

# Slater & Devil Incidents

## Incident Action Plan

Tuesday, October 6, 2020 (0700 – 1900)

CA-KNF-007035

(P5NKM3)

### NOTES:

Happy Camp Highway Road  
Closures for incident personnel

Closed 0900-1200

Open 1200-1300

Closed 1300-1530

Open 1530-1630

Soft Closure 1630-2000  
(up to 20 Minute delays)

Open 2000-0900

This QR Code provides access to IAP, Incident Maps, Briefings, Electronic Forms and Check-in process

24 hour Communication Line: 541-423-2631

<b>INCIDENT OBJECTIVES</b>	1. Incident Name <b>Slater &amp; Devil Fires</b>	2. Date Prepared <b>10/5/2020</b>	3. Time <b>2000</b>
----------------------------	---	--------------------------------------	------------------------

4. Operational Period

**Day Operations Tuesday, October 6, 2020 0700 – 1900**

5. **Commander's Intent:**

It is my expectation that we, as an organization, will meet the following Leader's Intent as well as the objectives identified below:

- Ensure all incident strategies and actions reflect a commitment to public, responder, and aviation safety through use of the risk management process as outlined in the IRPG and the aviation risk assessment process.
- Coordinate incident management activities with our requesting and cooperating agencies including but not limited to suppression actions and support needs.
- Treat all incident personnel, cooperators, and local publics with dignity and respect creating a "no tolerance" atmosphere for harassment, alcohol, or illegal drug use.

**Values of Concern:**

- Neighboring communities and private residences in California and Oregon.
- Critical communication and utility infrastructure including high power transmission lines, DOD/AT&T fiber optic cable, communication sites and repeaters.
- Highway 199 providing a main thoroughfare for inland and coastal areas of Southern Oregon and Northern California.
- Many historic, natural, cultural and recreational values within the fire area including historic buildings and multiple T&E species.
- Economic values impacted by area closures.

**Management Objectives:**

- Provide for emergency personnel and public safety at all times through the utilization of a deliberate risk-informed approach, with avenues for feedback from personnel. Also, ensure COVID-19 precautions and best practices are met by following agency, team and county guidance.
- Reduce the impacts of fire on communities, major infrastructure and private lands.
- Foster and maintain relationships with the public, cooperators and stakeholders.
- Ensure coordinated, timely and accurate release of public information. When possible utilize virtual platforms.
- Maintain fiscal accountability by making good risk-informed decisions.
- All personnel assigned should receive evaluations prior to leaving the incident.

**Operational Objectives:**

- Under the full suppression strategy, utilize direct and indirect tactics to minimize fire size. As feasible utilize minimum impact suppression tactics within the Red Buttes and Siskiyou Wilderness areas.
- Protect the values of concern identified above by suppressing the wildfire and utilizing point protection of structures when necessary.
- Scout, recon and identify primary and alternate containment opportunities considering resource availability and probability of success.
- Work collaboratively to refine and implement the population protection plan when necessary.
- Coordinate with lead Resource Advisor, including the Karuk Tribe representative, and operational Resource Advisors to minimize natural and cultural resource damage.
- Provide initial attack support with both air and ground resources, if requested, for all cooperating agencies in the area under the Temporary Flight Restriction.
- Secure lines and mop-up to the level necessary based on site conditions associated with the values at risk to make the likelihood of escape minimal considering current/predicted weather conditions.

6. Weather Forecast for Period See attached weather forecast regarding a strengthening inversion and smoke.

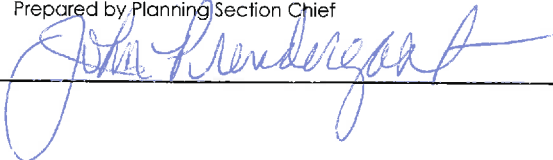

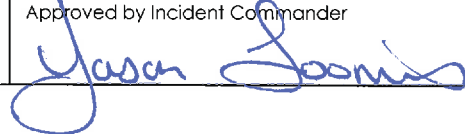

7. General Safety Message Recognize symptoms of dehydration.

# FIRE WEATHER FORECAST

FORECAST NO. 26

NAME OF FIRE: Slater & Devil

PREDICTION FOR: Tuesday October 6, 2020

UNIT: Klamath National Forest

TIME AND DATE

FORECAST ISSUED: 1930 Monday 10/5/20

SIGNED: Angie Enyedi  
*AL* Angie Enyedi 904-318-4041  
Incident Meteorologist

Please text  
me your Obs!

**WEATHER DISCUSSION:** Tuesday will be the warmest and driest day through the upcoming week. RHs will fall into the teens across much of the fire scape as temperatures warm to the upper 80s across lower slopes to the upper 70s across ridges. Terrain driven winds will continue across the valleys and lower slopes with weaker ENE winds across the ridges in the morning transitioning to WNW in the afternoon. Poor nighttime RH recovery will continue due to strong thermal belts in the upper slopes and ridges Tue night. Smoke will pool and linger in drainages and valleys in the evening through Wednesday morning due to a stronger valley inversion.

## **TUESDAY:**

**WEATHER:** Mostly sunny and hazy due to smoke.

**MAXIMUM TEMPERATURE:** Highs in the mid to upper 80s lower slopes to upper 70s ridges.

**MINIMUM RELATIVE HUMIDITY:** 9-19%.

### **20 FOOT WINDS:**

**Slopes & Valleys** – Terrain driven winds, generally 2-5 mph with gusts near 12 mph. For Illinois Valley, afternoon NNE winds 2-4 mph with gusts near 10 mph.

**Ridges & Peaks** – ENE winds 5 -10 with gusts 15-20 mph in morning. Ridge winds weaken through midday, then transition to WNW 5-10 mph in the afternoon, gusts near 15 mph.

**STABILITY:** Stronger morning valley inversions. Smoke lingering 4000 ft and below through the day, some improvement in the afternoon. Unstable conditions above afternoon smoke layer.

**CHANCE OF RAIN:** 0%      **LAL:** 1      **SMOKE TRANSPORT WIND:** SSW 5-10 mph

## **TUESDAY NIGHT:**

**WEATHER:** Mostly clear skies but with widespread smoke.

**MINIMUM TEMPERATURE:** Lows in the 40s valleys, 50s for slopes to 60s ridges.

**MAXIMUM RELATIVE HUMIDITY:** 25-35% ridges. Slopes & Valleys 60 to 80%.

### **20 FOOT WINDS:**

**Slopes & Valleys** – Terrain driven drainage winds settling to less than 5 mph.

**Ridges & Peaks** – Ridge-top winds WSW to SSW 5 to 10 mph with gusts near 15 mph in the evening. Winds become more SSE through sunrise Wed.

**STABILITY:** Thermal belt impacts will continue along mid-slopes & ridges. Stable at lower elevations with smoke funneling, pooling and lingering into drainages and valleys through Wed morning.

**CHANCE OF RAIN:** 0%      **LAL:** 1      **SMOKE TRANSPORT WIND:** SW 15 mph

**WEDNESDAY AND THURSDAY:** Continued warm, low humidity and poor RH recovery Wed morning with ENE flow across the ridges. SW winds will prevail across the ridges late Wed into Thu ahead of a mid-level disturbance as cloud cover thickens, temperatures cool and humidity increases. Highs in the 80s Wed will cool into the 70s Thu. Lowest afternoon RHs near 20% Wed to 25-35% Thu across eastern tier of Slater including Devil.

**OUTLOOK FOR FRIDAY THROUGH SUNDAY:** Strengthening SW flow, cloudy, cooler with RH recovery with a cold front passage Sat or Sat night. Rain chances increase Fri with the most likely time period of wetting rainfall Sat, then rainfall potential decreases Sun as WNW flow develops.

## Fire Behavior Forecast # 20

<b>Name of Incident:</b> Slater and Devil Fires	<b>Fire Number:</b> CA-KNF-7035
<b>Date &amp; Time Issued:</b> Oct 5, 2020 @ 2000	<b>Operational Period:</b> Oct 6, 2020
<b>FBAN:</b> Steve Ziel / Barry Kleckler (T)	<b>Signed:</b> Barry Kleckler

**Assumptions:** Today will be the warmest day of the week. Add poor overnight humidity recoveries on ridges, along with relative humidity in the teens, combined with local ERCs near the 90<sup>th</sup> percentile and live woody fuels entering seasonal dormancy, and this is a day with potential for fire spread. On our side, the burn period is getting shorter peaking between 1400-1700, the inversion is keeping our smoke as well as regional haze capped over our fires, and winds will be light and mostly terrain driven.

### Weather Summary

\*\*See IAP Fire Weather Forecast \*\*

### Fire Behavior Summary

Fuels in the fire area are primarily composed of:

- Timber Litter:** Timber stand lacking significant understory, generally underburns with moderate rates of spread without wind/slope alignment with occasional torching. Ponderosa pine and Douglas-fir are common.

---

- Timber with Understory:** Timber stand with brush or small trees in the understory will burn readily and aggressively with occasional torching, even with little wind. Heavy down fuels are common, receptive to embers, and consume completely once ignited. True fir with low crown base heights are common.

---

- Grass-Shrubs\*:** Grass or grass/shrub mix. Cured grasses will support rapid fire spread with any wind. Shrubs contribute to spread rate and flame length. **\*Grass-shrub fuel models are dynamic and respond to seasonal changes in live fuel moisture.**

### **Today's Peak Fire Behavior Potential (wind and slope alignment):**

*Along uncontained edges slope reversals or flare-ups on active flanks may produce short upslope finger runs and occasional torching with short-range spotting. Otherwise expect sustained backing and flanking to continue especially where exposed to sunlight and a breeze. Where containment lines have been established expect creeping, smoldering, and consumption of heavies and unburned fuel. Flare-ups are possible with occasional torching as interior pockets consume. Leaf fall and needlecast from scorched canopies could cause previously burned areas to rekindle. As always, watch for falling snags and rollout.*

<b>Fine fuel moisture = 3-6%</b>	<b>Live herbaceous fuels = 30%</b>	<b>POI = 60 - 80%</b>			
	<b>Live woody fuels = 60-70%</b>				
Fuel Type	<b>Head Fire</b>		<b>Backing Fire</b>		Spotting Distance
	ROS	Flame	ROS	Flame	
<b>Timber litter (TL8)</b>	4 - 8 ch/hr	3 - 4 feet	<1 ch/hr	1 foot	0.1 mile
<b>Timber with Understory (TU5)</b>	7 - 13 ch/hr	6 - 9 feet	<1 ch/hr	2 feet	0.1 mile
<b>Grass-Shrubs (GS2)</b>	15 - 30 ch/hr	4 - 6 feet	1 - 2 ch/hr	1 - 2 feet	<0.1 mile

### **Specific Assignments:**

- Divs M, P, T** - Secured control lines with no perimeter spread expected. Continuing smoldering consumption of heavies and interior burnout.
- Div U, Z** - Slater fire will continue to back off the ridgeline west of Swan Mountain south into Sucker Creek, watch for rollout on the north side into the Left Fork. Thompson Creek should remain active and smoky. Devil fire will remain alive creeping to the west along the Butte Fork.
- Divs W, Z, F** - Slater Fire edge will remain active in Thompson Creek smoldering and backing to the east. Devil fire could see more flanking and uphill pushes on the southeast toward Kangaroo Mtn within the wilderness.
- Divs D, G** - Isolated pockets of heat remaining active. Expect them to become a bit more active each day with continued warming and drying. Keep an eye on activity low in the East Fork Illinois.

**Aviation** Valley inversion could limit visibility in the morning. Expect smoke to hang along the east side of the Slater fire through the day. Potential for clearer skies in the afternoon mostly on the Devil and west side of Slater.

### Safety

Be alert to changing conditions – don't be lulled into the "same old/same old." Fire behavior and weather processes are dynamic and ever changing throughout the day, week, season.

<b>DIVISION ASSIGNMENT LIST</b>				1. Branch		2. Division/Group <b>F</b>

Patrol and hold the 1040 Road. Continue to hold the fire south of the 1040 Road and the Butte Fork Creek to the West of DP-16. Hold the fire on the hand line off the 1040 RD to the east. Use the Old Miller Complex burn scar to slow the fire to the east and keep it in the wilderness and designated roadless area.								
Protect life and property in the Jobar Community, the cabin near the California Dip, and the USFS Harlow cabin.								
<b>8. Special Instructions:</b>								
Backhaul unnecessary supplies, equipment, and trash.								
<b>Mop up Standards:</b> The level of mop-up intensity will be based on site conditions (at the division level) of the value at risk, fuel bed receptiveness and spread potential in the area adjacent to the containment line to the extent necessary to make the likelihood of escape minimal, based on professional experience, terrain, fuel types and conditions, and current/predicted weather conditions. Backhaul unnecessary supplies, equipment, and trash.								
<b>Fire Suppression Repair:</b> Divisions are to implement suppress repair per the Fire Suppression Repair Plan Slater/Devil Fire Incidents, as containment of the fire progresses and suppression repair is initiated.

7. <b>Control Operations/Work Assignments:</b> Continue to evaluate and remove hazard trees to mitigate hazard to Happy Camp Highway according to the Road Hazardous Tree Mitigation Traffic Control Plan. Maintain communication and coordinate with PPL operations. Backhaul unnecessary supplies, equipment, and trash.								
8. <b>Special Instructions:</b> # = resource identified for IA. Ensure that the road can be cleared for emergency traffic within 15 minutes or less. There will be no closures of the road between 1700 and 1830. The road being open during that time is required for logistical support from Lake Selmac to Happy Camp. Engines will be utilized for mop up and fire watch as needed. Ensure compliance with Happy Camp-Grayback Road Hazardous Tree Mitigation Traffic Control Plan in the IAP. <b>Fire Suppression Repair:</b> Divisions are to implement suppress repair per the Fire Suppression Repair Plan Slater/Devil Fire Incidents, as containment of the fire progresses and suppression repair is initiated.

TASK/ MISSION/ ASSIGNMENT (Type/ function includes: Air Tactical, Retardant, Recon, Personnel Transport, Bucket Operations, SAR, etc.)											
Request from	Mission										Comments
Fire	Verify all unimproved helispots with helicopter type, HOGE or HIGE, elevation										
Divs D	Bucket support and recon										
Divs T	Bucket as requested & conditions allow.										
Divs Z	Bucket to slow NE fire spread										
Divs U	Bucket support as requested and conditions allow.										
Divs DD	Buckets and recon as requested										
Divs GG	Bucket support and recon										

**RESOURCE CONCERNS/INSTRUCTIONS**

<b>Retardant</b>	Track locations and gallons applied
	AVOID aerial application of retardant / foam / agent within 300' of waterways, bodies of water, etc.
	If Retardant / Foam / Agent is dropped within these areas immediately notify the AOB and provide the following information:
	Lat / Long, estimated number of gallons and a map detailing the area.
<b>Dipsites</b>	Track all dip site use by gallons and locations (for cost share purposes)
	Dips from Kelly Lake must be dropped north of Klamath River and south of Oregon border
<b>Illinois Valley HB</b>	Minimize driving off pavement, utilize weed wash adjacent to airport, utilize Hotsy for bucket rinse if changing watersheds

# HEALTH AND SAFETY MESSAGE

*SAFETY* starts with *YOU*

We are ALL accountable for SAFE behaviors

**INCIDENT:** Slater and Devil fires

**DATE:** October 6, 2020

**Shift:** Day

**Major Hazards and Risks:** Covid Exposure, Hydration,

## Covid Mitigations

Wash and/or sanitize your hands frequently.

Wear a mask inside and outside when close to others, change it frequently.

Wash and/or sanitize high- touch items and surfaces frequently.

Keep meetings and gatherings as small as possible, and use social distancing.

Get temperature screened daily.

Report symptomatic personnel to Covid Coordinator, Medical unit, or Safety As soon as symptoms are suspected and isolate the person immediately.

## Watch Out Situation of the Day

12.CANNOT SEE MAIN FIRE, NOT IN CONTACT WITH ANYONE WHO CAN

## Hydration

Thirst is a very **poor** indicator of dehydration, especially if you're up at altitude or somewhere dry.

Drink before you are thirsty

Use sports drinks, but sparingly- 3 or 4 waters to 1 sports drink.

Avoid excessive caffeine consumption- it dries you out.

Avoid "energy drinks" they dry you out and mess with your metabolism.

Dehydration Indicators: headache, cramps, lack of energy, unusual grumpiness, dark and/or stinky urine.

"Dark and stinky? - Drinky, Drinky!"

## Incident Safety Officers:

Matt Broyles (ICP), Eric Brown (OR-FOB – Selmac), John Foley (CA-FOB Road Group) Duane Franklin (Div. U)

## **Hazardous Tree Mitigation Traffic Control Plan Happy Camp RD, Grayback RD and Indian Creek**

In order to decrease the amount of non-essential traffic travel delays on the Happy Camp Road, Grayback Road and Indian Creek Road, the following timeline will allow for increase work efficiency and reduce travel delays.

**It is essential that emergency traffic will have no more than a 15 minute delay.**

**05:00-09:00 Open for Slater Fire incident traffic**

**09:00-12:00 EMERGENCY traffic only**

**12:00-13:00 Open for Slater Fire incident traffic**

**13:00-15:30 EMERGENCY traffic only**

**15:30-22:00 Open for Slater Fire incident traffic**

## Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

## Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1 to 1000 ratio (using bleach with 6.0 % Sodium hypochlorite). Talk to a READ if you need some bleach!

## Invasive Yellow-tuft (Alyssum)

Please do not park in or drive through the flagged off area at the mill-site briefing area. There is an introduced plant in this area that spreads aggressively in the serpentine areas in the Illinois Valley. Most invasive plants do not spread into

serpentine soils. Serpentine soils are home to rare plants that only grow here in the Illinois Valley. This invasive plant does threaten those unique plants. The READs would appreciate people utilizing the weed wash when they can, especially if they've been working or parking near the IV Airport. Don't know what serpentine is? Not sure if you should hit the weed wash? Ask a READ!

**SLATER DEMOB PROCEDURE/CHECK OUT SHEET**

C# / E# / O# \_\_\_\_\_ Name of Resource \_\_\_\_\_

Your Cell Phone # \_\_\_\_\_ Email for timesheet \_\_\_\_\_

1. All Resources Start with Weed Wash \_\_\_\_\_

2. Bring check out sheet to demob personnel at Kiosk at Lake Selmac (call or text 541-215-5370 if demob personnel are not present)

3. Ground Support Unit (contracted resources only) \_\_\_\_\_

4. Supply Unit \_\_\_\_\_

5. Communications Unit \_\_\_\_\_

10/5/20

# INCIDENT RECYCLING

**Slater Fire Impact (9/13/2020 - 10/5/2020)**

MATERIAL	LBS RECYCLED
PLASTIC BOTTLES	2,110 lbs
ALUMINUM CANS	395 lbs
PAPER	1,482 lbs
CARDBOARD	12,065 lbs
FOOD DONATION	2,745 lbs non-perishable

- Non-perishable food donation goes to the Gospel Rescue Mission and Joe’s Place Ministries in Grants Pass, OR. As well as Illinois Valley Family Resource Center in Cave Junction, OR.
- Proceeds from Lake Selmac bottle and can collection go to Joe’s Place Ministries in Grants Pass, OR. Which support low income youth and their families.

## HOW TO RECYCLE WITH US

1. Come to the recycle center and pick up a blue recycle bag
2. Drop off at the recycle center blue bags with bottles, cans, and paper bags
3. Empty food boxes into the dumpster from large cardboard box, and place cardboard next to the dumpster for recycling
4. Use the recycling stations around camp to separate your trash

**Come ask us questions! We’re happy to chat!**

## TRAINING MESSAGE

Check-in – If you have a position task book (PTB), please check in by scanning the QR code below to initiate the registration process. Please complete the form in its entirety. To complete the registration process, at your earliest convenience, please email a copy of your qualification card and position task book cover to Debra Burgos, TNSP at [debra.burgos@usda.gov](mailto:debra.burgos@usda.gov) (if you have questions, please call 404-987-3256).

For your convenience, an electronic ICS-225 or ICS-226 and Evaluation Record will be sent to you after you complete the registration process.

### SLATER FIRE TRAINEE REGISTRATION

Demob – In order to receive credit for your assignment, you must 'close out' with the Training Specialist prior to departure.

Close out requirements include:

1. Ensure your trainer(s)/evaluator(s) has/have initialed completed tasks in your PTB;
2. Obtain an Incident Performance Evaluation;
3. Obtain an Evaluation Record;
4. If evaluator initialed #1 on your Evaluation Record, ensure he/she signs as final evaluator (located on the backside of your PTB cover page);
5. Email all documentation (including item #3, when appropriate) to [debra.burgos@usda.gov](mailto:debra.burgos@usda.gov) (please do not text);
6. Complete Exit Interview – Scan QR Code below.

### SLATER FIRE TRAINEE EXIT INTERVIEW

# WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

## Instructions for Screening

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	DO NOT MOBILIZE
At Entries: Consider adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained. If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	DO NOT ANNOUNCE Ask individual to step aside and follow the steps below.

Steps to follow
Escort symptomatic individual to isolation area.
Isolation support personnel should begin documentation.
Have symptomatic individual contact Supervisor for further direction.
Notify public health officials.
Have individual transported as appropriate.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> - 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> - 3<sup>o</sup> burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
