<b>Comments /notes on tonight's mission and this interpretation:</b>  I began mapping from the previous day's GIS perimeter.  <b>SHEEP:</b> There was minimal heat perimeter expansion and intense heat. The majority of the interior of the fire had abundant scattered heat.  <b>CLAREMONT:</b> There was some heat perimeter expansion on the southern and western flanks. There were pockets of intense heat in the expansion zones and abundant scattered heat throughout the rest of the interior of the fire.  <b>BEAR:</b> There was minimal heat perimeter expansion. There were pockets of intense heat on the northern and eastern flanks and abundant scattered heat throughout the remainder of the interior of the fire.
