Comments /notes on tonight's mission and this interpretation: Slightly less scattered heat and isolated heat in the interior since previous IR. Started interpretation with perimeter provided by the incident. No change in perimeter was detected. No intense heat was detected. Northwest flank has most scattered heat, but none on the perimeter edge. The rest of the fire area has some scattered heat islands in the timber. Fire remains west of Hwy139 and north of Hwy 299/139.
