Electra			Time Fr	om:	0700	Time To:	0700				
3. Objective(s):											
Strategic Objective											
Implement a full suppression strategy on the Electra utilizing life safety, community infrastructure defense lands by effective and efficient firefighting efforts that	e, and r	natural/cultural values	as a guidi	ing princip	le. Minimiz	e acres burn	ized ed on all				
Leaders Intent											
Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take the appropriate actions regarding: - Professional behavior, conduct timely / effective communications - Personal safety and safety of others, including driving slowly, safely and defensively Implementation of tactics that offer a high probability of success - Manage fatigue by taking breaks and maintaining work rest guidelines - All line supervision personnel including crew and striketeam leaders must attend the morning Operational Briefing											
Management Objectives - Provide for emergency personnel and public safety at all times Protect property, improvements, and infrastructure Ensure coordinated, timely and accurate release of public information Foster and maintain relationships with all cooperators and stakeholders Protect economic, natural, cultural and heritage resources Maintain fiscal accountability.											
Control Objectives											
- Keep the fire North of Jesus Maria Road											
- Keep the fire South of Highway 88											
- Keep the fire East of Highway 49											
Example 26 / Railroad Flat	Rodu										
General Situational Awareness:		11									
- Steep and rugged terrain, critically dry and recep	tive fue	el beds, and drought s	tressed tre	ees.							
 In the COVID-19 environment, high density populand to ensure all employees return home safely, 					help protec	t yourself, yo	ur family				
- Enhanced hygiene (especially handwashing), PF	E, and	monitoring practices	help limit t	he infection	on rate of fir	st responder	S.

Electra Fire

National Weather Service Sacramento

2022-07-06 12:46 PM PDT

SPOT FORECAST for Electra Fire...CAL FIRE National Weather Service SACRAMENTO CA 1245 PM PDT Wed Jul 6 2022

Forecast is based on forecast start time of 0700 PDT on July 07. If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...

The pattern of onshore flow continues Thursday and Friday. Temperatures will increase through late week with daytime humidity values decreasing, with this trend continuing through the weekend. Winds will generally be terrain driven. Good overnight recoveries are expected overnight Thursday into Friday.

.THURSDAY...

```
Sky/weather.....Sunny. Haze and areas of smoke.
Max temperature.....80-86.
Min humidity.....29-34 percent.
Wind (20 ft).....
Slope/valley......Variable winds less than 4 mph through mid-morning,
                  becoming southwest winds up to 10 mph in the
                  afternoon.
 Ridgetop......West around 6 mph gusts around 15 mph in the afternoon.
Mixing height......300-1200 ft AGL increasing to 2900-4300 ft AGL
                  late in the morning.
Transport winds.....West around 8 mph.
CWR.....0 percent.
LAL....1.
.THURSDAY NIGHT...
Sky/weather.....Clear. Haze and areas of smoke.
Min temperature....60-65.
Max humidity......64-69 percent.
Wind (20 ft).....
```

Slope/valley......West winds up to 8 mph in the evening becoming variable less than 5 mph.

Ridgetop......West around 6 mph.

Mixing height......3900 ft AGL decreasing to 200-900 ft AGL early in the evening.

Transport winds.....West around 6 mph.

CWR.....0 percent.

LAL.....1.

.FRIDAY...

Sky/weather.....Sunny. Haze and areas of smoke.

Max temperature.....84-90.

Min humidity.....21-26 percent.

Wind (20 ft).....

Slope/valley.....Variable less than 5 mph becoming southwest from

6 to 10 mph in the afternoon.

Ridgetop.....Southwest around 8 mph.

Mixing height......400-800 ft AGL increasing to 5700-5900 ft AGL.

Transport winds.....Southwest around 8 mph.

FIRE BEHAVIOR FORECAST

	Typed/printed: Brian Newman FBAN						
UNIT: AMADOR – EL DORADO	SIGNED: Brian Newman						
DATE ISSUED: 7/06/22	TIME ISSUED: 1900						
FIRE NAME: ELECTRA CA-AEU-17769	OPERATIONAL PERIOD: 7/07/22 - 7/08/22						
FORECAST NUMBER: 2	TYPE OF FIRE: Wildfire						

INPUTS

WEATHER SUMMARY

The pattern of onshore flow continues with temperatures increasing through late week with daytime humidity values decreasing. Winds will generally be terrain driven. Diurnal wind shifts are very predominant in this area and occur regularly just after sunset and again just after sunrise. Good overnight recoveries are expected overnight Thursday into Friday.

OUTPUTS

FIRE BEHAVIOR

GENERAL: The fire is located in steep topography of the Mokelumne river drainage. The fire is burning in mainly grass and brush, with some oak and pine tree stands and standing dead snags from the 2015 Butte fire. Overall, expect continued upcanyon fire spread with occasional spread upslope. Overnight downcanyon winds will limit inversions, But fire activity will diminish due to high humidity recoveries.

SPECIFIC:

Branches I, III: Fire activity is primarily in the heavier fuels and drainages with oaks and pine trees. Residual heat in the unburned islands and smoldering edges of green fingers pose the biggest threat for producing short intense upslope runs when winds and slope are in alignment. This could produce short range spotting, especially in the receptive grass fuel beds, but not be resistive to control. Spotting distances are generally 100 to 300 feet.

Branch V: Fire is in heavier fuels of brush and mixed timber with a grass understory. Expect more residual heat and higher chances of rollout from the recent firing operation. The brush and timber are not at critical moisture levels, so firing operations will generally not result in complete consumption.

Branches X, XIV: Fire activity is primarily limited to unburned islands and smoldering edges of green fingers. Ember production could cause spotting in the lighter fuels but spotting distances will be short and should not pose large threats to control efforts. Expect swirling winds near confluences of the main river and tributary drainages.

Air Operations: Smoke inversion will obscure the fire area during the transition in winds in the morning but will lift out around 1000. Once the smoke clears, there will be opportunities for air operations on the ridges first then into the canyon itself.

SAFETY

- Be aware of diurnal wind shifts throughout the morning and evening.
- Snags/ trees can burn in the upper portions. Look up! Just because there is no fire in the trunk doesn't' mean it's safe.

SAFETY MESSAGE

ac·count·a·bil·i·ty

- 1. the obligation of an individual or organization to account for its activities, accept responsibility for them, and to disclose the results in a transparent manner.
 - Trees are stressed due to previous fire activity. Look Up, Down, and Around.
 - Make sure everyone gets a briefing!
 - Monitor your hydration/nutrition intake and keep adequate supplies of each.
 - Scout, size up and mitigate hazards during handline, mop up and patrol.
 - Drive defensively and expect the unexpected.
 - All types of heavy equipment are working on the incident. Give them space.
 - Understand the plan for the day and your individual role within the plan.
 - Be aware that civilians continue to occupy the fire area.

SNAG (Hazard Tree) SAFETY:

Size up snag hazards in work area

Never become complacent

Always look up

Get weather reports

Scout out parking, work areas, and safety zones

Advise co-workers of known hazards

Face your hazards and take appropriate action

Examine work area for other hazards

Take extra caution around heavy equipment

You are responsible for your own safety

Lookouts
Communications
Escape Routes
Safety Zones

CALFIRE INCIDENT MANAGEMENT TEAM 3 SOF1 David Sargenti

INCIDENT RISK ANALYSIS ICS 215A

DDANCH	HAZARDOUS ACTIONS/	MITIGATIONS (MADNINGS /DENAFRIES
BRANCH	HAZARDOUS ACTIONS/ CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	FIRE AND DROUGHT WEAKENED TREES/SNAG HAZARDS	 Follow Hazard Tree Safety Guidelines (IRPG p. 20). Many of the trees within the fire area and along roadways are stressed due to previous fires and drought conditions.
ALL	STEEP TERRAIN	 Ensure proper footing and maintain spacing between crew members. Develop a plan for medical emergency extrication utilizing resources on your Branch.
ALL	DRIVING HAZARDS	 Watch your speeds. Drive defensively! Expect the unexpected. Watch for road degradation, smokey and dusty conditions. Be aware of debris in the roadways from rollout and suppression operations.
ALL	FIRING OPERATIONS	 Ensure adequate personnel and resources are available for the operation. Validate LCES with all resources. Follow the Firing Operations checklist. Utilize Risk Management Process IRPG (p. 1).
ALL	BRIEFINGS	 Make sure everyone gets a briefing on the plan for the day. Document this on your ICS 214.
ALL	HYDRATION	 Drink water before, during and after each shift. Be alert for signs of heat stress in yourself and others.
ALL	HELICOPTER AWARENESS	 Be aware of rotor wash when working near helicopters. Understand that hazardous trees may react to helicopters overhead.
ALL	HEAVY EQUIPMENT	 Give ample space for heavy equipment to work (100ft in front, 50 feet behind) Avoid working downhill from equipment where rolling material could jeopardize your safety.
ALL	PERSONNEL SAFETY	 All personnel are responsible for their personal safety. Immediately report any suspicious activity. Be sure to wear all required PPE while on the fire line.
ALL	COMMUNICATIONS	 Check the communication plan for frequency assignments. Be clear and concise when talking on the radio. Use human repeaters as needed.
ALL	CIVILIAN PRESENCE	 Watch for civilian traffic. Be aware that civilians continue to occupy the fire area. Watch for residents in and around the area.
ALL	WEATHER	 Maintain your situational awareness Review the forecast for the operational period.
ALL	COVID 19	 Monitor yourself and crews for signs and symptoms. Wash/sanitize hands often. Maintain social distancing when applicable.

ELECTRA INCIDENT PEER SUPPORT:

The Electra Peer Support Team is available on this incident for any peer support needs.

Examples of peer support needs are, but not limited to, understanding stress reactions, dealing with traumatic experiences, professional or personal crisis, other behavioral health impacts and/or obtain vetted resiliency resources.

The best way to make contact with the Peer Team members is to call the number below.

Jake Hannan 530-333-5184

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

A message to firefighters from ASHLEY IVERSON.

Stay Healthy, Stay Alert and Stay Strong!

1.5 hrs

LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

Division Supervisor contacts:

Level 2 Trauma

UC Davis Burn Center

Level 1 Trauma

- FEMT / FEMP
- Communications Unit
- Communication Unit will clear command channel for emergency traffic; as needed for Minor/Major Emergency
- Communications will switch all emergency traffic to CALCORD as needed or requested.
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on CALCORD.
- Medical Unit will:
 - Dispatch air/ground ambulance to as appropriate.
 - If necessary, after patient pickup, dispatch ambulance to helibase for transportation.
 - Notify receiving hospital of injury status.

CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found here.

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy here.

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE - The Information Section can assist you with sending and receiving mail.

ELECTRA INCIDENT FINANCE MESSAGE

CAL FIRE TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL make sure you have started your eFC-33's and update after each shift. Please make sure Epay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS Check in with the Time Unit and drop off your agreements.
- SHIFT TICKET BOOKS for line supervisors are available in the Time Unit (agency personnel only).
- DIVISION GROUP SUPERVISORS / LINE SUPERVISORS Please make sure to turn in hired equipment shift tickets at the end of each shift.
- OES REP Located west of the feeding area.
- FEDERAL Time, Please see CAL FIRE Time Unit.

COMP / CLAIMS

- DAMAGE CLAIMS (suppression, property, vehicle), 2 ways to report:
 - ⇒ QR code at the bottom left
 - ⇒ ICS-213 with location, description of damages, and your contact information.
- Report all injuries to the Comp / Claims, no matter how minor.

WATER SOURCE WORKSHEET

Please complete the attached form for water sources used. You can also use the QR code at the bottom right.

The intent of this document is to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

^{**}Please note PROPERTY OWNER AND CONTACT NUMBER! (Use reverse side if needed.)

FIRE SUPPRESSION REPAIR PLAN: ELECTRA INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is <u>not</u> the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire.

Damaged facilities will be upgraded to functional status to mitigate future damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by Operations and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and
Utility distribution lines (above or below ground)	animals
Road barriers removed for fire access	Archaeological sites
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

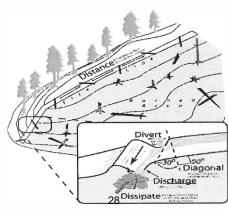

Dozer Line and Road Repair

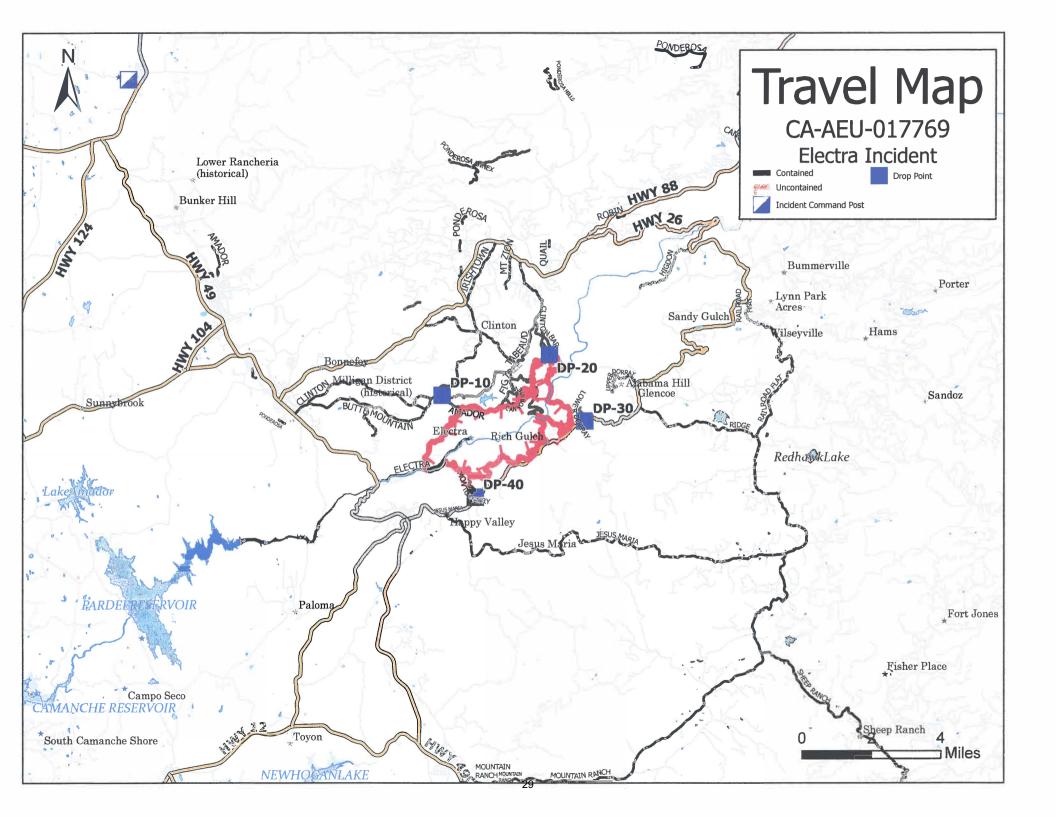

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading
 and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially
 important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rocked areas.
- Where slopes exceed the range at which equipment can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.
