### FIRE WEATHER FORECAST

FORECAST NO: 4

PREDICTION FOR: Thursday Day SHIFT

SHIFT DATE: 18 September 2014

TIME AND DATE

FORECAST ISSUED: 2100 / 17 September 2014

INCIDENT NAME: King Fire UNIT: Eldorado National Forest

SIGNED:

Jason Clapp

Jason Clapp

Incident Meteorologist

WEATHER TODAY: \*\*\*Gusty SSW ridge winds & Potential erratic winds from any outflows \*\*\*

**WEATHER:** The upper Low is over the coast with a chance of showers being late in the morning with potential thunderstorms in the afternoon/evening. Expect cooler temps/higher RH due to upper Low and clouds. Increased mixing will allow inversion to break sooner..

TEMPERATURES:

75-80

Trend: Down 6 - 8

RELATIVE HUMIDITY:

30-40%

Trend: Up 8 - 12%

20 FT WINDS:

**RIDGETOP** - SE 5-9 mph early in the morning. After 0900 - S 6-10 mph gusts 15 mph increasing to 20-25 mph early to mid afternoon.

**SLOPE/VALLEY -** Downslope 3-5 mph & downcanyon 5-8 mph, shifting upslope/upcanyon 4-7 mph after 0800, increasing to 6-9 mph with gusts 15 mph in aligned canyons...Rubicon upper slopes gusting to 20 mph.

LAL: 1...2 afternoon

STABILITY/INVERSION: Inversion breaking between 0900-1100.

**AVIATION:** Partly cloudy with improving visibility after 1000 due to smoke. Cleanest air north/east flank in morning, west/south in afternoon.

8000 MSL FL winds: S 15-20 knots.

<u>WEATHER DISCUSSION:</u> . The upper Low moves over the coast today with continued breezy ridge winds and increasing clouds. Continued breezy wind today with potential 20% chance of showers/thunderstorms. Friday and Saturday, the Low moves southeast bringing NW to NE ridge winds.

WEATHER FOR THURSDAY NIGHT: Mostly cloudy with smoke settling in after 2100.

Low temperatures: Thermal belts/ridges 60-65...Valleys 55-60.

Max RH: Thermal belts/ridges 45-50... Valleys 60-70%.

20FT Winds:

Ridge - S 3-5 mph shifting NE after 2100.

Slope/valley - Downslope 3-5 mph. Downcanyon wind gusts 5-9 mph after 2400.

<u>OUTLOOK FOR FRIDAY:</u> Low drifts south of the fire with warming temps, lowering RH, and a partly cloudy sky. <u>High temps:</u> 80-84. <u>Min RH:</u> 27-35%. <u>Ridge winds:</u> Battling winds from ENE 4-7on east side and WNW 3-6 on west side with westerly afternoon gusts to 12 mph. <u>Valley/Slope winds:</u> Downslope 4-7 mph shifting upslope/upcanyon 4-8 mph by late morning.

### FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 4 TYPE OF FIRE: Wildfire

FIRE NAME: King Incident CA-ENF-023461 OPERATIONAL PERIOD: 9/18/2014 (0600 -1800)

DATE ISSUED: 9/17/14

TIME ISSUED: 2100 hours

UNIT: ENF SIGNED: Denny O'Neil (FBAN)

### **INPUTS**

### WEATHER SUMMARY-SEE ATTACHED FIRE WEATHER FORCAST

An upper level low over the coast gives us a chance of showers late in the morning with potential thunderstorms in the afternoon. Expect cooler temps and higher RH's. Inversion should break early.

Temperatures 75-80 Down 6-8 from yesterday

Relative Humidity: 30-40 % Trend up 8-12%

**20 FT RIDGETOP WINDS:** SE 5-9 mph early in the morning. After 0900-S 6-10 mph, gusts 15 mph increasing to 20-25 mph early to mid afternoon.

**20 FT SLOPE/VALLEY WINDS:** Downslope 3-5 mph & downcanyon 5-8 mph, shifting upslope/upcanyon 4-7 mph after 0800, increasing to 6-9 mph with gusts t15 mph in aligned canyons. Rubicon upper slopes gusting to 20 mph.

**FUELS** –The primary carrier of fire is timber. The fire area has many areas with fuel treatments and timber operations, which have created open and closed canopies and understories of grass, regeneration and brush. There are also areas of brush and grass. The only significant fire history is on the western perimeter of the fire where the 1992 Cleveland Fire Burned. *Live and dead fuels are at critically low levels!* 

FIRE DANGER INDICES-Thresholds for Active Fire Behavior in the King Fire area (Eldorado NF PocketCard): \* 20ft Winds (over 5 mph), \*RH (under 22%), \*Temperature (over 84°) and \*1000hr FMC (under 9%).

### **OUTPUTS**

### FIRE BEHAVIOR SPECIFIC

CRITICAL BURN PERIOD = 0900 - 2000 hours
LIVE FUEL MOISTURE = Below Critical Threshold
RATE OF SPREAD= 20- 30 Chains/Hour

POTENTIAL FOR SPOTTING = Moderate-High SPOTTING DISTANCE = 1/4-1/2 Mile FLAME LENGTHS= 1-10 ft

**Branch I-** South winds will be favorable for holding completed fireline on the SW side of branch. Monitor interior islands and unburned fuels adjacent to control lines. Unmitigated hot spots in these areas have the potential to create flare ups that can loft embers over control lines.

**Branch III-** Expect flanking fire behavior as the fire moves down into the Slab Creek Drainage. If the fire establishes in the drainage, there is the potential for upslope runs towards Slate Mountain and Mosquito Road. South winds will be favorable for keeping the fire north of the communities to the Southwest.

**Branch V-** The fire will continue to burn to the N and NW towards Ralson Ridge. Expect single and group tree torching. The fire could reach Ralson Ridge by the end of the operational period. Expect the fire to continue to burn to the NE from Silver Creek up Government Ridge toward Hunter Valley.

Branch VII- SW winds could create adverse conditions for holding firing operations. Monitor for spotting.

#### AIR OPERATIONS

Inversion should lift early. Expect heavy smoke to the North and NW of the fire, which will limit operations.

Sunrise 0647 hours

Sunset 1906 hours

#### SAFETY

- Dead and live fuels are at critical levels. Alignment of fuels with topography or wind can initiate a rapid change in fire behavior.
- When developing strategies and tactics, safety zones and escape routes you should be evaluating
  potential fire behavior (worst case scenario), not just observed fire behavior.

. Control Operations				

Construct line and provide for structure defense adjacent to communities at risk from the Division D/A break to the Division D/G break.

### 8. Special Instructions

Identify resources to respond for initial attack.

Noxious weeds are marked by orange "noxious weed" flagging. Minimize or avoid activities in these areas. Sensitive areas are marked with pink/black checkerboard flagging. Minimize ground disturbing activities in these areas.

### \* Indicates a 24 hour resource.

Control Operations	3		.3			. •	,	0000			

Construct indirect and direct lines from the Division U/W break to the Division W/Y break.

### 8. Special Instructions

Noxious weeds are marked by orange "noxious weed" flagging. Minimize or avoid activities in these areas.

Sensitive areas are marked with pink/black checkerboard flagging. Minimize ground disturbing activities in these areas.

<sup>\*</sup> Indicates a 24 hour resource 0600-0600

### **SAFETY MESSAGE**

KING FIRE CA-ENF-023461

Day Shift 09/18/2014 0600 to 1800

EXTREME FIRE BEHAVIOR – Strong potential for very active to extreme fire behavior continues to persist on this incident. Monitor current weather conditions and be alert for radio updates from the incident meteorologist. Weather conditions that can affect fire behavior may change quickly. Maintain LCES and continually re-evaluate. Assure that all personnel have good communications. If you aren't in position to see the fire, who is your lookout???

#### DOING REPETIVE TASKS:

- When we do a task repetitively, we start to overlook small hazards that can cause big problems. And,
- When we "get away with" risky behavior, we start to think that we will always have a positive outcome.
  - Both of these tendencies can lead us to an accident or injury.
  - No matter how repetitive or boring your assignment may be, remember that every day is a new opportunity to SEE small problems, ACT to prevent them from getting big, and COMMUNICATE within your crew and your supervisor.
  - With over 2,500 personnel assigned to a very complex incident, it is amazing that there has been only one reportable injury up to this point and a minor one at that. Keep up the good work!

**SNAGS AND HAZARD TREES**– Snags are in all divisions- in the green and in the black. If you're working on the same piece of ground today, perform a new hazard tree assessment and risk analysis before starting work. Are you parking your vehicle in a safe spot? Wear your hard hat & follow Hazard Tree Safety Guidelines (IRPG page 22).

### **ROADSIDE OPERATIONS**

Exit vehicle from the passenger side and avoid exiting from traffic side if possible. Utilize "Look-First" Situational Awareness while loading and unloading vehicle. Assign a single person to unload equipment from traffic side of vehicle and instruct him/her to face traffic flow. Emphasize the need for extreme caution and to look both ways when walking between or in front of parked vehicles toward active traffic lanes. Many fatalities to responders at roadside incidents have resulted from inattention or casual attitudes.

STRESS THE CRITICAL IMPORTANCE OF SITUATIONAL AWARENESS TO ALL CREW MEMBERS!

### **ACCOUNTABILITY**

- CONSTANTLY KNOW WHERE YOUR FOLKS ARE AT AND BE SURE THEY ALWAYS KNOW WHERE THEIR ESCAPE ROUTES AND SAFETY ZONES ARE LOCATED.
- ANYONE WHO ENTERS A DIVISION MUST NOTIFY THE DIVISION SUPERVISOR AND ALSO YOU MUST NOTIFY THE DIVISION AGAIN WHEN YOU DEPART THE DIVISION.

Safety Officers: Marty Hamel, Steve Ryberg & Charlotte Jordan (T)

Martin Rfine

### **MEDICAL PLAN**

When an injury occurs, initiate care with available resources at scene and notify DIVS.

The DIVS shall coordinate the incident and direct necessary actions. The following steps shall be taken to mitigate the incident:

- Determine the nature of the emergency.
- 2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening.
- 3. If the injury is life threatening, then clear designated frequency for emergency traffic.
- 4. Identify the on-scene point of contact by position.
- 5. Ensure that the Medical Unit Leader is contacted immediately.
- Identify number injured, patient assessment(s) and location (geographic and/or GPS coordinates).
- 7. Identify on-scene medical personnel by position and last name (i.e. EMT Jones).
- 8. Identify preferred method of patient transport.
- 9. Determine any additional resources or equipment needed.

The Evacuation Plan should be continually evaluated, and contingencies developed in the event the first plan is not effective.

#### **Medical Incident Report**

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

	Use items one through nine to communicate situation to communications/dispatch.
	CONTACT COMMUNICATIONS/DISPATCH  Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)
2.	INCIDENT STATUS: Provide incident summary and command structure.

Ex: "Commu	nications, Div. Alpha. S	Stand-by	for Priority Medical	Incident Re	eport." (If life threate	ening reque	st designated freq	quency be cleared for e	emergency traffic.)		
2. INCIDENT	STATUS: Provide ind	cident sui	mmary and comma	nd structur	e.						
	Injury/Illness		, , , , , , , , , , , , , , , , , , , ,					Describe the inj (Ex: Broken leg with b

#### FIRE ASSIGNMENT STRESSORS

- <u>Environment</u> climate, altitude, air quality, noise levels and types, new fuel types and topography, different hazards such as bees, snakes, poison oak
- <u>People</u> different supervisor, different co-workers, change in objectives, change in communications, working with contractors, working with other agencies, not always able to contact home
- <u>Physical</u> sleeping patterns and conditions, eating patterns, demands of the work, dehydration, acclimatization, change in work schedule
- <u>Safety</u> crew awareness, communication of hazards, exposure to new fuel types and weather patterns, lack of access to equipment and resources when needed
- S STANDBACK: LOOK AT WHAT'S BOTHERING YOU, TAKE ANOTHER APPROACH
- T TALK: ABOUT WHAT'S BOTHERING
- R RELAX: TAKE WALKS, EXERCISE, DEEP BREATHS
- E ESCAPE: TAKE TIME OFF
- S SCALE DOWN: REDUCE AMOUNTS OF CAFFINE, NICOTINES, SUGARS, ETC...
- S SENSE OF HUMOR: LAUGHTER IS ALWAYS THE BEST MEDICINE.
