Comments / notes on tonight's mission and this interpretation: <p>Tonight's mapping began with the incident provided perimeter (9/11/19 @ 0022hrs). Growth was primarily found on the eastern and southern portions of the fire, and includes some shrinking of interior islands. The largest area of growth was mapped in the areas southeast of Papoose Peak</p> <p>Intense heat was mapped along the fire's perimeter along the southern and southeastern edges, as well as along portions of the northwest perimeter of the fire. Much of the fire's interior contains scattered heat sources.</p> <p>One isolated heat source was mapped >1/10th of a mile from the main perimeter, and south of FS Road 26N06 at 120 28.064 W 40 4.436 N.</p>
