of Interstate 5
 - Keep the fire West of Blue Sky Road

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

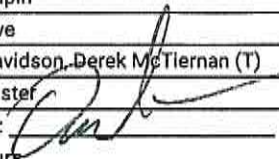

Approved Site Safety Plan(s) Located at:

Fawn Fire Weather Forecast

FORECAST NO: 1
PREDICTION FOR: 0700-0700
SHIFT DATE: Sun 9/26-Mon 9/27
FORECAST ISSUED: 1700 9/25/2021

NAME OF FIRE:Fawn
UNIT: Shasta-SHU
SIGNED: *Gen Walsh*
Incident Meteorologist *Ryan Walsh*

WEATHER DISCUSSION: The weather pattern stays quiet on Sunday ahead of the Monday frontal passage. General winds will remain southerly with some increasing winds late in the afternoon and evening but gusts generally in the 15-20 mph range along I-5 in Division A/B. High temperatures will top in the mid and upper 80s under hazy sunshine. Humidity values will trend slightly wetter and range from the upper teens to around 25 percent. Southerly winds ease around sunset with light downslope winds overnight. General winds may increase slightly out of the south overnight ahead of the cold front due to arrive later Monday.

WEATHER FORECAST FOR SUNDAY:

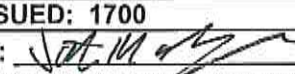

WEATHER: Hazy sunshine
TEMPERATURES: Highs in the mid to upper 80s (1-4 degrees cooler than yesterday)
HUMIDITY: Afternoon values lowering 18-24% (about 2-5% wetter than yesterday)
20 FT WINDS:
 RIDGETOP - South/Southwest 5-10 mph afternoon gusts 12-15 mph. Locally to 20 mph Div A/B.
 SLOPE/VALLEY - Light winds until mid-morning then southerly 3-6 mph gusts 9-12 mph.
HAINES INDEX: 4 **STABILITY/INVERSION:** Moderate morning inversion lifting by about 1100 hours.

WEATHER FORECAST FOR SUNDAY NIGHT:

WEATHER: Smoke and haze with a few clouds towards sunrise as front approaches.
TEMPERATURES: Lows 55-60 (1-4 degrees cooler than yesterday)
HUMIDITY: Moderate to good recovery by Monday morning of 60-65%
20 FT WINDS:
 RIDGETOP - South/Southwest 5-10 mph
 SLOPE/VALLEY - Evening southerly becoming light downslope 2-5 mph overnight.
HAINES INDEX: 3 **STABILITY/INVERSION:** Moderate to strong inversion setting up after dark.

EXTENDED FORECAST: An early season cold front approaches on Monday with increasing southwest winds Monday afternoon with gusts to 25 mph. Temperatures will be cooler with higher humidity on Monday afternoon but the initial impacts will be gusty frontal winds that will test containment lines. Front moves through Monday night with a slight chance of rain showers. Should rain occur amounts would be less than a tenth of an inch. Front passes through Monday night with winds switching to West and Northwest overnight with gusts 25-30 mph. Temperatures will be much cooler with lows into the 40s and full humidity recovery. Highs only into the lower 70s Tuesday before 3-h pressure rebuilds with light North winds midweek.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: Wildland
FIRE NAME: Fawn	OPERATIONAL PERIOD: 9/26-9/27, 0700-0700
DATE ISSUED: 9/25/2021	TIME ISSUED: 1700
UNIT: CA-SHU-010480	SIGNED: 
Typed/printed: Jonathan Pangburn, FBAN	

INPUTS

WEATHER SUMMARY: FAVORABLE WEATHER BEFORE APPROACHING FRONT

High pressure.
 Temp: 85 max; 55 min
 RH: 20% min; 70% max
 Wind: S/SW 4-8, gust 12 day; diurnal downslope night with general S wind 4-8 above 2,000'

OUTPUTS

FIRE BEHAVIOR

GENERAL:

S/SW wind will direct fire east of Jones Valley. Dead fuel accumulation from winter storm damage & mortality. BI & ERC above 90th percentile. Live & dead fuel moistures at critical. 100- & 1,000-hr dead fuels below 10th percentile.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	<5' (1.5 m)	30-40 ft/min (0.5-0.7 km/hr)	< 0.2 mile (0.3 km)	75%
Shrub	10-15' (3-4.5 m)	35-45 ft/min (0.6-0.8 km/hr)	< 0.3 mile (0.5 km)	75%
Timber Litter	< 5' (1.5 m)	5-10 ft/min (0.1-0.2 km/hr)	< 0.2 mile (0.3 km)	75%
Timber Understory	5-10' (1.5-3 m)	5-10 ft/min (0.1-0.2 km/hr)	< 0.2 mile (0.3 km)	75%

- **minimum safety zone size for grass fuels is 1/4 acre (0.1 Ha) for a Strike Team of Engines.
- **minimum safety zone size for timber fuels is 1/3 acre (0.1 Ha) for a Strike Team of Engines.
- **minimum safety zone size for WUI/shrub fuels is 1/2 acre (0.2 Ha) for a Strike Team of Engines.

SPECIFIC:

- Branch I: Watch for rollout, especially in DIV B. Little fire growth anticipated.
- DIV M: Higher elevation transition to Ponderosa pine and white fir. Greater spotting potential from ember cast, especially with any torching. Watch for wind gusts and spotting across Pit River.
- DIV T: Watch for fire activity in East Dry Creek or Clikapudi Creek east of Jones Valley. These areas will channel wind.
- DIV U / W: Concern if fire gets established in East Stillwater or East Valley Creek, which could align with afternoon winds

AIR OPERATIONS:

Hazy all day, especially in morning hours. Partial clearing in afternoon.
 Mixing height: 1,000 becoming 5,000 ft. AGL. Transport winds: S/SW 10 mph. Sunrise 0701, Sunset 1859.

SAFETY

Changes in fire behavior are often subtly signaled by atmospheric changes that can go unnoticed when firefighters are focused on more tangible effects of fire and terrain. Watch for the wind shift!

Fuels and Fire Behavior Advisory

Northern California

September 16, 2021, to September 30, 2021

Subject: Potential for extreme fire behavior due to continued critically low live and dead fuel moistures. Very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, periods of excessive heat have caused elevated to record fire danger rating values across much of northern California. Anticipated moisture could temporarily reduce some threat across the far north PSAs.

Discussion: Fires burning in northern California continue to exhibit extreme fire growth due to critical fuel conditions. Rapid fire spread can be fuels driven. Wind events have led to extreme rates of spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Extreme to Exceptional levels of drought conditions continue to exist across much of Northern California. The drought is expected to persist or intensify through the rest of fire season. Deficient rainfall and snowpack with early melt off, coupled with periods of extreme heat has resulted in fuels that are critically dry, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year. Recent scattered rain has reduced some ERC values, but fuels are rebounding quickly. Extreme fire behavior has been observed in all fuel types and both live and dead fuels. **Continue to anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of extreme levels of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. 1000-hour fuel moistures continue to trend at record low levels in many areas. Live fuel moistures in grasses, shrubs, and trees, remain at critical levels in many areas of Northern California due to limited green-up this spring. **Expect fires to ignite easier, spread faster and burn hotter. Reports of blistered paint on vehicles have been surprisingly frequent so far this year. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. Aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. **Anticipate higher resistance to control in all fuel types.**
- Northern California continues to experience large fire activity and multiple team deployments and will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. **Everyone, every day, returns home safely.**
- The frequency of North to Northeast offshore wind events increases from mid-September into the fall. These strong winds are often accompanied by very low RHs and will pose an increased hazard when combined with this year's critically dry fuels conditions. **Watch for change.**

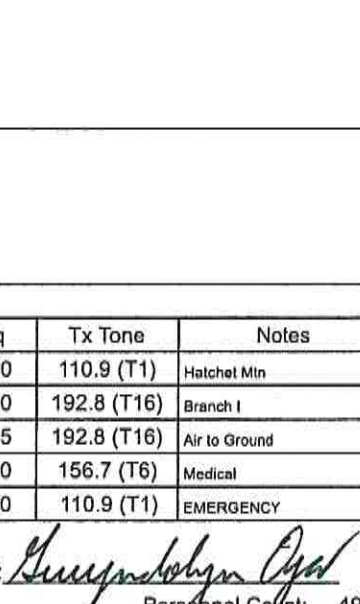

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. **Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, PocketCards, ERC's, live and dead fuel moistures.**
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Merced and Diablo-Santa Cruz, and the northeastern portion of Far Eastside.

6. Work Assignments:
 Identify and construct primary control line from Bear Mtn Lookout Rd to Silver Thorn.
 Mop up 100' from control lines.
 Hold and improve control lines.
 Prepare to implement a firing plan.
 Develop and prepare to implement a Structure Defense Plan in the Silver Thorn area.
 Identify and document fire suppression repair needs.

7. Special Instructions:

HIDDEN HAZARDS

EXTENDED DAYS OF BURNING VEGETATION CREATES UNSEEN HAZARDS

Watch Out - Be on the lookout for hidden hazards

- Avoid trees that have been burning for long periods of time
- Areas of the burn may have stumps remaining causing hazards
- Utility poles within and around the fire perimeter

Mitigation - If it doesn't look right make it known

- Flag hazard trees and communicate the dangers to your supervisor
- Stump holes are difficult to identify, use your hand tool to feel for ground depth
- Evaluate, identify, and make known, the hazards in your work area

FATIGUE

PHYSICAL AND MENTAL FATIGUE MAY COMPROMISE SAFETY

Watch Out - Be on the lookout for signs of fatigue - look out for one another

- Chronic feelings of exhaustion, feeling "spacey"
- Impaired decision-making and judgment • Low motivation • Moodiness
- Look for signs and symptoms among your fellow workers, irritability, anger, depression

Mitigation - Proper nutrition reduces fatigue

- Eat foods, which provide steady energy - limit sugary, fatty, fried foods
- Hydrate - proper hydration prevents fatigue
- Manage work rest ratio while performing work and take full advantage of time off the line to rest

LEADERSHIP

IT'S THE FOUNDATION TO SAFETY

Watch Out - When it does not seem clear, it probably isn't

- Crews sacrificing safety for the sake of the task
- Ignoring basic safety policies and protocols
- Things falling through the cracks, breakdown in communications, no clear plan

Mitigation - Leaders are not rank specific and are at all levels in an organization

- Leaders hold themselves accountable to doing the right thing
- Hold each other accountable to doing the right thing
- Leaders lookout for one another and take care of one another

Each Safety Message is designed for a daily Tailgate Safety discussion

REMAIN FIRE FOCUSED AND COVID-19 AWARE

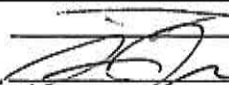

JACK PICCININI

IMT 4 SAFETY OFFICER

INCIDENT ACTION PLAN SAFETY ANALYSIS (ICS 215A)

1. Incident Name: FAWN		2. Incident Number: 21-CA-SHU-010480	
3. Date/Time Prepared: Date: 09/25/2021 Time: 1700 hours		4. Operational Period: Date From: 09/26/2021 To: 09/27/2021 Time From: 0700 hours To: 0700 hours	
5. Incident Area	6. Hazards/Risks	7. Mitigations	
DIV. A, B, M, T, U, W	Fatigue – physical and mental	Continually monitor your crew. Know the signs and symptoms of heat illness. Plan for a 2-1 Work Rest Work Cycle	
DIV. A, B, M, T, U, W	Hazardous Trees	IRPG Pg 22: Identify and Flag Hazardous Trees. Eliminate hazardous trees with qualified sawyers or heavy equipment.	
DIV. A, B, M, T, U, W	Dehydration / Rhabdomyolysis	With the long operational shifts and low humidity's, maintain your crews water and caloric intake regimen.	
DIV. A, B, M, T, U, W	Changing Weather	Northerly Winds are predicted to reverse and become Southerly... Be Aware and Prepare for the weather transition.	
DIV. B, M, T, U	Helicopters - Water Drops and Turbulence	Post lookouts and make escape routes and safety zones known. LCES. Watch overhead for hazard trees and wind changes.	
DIV. B, M, T, U	Steep, unstable terrain	Watch footing and maintain downhill tool placement. Be aware of loose material. Look for ash pits and stump holes.	
DIV. A, B, M, T, U, W	Unburned areas	LCES - utilize worst case scenario when working in or around pockets of unburned fuels.	
DIV. A, B, M, T, U, W	Working around heavy equipment	Maintain eye-to-eye contact with the operator. Have fire suppression support when operating in dry fuels	
DIV. A, B, M, T, U, W	Personal Protective Equipment (PPE)	Wear appropriate PPE for all operations until your supervisor indicates its safe to remove.	
DIV. A, B, M, T, U, W	Highway 5 Old Oregon Trail and Bear Mountain Road: CAL TRANS and Utilities working along the roadway	Drive slow through the construction areas. Expect delays along all travel routes.	
ALL areas of the incident including the ICP and Hotels	COVID-19: Reduce exposure potential to yourself, your crew and the public	<u>Wear a mask</u> while in the ICP, while feeding and with the public, and when six feet of social distancing is difficult. Wash hands for at least 20-seconds.	
DIV. A, B, M, T, U, W	Powerlines /Compromised Power Poles and Utility Workers	LOOK UP and LOOK DOWN... Communicate utility hazards, and flag those to prevent injury of other crews.	
Ground Support	Personnel and vehicles moving around one another in tight areas	Chock wheels. Use spotters and backers. Follow mechanic direction.
