INCIDENT OBJECTIVES	1. Incident Name Slater & Devil Fires	2. Date Prepared 10/14/2020	3. Time 2000
----------------------------	---	---------------------------------------	------------------------

4. Operational Period
Day Operations Thursday, October 15, 2020 0700 – 1900

5. **Commander's Intent:**
It is my expectation that we, as an organization, will meet the following Leader's Intent as well as the objectives identified below:

- Ensure all incident strategies and actions reflect a commitment to public, responder, and aviation safety through use of the risk management process as outlined in the IRPG and the aviation risk assessment process.
- Coordinate incident management activities with our requesting and cooperating agencies including but not limited to suppression actions and support needs.
- Treat all incident personnel, cooperators, and local publics with dignity and respect creating a "no tolerance" atmosphere for harassment, alcohol, or illegal drug use.

Values of Concern:

- Neighboring communities and private residences in California and Oregon.
- Critical communication and utility infrastructure including high power transmission lines, DOD/AT&T fiber optic cable, communication sites and repeaters.
- Highway 199 providing a main thoroughfare for inland and coastal areas of Southern Oregon and Northern California.
- Many historic, natural, cultural and recreational values within the fire area including historic buildings and multiple T&E species.
- Economic values impacted by area closures.

Management Objectives:

- Provide for emergency personnel and public safety at all times through the utilization of a deliberate risk-informed approach, with avenues for feedback from personnel. Also, ensure COVID-19 precautions and best practices are met by following agency, team and county guidance.
- Reduce the impacts of fire on communities, major infrastructure and private lands.
- Foster and maintain relationships with the public, cooperators and stakeholders.
- Ensure coordinated, timely and accurate release of public information. When possible utilize virtual platforms.
- Maintain fiscal accountability by making good risk-informed decisions.
- All personnel assigned should receive evaluations prior to leaving the incident.

Operational Objectives:

- Under the full suppression strategy, utilize direct and indirect tactics to minimize fire size. As feasible utilize minimum impact suppression tactics within the Red Buttes and Siskiyou Wilderness areas.
- Protect the values of concern identified above by suppressing the wildfire and utilizing point protection of structures when necessary.
- Scout, recon and identify primary and alternate containment opportunities considering resource availability and probability of success.
- Work collaboratively to refine and implement the population protection plan when necessary.
- Coordinate with Lead Resource Advisor, including the Karuk Tribe representative, and operational Resource Advisors to minimize natural and cultural resource damage.
- Provide initial attack support with both air and ground resources, if requested, for all cooperating agencies in the area under the Temporary Flight Restriction.
- Secure lines and mop-up to the level necessary based on site conditions associated with the values at risk to make the likelihood of escape minimal considering current/predicted weather conditions.
- Coordinate with resources advisors and technical specialists to prioritize, initiate, and complete fire suppression repair as specified in the suppression repair plan.

6. Weather Forecast for Period
Red Flag Weather developing today and persisting through Friday.

7. General Safety Message
New winds may create new hazards.

FIRE WEATHER FORECAST

Forecast No. 35
Fire: Slater & Devil
Unit: Klamath National Forest

Forecast for: Thu 10/15/2020
Date & Time Forecast Issued: 1930 Wed 10/14/2020
Incident Meteorologist: Angie Enyedi 904-318-4041 *AE*

RED FLAG WEATHER DEVELOPING TODAY AND PERSISTING THROUGH FRI

Above normal temperatures combined with windy offshore flow will create critical fire weather conditions this afternoon through tonight as the thermal trough persists near the coast. This pattern will dry portions of mid slopes to ridges with wind gusts strengthening to 35-45 mph Thu afternoon and Thu night. ENE oriented drainages will channel winds which will cause stronger speeds across lower elevations. The driest conditions will occur across Div F, Div W, Div U, Div Z including the southern Indian Creek drainage where less rainfall recently occurred. Minimum RHs will range in the teens with very poor ridge top RH recovery at night.

THURSDAY: Sunny and becoming windy. Patchy morning frost in wind protected areas.

Chance of Rain: 0% LAL: 1 Smoke Transport: ENE 30-40 mph

Stability: Elevated. Brief period of instability late afternoon into early evening (1700-2000).

Location	Maximum Temperature (F) & Minimum Humidity (%)		20-ft Winds
Slopes + Valleys	70s	20-30%	ENE aligned: 10-15 mph, gusts 15-25 mph. Sheltered Drainages: Variable 8-12 mph, gusts 15-20 mph. Strongest into late afternoon & evening.
Ridges & Peaks	60s	13-25%	ENE 15-25 mph, gusts 30-40 mph. Strongest gusts on ENE aspects late afternoon into evening.

THURSDAY NIGHT: Clear, windy & cold in valleys.

Chance of Rain: 0% LAL: 1 Smoke Transport: ENE 35-45 mph

Stability: Elevated. Morning inversion below 4000 ft. Thermal belt impacts mid slope to ridges.

Location	Minimum Temperature (F) & Maximum Humidity (%)		20-ft Winds
Slopes + Valleys	Mid 30s - mid 40s	45-65%	ENE aligned: near 15 mph, gusts 20-30 mph. Sheltered Drainages: Variable 10-15 mph, gusts 20-25 mph.
Ridges + Peaks	50s	15-25%	ENE 20-30 mph, gusts 35-45 mph. Strongest gusts on ENE aspects.

FRIDAY: RED FLAG FIRE WEATHER CONDITIONS FRI as the low level thermal trough continues to focus gusty ENE flow, warm temperatures and dry air across the area. High temperatures will range in the mid to upper 70s (60s ridges) with very low humidity near 15-25% and poor ridge top recovery overnight. Sat winds begin to weaken, but warm and dry weather will continue under breezy offshore flow.

OUTLOOK SUNDAY THROUGH TUESDAY: A gradual transition to a cooler pattern is expected Sun-Tue as the upper level ridge weakens and thermal trough begins to break down. Expect continued low RHs, but values will trend slightly upward each day. Weaker offshore flow in the morning will transition to WNW into the afternoon as the thermal trough axis wavers inland each afternoon.

Fire Behavior Forecast # 28

Name of Incident: Slater and Devil Fires	Fire Number: CA-KNF-7035
Date & Time Issued: Oct 14, 2020 @ 2000	Operational Period: Oct 15, 2020
FBAN: Steve Ziel / Barry Kleckler (T)	Signed: /s/ Barry Kleckler

Assumptions: The southern portion of the fire area is under a **Fire Weather Watch**, transitioning to a **Red Flag Warning** tonight through tomorrow for strong ENE winds, low relative humidity, and poor overnight recovery on upper slopes. Think "**Fire Behavior Triangle**" and the weather side is critical. Fuels are another part of it, and they are starting out still damp but have the potential to dry rapidly, heads up for changing conditions. Finally, **topography** means south aspects will get the most sun, ridgetops will get the most wind exposure, and east/west valleys can funnel winds. Pay attention to all these as well as potential **ignition sources**.

Weather Summary

**See IAP Fire Weather Forecast **

Fire Behavior Summary

Fuels in the fire area are primarily composed of:

- Timber Litter:** Timber stand lacking significant understory, generally underburns with moderate rates of spread without wind/slope alignment with occasional torching. Ponderosa pine and Douglas-fir are common.

- Timber with Understory:** Timber stand with brush or small trees in the understory will burn readily and aggressively with occasional torching, even with little wind. Heavy down fuels are common, receptive to embers, and consume completely once ignited. True fir with low crown base heights are common.

- Shrubs:** Woody shrubs and shrub litter. Manzanita, tanoak, ceonothus. No grass present. May have scattered conifer with low branches that easily torch.

Today's Peak Fire Behavior Potential (wind and slope alignment):

*As fuels dry, there is potential for smoldering fire behavior to kindle to flame in fine fuels with sunshine and wind exposure. Surface reburn is possible where scorched and/or dormant canopies have recently dropped new needles or leaves. If surface fire does spread today, it will likely produce a lot of **smoke** as an indicator of the damp duff underneath. Watch for these signs of drying!*

*****FIRE BEHAVIOR CHARACTERISTICS BELOW ARE BASED ON DRY FUELS*****

Fine fuel moisture = 4 - 8%	Live herbaceous fuels = 30% Live woody fuels = 60-70%	POI = 30 - 50%			
Fuel Type	<u>Head Fire</u>		<u>Backing Fire</u>		Spotting Distance
	ROS	Flame	ROS	Flame	
Timber litter (TL8)	4 - 8 ch/hr	2 - 4 feet	<1 ch/hr	1 foot	0.2 mile
Timber with Understory (TU5)	6 -12 ch/hr	6 - 8 feet	<1 ch/hr	2 feet	0.2 mile
Shrubs (SH2)	2 - 8 ch/hr	2 - 5 feet	<1 ch/hr	1 foot	<0.1 mile

Specific Assignments:

- Contained Divs** - Secured control lines with no perimeter spread expected. Expect to see some increased activity and smoke production from the fire interior. Watch out for reburn potential. Snag hazards increase with winds.
- Divs D,U** - Exposed ridgelines, will be breezy. Smoldering fire is expected, to transition to creep as fuels in the open will be drying in the sunlight and breeze. Fine fuels and surface litter may begin to come into play.

- Aviation** Good visibility with dry and clear air expected.

Safety

Changing* conditions require re-evaluation of actions. If the conditions are changing ask: how fast, how much, when, where? Consider the effects of change on your planned action; may require adjusting your actions to mitigate changing conditions. Verify forecast values. Will your situation get better or worse? Will it get worse before it gets better?

*Always expect change, except from a vending machine."

7. Control Operations/Work Assignments Patrol and monitor perimeter roads daily to ensure accessibility to fire perimeter. Mop-up control lines and around structures as appropriate to secure these areas. Scout and communicate alternate control lines should primary lines fail. Be available for initial attack upon request. Maintain indirect line on the northern boundary Seiad. Patrol Devil (south edge) by air. Continue to secure Thompson Creek road. Mop-up control lines and around structures as appropriate to secure these areas. Scout and communicate alternate control lines should primary lines fail.							
8. Special Instructions Backhaul unnecessary supplies, equipment, and trash. Air support as needed. Mop up Standards: The level of mop-up intensity will be based on site conditions at the division level, the values at risk, fuel bed receptiveness, and spread potential in the area adjacent to the containment line to the extent necessary to make the likelihood of escape minimal, based on professional experience, terrain, fuel types and conditions, and current/predicted weather conditions. Fire Suppression Repair: Divisions are to implement suppression repair per the Fire Suppression Repair Plan as containment of the fire progresses and suppression repair is initiated.

7. Control Operations/Work Assignments: Continue to evaluate and remove hazard trees to mitigate hazard to Happy Camp Highway according to the Road Hazardous Tree Mitigation Traffic Control Plan. Maintain communication and coordinate with PPL operations.							
8. Special Instructions: Backhaul unnecessary supplies, equipment, and trash. Ensure that the road can be cleared for emergency traffic within 15 minutes or less. There will be no closures of the road between 1700 and 1830. The road being open during that time is required for logistical support from Lake Selmac to Happy Camp. Engines will be utilized for mop up and fire watch as needed. Ensure compliance with Happy Camp Highway Road Hazardous Tree Mitigation Traffic Control Plan in the IAP. Fire Suppression Repair: Divisions are to implement suppression repair per the Fire Suppression Repair Plan as containment of the fire progresses and suppression repair is initiated.

7. Control Operations/Work Assignments Secure sections of Knopki Creek Road and Hazel View Road. Patrol and monitor fire behavior in the Chicago Creek drainage. Chip all spur roads from the 124 Road to Sanger Lake.								
8. Special Instructions: Backhaul unnecessary supplies, equipment, and trash. Take precautions in mitigating hazard trees. Mop up Standards: The level of mop-up intensity will be based on site conditions associated with the values at risk, fuel bed receptiveness, and spread potential in the areas adjacent to the containment line to the extent necessary to make the likelihood of escape minimal. Operate based on your professional experience and current/predicted weather conditions. Fire Suppression Repair: Divisions are to implement suppression repair per the Fire Suppression Repair Plan as containment of the fire progresses and suppression repair is initiated.

TASK/ MISSION/ ASSIGNMENT (Type/function includes: Air Tactical, Retardant, Recon, Personnel Transport, Bucket Operations, SAR, etc.)				
Request from	Mission	AIRCRAFT	Time Needed	Comments
Division U	Bucket support as requested and conditions allow.			
Division D	Bucket support			

RESOURCE CONCERNS/INSTRUCTIONS

Retardant	Track locations and gallons applied AVOID aerial application of retardant / foam / agent within 300' of waterways, bodies of water, etc. If Retardant / Foam / Agent is dropped within these areas immediately notify the AOB and provide the following information: Lat / Long, estimated number of gallons and a map detailing the area.
Dip sites	Track all dip site use by gallons and locations (for cost share purposes) Dips from Kelly Lake must be dropped north of Klamath River and south of Oregon border
Illinois Valley HB	Minimize driving off pavement, utilize weed wash adjacent to airport, utilize Hotsy for bucket rinse if changing watersheds

SAFETY MESSAGE

INCIDENT: Slater and Devil

PERIOD: 10/15/2020 Day shift

NARRATIVE

HAZARD: DOING REPETITIVE TASKS- NORMALIZATION OF RISK

- When we do a task repetitively, we tend to start to overlook small hazards that can cause big problems. This includes working the same piece of line for mop up over and over.
- When we “get away with” risky behavior, we start to think that we will always have a positive outcome. When we work an area over and over with no adverse events we tend to think all hazards have been addressed there already.
- These tendencies can lead us to an accident or injury.

MITIGATION:

- Stay engaged and maintain control of your forces. Don't let your guard down.
- No matter how repetitive or boring your assignment may be, remember that every day is a new opportunity to SEE small problems, ACT to prevent them from getting big, and COMMUNICATE within your crew and your supervisor.
- DO NOT normalize attitudes and actions that contribute to injury/illness/death

HAZARD: WINDS FROM A NEW DIRECTION

- Winds from a new direction today will present new overhead hazards because they push hazard trees and hung up widow makers in new directions that may allow them to fall when they may not have fallen under previous winds.
- Fuels may react favorably with new wind direction and flareups could occur on previously quiet areas of the fire.

MITIGATION:

- Check and re-check your work areas for hazards before engaging.
- Identify and mitigate any new hazard trees.
- Post lookouts if necessary.
- Think about where fire may flare with new winds in your work area and how you will deal with it.

SAFETY OFFICERS: Matt Broyles (ICP), Tyson Albrecht (ICP), Eric Brown (OR-FOB – Selmac, P, T, North road group), John Foley (CA-FOB South Road Group) Duane Franklin (U), Jon Lee (D, M/G).

**Traffic Control Plan for Happy Camp Highway Part 1- applicable during scheduled closures.
See Part 2 for closure periods.**

Much of the content of this plan incorporates actions and practices already being implemented. This plan is a formalization of those actions and practices, with some additional detail.

The fire incident managed tree removal operation along the Happy Camp Highway/Grayback road (the Road) will proceed only at a pace that allows the following measures necessary to ensure a safe work area for all. The DIVS on scene is authorized to temporarily shut down the operation- in part or in whole- if necessary, to address a safety concern or non-compliance with the following measures.

1. The fire incident tree removal operation will establish daily work area(s) along the Road.
2. All fire incident tree removal operations that could impact the Road will be conducted only within the defined and marked work area(s).
3. Dedicated road guards with no other duties and having communications with each other, and with the TFLD in charge of the equipment and fallers. A traffic cone or other identifiable marker will be placed at each end of the work area(s).
4. All side roads connecting to the Road within the work area(s) will be physically blocked and/or staffed by a road guard with radio contacts as described above.
5. Vehicles will not enter the work area without first checking in with a road guard.
6. Any vehicle requesting access into the work area will approach the road guard at a low rate of speed, and stop, and clearly communicate their intentions to the road guard.
7. The road guard will read the following script to the driver:
 - a. Do not proceed until I tell you to.
 - b. What is your name? and What is your mission?
8. If the name/mission is on the list of exempted traffic (see Part 2) the road guard will communicate the need to shut down tree removal operations to the TFLD and hold the vehicle until an all clear to proceed is received from the TFLD.
 - a. When all clear is received road guard will then tell the driver:
 - b. You are clear to proceed. You are authorized only to proceed directly to _____ where you will check out with a road guard like me.
 - c. You are not authorized to exit the work area other than at a location with a road guard like me.
 - d. You are not authorized to stop in the work area except for emergencies.
9. Tree removal operations **will not resume** until a road guard confirms that the vehicle described has exited the work area.
10. If the name/mission is not on exempt traffic list (Part 2) the traffic can be held for up to 2 hours.

Traffic Control Plan for Happy Camp Highway Part 2 - Closure Schedule and Exempted Traffic

Road Closure Schedule

Rogue-Siskiyou North Side	Klamath South Side
From DP52 / Snowpark to the North	From DP52 / Snowpark to the South
0900-1200 CLOSED	0900-1200 CLOSED
1200-1300 open	1200-1300 open
1300-1530 CLOSED	1300-1700 CLOSED
1530-1600 open	1700-0900 open
1600-1730 CLOSED	
1730-0900 open	

Traffic Exempted From Closure During Closed Periods:

1. **Medical Emergency Traffic** or personnel responding to a **major powerline strike** will be allowed passage through the work area as soon as the road can be rapidly cleared
2. **MFE Essential resources** must be allowed quick passage through the closure areas **within 15 minutes**
 - Any direct PP&L staff
 - MFE Overhead Individuals
 - Erik Jensen- MFE IC-White dodge 2500
 - Lance Fink- Axeworks deputy IC-White Chevy
 - Michael "Youngblood" Konkle- Safety-MGE Pickup
 - Julian Centeno- Safety-MGE Pickup
 - Richard Goodwin (Tribal Monitor MGE) Red F150
 - John Sayre-MFE tree crew operations manager
 - Meghan Bradshaw- Archaeologist Lead
 - Mathew Gilbert- Primary Inspectors Lead
 - High Sierra Fueling Service
 - Low beds with equipment on trailer or headed for pick up
 - Mechanic or support staff for MFE or other contractors. Unknown company name.
 - Firestorm fire services on dispatch call for medical or hot spot flare up.

MFE essential resources are asked to approach road guards and identify themselves by showing ID or other verification of essential status for quick passage.

All other traffic may be required to wait for a period up to but **no longer than 2 hours**. Efforts will be made to allow traffic to pass through work areas at shorter intervals (Example 1: if the current work allows a lane to be readily opened, waiting traffic will be allowed to pass. Example 2: if the queue of waiting traffic becomes longer than 8 vehicles, the work will be changed to accommodate passage at an earlier interval.)

Slater Incident – North Zone: Resource Advisor Message

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1 to 1000 ratio (using bleach with 6.0 % Sodium hypochlorite). Talk to a READ if you need some bleach!

Invasive Yellow-tuft (Alyssum)

Please do not park in or drive through the flagged off area at the mill-site briefing area. There is an introduced plant in this area that spreads aggressively in the serpentine areas in the Illinois Valley. Most invasive plants do not spread into

serpentine soils. Serpentine soils are home to rare plants that only grow here in the Illinois Valley. This invasive plant does threaten those unique plants. The READs would appreciate people utilizing the weed wash when they can, especially if they've been

working or parking near the IV Airport. Don't know what serpentine is? Not sure if you should hit the weed wash? Ask a READ!

READ Water-bar Guidance

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Distance: To ensure that excess runoff cannot accumulate, waterbars must be placed the proper distance apart, based on the slope of the fireline. This breaks up the area that accumulates runoff, keeping it small enough to prevent damage. Erosion potential depends on slope and a table is provided on the next page that gives the maximum distance between waterbars, or between a waterbar and the next upslope drainage break.

Diagonal: A diagonal waterbar has a gentle slope along its base that leads the water off. Build them at 15-30 degrees from horizontal and drained away from the fire burned area if possible

Divert: A good waterbar will divert the water off the fireline. To do this the waterbar must be sufficiently deep to handle all the flow for as long as it's needed. Excavation is much more effective than fill in making a durable and effective waterbar (a ditch or a dip beats a dike)

Discharge: A good waterbar is not a dam – it must have an open outlet.

Dissipate: A good waterbar should dissipate the flow just below the outlet to exhaust its eroding power and cause it to filter into the soil. This may require placing slash, rock, or debris below the outlet, or fudging a bit on distance to take advantage of natural features that will dissipate the water's erosive energy.

Illustration by
Kathryn Ronnenberg

Fireline slope %	Maximum Distance Apart (feet)
1 – 5	200
6 – 20	125
21 – 40	60
41 – 60	40
>60	25

Finance Message

- **All CTR's with hazard pay must have a justification in the remarks section. The justification needs to be more substantial than, "Uncontrolled fire". Were you fighting fire on uncontrolled fire line? Were you scouting? Were you patrolling for spot fires? Were you attaching a load to a hovering helicopter?**

**From the Interagency Incident Business Management Handbook*

Criteria for Entitlement to Hazardous Pay Differential for Irregular and Intermittent Hazardous Duties (5 CFR 550.904)

Full-time, part-time, and intermittent GS employees are eligible for hazard pay differential computed at 25 percent of the base rate when performing duties specified below.

Any member of the incident fire suppression organization is eligible for hazard pay while carrying out assigned duties, if hazard pay criteria, as described below, are met. Incident supervisors must manage for the appropriate application of the authority.

- **Firefighting – Participating as a member of a firefighting crew in fighting forest and range fires on the fireline before the fire is controlled. This includes single resource personnel assigned to the fireline. Personnel assigned firefighting duties are not entitled to hazard pay after the declaration of an official control time and date.**

This does not include personnel engaged in logistical support, service, and non-suppression activities, e.g., media tours to the fireline, incident personnel driving to the fire to observe activities, drivers delivering tools or personnel (Appendix B – hazard/environmental pay matrix).

- **Flying – Individuals, except pilots, who are participating in limited control flights.**

Hazard pay for flying activities is related to the use of the aircraft, not the work of the occupants. If the flight is undertaken under unusual and adverse conditions which threaten or severely limit control of the aircraft, then hazard pay is warranted. Hazard pay is not authorized for situations such as flying passengers from a work center to a location to fix equipment when there are no adverse conditions that threaten or severely limit the aircraft.

- **Groundwork Beneath Hovering Helicopter – Participating in ground operations to attach an external load to a helicopter hovering just overhead.**
- **Work in rough and remote terrain – Working on cliffs, narrow ledges, or near vertical mountainous slopes where a loss of footing would result in serious injury or death, or when working in areas where there is danger of rock falls or avalanches.**

Burned Area Emergency Response (assessment or implementation) does not meet the definition of firefighting for hazard pay eligibility; however, hazard pay criteria listed above may apply.

Prescribed fire does not meet fireline hazard definition for hazard pay; however, hazard pay criteria listed above may apply.

10-14-20

TIME Instructions

*Due to Covid-19 safety precautions and the physical distance of resource locations, virtual procedures and approvals will be used in lieu of paper copies.

ODF resources ordered under Illinois Valley Support Incident (OR-712S-047521)

- Submit time by completing a CTR/shift ticket, get supervisor signature, then take a clear picture of the document. Email the signed CTR or Shift Ticket to 2020.slater.finance.north@firenet.gov. The subject line should read "ODF Time". Slater finance will forward your time to ODF Illinois Valley Finance personnel.
- If you have questions, please call ODF finance at 541-474-3152.

LFS resources ordered under RSF Large Fire Support Incident (OR-RSF-000001)

- Continue to submit your time as directed by RSF Large Fire Support finance personnel. Please **do not** send your time to Slater Finance.
- For questions please call 541-592-4002 or 541-589-2142.

Slater resources ordered under Slater Incident (CA-KNF-007035)

- Submit time by completing a CTR/shift ticket, get supervisor signature, then take a clear picture of the document. Email the signed CTR or Shift Ticket to 2020.slater.finance.north@firenet.gov. The subject line should read "Time".
- Electronic time forms are available at https://linktr.ee/slater_incident or by scanning the universal Slater QR code.
- If you have questions for Slater Finance call 541-255-5738.

***All Resources:** If you are doing suppression repair work, please note on your CTR that you are doing repair work and the jurisdiction of the land you are working on for that shift.

SLATER FIRE CHECK-IN PROCEDURES

For New Resources, Operator Swaps, & Crew Swaps

1. All contracted resources need an inspection before moving to the next step. Call Ground Support at:

847-946-8847

2. Email The Following Documents:

To: 2020.slater.plans.north@firenet.gov

Subject: (Your Resource Order Number)

- **Manifest** (crews and engines)
- **Resource order** (crews, equipment, and overhead)
- **Red cards** (crews, equipment, and overhead)
- **Casual hire form** (A.D. resources)
- **Contractor agreement** (pgs. 1-3)

3. Fill Out The Check-In Form: https://linktr.ee/slater_incident

4. Wait for confirmation that you are checked-in. Check-In will provide instructions for how to contact your supervisor.

5. If you have not been contacted within 2 hours of initially emailing your paperwork or need help with steps 1-3 call:

847-946-6416

SLATER DEMOB PROCEDURE/CHECK OUT SHEET

C# / E# / O# _____ Name of Resource _____

Phone # _____ Email for timesheet _____

For resources not scheduled to demob as listed in the IAP, complete name and signature below.

Incident Supervisor Name: _____

Incident Supervisor Signature: _____

1. All resources wash vehicles
 - a. Happy Camp resources get a token from Chuck House-Logs, and self-wash.
 - b. All other resources proceed to weed wash.

Happy Camp resources complete steps 2-5 with Chuck House-Logs. All other resources call 541-423-2631 to schedule demob.

2. Ground support (contracted resources only)
3. Supply Unit
4. Communications
5. Documentation (inspections, CTR's, Shift Tickets, evaluations, etc.)
6. Slater Resources call Finance at 541-255-5738

Return Travel Info

Departure Date and Time _____

Rest Overnight Location(s) _____

Estimated Arrival Date and Time _____

E number of vehicle (if applicable) _____

- Personnel at Kiosk will email CTRs/Shift tickets, inspections, other documentation and completed checkout sheet to the email addresses below.

****Indicate resource type "ODF" or "LFS" or "Slater" and Resource Order# in subject line**

****ODF and LFS resources will continue using current payroll processes.**

- Resources do **NOT** need to remain at incident to receive pay documents. Finance will email pay documents once CTR's/Shift Tickets have been posted.

2020.slater.finance.north@firenet.gov

Finance Phone number: 541-255-5738

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

Instructions for Screening

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	DO NOT MOBILIZE
At Entries: Consider adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained. If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	DO NOT ANNOUNCE Ask individual to step aside and follow the steps below.

Steps to follow
Escort symptomatic individual to isolation area.
Isolation support personnel should begin documentation.
Have symptomatic individual contact Supervisor for further direction.
Notify public health officials.
Have individual transported as appropriate.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
