Comments /notes on tonight's mission and this interpretation: Began interpretation with the IR perimeter from last night. All shapefiles are in NAD_1983_UTM_Zone_10N coordinate system. The fire contained isolated heat and one small area of intense heat. The small area of intense heat was detected on the east end of the fire to the south of S. Creek Rd. The fire grew by less .5 acres south of Stony Creek on the west end of the heat perimeter.
