Incident: SALMON AUGUST COMPLEX

FSPRO data at same location

28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):

Minimal
Smoldering

Narrative:

No growth, minor interior burnout of heavy fuels. Minimal fire behavior, creeping.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Grass and Understory)
Brush (2 feet)
Timber (Litter and Understory)

Narrative:

This wilderness area has high tree mortality and fuels are primarily dense stringers of mixed conifers with heavy dead & down fuels and brush in open areas. Large down fuels can exceeds 200 tons/ac. with high numbers of standing snags. 2013 and 2014 burn perimeters have a receptive fuel bed of fine fuels.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

Historic Tom Taylor Cabin was destroyed, verified by aviation on 06 Sept 2017.

33. Life, Safety, and Health Status/Threat Remarks:	34. Life, Safety, and Health Threat Management:	
<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):</p> <p>Observed: Strong high pressure will dominate the weather pattern through Thursday, bringing dry and stable weather to northwest California. For most locations, temperatures will increase and the humidity will decrease each day. Today's temperatures across the Salmon August Complex were in 60s above 5000 feet, 70s between 3000 feet and 5000 feet, and around 80 below 3000 feet. The relative humidity values were mainly in the 20s below 5000 feet and in the 30s above 5000 feet. Winds were light and terrain driven. Ridgetop winds were predominantly from the north-northeast at 5 to 10 mph with morning gusts to 15 mph.</p> <p>Forecasted: Tuesday will be another warm and dry day, and temperatures will begin to climb to above seasonal averages. The humidity will be a little less than Monday, and a few locations in the valleys could observe the relative humidity around 20 percent. Winds will continue</p>

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:	
12 hours:	No spread or growth potential.
24 hours:	Continuing warming and drying further raise burning conditions to the low to moderate level. There is no to very low spread or growth potential.
48 hours:	The warm and dry airmass over the region maintains the burning conditions in the low to moderate level. There is no to very low spread or growth potential.
72 hours:	The general warm and dry airmass maintains the burning conditions in the low to moderate level for today. There is no to very low spread or growth potential.
Anticipated after 72 hours:	The general warm and dry airmass maintains the burning conditions in the low to moderate level for Friday, but there is a slight chance of a shower. The burning conditions are likely to maintain a low to moderate level going into the weekend. There is no to very low spread or growth potential.

37. Strategic Objectives (define planned end-state for incident):

Incident Status Summary (ICS-209)

Incident: SALMON AUGUST COMPLEX

<p>The Wallow Fire is 60% full suppression strategy. Direct, indirect and contingency lines have been established on the south and east side of the incident. Containment lines are in monitor status for H2 to Yellow Jacket Ridge on the east portion of the Wallow Fire. The north portion in the wilderness area is a confine strategy.</p>
<p>38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:</p> <p>12 hours: None</p> <p>24 hours:</p> <p>48 hours:</p> <p>72 hours:</p> <p>Anticipated after 72 hours:</p>
<p>39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. <p>40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:</p> <ol style="list-style-type: none">1) critical resource needs identified above,2) the Incident Action Plan and management objectives and targets,3) anticipated results. <p>Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.</p> <p>* Current resources are adequate to complete incident objectives.</p> <p>* Use of mechanical equipment is not possible or practical in all areas due to terrain.</p> <p>* Continue suppression repair on portions of the Wallow Fire. Suppression Repair is 80% complete.</p>
<p>41. Planned Actions for Next Operational Period:</p> <p>* Repair Group West will continue suppression repair on dozer lines and hand lines.</p> <p>* Monitoring From H-2 west around to Yellow Jacket Ridge.</p>
<p>42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):</p>
<p>43. Anticipated Incident Containment or Completion Date: 10/20/2017</p>
<p>44. Projected Significant Resource Demobilization Start Date:</p>
<p>45. Estimated Incident Costs to Date: \$38,256,032.00</p>
<p>46. Projected Final Incident Cost Estimate:</p>
<p>47. Remarks (or continuation of any blocks above – list block number in notation):</p> <p>Resources are available for IA on the Klamath National Forest and Siskiyou Ranger Unit.</p>
