Fire Weather Forecast

FORECAST NO: 10
PREDICTION FOR: 24 Hr Shift

INCIDENT: August Complex
UNIT: Mendocino NF
SIGNED: Chuck Redman
 Incident Meteorologist (IMET)

Discussion: *HOT AND DRY CONDITIONS TO CONTINUE THROUGH THE WEEKEND*****

The region will remain between the main jet stream (well to the north) and a weak upper trough across Southern California for one more day. As a result, light winds are expected across the fire area this afternoon. A weak dry cold front drops into the northern portions of the Great Basin Sunday night and into Monday. Slight cooling is possible along with a brief shift of winds from the NE. This may bring battling winds to the east side of the fire where normal down drainage winds typically are from the west. A strong upper ridge re-builds over the region for the first part of the week bringing once again well above normal temperatures.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Mostly sunny.
Max Temperature: 80 to 85 higher elevation, except mid 90s lower valleys.
Min RH: 18 to 28 percent.

-20 ft Level WINDS:

TONIGHT:

WINDS:

-20 ft Level-

GENERAL FUEL ASSUMPTIONS: It has been over 100 days since much of the fire area has received over 0.10" of precipitation and all three groups are extremely dry and are burning readily. 10 Hr fuel moistures in the fire area were again observed at 5-8% on August 29th.

OUTPUTS

FIRE BEHAVIOR

GENERAL

Fuels continue to dry due to lack of precipitation combined with low humidity's (18-28%) yesterday. Smoke over the fire area is impacting fire spread and behavior, but the potential is still there for rapid fire movement and moderate/extreme fire behavior if the airshed clears out. Most of the fire spread is anticipated to be terrain driven except on exposed ridgetops.

Vegetation Type	Fuel Model	Fire Behavior Potential			
		ROS (ch/hr)	FL (ft)	PIG (%)	Spot Dist (mi)
Grass	GR2	45-50	5-6	76	0.25
Grass/Shrub	GS2	30-33	6-7	76	0.25
Shrub	SH7	49-52	15-16	76	0.25
Timber	TL8	7-8	3-4	76	0.25

SPECIFIC:

- >**Branch I:** Anticipate continued Fire spread up the Willow Creek drainage towards the M2 Road closing the gap between the Doe and Glade Fires. Post lookouts and monitor the situation developing on the Elkhorn Fire to the N/NE.
- >**Branch II:** Active upslope fire spread on the Western edge of the Doe Fire. The pocket of unburned fuel in the 311 Road area will continue to fill in as the fire moves upslope along Bear Wallow Ridge.
- >**Branch III:** Anticipate continued terrain influenced fire spread along Brushy Camp Ridge.
- >**Branch IV:** Hull Fire, the NE portion of the fire is beginning to curve to the NW towards Pole Point/Goat Rock. Maintain SA during the firing operations on the Southern portion of the fire.
- >**Branch V:** Hopkins fire, IR indicates significant heat along the Northern half of the fire perimeter. Expect continued fire movement to the north following terrain and fuels. Willow Basin fire, some heat detected on SE corner of the fire. Does not appear to be significant perimeter growth over the last few operational periods. Continue to monitor fire spread.

AIR OPERATIONS:

Smoke will continue to impact air operations.

SAFETY

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18 Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions.

AUGUST COMPLEX HEALTH AND SAFETY MESSAGE

QR code for hazards and risks

INCIDENT: August Complex	DATE: Sunday August 30, 2020
Major Hazards and Risks: Dusty Roads, Night Operations, Burn Operations	
<p>Dusty Roads: Driving to your work assignments may take you on new roads with hazards you have not seen before. Some of the incident roads are narrow with limited visibility and few pull-outs. Increased fire traffic and residents should be expected around homes. Adjust your driving for smoke, dust and night operations. Watch for degraded areas in the road on between drop point 10 & drop point 11.</p> <p>Night Operations: Be sure to get a good briefing before you start your assignment. Identify whom you might get additional information from and can you meet up with the departing overhead/resource leaders? Travel your escape route before the sun sets if possible, stay alert by staying engaged with your assignment.</p> <p>Burn Out Operations: All burning operations must be approved through operations, fire should be applied slowly and strategically in order to the maximize benefits of the indirect firefighting approach. After the operation is complete, be sure to monitor the area, looking for areas that are still holding heat and could threaten to jump over the containment line.</p>	

Safety Zones

In an area where a firefighter can survive without a fire shelter? IRPG p.8

- Take advantage of hear barriers such as lee side of ridges, rocks, or solid structures.
- When possible, burn out safety zones prior to arrival of the fire front.
- Avoid locations that are upslope or downwind from the fire, chimneys, saddles, or narrow canyons, and steep uphill escape routes.
- Not intended for structure protection.

Incident Safety Officers: Paul Churchill, Pat Sheridan, Brian Beisel

HUMAN RESOURCES MESSAGE

August 30, 2020.

There is a new Human Resource Specialist in Camp...

My name is Tony Torres and I am happy to assist all with you HR Questions...

I will start off the week with...

C o m m u n i c a t i o n

Communication is a two way street. When communication becomes a one way, it becomes a traffic jam and turns into an issue.

Some examples are:

- ❖ **Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.**
- ❖ **A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.**
- ❖ **It can be like the telephone game. It starts with specific information and by the time it gets to the end it very different than what was first communicated.**

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two way street!

“The single biggest problem in communication is the illusion that it has taken place”by George Bernard Shaw
