Discussion:

In wake of a weak cold front that approached the region early this morning, an upper ridge is expected to push from the Gulf of Alaska into Northern California Tuesday. This continues the slightly above normal temperatures along with dry conditions to the fire region. Besides the warm/dry conditions, light wind is expected trough a great depth of the atmosphere bringing terrain driven winds to the lower drainages. Ridgeline winds are expected to remain from the southwest by each afternoon.

WEATHER FORECAST FOR TODAY:

SKY/WEATHER: Mostly sunny.
Max Temperature: 78 to 83 higher elevation, except mid 90s lower valleys.
Min RH: 15 to 24 percent.

-20 ft Level WINDS:

Lower Valleys/Lower Slopes Variable and erratic in the morning to 10 mph on the far east side of the forest. Otherwise down drainage. Wind becoming up drainage by early afternoon.

Upper Ridges: East 10 mph with gusts to 15 mph in the morning becoming Southwest around 10 mph by early afternoon.

TRANSPORT WINDS: West to Southwest to 10 mph. **MIXING HEIGHT:** 9 KFT AGL

TONIGHT:

SKY/WEATHER: Clear.

GENERAL FUEL ASSUMPTIONS: It has been over 100 days since much of the fire area has received over 0.10" of precipitation and all three groups are extremely dry and are burning readily. 10 Hr fuel moistures in the fire area were again observed at 5-8% on August 30th.

OUTPUTS

FIRE BEHAVIOR

GENERAL

Fuels continue to dry due to lack of precipitation combined with low humidity's (18-28%) yesterday. Smoke over the fire area is impacting fire spread and behavior, but the potential is still there for rapid fire movement and moderate/extreme fire behavior if the airshed clears out. Most of the fire spread is anticipated to be terrain driven except on exposed ridgetops.

Vegetation Type	Fuel Model	Fire Behavior Potential			
		ROS (ch\hr)	FL (ft)	PIG (%)	Spot Dist (mi)
Grass	GR2	45-50	5-6	76	0.25
Grass/Shrub	GS2	30-33	6-7	76	0.25
Shrub	SH7	49-52	15-16	76	0.25
Timber	TL8	7-8	3-4	76	0.25

SPECIFIC:

>**Branch I:** Anticipate continued Fire spread up the Willow Creek drainage towards the M2 Road closing the gap between the Doe and Glade Fires. Post lookouts and monitor the situation developing on the Elkhorn Fire to the N/NE. Movement on the spot fire on Boswell Ridge is expected to spread up the ridgeline with backing and flanking down the ridge edges.

>**Branch II:** Active upslope fire spread on the Western edge of the Doe Fire. The pocket of unburned fuel in the 311 Road area will continue to fill in as the fire moves upslope along Bear Wallow Ridge.

>**Branch III:** Anticipate continued terrain influenced fire spread along Brushy Camp Ridge.

>**Branch IV:** Hull Fire, the NE portion of the fire continues to curve to the NW towards Pole Point/Goat Rock. Once this gets fully aligned with the terrain monitor for movement to the NW. Maintain SA during the firing operations on the Southern portion of the fire.

>**Branch V:** Hopkins fire, IR indicates significant heat along the Northern half of the fire perimeter. Expect continued fire movement to the north following terrain and fuels. Willow Basin fire, some heat detected on SE corner of the fire. Does not appear to be significant perimeter growth over the last few operational periods. Continue to monitor fire spread.

AIR OPERATIONS:

Smoke will continue to impact air operations.

SAFETY

When working with unburned fuel between you and the fire know your escape routes and safety zones. Post lookouts.

AUGUST COMPLEX

HEALTH AND SAFETY MESSAGE

We can't improve a situation if we don't communicate with each other.

QR code for hazards and risks

INCIDENT: August Complex	DATE: August 31, 2020
Major Hazards and Risks: Communications, Heavy Equipment, Smoke Exposure	
<p>Communications: You cannot over-communicate. When you know/learn something the question you should ask yourself is..."Who else needs to know this?" Just like was the IC has said, "<i>We can't fix something if we don't know about it.</i>" Have you received a daily briefing and had time to ask questions? We don't want anyone to start their day without understanding the plan for the operation period.</p> <p>Heavy Equipment: There is a lot of heavy equipment on the roads, on-line, and support for our operations. Water tenders, graders, engines, dozers, masticators, and ambulances are all over this incident. They cannot stop as quickly as you can so give them adequate space, don't brake hard when they are behind your vehicle, and be sure they can see you when working in close proximity of any heavy equipment.</p> <p>Smoke Exposure: Smoke is part of the wildland fire environment. Firefighters and incident overhead should be on the lookout for opportunities to reduce exposure. There has already been one individual that was over exposed to smoke on this incident. "<i>As CO exposure increases, your ability to think clearly decreases. Being in smoke you don't need to be in is the epitome of not working smarter. In fact, it is actually working dumber.</i>"</p>

Smoke Exposure = Concentration x Time x Volume

Protect your lungs!

If you can safely do so, step away from highest **concentration**.

When you are able, spend **break or rest time** in cleaner air.

Breathing deeply brings 10 times as much air into your lungs.

Remember to **take a breather** from strenuous activity if you start feeling the effects of smoke.
