Comments /notes on tonight's mission and this interpretation: <p>There was growth to the South East and South West above Selad Valley. There was small growth to the North East and the North West as well as the left flank.</p> <p>There are islands of fire along the Southeast portion of the fire, appear they could be a back burn.</p> <p>I found various Isolated Heat along the Eastern edge of the main fire. These have been flagged with Lat and Long lables. Also found one isolated heat in the Hello Fire as shown on the map.</p>
