INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From:	9/5/2022	Date To:	9/6/2022
Mill / Mountain Incident		Time From:	0700	Time To:	0700
3. Objective(s):				71110 10.	
Management Objectives					
- Provide for emergency personnel and public safe	ety at all times.				
- Protect property, improvements, and infrastructur	re.				
- Ensure coordinated, timely and accurate release	of public information.				
- Foster and maintain relationships with all coopera	ators and stakeholders.				
- Protect economic, natural, cultural and heritage r	esources.				
- Maintain fiscal accountability and keep costs com	nmensurate with values at ris	sk.			
- Ensure COVID-19 precautions and best practices	s are met at all times.				
Control Objectives					
Mill Fire Keep the fire North of South Davis Street. Keep the fire East of I-5. Keep the fire South of Louie Road. Keep the fire West of HWY 97. Mountain Fire Keep the fire North of Houston Creek. Keep the fire East of McConaughy Gulch Road ar Keep the fire South of Macs Gulch. Keep the fire West Dewey Mine Road. General Situational Awareness: Steep and rugged terrain, critically dry and reception. In the COVID-19 environment, high density popular family and to ensure all employees return home so	ive fuel beds, active area for ations or large groups are pa afely, make sure to practice	articulary at risk. To social distancing.	help protect y	ourself, you	r

INCIDENT Weather Forecast

FORECAST NO:

1

NAME OF FIRE: Mill and Mountain

PREDICTION FOR:

FORECAST ISSUED:

24 hour shift

9/4/22 @ 1900

UNIT: CalFire

SHIFT DATE:

9/5/22-9/6/22 (0700-0700)

SIGNED:

Rich Thompson Incident Meteorologist

WEATHER DISCUSSION: Hot and dry conditions will persist across the incidents through the operational period. Afternoon temperatures will generally be in the 90s (about 3-5 degrees warmer than Monday). Overnight low will remain warm, generally in the 60s. Afternoon relative humidity will drop into the lower and middle teens during the daytime (about 3-5% lower than Monday) with poor to moderate overnight recovery. At lower elevations, typical diurnal winds will prevail with upcanyon gusts 10-15 MPH in the afternoon hours.

Ridgetop winds will generally be from the southwest and west.

For Tuesday and Wednesday, even warmer conditions are anticipated as high pressure continues to build over the area. With the warmer temperatures, afternoon relative humidity will remain low with poor overnight recoveries. As for winds, expect stronger winds across the ridgetops Tuesday and Wednesday with westerly winds potentially gusting around 15-20 MPH. Additionally, instability is expected to increase during this time period, resulting in better clearing of the smoke and increased mixing heights.

WEATHER FORECAST:

WEATHER:

Mostly clear and smoky.

TEMPERATURES:

Max: 88-98.

Min: 62-70.

HUMIDITY:

Min: 10-16%.

Max: 35-45%.

20 FT WINDS:

RIDGETOP -

East 4-8 MPH this morning becoming southwest to west 6-12 MPH

this afternoon. Winds will shift to south 4-8 MPH overnight.

SLOPE/VALLEY -

Variable/upslope 3-6 MPH this morning, becoming upvalley 4-8 MPH with

gusts 10-15 MPH in the afternoon. Winds becoming downslope and

downvalley after sunset.

STABILITY/INVERSION:

Inversion around 2000 feet AGL likely to remain through the period.

OUTLOOK FOR TUESDAY:

Mostly clear and smoky. High temperatures 92-102. Low temperatures 65-75. Min RH: 8-15%. Max RH: 30-40%. Winds: typical diurnal winds at lower elevations with upcanyon gusts 10-15 MPH in the afternoon. For ridgetops, southwest to west winds 6-12 MPH in the afternoon hours and light and variable winds during the overnight hours.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2

FIRE NAME: Mill - Mountain

DATE ISSUED: Sep 4, 2022

UNIT: CALFIRE SISKIYOU UNIT

Typed/printed: Troy Velin - FBAN

INPUTS

WEATHER SUMMARY:

HOT AND DRY THROUGH THE OPERATIONAL PERIOD. SEE SPOT FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL:

NFDRS- Energy Release Component is 64 and above the 97th percentile. BI – Burning Index is 46 also above the 97th percentile. 100hr FM 10%, 1000 hr FM 11%. LFM in Manzanita approaching critical at 85%. Annual grass is completely cured. The Mill fire is burning in annual grass, light to heavy brush and scattered high desert timber fuels. The Mountain fire is burning in annual grasses, light to heavy brush and scattered hardwood litter and timber litter. Fire area ranges from 2700' to 6000' elevation. On September 2nd, 2022 a Fuels and Fire Behavior advisory was issued for Northern California. Due to extreme drought, extremely dry fuels and extended periods of hot weather, fire behavior will be elevated for the near future.

SPECIFIC:

Mill

Smoldering and creeping fire is burning in rolling hills with a mix of light and heavy fuels depending on aspect. Due to drought, agricultural lands are not a barrier to fire spread. Unconsumed islands and destroyed structures will need to be monitored as they still have the potential to produce embers that could be carried by afternoon winds.

Mountain

The fire is actively burning in steep broken terrain absent of modern fire history; expect torching, short duration crown runs and spotting. General movement of the fire will be to the West and North. Fire backing into creek drainages has the potential to make slope reversals with rapid runs to ridgetops. Winds will be stronger on the ridges and provides an opportunity for mid to long range spotting. Average head fire ROS is 21 ch/hr. In Div BB monitor for rollout across the line in the Gazelle Lookout drainage. In Div GG the fire will continue to back down into the Noyes Valley drainage. Evening downcanyon winds will allow growth to the Southwest. Morning sun on East aspects there will promote uphill runs to the West. In Div LL the fire will cross Moffet Creek and make terrain runs to the ridgeline in the West. Once on the ridge the fire will back today will support instability if the smoke layer is disturbed. Div's PP, TT, WW. Monitor for rollout in steep terrain.

AIR OPERATIONS:

Sunrise 6:40 am Sunset 7:35 pm. High pressure with light winds may cause smoke to linger through the operational period.

SAFETY

The mountain fire has burned actively through the night since the IA. Remember that once the sun goes down downslope winds may turn backing fire into downhill head fire. Updates LACES appropriately.

Fuels and Fire Behavior Advisory

Northern California

September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will
 continue to decrease already low fuel moisture values:
 - o 1000-hour fuel moistures are below average and approaching the 90th percentile,
 - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - O Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current <u>North Ops Outlooks</u> and <u>national fuels and fire behavior advisories</u>.

Mitigation Measures:

- Suppression actions need to be based on good anchor points, escape routes, and safety zones.
 Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates
- Fire managers should be aware of high use recreation and visitor sites in their area. The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

Mill/Mountain INCIDENT HEALTH AND SAFETY MESSAGE

Maintain Situational Awareness!!!

INCIDENT Mill/Mountain CA-SKU-007568/007586 DATE: September 5, 2022 TIME: 0700-0700

Major Hazards and Risks:

HEAT - SNAGS- TERRAIN - RECEPTIVE FUELS - DRIVING - FATIGUE

Situational Awareness: Access your current situation constantly, maintain radio communication with your division, adjacent divisions, and monitor air-to-ground frequencies to understand what is happening around you at all times. Pay attention to any changes in weather and fire behavior.

Steep slopes/rolling material/snags: Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness while working around trees and snags.

Line Construction: Use Downhill Line Checklist (IRPG). Conduct thorough briefing for all personnel. Ensure LCES in place prior to engagement. Establish Safety Zones. Utilize Risk Management Process.

COVID: Maintain good hygiene and report any symptoms to supervisor.

Environmental Hazards: Watch for damaged propane tanks and other hazards around damaged structures. Wear appropriate PPE when overhauling structures.

Fatigue: Take frequent nutrition and hydration breaks throughout the day. Hydrate with a 2 water to 1 electrolyte drink ratio on hot dry days. Monitor personnel for fatigue and plan accordingly with work assignments.

Fire Behavior: Be prepared for spot fires and erratic winds. Fuels are receptive to fire. Consider P.A.C.E and know your L.C.E.S. Be prepared for erratic fire behavior.

Lookouts, Communication, Escape routes, Safety zones

TAILGATE SAFETY

- Accountability: Supervisors know where their crews are at all times.
- Hydration and Nutrition: Monitor each other for proper hydration and nutrition.
- **Communication:** Everyone knows the comm plan and follows it.
- **Briefing:** Leaders intent is fully communicated, and safety briefing is provided.
- Safety gear: Everyone has the appropriate PPE and is using it.
- LCES: They are clear, understandable and made known to everyone.

Planning For Medical Emergencies

Supervisors and all firefighters need to Review your ICS 206 ask and be able to answer the following questions:

What are we going to do if someone gets hurt?

• Is there personnel and equipment available to assist?

How will we get them out of here?

 What is your best extraction and transport method? Road, helispot, hoist? Primary plan and contingency plan in place?

How long will it take to get them to the hospital?

- Will you request air or ground resources?
- Are helicopters able to fly?

SAFETY COMMUNICATION

HIGH TEMPERATURES & HEAT ILLNESS

With the significant heat wave across California, all CAL FIRE employees are expected to review and implement the following heat illness prevention measures. With high heat, body temperature can rise to dangerous levels and lead to heat related illnesses such as heat exhaustion or heat stroke. Heat related illnesses can affect anyone, regardless of age or physical condition. Those who have not properly acclimated to hot conditions, include new employees and employees returning to work after a week or more off, are at an increased risk of heat related illnesses.

WHILE RECOGNITION AND TREATMENT ARE IMPORTANT, PREVENTION IS ESSENTIAL.

Avoid or reduce outdoor activities:

- Strenuous activities should be reduced, eliminated, or rescheduled.
- Outdoor activities, including trainings and exercise, should be moved indoors or rescheduled during cooler times of the day.
- If outdoor work cannot be avoided, increase recovery time spent in cool, shaded areas, such as the cab of vehicles, shade from trees or vehicles, rock outcroppings, or buildings. During breaks, and when operationally safe to do so, loosen or remove PPE.

Hydrate:

- Drink cool water, even if you are not thirsty.
- Begin hydrating well in advance of physical activity, including when off shift and during recovery periods.
- Avoid Hyponatremia (low concentration of sodium in the blood) by supplementing water intake with electrolyte enhanced fluids, such as sports drinks.
- Avoid carbonated and caffeinated beverages, as they can lead to dehydration.

Monitor for symptoms:

- Signs and symptoms of heat illness may progress over the course of a few days or may have a rapid onset
- Signs and symptoms of heat illness include headache, muscle cramps, unusual fatigue, profuse sweating, unusual behavior, and nausea or vomiting

Any employees exhibiting signs and symptoms of heat illness require immediate attention. If medical personnel are not available on-site and heat illness is suspected, emergency medical personnel should be contacted immediately and on-site first aid shall begin.

Additional heat illness prevention tools are available through the <u>Safety Program's</u> <u>Safety Officer Toolbox</u> or by contacting your <u>Unit, Program or Region Safety Officer</u>.

STATEWIDE 2022 02

Mill/Mountain Incidents CA-SKU-007568/007586 RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS	MITICATIONS (WIA	TAKE TAKE						
	ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS							
		Be alert for signs of fatigue and take breaks as nece	ssary.						
ALL	FATIGUE/HEAT/DEHYDRATION	Monitor incoming resources for level of fatigue.							
ALL	TATIGUE/REAT/DEHYDRATION	Drink water before, during and after shifts, up to 1.:	5 gal. per shift.						
		Be alert for signs of heat stress in yourself and other	rs: Find shade when you can						
		Drink electrolyte drinks at a 2 water to 1 sport drink ratio.							
		Don't underestimate the task at hand.							
ALL	COMPLACENCY	Everyone should be briefed on the conditions and circumstances regarding their							
		assignment.							
		Be alert while working along roadways.							
		Know your LCES and maintain Situational Awaren	ess.						
Mountain	FIRE BEHAVIOR	Use experienced Lookouts.							
		Monitor weather for changes in the wind, temp, and	RH during the shift.						
		Have a contingency plan with established decision r	oints and safety zones						
		Monitor air-to-ground frequency, they are your eyes	in the sky.						
Mountain	AIRCRAFT OPERATIONS	Use air-to-ground frequency to communicate with aircraft							
		Use clear, concise statements when directing aircraf	t.						
		Clear the area for incoming water and retardant drop	os.						
ALL	HEAVY EQUIPMENT	Watch for rolling material avoid working below hea	vy equipment.						
		Monitor safe working distances provide adequate we	orking space.						
		Ensure LCES in place prior to engagement.							
Mountain	LINE CONSERVICENCE	Establish adequate safety zones.							
Modificant	LINE CONSTRUCTION	Use Downhill Line Checklist.							
		Follow "Look Up, Look Down, Look Around" procedures.							
		Utilize Risk Management Process. Reference the IRPG.							
ALL		Wear a mask when applicable.							
CAMP	COVID 19	Utilize hand sanitizer and wash hands frequently							
HOTELS	COVID 19	Maintain social distancing.							
HOTELS		Disinfect apparatus and coolers frequently.							
		Adhere to local, state and federal Covid-19 guideline	S.						
		Complete appropriate DOT daily vehicle inspection.							
ALL	DRIVING HAZARDS	Slow Down! Long travel times to the line, stay alert.	Stop if fatigued.						
1100	DIG HAZARDS	Drive defensively! Expect the unexpected around ev	ery curve.						
		Drive with headlights and seatbelts on. Narrow roads	with limited passing room.						
		Expect roads to deteriorate over the shift.							
ALL	COMMUNICATIONS	Confirm correct tactical and command channel. No u	nassigned radio channels.						
		Check your Air to Ground channel to make sure it is	correct.						
_		Check your tactical frequency if you have moved branches	or divisions.						
	HAZARD TREES/TREE FELLING	Identify and isolate the area to provide for the safety	of others.						
ALL	SAFETY	Flag and make proper notifications.							
		Size up and mitigate concerns, put the tree fire out if	possible! Work within your						
1		qualifications if considering felling a tree							
ATT		Maintain situational awareness for illegal activity. Be aware of wild animals

\$ FINANCE MESSAGE \$

Please No Off Site Feeding Unless Approved by a Finance Section Chief. Certain circumstances will need to apply for our approval.

CAL FIRE PERSONNEL

Make sure to create a paper FC-33 so we can update. If anyone has any CalCard travel receipts and meal/lodging sign in sheets, please get a copy to Finance.

LOCAL GOVERNMENT RESOURCES

Make sure you check in with TIME Unit for ABH or F-42 Paperwork.

ALL HIRED EQUIPMENT

Make sure you get your shift ticket filled out by your **<u>Division</u> <u>Group Supervisor or Supervisor.</u>**

ALL SUPERVISORS OF HIRED EQUIPMENT

Shift Tickets for hired equipment need to be signed and turned in to TIME daily. Ensure the shift ticket is filled out completely (including evaluation), accurately and legibly. **Example included in IAP.**

PROPERTY DAMAGE or INJURIES

Please report any property damage caused by suppression activities and/or injuries to the Comp/Claims Unit.

Information:

This document is intended to track, record and validate the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

PUBLIC INFORMATION SECTION

Incident Information:

211

	Status
Incident Start Date:	
Total acres:	Containment:
Cause:	Total Personnel:

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy <u>here</u>.

PHOTOGRAPHS AND VIDEOS OF INCIDENT — We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional, or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND - The Information Section will manage lost and found items for the incident.

MAIL SERVICE - The Information Section can assist you with sending and receiving mail.

PEER SUPPORT MESSAGE

Watch for the signs and symptoms of stress in yourself and the people around you. Some of the signs and symptoms you may be experiencing include, but are not limited to:

Irritability, lack of sleep, quick to anger, isolation, above average tobacco use, an increase in negative coping mechanisms such as excessive alcohol and/or substance abuse. You might experience lack of appetite, isolate yourself, or various other unexplained reactions to normal everyday events.

Peer Support Handouts

You may not be experiencing these symptoms now. However, you may find yourself experiencing them when you return to your home or Unit or have a co-worker who is. You may be triggered by a past event, that has impacted you, while assigned to future incidents. A sight, sound, smell, or touch could trigger a memory, affecting you now, but you are not sure why?

If you find yourself in this situation and need to talk to someone, please contact a peer support team member.

The peer support team is available on the incident for any peer support needs.

Examples of peer support needs are, but not limited to, understanding the science behind stress and reactions, assistance with professional or personal crisis, other behavioral health, and wellness impacts. Come see and ask us what we do and can provide.... We will gladly explain!

Stay Healthy, Stay Alert and Stay Strong!
