WEATHER

See attached Fire Weather Forecast

GENERAL FIRE BEHAVIOR

Heads up!!! 1 & 10 hr fuels are below the local thresholds for extreme fire potential. 100hr & 1000hr fuels are running at 9%. Until the upper level smoke blanket lifts, fire activity will continue to be limited to short wind/slope runs. The understory fuels will continue to meander and find pockets of heavy fuels in the drainages. Expect all active pockets to on the SW divisions to move back into the black, and areas on the NW divisions to make progress toward Ham Pass with the predicted weather.

Grass – Surface rates of spread 45-60 chains per hour (<1 mph) with flame lengths 3-7 feet

Shrub – Surface rates of spread 30-50 chains per hour with flame lengths 6-15 feet

Timber – Surface rates of spread 6-12 chains per hour with flame lengths 4-9 feet

Maximum spotting distance 0.2 mile – PIG 70-80%

SPECIFIC FIRE BEHAVIOR

Branch 7- Div Y,U,S As spots establish in Cardenas Cr & Red Chert Cr expect short lived uphill runs, especially as the fire edge moves into lighter fuels on the opposing slopes. The rocky terrain is expected to limit the extent of this movement. Pockets of unburnt fuels between Cardenas and Red Chert Creeks will continue throughout the day as the arrival of NW winds aligns with slope.

The remaining pockets of heat near Barnes Ranch will continue to smolder, with minimal visible fire activity as the NW winds push this edge back into the black.

ROS Potential- 50-150 Chains per hour, flame lengths 15-20 feet on SW facing slopes

Branch 40, 41, 43- Interior pockets of smoldering fuels will continue remain dormant until the late afternoon temperatures arrive, and the inversion lifts. Opportunities for spotting beyond the secured perimeter are limited by the depth of mop-up operations.

AIR OPERATIONS

Smoke will continue to be the most limiting factor with clear air unlikely before 13:00. Late day fire activity will contribute the smoke layer, beginning to sink into drainages before sunset cutoff.

SAFETY

Opportunity for short crown fire runs as NW winds increase and align with terrain.

SAFETY MESSAGE

Pacific Northwest Team 2

October 1, 2020

INCIDENT: August Complex- South

OPERATIONAL PERIOD: Day

TOPICS:

Fatigue

Accumulated (Chronic) Fatigue is defined as fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, which results in decreased productivity, compromised immune function, and reduced alertness. Fatigued workers perform poorly, behave carelessly, tolerate greater errors and become inattentive. Chronic fatigue often results in increased stress, which may present itself through certain behavioral and physiological indicators, such as those described below. Firefighters should look for these indicators in each other and take appropriate action to ensure a safe work environment.

Behavioral indicators

- Decreased motivation and low morale
- Increased irritability and depression

Physiological indicators

- Confused, poor problem solving
- Poor abstract thinking
- poor attention/decisions
- poor concentration/memory
- extreme emotional responses
- social/behavioral changes

Recommendations for chronic fatigue/stress are:

- Take longer periods of rest/recovery
- Ensure that workers are adequately rested before they begin work shifts
- Provide periodic rest breaks to allow physical and mental recovery
- Alternate between heavy and light tasks
- Eat well-balanced meals regularly, with energy supplements during periods of high exertion
- Maintain hydration
- Ensure workers maintain good personal hygiene
- Maintain high standards of physical fitness and work capacity
- In extreme cases, personnel may need to be relieved of their duties

When operational assignments and the environment change, remain present in the activities you are engaged in. Set a pace appropriate for the task. Take the necessary "safety -breaks".

Accumulated fatigue is real. Take care of yourself between assignments. Have fun on R&R, but be wise in your decision making. Get the rest and recovery intended.

Human Resource Message

"Always do everything you ask of those you command."

- George Patton

Leading others effectively encourages those we lead to do great things. Let's remember the value of our leadership while we continue to do the important work we are doing here.

Leaders Who Motivate People:

- Know their job.
- Know the jobs of those they supervise.
- Set the direction.
- Give people the chance to succeed or fail.
- Provide support for the doers.
- Seeks to know "what encourages" each doer.
- Work with reality and current conditions.
- Enjoy their work and provide a positive work environment.

"Leaders are made, they are not born. They are made by hard effort, which is the price which all of us must pay to achieve any goal that is worthwhile." -Vince Lombardi-
