Fire Weather Forecast

FORECAST NO: 26
PREDICTION FOR: 24 Hr Shift

INCIDENT: August Complex
UNIT: Mendocino NF

SHIFT DATE: Monday 9/14/2020
SIGNED: Rick Davis and Steve Hannah
TIME AND DATE ISSUED: 9/13/2020 1800 PDT
Incident Meteorologist (IMET) and (Trainee)

Discussion:

Warm but cooling and with low daytime RH will persisting through Tuesday. Of note, this morning will see very dry conditions, which will then persist through the rest of the day. This will cause today to be the driest day of the week. The winds will shift to the southwest which will help to move smoke out of the area. The loss of smoke and the few clouds will not provide much shading.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Warm, and extremely dry.

Max Temperature: 76 to 81 higher elevations and except 85 to 90 lower valleys

Min RH: 7 to 13 percent.

WINDS:

-20 ft Level-WINDS

Lower Valleys/Lower Slopes Terrain or southwest winds 5-10 mph gusts 15 mph.

Upper Ridges: Southwest winds 15 to 20 mph gusts to 25 mph.

TRANSPORT WINDS: Southwest 10 to 20 mph. Mixing Height 7,000 ft.

TONIGHT:

SKY/WEATHER: Clearing smoke and clear skies.

Min Temperature: middle 50 and 60s.

Max RH: 20 to 30 percent.

WINDS: -20 ft Level-

Valleys/Lower Slopes: Down drainage 5 to 10 mph after sunset.

Upper Ridges: Southwest 10 to 15 mph gusts to 20 mph by midnight.

TUESDAY:

SKY/WEATHER: Clearing Smoke and mostly sunny skies.

Max Temperature: 75 to 80 higher elevations and 84 to 89 lower valleys

Min RH: 12 to 18 percent.

WINDS:

-20 ft Level-WINDS

Lower Valleys/Lower Slopes Terrain or southwest 5 to 10 mph gusts to 15 mph afternoon.

Upper Ridges: Southwest wind 10 to 15 mph gust to 20 mph.

TRANSPORT WINDS: Southwest 10 to 20 mph. Mixing Height 7,000 ft

Outlook Wednesday through Thursday:

Southwest winds expected on the fire area for both days. Chance for precipitation and higher RH is looking to arrive later on Wednesday and be higher for Thursday.

FIRE BEHAVIOR FORECAST										
FORECAST NUMBI	ER: #27	TYPE OF FIRE: Wildfire								
FIRE NAME: Aug	gust Complex	OPERATIONAL PERIOD: Monday September 14 2020								
DATE ISSUED:	Sunday September 13 2020	TIME ISSUED: 2000								
UNIT:	CA-MNF									
Prepared By:	Kelly Cagle/FBAN	Kelly Cagle								

INPUTS

WEATHER SUMMARY:

TODAY (Saturday) See Fire Weather Forecast.

WEATHER: Warm and especially dry.

Lower Valleys/Slopes: MAX Temp: 85-90 degrees MIN Rh: 7-13% WIND: Valleys: Terrain driven winds or SW winds at 5-10

Upper Ridges: MAX Temp: 76-81 degrees MIN Rh: 7-13% WIND: Southwest winds at 15-20 with gusts to 25

MIXING HEIGHT: 7,00 ft AGL TRANSPORT WINDS: Southwest 10 to 20

LAL: 1 **CWR**: 0%

Haines Index: 4

GENERAL FUEL ASSUMPTIONS: It has been well over 100 days since much of the fire area has received over 0.10" of precipitation and fuels are extremely dry and burning readily. **All fuel size classes are available, including live fuels.**

FIRE BEHAVIOR OUTPUTS

GENERAL

With southwesterly winds, this fire will predominantly back or flank against the wind. Assume backing rates of 2-4 chains per hour. Even with backing fire, there has been occasional single and group torching associated with a backing fire front. Expect fire activity to increase as clear sky increases. Expect fire movement towards the south and west in Romeo to persist as long as fuel persists. Do not expect suppression operations to be "typical". Expect more difficulty than one might be accustomed to.

10 Hr: 5

100 Hr: 10

1000 Hr: 10

		Fire B	tential (Cl	ear Air)	Fire beh	avior Pot	ential (Und	er Smoke)	
Vegetation Type	Fuel Model	ROS (ch\hr)	FL (ft)	PIG (%)	Spot Dist (mi)	ROS (ch\hr)	FL (ft)	PIG (%)	Spot Dist (mi)
Grass	GR2	50-70	6-8	86	.24	30-50	4-6	65	0.2
Grass/Shrub	GS2	30-60	6-9	86	.24	25-35	4-7	65	0.2
Shrub	SH5	100+	14-20	86	.24	50-90	12-17	65	0.2
Timber	FM 10	8-18	5-8	86	.24	7-12	4-6	65	0.2

- Branch I: Division Delta is fairly quiet and expected to remain that way. Little to no heat showing on IR. Division Foxtrot heat will persist
 as fire consumes the unburned fuels inside the containment line. Be wary of fire escaping containment lines to the east where pockets
 of shrub and grass fuel will allow for fire to rapidly establish and begin to move. No heat showing on IR in Juliet or November.
- Branch III: Oscar appears quiet. Expect flanking fire from Romeo to move towards Oscar. Romeo Unless contained, expect the slopover to continue to back towards the south/west and flank towards the east. Further towards the west, the area where fire has crossed the drainage will continue to progress towards the west with steady progression. Short runs would be possible if the fire aligned in a drainage or favorable slope. Anticipate continued terrain influenced/diurnal wind fire spread which will be accelerated in higher elevations/exposed terrain.

Night Shift: Fuels have been exposed to warming and drying during the day. They are at their warmest and driest point as you enter your shift. Expect fire to be active and moving around early in the shift. That activity may continue for several hours. If thermal belts develop, activity is likely to continue until near daybreak. Div Romeo has been the most prone to thermal belt development. RH's have tended to decrease overnight in this divisions. This fire has experienced significant growth at night on at least 2 occasions.

AIR OPERATIONS:

Winds look favorable to move smoke out of the area today. Conditions likely to be acceptable for air operations with the possible exception to Foxtrot if Romeo smoke drifts towards Romeo.

SAFETY

Night shift presents its own unique set of hazards. It is much harder to have the quality "L" of LCES at night. Make intentional and deliberate effort to main your situational awareness and your LCES at night.

Radio Cloning Procedures:

- At operational briefings, one representative from each module should be cloned by Communications Unit, then subsequently share the radio code plug/program with the module.
- Cloning procedure:
 - 1. COMT puts on gloves and face covering.
 - 2. COMT clones radio (COMT is only person that handles cloning cable and cloner).
 - COMT wipes down customer radio with appropriate disinfecting solution or wipes and returns the radio.
 - 4. COMT wipes down cloner, cable, and gloves.
 - 5. Move on to the next radio.
- Module representatives, single resources, and cooperators will maintain social distancing as they line up for service.
- As practical, cloning areas should be set up outdoors in wellventilated areas with enough space for social distancing.

Finance Message

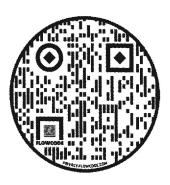

ALL Resources = if you have not already done so, please submit all the required paperwork to finance (contracts, casual hire forms, cooperator agreements, etc.

TO SUBMIT TIME:

- Be sure to get your hard copies to the appropriate individual after morning briefing.
- Hard copies are preferred but you may also send digital copies to 2020.AugustComplex.finance@firenet.gov.
- Ensure your resource order number is on your CTR and shift tickets.
- Single resources please put only one person on each CTR.
- Please remember to put the **reason for hazard pay** and **compensable meal** justifications in the Remarks block on the CTR or shift ticket.
- Please submit time at least every other day.

Please Click the QR code below for the following fillable Finance forms:

CTRs/Shift Tickets and Comps/Claim

When completing claims form be sure to include your Resource Order #, your home unit address, your contact number and email address as well as pictures of the damage/damaged item.

Finance Contact Information

Finance Chief: Carol Bass 775-296-2402

Finance Chief Trainee Sharon Holmes 318-730-5813

Procurement Unit Leader Dan Myers 970-485-0139

Comp Claims Judy May 775-340-0224

Judy May GBT2 COMP Unit Leader at 775-340-0224.

CHECK-IN PROCEDURES

Virtual Check-In: Please complete online check-in with your smart phone.

Use your Resource Order and Incident Qualification Card to complete the check-in information accurately. For CREWS, only the leader must check in online. For all other resources with multiple people per resource order number, all people should complete check-in.

1.SCAN THE QR CODE and COMPLETE the form in its entirety.

2.EMAIL RESOURCE ORDER AND MANIFEST TO:

or 2020.augustcomplex.resources@firenet.gov

If you do not have the capability or information needed to complete online check-in on your smart phone, please come to Check-In Trailer and knock on the door and someone will come outside to assist you with check-in. Thank You!

Base Camp Check-in Trailer Hours 0600 - 2000

Willows ICP Check-In Hours 0700-2100

PAPERLESS DEMOBILIZATION CHECKOUT PROCESS

Questions??? Contact Lori Price @ DEMOB 925-588-6089

1.) Visit the DMOB Unit Last for final checkout.

2.) At each of the following units, take a picture of the Unit Lead's signature after you have been cleared by them for DEMOB.

Supply

(856-430-5621)

Communications

(925-817-9846)

Ground Support

(928-679-0611)

- 3.) Once cleared from <u>all 3 units</u> present your pictures to the DEMOB unit leader for final approval and checkout.
- If you do not have all required signatures you will not be cleared from ICP.
- Those without the ability to take a picture on their phones should coordinate with their supervisor.

CREW SWAP???

Click the QR code below

to complete e-Form

24 hours prior to GROUND travel and 48 hours prior to AIR travel...

SECTION SUPERVISORS will complete either paper or fillable electronic Gen Msg (213) containing the following info to lorie_price@firenet.gov

- Release Date and Time
- ETD and ETA in Pacific ST
- Mode of Transport: (Air, AOV, POV)
- Name on Driver's License
- Date of Birth
- 3 letter Jetport Identifier
- Need for transport to airport?
- Preferred time of day to travel

TRAINING MESSAGE - Trainees - please check in with the Training Specialist, by accessing the fillable Trainee Check-In Form here:

If Trainee or Trainer is demobing: Trainers – Trainer needs to fill out the relevant parts of the Task Book and do an Incident Personnel Performance Rating and discuss the assignment with the trainee.

If Trainee is staying: Trainee should contact Training Specialist to discuss plans for remainder of the assignment.

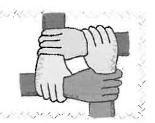

If Trainee is demobing: Trainee should access the Trainee Check-Out form here:

Don Washco, 623-695-6487 Don_Washco@firenet.gov

Human Resource Message

Communication

Communication is a two way street. When communication becomes a one way, it becomes a traffic jam and turns into an issue. Some examples are:

- Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.
- A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.
- It can be like the telephone game. It starts with specific information and by the time it gets to the end it very different than what was first communicated.

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two way street!

"The single biggest problem in communication is the illusion that it has taken place"....by George Bernard Shaw

The Human Resources Specialists are here on assignment to help you and your teams manage the operational stress keeping your crews safe, positive, and productive increasing your situational awareness.

Human Resources Specialist – Karen Mora 970-420-5108 (call/text)

Human Resources Specialist Trainee – Tony Torres 505-249-2341 (call/text) or email @ <u>Anthony.Torres@usda.gov</u>

Great Basin Team 2 Expectations 2020 Safety is the Team's Number One Priority Everyone is a safety officer—See It, Say It, and Fix It!

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of **Duty**, **Respect**, and **Integrity** as outlined in the Incident Response Pocket Guide (IRPG):

If you Need to Leave the Incident Environment when Off Duty:

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol /Illegal Drugs / Fitness for Duty

Alcohol and illegal drugs are not permitted within the incident environment. Be ready, willing, and able to perform your duties. If you are unable to perform your duties, you may be released from the incident with the home unit or employer being notified of the circumstances.

Work Environment/Human Relations:

Conduct yourselves as professionals and maintain a positive, non-hostile work environment with mutual respect. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates human rights, the provisions of equal employment opportunity (EEO), or ethics and conduct standards will not be tolerated. If you need clarification of these expectations, contact the Human Resource Specialist.

Your actions in the community outside of the incident environment must also conform to these standards while assigned to this incident. Your integrity is shown by obeying the law and following local rules and ordinances. Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

Work / Rest Guidelines:

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

Performance Evaluations:

Performance Evaluations will be completed for all trainees and contractors (including ADs). Any unsatisfactory performance will be documented on an evaluation. It is your responsibility to ensure that your supervisor has completed an evaluation.

Use of Social Media on Wildland Fire Assignments:

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

Tony DeMasters

Incident Commander

HEALTH AND SAFETY MESSAGE

SAFETY starts with YOU

We are **ALL** accountable for **SAFE** behaviors

For Day/Night Operations: September 14, 2020

TIME: Day-0600/ Night-1800

INCIDENT: August Complex

Major Hazards and Risks:

- DRIVING: Drive defensively, be aware of <u>STEEP/ NARROW</u> roads. Obey all posted speed limits. Share the roadway. Be aware of other drivers, personnel and wildlife. Be alert and watch for public and other non-operational personnel in fire areas.
- Heat Related Illness (HRI): Take care to monitor the health and welfare of yourself and crew, drink plenty of water/fluids, take frequent breaks, get 8 hours of sleep, and get enough food to support your task of the day.
- HAZARD TREES: Look up, Look down, Look around for signs of fire weakened trees.

Fire Order of the Day:

Give clear instructions and be sure they are understood.

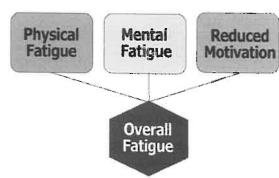

- Brief others as needed.
- Be clear and specific.
- Don't assume they know what you mean.

Hazard Trees

- Follow "Hazard Tree Safety" guidelines IRPG page 22
- Post lookouts or spotters in mopup areas.
- Don't take breaks in high concentrations of hazard trees
- Consider the effect of wind on hazard trees
- Remember the hazard zone is 2 ½ times the tree height
- Use qualified fallers to mitigate snags

Fatigue Management

- Fatigue management goes beyond counting hours on timesheets, it is individualized and overt.
- Cumulative fatigue is dangerous. It prevents sound decision-making, confounds situational awareness, and dulls reaction times. It is as problematic in the office as it is on the fireline.
- Cumulative fatigue is manifest in the explanations used when folks are asked to take a break, or take a day off..."I don't have time."
 "There is too much going on." "As soon as things calm down a bit."

Please take the time to watch out for each other!

Your Safety Team:

Laney Cutshaw, Brandon Hoffman

Our Safety Record to date is GREAT keep it up. "Safety in Leadership and Actions will benefit EVERYONE"

Avoiding Fuel Geysering

Miscellaneous Fireline Hazards

Fuel geysers continue to be reported and the potential for injury is real. In 2018, there were 28 incidents of fuel geyser reported: 23 chainsaws, a leaf blower, and four jerry cans. A fuel geyser can happen on any equipment with a fuel tank including fuel bottles and containers. Even chainsaws with two-way vents may "geyser" at high temperatures or high elevation. User should assume all gas-powered equipment and fuel containers are pressurized.

Pressure

Fuel - Know Your Fuel

- Fuel volatility changes seasonally and geographically.
- Think locally. Using fuel from a cooler climate (i.e. Idaho) in a warmer climate (i.e. Texas) increases the geysering potential.
- As elevation increases, boiling point temperatures decreases. 125°F at 8,000 ft. is approximately equivalent to 140°F at 1,000 ft.

Fuel Bottles and Containers

Fuel bottles (i.e. Sigg bottles), fuel containers (i.e. dolmars or jerry cans) can geyser even after the cap is removed. To mitigate possible fuel geyser and/or potential injury from fuel bottles and cans, use the following procedures:

- Keep containers in the shade and away from any external heat source.
- Never open a fuel tank within 20 feet of any heat source.
- Gently shake the container to release surface tension. Too much agitation will create pressure.
- Open container slowly, pointing opening away and cover the opening with a cloth and glove.

Engine Powered Equipment

- Never use fuel that was stored in a fuel container for longer than one month. Older fuel may lead to poor engine performance and increased operating temperatures. Older fuel may also have higher volatility for the current conditions.
- Always check fuel level in the tank before taking any action. Fuel levels above ½ tank are more likely to geyser.
- Never open a fuel tank within 20 feet of any heat source.
- Only after the above mitigations are completed; put the equipment in a cleared area, cover the cap with a cloth or glove, and open slowly.

For more information or if you experience a fuel geyser, see the Fuel Geyser Awareness section at

https://www.nwcg.gov/committees/equipment-technology-committee

2020 COVID-19 Guidance

LEADERS INTENT:

- Incident responders have a DUTY to safeguard each other and the public we serve from hazards. It is through our RESPECT for
 everyone's health and safety that we follow these mitigations, and we rely on everyone's INTEGRITY to ensure that we do so
 and expect the same of others.
- All incident personnel are expected to conduct self-screening of their health on a daily basis. Individuals experiencing any of the
 symptoms should take precautions to self-isolate and immediately report symptoms to your supervisor and to the IMT's Medical
 Officer or MEDL for assessment.
- All incident personnel will adhere to the Module of One concept to the extent practical.
- All incident personnel and visitors will wear cloth face coverings when six feet of social distancing cannot be maintained with others outside of their Module of One.
- All incident personnel and visitors are required to wear cloth face coverings when attending briefings or meetings in common use areas at ICP and camps.
- All incident personnel and visitors will wear cloth face coverings whenever they enter an enclosed incident facility, such as yurt, tent, building, restroom facility, or other common-use areas regardless of proximity to other people.

ALL RESOURCES (IMT Members, Single Resource, Operational & Support resources):

• Each resource should arrive at the incident "self-sufficient" for 72 hours, including food, water, sanitizer or wipes, batteries, etc.

ICP AND CAMPS

- Access into ICP and some base camp facilities may be restricted to essential personnel only, i.e. module supervisors and trainees.
- To promote isolation and social distancing, operational resources will be assigned to camps and spike camps dispersed on the incident.
- Food will be individually packaged and delivered to drop points for distribution. Special dietary needs should be reported to your line supervisor.
- Daily operational briefings will be conducted via radio or virtually. Only supervisors and trainees should attend in-person briefings.

¹Symptoms of Coronavirus

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
* Take temperature with no-touch thermometer, if available *

Instructions for Screening

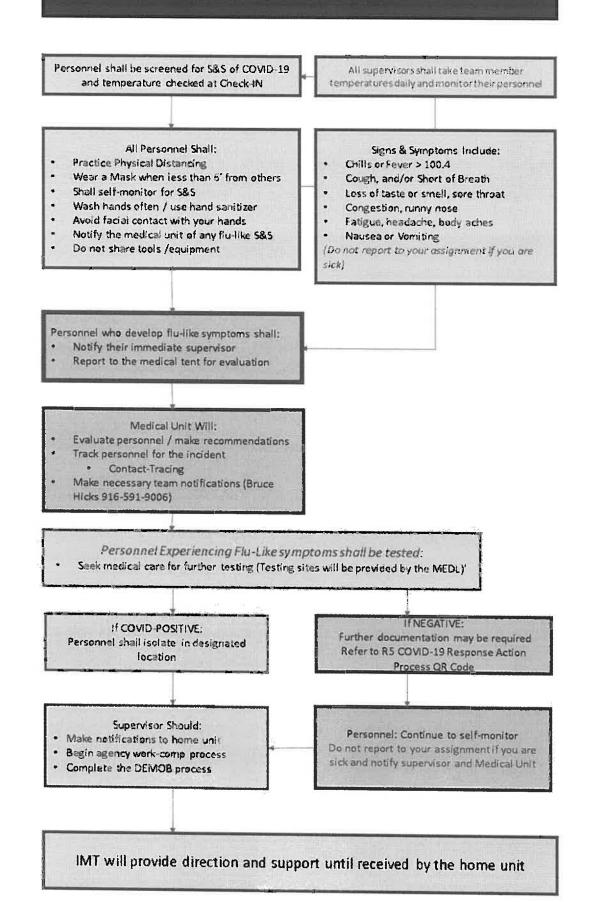

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	DO NOT MOBILIZE
At Entries: Consider adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be	DO NOT ANNOUNCE Ask individual to step aside and follow the steps
medically trained. If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	below.

Steps to fellow
Escort symptomatic individual to isolation area.
Isolation support personnel should begin documentation.
Have symptomatic individual contact Supervisor for further direction.
Notify public health officials.
Have individual transported as appropriate.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

COVID-19 Operational Flow Chart

INCIDENT SAFETY ANALYSIS 215a

August Complex CA-000753 - Monday, September 14, 2020

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
ALL	Helicopter Operations	 Stay clear of all bucket drops when suppression actions are in place and allow 1 minute prior to re-entry. Monitor A-G communications. Follow aviation safety guidelines in IRPG and IHOG.
ALL	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads and city streets.
ALL	Fatigue & Over Exertion	∼ Drink 1 quart of water each hour during and after work. ∼ Rotate crews out of smoky areas. ∼ Set a reasonable work pace and allow adequate rest breaks while on the project. ∼ Stagger work crews start time to limit fatigue. ∼ Use buddy system to monitor personnel of heat related and fatigue issues. ∼ Follow work / rest guidelines.
DIVS O,R,D,F	Firing Operations & Devices	 Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
DIVS O,R,D,F	Indirect Fireline	∼ Post lookouts, identify escape routes and safety zones (IRPG pg. 7). ∼ Review "Strategy/Indirect Attack" (IRPG pg. 83).
ALL	Firefighter & Public Smoke Exposure	 ∼ Identify homes and structures with private parties remaining behind the evacuation. ∼ Identify personnel responsible for contacting private parties. ∼ Use warning lights and provide traffic control on roadways during smoky and night operations. ∼ Rotate crews out of smoky areas during firing and mop-up operations. ∼ Contact Communications when firing operations are initiated.
DIVS O,R,D,F	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.

INCIDENT SAFETY ANALYSIS 215a

ALL	Heat Related Illness (HRI)& Dehydration	 Drink Fluids throughout operational period (6-8 qts/shift). Maintain water/electrolyte ratio of 3 to 1. Carry extra water on line and cache water at drop points. Take Frequent breaks, minimum of 10 minutes every hour. Allow out of area resources time to acclimatize before expecting peak performance. Recognize symptoms of HEAT RELATED ILLNESS which include. Lack of energy Headaches, dizziness Lack of rest No hunger, poor eating habits Hot skin, and lack of sweating
ALL	Steep Terrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts (IRPG pg 7).
ALL	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots.
ALL	Spike Camp	 Keep a clean camp. Ensure communications are in place. Review and observe "Line Spike" considerations (IRPG pg. 95).
DIVS OR,D,F	Structure Protection & HAZMAT	 Review "Wildland Urban Interface" Watch outs, IRPG page 12. Use "Structure Assessment" checklist, IRPG pages 12-16. Follow "HAZMAT Incident Operations" on pages 36-41 in IRPG.
DIVS O,R,D,F	Chain Saw Operations	 Follow "Hazard Tree Safety" guidelines, IRPG page 22 Look up, Look down, Look around for hazard tree indicators. Only fell and buck trees within your expertise, and training. Follow "Procedural Felling Operations" on page 85 in IRPG. Do not fall trees during high wind events. Ensure proper use of all required PPE.
ALL	COVID-19	 Follow local and CDC guidelines. Practice social distancing. Wear face coverings in designated areas and when social distancing is not possible. Wash and Sanitize hands often. Follow module of one concept. Minimize number of indivuals at briefings and meetings. Monitor symptoms of all resourses daily and report concerns to COVID Coordinator.
ALL	Wildlife & Livestock	~ Watch out for wildlife & livestock inside fire area and along roadways. ~ Clean up all debris and trash during each operational period. ~ Rattlesnakes and Scorpions are pleantiful in the fire area, keep your distance from these critters. ~ Wear gloves when moving logs and debris. ~ Look around before you sit or step over logs and rocks. ~ Give wildlife pleanty of room to escape/ retreat to safety.
DIVS O,R,D,F	Night Operations	 Maintain high visibility in work area and wear vest while in roadway. Use glow sticks to mark hazards. Ensure personnel have a personal light (headlamp). Watch for signs of fatigue. Take breaks away from areas of known hazard.

INCIDENT SAFETY ANALYSIS 215a

ALL	Bees, Ticks, Mosquitoes	 Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection. Keep affected area clean and bandaged. Be extra careful when eating and/or drinking to avoid stings to mouth and throat.
