<b>FIRE NAME:</b> August Complex		<b>OPERATIONAL PERIOD:</b> Sunday September 13 2020
<b>DATE ISSUED:</b> Saturday September 12 2020		<b>TIME ISSUED:</b> 2000
<b>UNIT:</b>	CA-MNF	<i>Kelly Cagle</i>
<b>Prepared By:</b>	Kelly Cagle/FBAN	

### INPUTS

**WEATHER SUMMARY:**

TODAY (Saturday) See Fire Weather Forecast.

**WEATHER:** Smoky, warm and dry.

**Lower Valleys/Slopes:** **MAX Temp:** 87-92 degrees **MIN Rh:** 10-15% **WIND:** Valleys South @-10-15 Gusts to 20

**Upper Ridges:** **MAX Temp:** 80-85 degrees **MIN Rh:** 10-15% **WIND:** South @ 20-25 Gusts to 30

**MIXING HEIGHT:** 8,00 ft AGL **TRANSPORT WINDS:** South 20 to 25 mph **LAL:** 1 **CWR:** 0% **Haines Index:** 4

**GENERAL FUEL ASSUMPTIONS:** It has been well over 100 days since much of the fire area has received over 0.10" of precipitation and fuels are extremely dry and burning readily. **All fuel size classes are available, including live fuels.**

### FIRE BEHAVIOR OUTPUTS

**GENERAL**

With southerly winds, this fire will predominantly back against the wind. Assume backing rates of 2 -4 chains per hour. Smoke continues to impact the fire area and limit fire behavior; however fire activity will continue with persistent fire spread underneath the smoke.

**Mendocino Pass RAWs FM% 1Hr:4      10 Hr: 4      100 Hr: 5      1000 Hr: 7**

Vegetation Type	Fuel Model	Fire Behavior Potential (Clear Air)				Fire behavior Potential (Under Smoke)			
		ROS (ch\hr)	FL (ft)	PIG (%)	Spot Dist (mi)	ROS (ch\hr)	FL (ft)	PIG (%)	Spot Dist (mi)

Grass/Shrub	GS2	30-60	6-9	89	.2 - .4	25-35	4-7	55	0.2

Timber	FM 10	8-18	4-7	89	.2 - .4	7-12	4-6	55	0.2

- **Branch I:** Expect fire to continue to back against a southern wind **with the exception of Div C. Fire shape in Charlie will allow for fire movement to the north.** Flanking or short runs are possible when fire aligns in drainages. Anticipate continued terrain influenced/diurnal wind fire spread which will be accelerated in higher elevations/exposed terrain.
- **Branch III:** Expect predominantly backing fire against a southern wind. Short runs would be possible if the fire aligned in a drainage or favorable slope.. Anticipate continued terrain influenced/diurnal wind fire spread which will be accelerated in higher elevations/exposed terrain.
- **Branch V:** Expect fire to continue to back to the west against a southern wind. Short runs would be possible if fire aligns in a drainage or finds favorable slope. Anticipate continued terrain influenced/diurnal wind fire spread which will be accelerated in higher elevations/exposed terrain.

\*\*\*\*\*  
**Night Shift:** Fuels have been exposed to warming and drying during the day. They are at their warmest and driest point as you enter your shift. Expect fire to be active and moving around early in the shift. That activity may continue for several hours. If thermal belts develop, activity is likely to continue until near daybreak. Div Romeo, Tango and Victor have been the most prone to thermal belt development. RH's have tended to decrease overnight in these divisions. This fire has experienced significant growth at night on at least 2 occasions.

### AIR OPERATIONS:

There is a chance that air will be better today than recent days. Aircraft use might be an option today.

### SAFETY

This area of California has a significant amount of recent fire history. Many areas of this fire contain heavy concentrations of fire killed timber. In many cases, these are very large trees. Don't forget to "look up" during suppression actions.

## Radio Cloning Procedures:

- At operational briefings, one representative from each module should be cloned by Communications Unit, then subsequently share the radio code plug/program with the module.
- Cloning procedure:
  1. COMT puts on gloves and face covering.
  2. COMT clones radio (COMT is only person that handles cloning cable and cloner).
  3. COMT wipes down customer radio with appropriate disinfecting solution or wipes and returns the radio.
  4. COMT wipes down cloner, cable, and gloves.
  5. Move on to the next radio.
- Module representatives, single resources, and cooperators will maintain social distancing as they line up for service.
- As practical, cloning areas should be set up outdoors in well-ventilated areas with enough space for social distancing.

***Safety is the Team's Number One Priority***

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of **Duty, Respect, and Integrity** as outlined in the Incident Response Pocket Guide (IRPG):

**If you Need to Leave the Incident Environment when Off Duty:**

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

**Alcohol /Illegal Drugs / Fitness for Duty**

Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

**Performance Evaluations:**

**Use of Social Media on Wildland Fire Assignments:**

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

# HEALTH AND SAFETY MESSAGE

***SAFETY** starts with **YOU***

We are **ALL** accountable for **SAFE** behaviors

For Day/Night Operations: September 13, 2020

INCIDENT: **August Complex**

TIME: DAY 0700/Night1800

## **Major Hazards and Risks:**

- **DRIVING:** Drive defensively, be aware of oncoming traffic on all roadways and fire area. **SLOW DOWN** and **SHARE** the ROAD.
- **Heat Related Illness (HRI):** Take care to monitor the health and welfare of yourself and crew, drink plenty of water/fluids, take frequent breaks, get 8 hours of sleep, and get enough food to support your task of the day.
- **HAZARD TREES:** Look up, Look down, Look around for signs of fire weakened trees.

## Fire Order of the Day:

*Give clear instructions and insure they are understood.*

- **Task** = What is to be done
- **Purpose** = Why it is to be done
- **End State** = How it should look when done

**NEED MORE INFO????.....Check your IRPG, Page x (white pages)**

### **Safety Alert**

**Subject:** Fatigue and/or Distractions, and Speed = Dangerous Conditions

**Area of Concern:** Driving Related to Fires

**Distribution:** Suitable for All, Anyone Thinking About Driving When Fatigued

**Discussion:** Especially Relevant With Current Fire Situation

**Safety Concerns to Employees:** Making it Home in One Piece

There are many long days being worked. Some crews are about to time out.

- *Make sure you are getting your rest when you can! ...and sticking to work/rest guidelines.*

Fatigue can cause us to mentally stray from the driving task.

It only takes a second of distraction to lose control of our vehicle. The faster you are traveling, the faster you get in trouble.

- *Make sure you recognize when you are too tired to drive!*
- *Don't tough it out and put yourself and crew at risk!*
- *Slow down, take breaks, talk to your passengers.*
- *Be a Hero ... know your limits and stay out of trouble.*

## **Human Factor Watch Outs**

Watching out for yourself, coworkers, subordinates and your boss is a primary responsibility for everyone involved in high risk activities. Watch outs are not just for the tactical environment. The Human Factor Watch Outs are designed to create an opportunity for you to take a tactical pause and re-evaluate your situation.

If any of the following occur:

- Your briefing was unclear.
- You are not getting answers to your questions.
- You are not getting clear acknowledgement of your message.
- You are encountering hazards that are not mentioned in your brief.
- Your team is not debriefing.
- Your tempo is too high to maintain command and control.

**Take moment to re-assess your situation.**

## **Your Safety Team:**

**Laney Cutshaw, Brandon Hoffman**

**Always think LCES.....**

**Discuss possible risks prior to engaging in work tasks.**

## COVID-19 LCES

Firefighter Health & First Aid

The COVID pandemic has caused a lot of ripples in our lives and many of us simply want to return to normal. We may never go back completely to our past business practices, but there are some things we can do to ease the transition.

Relying on the familiar to help us frame our new environment can make change easier – and communicating that change easier too! With all the talk of what we need to do differently with COVID, let's see how it actually compliments what we know and do:

- **Lookouts.** *We know how to establish lookouts: find a good spot, know the lay of the land and the fire environment, pay attention to changes, and communicate.*
  - **COVID lookouts:** Learn local factors we may be stepping into – What is the current number of cases in the area? Where are the adjoining resources? Where will we be able to operate safely without exposing ourselves to unacceptable risk? Being your own lookout means conducting your daily personal health screening for COVID symptoms and sharing if you might be exposed.
- **Communication.** *This includes having a good system in place and sharing info early to all parties.*
  - **COVID Commo:** We must speak up if we see something – even to remind people to wear their PPE or not shake hands. It means finding gaps in our systems of virtual information exchange and plugging them BEFORE it impacts our situational awareness on the operational ground. We need to confirm everyone (top-down and bottom-up) is comfortable with the assignment and the environment we are being asked to work in.
- **Escape Routes.** *Having an exit strategy and a timeline to use it, including a backup plan.*
  - **COVID Escape Routes:** Set trigger points for when to back out of a situation and expand your personal space or wear PPE to increase safety from exposure. Set these early before things heat up – What mitigations (PPE, physical distancing, etc.) will be used when? How long will these mechanisms be viable (clean PPE, upgrading PPE, etc.)? How can we make sure it's used consistently and we don't get too focused on operations? Don't get complacent – time the route, practice the route!
- **Safety Zones.** *Survivable areas that are appropriately sized so we don't need to use additional protection.*
  - **COVID Safety Zones:** Buffer areas we create for ourselves using Module as One concepts to limit our environmental exposure. This also includes cleaning and hygiene protocols that ensure the space created with physical distancing remains viable and secure from the virus. It can also mean quarantines (at the start of the season, between assignments, etc.) to create safe areas to work in – giving ourselves the time and space to validate we haven't been exposed.
  - **COVID Deployment Zones:** Deployment zones are the fallback in case safety zones aren't available. A fire shelter and/or PPE (gloves and cloth masks) can give us added protection. It may even mean isolating ourselves if we become sick so that we don't further impact our friends and family.

We don't engage without Lookouts, Communication, Escape Routes, and Safety Zones (LCES) being in place. How about your COVID LCES?

1. How will you understand the changing environment so you know what you're getting into?
2. Does everyone involved feel good about how you're conducting business with the added COVID hazard?
3. Do you have all the information for your assignment and have you been given a solid briefing?
4. Set up your COVID escape routes and safety zones. What are your trigger points for today's work?
5. What will your team do if LCES becomes compromised? Plan ahead!

**Have an idea? Have feedback? Share it.**

## 2020 COVID-19 Guidance

### LEADERS INTENT:

- Incident responders have a **DUTY** to safeguard each other and the public we serve from hazards. It is through our **RESPECT** for everyone's health and safety that we follow these mitigations, and we rely on everyone's **INTEGRITY** to ensure that we do so and expect the same of others.
- All incident personnel are expected to conduct **self-screening** of their health on a daily basis. Individuals experiencing any of the symptoms should take precautions to self-isolate and immediately report symptoms to your supervisor and to the IMT's Medical Officer or MEDL for assessment.
- All incident personnel will adhere to the **Module of One** concept to the extent practical.
- All incident personnel and visitors will wear **cloth face coverings** when six feet of social distancing cannot be maintained with others outside of their Module of One.
- All incident personnel and visitors are required to wear **cloth face coverings** when attending briefings or meetings in common use areas at ICP and camps.
- All incident personnel and visitors will wear **cloth face coverings** whenever they enter an enclosed incident facility, such as yurt, tent, building, restroom facility, or other common-use areas regardless of proximity to other people.

### ALL RESOURCES (IMT Members, Single Resource, Operational & Support resources):

- Each resource should arrive at the incident "self-sufficient" for 72 hours, including food, water, sanitizer or wipes, batteries, etc.

### ICP AND CAMPS

- Access into ICP and some base camp facilities may be restricted to essential personnel only, i.e. module supervisors and trainees.
- To promote isolation and social distancing, operational resources will be assigned to camps and spike camps dispersed on the incident.
- Food will be individually packaged and delivered to drop points for distribution. Special dietary needs should be reported to your line supervisor.
- Daily operational briefings will be conducted via radio or virtually. Only supervisors and trainees should attend in-person briefings.

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. <b>Non-EMERGENCY transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>
