Incident: SALMON AUGUST COMPLEX

28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):

Active

Wind Driven Runs

Long-range Spotting

Running

Narrative:

Active fire behavior on Div V combined with Red flag conditions will push the fire south and west toward Forks of Salmon and surrounding communities.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Grass and Understory)

Brush (2 feet)

Timber (Litter and Understory)

Narrative:

This wilderness area has high tree mortality and fuels are primarily dense stringers of mixed conifers with heavy dead & down fuels and brush in open areas. Large down fuels can exceeds 200 tons/ac. with high numbers of standing snags. 2013 and 2014 burn perimeters have a receptive fuel bed of fine fuels.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

An area closure has been issued for the Salmon-August Complex Fire. To include the following trails: Pacific Crest, North Fork Salmon, Snowslide, English Peak, Hancock Lake, Upper Abbott's, Big Meadows Tie, Big Meadow Creek, Kidder Creek, Shackleford, Ethel, and Kidder along with the following trailheads: Creek, Pacific Crest Etna Summit and Mule Bridge.

36. Projec operation	ted Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next al period and in 12-, 24-, 48-, and 72-hour time frames:
	Hot and dry conditions continue through the period. Northeast winds, receptive fuel beds and long range spotting will make control challenging. Potential for large fire growth to the south and west treating structures along Salmon River Valley.
24 hours:	Hot and dry conditions continue with a slight chance of isolated thunderstorms leading to unexpected fire growth. Return of the W/SW winds will spread the fire north and east to Snoozer Ridge into North Russian Creek threatening the city of Etna.
48 hours:	More moderate temps with diurnal S/SW winds. Increased chance of isolated thunderstorms and unexpected fire spread in the afternoon. High probability that the fire will have moved into Forks of Salmon, and Quail Flats and be threatening Sawyers Bar, Bestville and the North Fork Salmon River.
72 hours:	Cooling trend continues with diurnal S/SW winds. Greater chance of isolated afternoon thunderstorms and

Incident: SALMON AUGUST COMPLEX

Anticipated after 72 hours: 37. Strategic Objectives (define planned end-state for incident): The Wallow Fire is 60% full suppression strategy with direct, indirect and contingency lines established on the south and east side of the incident. The north portion in the wilderness area is a confine & contain strategy. 38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts: The areas of Little North Fork, Sawyers Bar, Forks of Salmon, Sauerkraut Peak, Portuguese Peak, Tom Payne Peak, Structures in Mule Bridge and Historic cabins in the Marble Mountain Wilderness, North Fork Salmon River public and private lands, public water supply, power transmission and distribution lines, and communication towers. Livestock and commercial timber stands, wildlife habitat and endangered species including spotted owl, 12 hours: coho, steelhead, and chinook habitats. Cultural and historic values including the PCT could be compromised by a large high intensity fire. Hunting season is currently underway and is affected by fire activity. There are a number of small residential enclaves and community businesses that could suffer economic impacts with the closing of the PCT and peripheral trails. Cultural interests and resources on ancestral lands of the Shasta, and Karuk Tribes, could be impacted, as well as those of the Quartz Valley Indian Reservation. The areas of Little North Fork, Sawyers Bar, Forks of Salmon, Sauerkraut Peak, Portuguese Peak, Tom Payne Peak, Structures in Mule Bridge and Historic cabins in the Marble Mountain Wilderness, North Fork Salmon River public and private lands, public wa

72 hours:	3 2IA Crews (Timing Out)	
	IR flight	
Anticipate	d after 72 hours: 5 IHC Crews (Timing O IR flight	ut)

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

The high volume of type 1 hand crew work in sensitive / wilderness land, with it's steep rocky terrain; combine with their work duration time outs makes completion of indirect line slow and often ineffective. Use of mechanical equipment is not possible or practical.

Smoke conditions limits/negates use of aircraft, ground forces have to make up the effort.

Missed direct / indirect opportunities, due to lack of crews has lead to increased need for engines for structure point protection and indirect actions.

Shifting winds, dead & down fuels, snags and long travel times; combined with limited resources will extend the incident till the first significant wetting rain fall.

Incident: SALMON AUGUST COMPLEX

41. Planned Actions for Next Operational Period:

Shift our limited number of type 1 crews to improving indirect and direct line construction to defend the Salmon River communities. Improve previous hand lines along Patterson Ridge, Patterson Creek, Kidder Creek, Etna Mill Creek, Whiskey Butte, and the ridge line NE of the fire. Structure prep & defense along Salmon River Valley communities during Red Flag conditions. Strengthen established lines along the PCT. Fuel reduction and preparation around structures and on contingency lines near Sawyer's Bar.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"):
- 43. Anticipated Incident Containment or Completion Date: 09/20/2017
- 44. Projected Significant Resource Demobilization Start Date:
- 45. Estimated Incident Costs to Date: \$15,275,200.00
- 46. Projected Final Incident Cost Estimate:
- 47. Remarks (or continuation of any blocks above list block number in notation):
- 31 & 34. Level 2 evacuation order in effect for the communities of Sawyers Bar, Little North Fork and Forks of Salmon (Salmon River Valley communities)
- 39. Crew time outs will significantly limit our ability to construct indirect/direct line and increase fire spread. The spread will increase impact to residents, infrastructure and cultural resources.

Incident Name	Suppression Strategy	Area	Area Measure	% Ctn/Comp	% Ctn/Comp Measure	Est. Cost to Date	Est. Comp Date	Perimeter
